JEHOASH HIRSHBERG

Wernik, Kazimierz (*b* Warsaw, 1828; *d* St Petersburg, 4 May 1859). Polish pianist and composer. He studied the piano with Józef Nowakowski in Warsaw, and from 1842 with Chopin in Paris; he also studied composition with H. Reber. After a few years he returned to Poland, but in 1849 moved to St Petersburg, where he spent the rest of his life. He played at concerts in Warsaw (1845, 1849), Vilnius (1852) and St Petersburg (from 1849), and was regarded by his contemporaries as a pianist of considerable ability, though given to sentimentality. He wrote many piano works, including a Piano Concerto (Warsaw, 1853), a Mazurka (Warsaw, 1858), two Polonaises (St Petersburg, 1858), a Morceau caractéristique, nocturnes and further mazurkas and polonaises. These works show a marked influence of Chopin, particularly the polonaises. His piano writing is characterized by rich textures which demand considerable technical accomplishment. Some of his works were left in manuscript, and are presumed lost.

ZOFIA CHECHLIŃSKA

Werrecore [Vercore, Verecore, Verrecore], **Matthias** [Mathias] **Hermann** [Mathias Fiamengo] (*b* ?Vercore or Warcoing, Hainaut; *d* after 1574). ?Flemish composer. Although the various forms of his name suggest that he was Flemish, the records of Milan Cathedral state that he was the son of 'Eligio' who lived in Milan. On 3 July 1522 he succeeded Gaffurius as *maestro di cappella* of Milan Cathedral. On 9 February 1525 he was accused of a misdemeanour, of which no details are known; there is some evidence that he did not always perform his duties satisfactorily. In 1534 he reorganized the *cappella* and on 31 December of that year he presented himself to the cathedral prefects, demanding the credits due to him from loans made to the cathedral *fabrica*, including 'una cum interesse'. On 6 July 1542 he received an increase in salary as reward for his good services. Towards the middle of 1550 he was succeeded, temporarily, by Oliviero di Phalansis, and, in 1557 or 1558, by Simon Boyleau. Werrecore is last mentioned in documents of 9 December 1574 concerning benefices awarded by the chapter. The theory proposed by Kade and Fétis that Werrecore and Matthaeus Le Maistre were the same composer has been disproved by Haberl and others.

Werrecore's most famous work was the four-voice *Bataglia taliana*, celebrating the defeat of France at the Battle of Pavia (1525) which ensured Milan's independence. It was first published in Nuremberg with the German title *Die Schlacht vor Pavia* and the note: 'Matthias Herman Verecorensis, who was himself in the line of battle and witnessed the worst miseries, composed this on the way'.

PIER PAOLO SCATTOLIN

Wert [Vuert], **Giaches** [Jaches] **de** (*b* Flanders, perhaps Ghent, 1535; *d* Mantua, 6 May 1596). Flemish composer active in Italy.

1. LIFE. Wert's early years remain clouded in obscurity. According to a reliable contemporary description he was taken to Italy as a boy to be a singer in the household of Maria di Cardona, Marchesa of Padulla, who mostly lived at Avellino near Naples. The simple, formulaic accompanimental style found in some of his early madrigals, and especially in his Petrarch settings, have been associated with these formative years near Naples, where simple accompaniments were used for elevated vernacular poetry. Although it has been suggested that Wert spent some time in a similar capacity in Rome, under the protection of Giulio Cesare Gonzaga, Patriarch of Alessandria, the evidence is unstable. More secure is the idea that he moved to Novellara, capital of a small county governed by a cadet branch of the Gonzaga family, in about 1550. During the early 1550s he is recorded in both Mantua and Ferrara (where he got to know Rore) before returning to Novellara and the service of Count Alfonso Gonzaga in 1556. Between then and the early 1560s he remained in Novellara; it was there that he married and a number of his children were born (he was to have at least six). It was probably through his connections with the Gonzaga of Novellara that Wert next moved to Milan, where he worked at the governor's court as *maestro di cappella* until 1565. His letters from Milan present a lively and engaging picture of daily life among the officers of the Spanish garrison.

In the same year, Wert left Milan for Mantua, where he was appointed as *maestro di cappella* at the recently completed ducal chapel of S Barbara. His appointment evidently aroused considerable opposition from other members of the choir, in particular from AGOSTINO BONVICINO, a minor composer who engineered various attempts to undermine Wert's authority. In 1570 matters came to a head with the disclosure of Bonvicino's adultery with Wert's wife Lucrezia, a member of a minor branch of the Gonzaga, as a result of which she was compelled

to return to Novellara. Despite the hostile atmosphere which bedevilled Wert's early years at S Barbara, he resisted offers of work elsewhere. One came in the spring of 1566, when he accompanied Guglielmo Gonzaga, Duke of Mantua, to the Imperial Diet in Augsburg. According to Francesco Sale, a member of the Cardinal of Augsburg's *cappella*, Wert's distinguished improvisation at the keyboard resulted in a proposal of work at the Imperial court in Prague. There were also important contacts with the Farnese court in nearby Parma, and Wert implied in a letter of 1567 that he was offered the chance of employment there. In these years he continued to maintain relations with the Gonzaga of Novellara, as he was to do throughout the rest of his career. In January 1568, for example, he was in Novellara to prepare the music and rehearse singers and instrumentalists for an *intermedio* to accompany a comedy written for the marriage of Alfonso Gonzaga to Vittoria di Capua; among the other artists involved were the Mantuan choreographer Leone de' Sommi with whom he was to work again, notably in preparations for an aborted performance of Guarini's *Il pastor fido*, at Mantua, in 1591–2 (see below).

Although there is little documentation of Wert's activities and movements during the 1570s, what survives gives a clear impression of his increasingly important contacts with the Este court at Ferrara. While the Mantuan court might be characterized as somewhat Counter-Reformation in spirit (Duke Guglielmo Gonzaga was both austere and devout), Ferrara under Duke Alfonso II d'Este was the opposite. Wert's artistically productive and evidently close contacts with Tasso and Guarini date from this period; for example, *Il sesto libro de madrigali*, of 1577, contains a setting of Tasso's *Tolse Barbara gentil* which must have been composed shortly after the verse had been written and before it was published. After the marriage of Duke Guglielmo's daughter, Margherita Gonzaga, to Duke Alfonso in 1579, the ties between the Mantuan and Ferrarese courts were strengthened even further. Wert's connection to both was intensified as well, partly as a result of the extensive litigation over Lucrezia Wert's property, confiscated following the discovery of her part in a plot to overthrow the Gonzaga of Novellara; Lucrezia went to prison, where she died in 1584. In this unfortunate affair, in which Wert found himself opposed to the Counts of Novellara, he was supported by both Guglielmo Gonzaga and his son Prince Vincenzo, as well as by Duke Alfonso, who had jurisdiction over the case. It was not until 1588 that the matter was finally resolved, with Wert being awarded one third of his wife's possessions together with the right to bequeath them to his children. A second reason for Wert's increasingly frequent visits to Ferrara in these years was his attachment to Tarquinia Molza, a niece of the poet Francesco Maria Molza and an accomplished musician and member of the second *concerto delle dame*. Her affair with Wert began in 1584, and was finally exposed in October 1589 following enquiries ordered by Duke Alfonso. The main issue was to do with class: in such a highly stratified society, it was considered inappropriate for a member of the minor aristocracy, engaged at court as lady-in-waiting to the Duchess of Ferrara, to form a relationship with a servant. Tarquinia was banished from court and returned to Modena. In addition to these personal reasons for visiting Ferrara, Wert was also professionally attracted by the cultural and musical climate of the Este court, and particularly by the virtuoso musical skills of the *concerto delle dame*. This debt is clearly acknowledged in in the dedication of *L'ottavo libro de madrigali*, dedicated to Duke Alfonso; many of the madrigals in this book were composed for the *concerto*. Wert also contributed to *Il Lauro secco* (1582[5]) and *Il Lauro verde* (1583[10]), collections of madrigals, mostly by Ferrarese composers, assembled in honour of Laura Peverara, another member of the ensemble. During the 1580s Wert's health began to fail. In 1582, when he fell ill with malaria, Gastoldi was called upon to deputise as *maestro di cappella*, and the same arrangement was made again in 1585. Finally, in 1592, Gastoldi officially succeeded Wert at S Barbara.

Vincenzo Gonzaga's succession to the Duchy of Mantua in 1587 brought about important changes in the cultural life of the court, which now entered its most brilliant period since the days of Duke Federico I. The *cappella* at S Barbara was expanded, and the new duke instituted an ensemble of virtuoso singers in imitation of the Ferrarese *concerto delle dame*. The Vincenzo's fondness for the theatre is reflected in the attempts to produce Guarini's controversial pastoral *Il pastor fido* at court during the 1590s; together with Francesco Rovigo, Wert provided the music for a projected performance in 1592. In the end this had to be abandoned, partly because of the difficulty of bringing off the 'Gioco della cieca', a sung and danced *ballo* (Act 3, scene ii), and it was not until 1598 that the play was successfully staged in Mantua with music by Gastoldi. Wert's collaboration with Leone de' Sommi over the performance of Muzio Manfredi's *Le nozze de Semiramide con Memnone* was less troublesome, and Manfredi's published letters suggest that the piece itself was more traditional. This must have been one of Wert's last major involvements in the artistic life of the Mantuan court. The dedication of his *L'undecimo libro* is dated 18 August 1595; he died in the following spring in his house in Mantua in the Contrada dell'Aquila, close to both the ducal palace and the Mantua residence of the Gonzaga of Novellara, who between them had employed him for most of his career. He was buried in the crypt of S Barbara close to the tomb of another court musician, Francesco Rovigo. A posthumous book of madrigals was put together by his son Ottavio.

2. Works. Although some of Wert's church music was published during his lifetime, much of it, being specially composed for the exclusive use of S Barbara, was not; to his contemporaries he was primarily known as a composer of madrigals and occasional pieces. Nevertheless, he wrote polyphony for S Barbara throughout his career, and a substantial corpus survives among the manuscripts from the basilica. Of his seven masses, only one, the *Missa Dominicalis*, was published during his lifetime. This appeared in a collection of six *alternatim* settings all based on the chant *Kyrie orbis factor*, and all by composers connected in some way or other with S Barbara and Mantua. Between them, these seven masses cover all the liturgical festal categories for which polyphonic masses are specified in the S Barbara *Ceremoniale* drawn up in 1583.

Of the various collections of hymns that were specially commissioned for S Barbara, Wert's magisterial cycle is the largest and most important. It consists of 127 pieces, none of which was published during the 16th century. In style, Wert's hymns resemble his other *alternatim* settings

for the basilica; their extreme simplicity, evidently designed to allow the texts to be clearly heard, is reminiscent, in their combination of careful declamation, attention to text and restrained counterpoint, of the hymns and the *Preces speciales* of Jacobus de Kerle. Many of Wert's hymns were intended for performance on the feast days of saints who were prominent in the liturgy at S Barbara, and whose relics lay inside the Basilica (including St John the Baptist, St Sylvester, St Adrian and, of course, St Barbara herself); Marian feasts and the Finding and Exultation of the True Cross also receive special emphasis in Wert's hymn cycle.

Wert's motet settings, the most important and in some cases most widely circulated of his sacred music, were also the only part of this corpus to be printed in quantity in his lifetime. The *Motectorum liber primus* of 1566 contains 19 pieces, many of them settings of texts from the Roman liturgy. As with the *Secondo libro de motetti* (1581) and his third and final motet collection, the *Modulationum cum sex vocibus liber primus* of the same year, the majority of these are from Epistles, Gospels or Lectiones for major feasts. Taken in the main from New Testament sources, these extracts were traditionally read or intoned by the celebrant rather than sung in polyphony, as were devotional or psalm texts. This peculiarity may well be explained by the particular conventions of liturgical performance in S Barbara, where it is known that extra polyphonic items were often sung as substitutes for antiphons or other chants on major feast days. The motets apart, most of Wert's music for the basilica remained in manuscript as a private and reserved repertory specifically composed for a single privileged and élite institution. Partly proclaimed through the deployment of special texts (at least two of the hymns were written by Marc' Antoine Muret) and cantus firmi derived from the S Barbara liturgy, its distinctiveness was additionally underscored by being set in *alternatim* fashion.

Although Wert's task as *maestro di cappella* at S Barbara must have occupied a good deal of his time, he was largely known to the outside world as a composer of madrigals. The dedications of his published books shadow his biography: the early ones were addressed to Count Alfonso Gonzaga, Duke Ottavio Farnese, Consalvo Fernandes di Cordova (Governor of Milan), the Marchese di Pescara and Duke Guglielmo Gonzaga. *Il quinto libro* of 1571 is the only collection to be dedicated to a collective patron, in this case the members of the Accademia Filarmonica of Verona; and from the sixth book on, the dedicatees are mostly members of the Gonzaga family. Two books are addressed to Vincenzo Gonzaga, one to Vincenzo's wife Margherita Farnese, one to his mistress Agnese Argotta (who was much involved in the attempts to stage *Il pastor fido* in 1591–2), and one to his second wife Leonora de' Medici. Indeed the idea that Wert, as the Gonzaga composer *par excellence*, had embarked on a plan to dedicate each of his madrigal books to a different member of the family, is explicitly stated in the dedicatory letter to *L'undecimo libro*. The only real exception to the pattern is *L'ottavo libro*, dedicated to Duke Alfonso II d'Este and filled with madrigals written for the celebrated Ferrarese *concerto delle dame*.

Wert's madrigals follow a discernible pattern of stylistic change, mirroring both the resources available and the differing tastes of his patrons, as well as his exposure to other musical influences. In their use of chromaticism, representational melodic figures and dark colouring the early books are strongly indebted to Rore, whom Wert knew personally. From *Il quarto libro* onwards these characteristics undergo a process of refinement, and are now combined with an increased use of pure homophony and an interest in textural contrast. *Il sesto libro* contains two long canzoni written in the declamatory style that writers since Einstein have identified as one of Wert's most important and original contributions to madrigalian language. The texts which Wert set in these books are characteristic of mid-century taste; Petrarch's verse is prominent, there is some Bembo as might be expected and, less predictably, a good deal of Tansillo.

The real change comes with *Il settimo libro*, a book which marks his increased involvement in the life of the Ferrarese court, and his new enthusiasm for epic verse and in particular for the works of Tasso and Guarini. This, and the two books that follow it, are filled with pieces in a more dramatic style, forged out of the language of strong contrast and theatrical melodic gesture. The pieces of the eighth book show the virtuoso upper lines and separation of upper and lower voices into separate blocks that would become the hallmark of madrigals written for the *concerto delle dame*, much copied by other composers working in the Mantuan–Ferrarese orbit during the 1580s and 90s, including Benedetto Pallavicino and Claudio Monteverdi. Wert's book of five-voice *villanelle*, his only collection of pieces in a lighter vein, is much less distinctive in style, being virtually indistinguishable from Marenzio's in the same genre. *L'undecimo libro*, the last of Wert's collections to appear during his own lifetime, contains a number of settings of passages from *Il pastor fido*; they obviously reflect the intense interest in this play at the Mantuan court in about 1591, but the temptation to identify the book's eleven settings with music written for the Mantuan production must be resisted. Mannered, aristocratic and elegant, the poetry of *Il pastor fido* came to rival that of Tasso's *Gerusalemme liberata* as a source of madrigal texts. In this, as in so many other ways, Wert's madrigals are innovatory and prophetic, introducing elements of style and gesture that historians usually associate with later composers, and above all with Monteverdi who spent his earliest years at Mantua during Wert's final ones.

WORKS

For works mentioned in Wert's letters which cannot be identified see Fenlon, *Letters and Documents* (1999).

all printed works except anthologies published in Venice

IAIN FENLON

Wertheim, Rosy [Rosalie] (**Marie**) (*b* Amsterdam, 19 Feb 1888; *d* Laren, 27 May 1949). Dutch composer. After gaining a piano teaching certificate in 1912 from the Koninklijke Nederlandse Toonkunstenaars Vereniging, she studied composition with Bernard Zweers and Sem Dresden. She also taught the piano and solfège at the Amsterdam Muzieklyceum. Deeply concerned about the social circumstances of the working classes, she gave piano lessons to poor children, conducted a children's chorus in a working-class neighbourhood and financially supported a number of families. She also conducted the Jewish women's chorus of the Religieus Socialistisch Verbond in Amsterdam. During World War I her song *Neutraal* was popular. She began her career writing mainly songs and choral works and after encountering the works of Debussy, Ravel and Stravinsky her music became increasingly Impressionistic. In 1929 she moved to Paris, where she studied with Louis Aubert. Until 1935 her home in Paris was a meeting-place for many composers, including Elsa Barraine, Arthur Honegger, Jacques Ibert, André Jolivet and Messiaen. After spending a year in Vienna, where she studied counterpoint with Karl Weigl, she went to the USA, where some of her works were performed by the Composers' Forum Laboratory in New York. In 1937 she returned to Amsterdam but was forced to go into hiding during World War II because of her Jewish origins. Much of her chamber music is cheerful and neo-classical, and can be playful, as in 'Cortège de marionettes' from the *Trois morceaux*.

Wesch, Anthonius. *See* MUSA, ANTHONIUS.

Wesendonck [Wesendonk; née Luckemeyer], **Mathilde** [Agnes] (*b* Elberfeld, 23 Dec 1828; *d* Traunblick, nr Altmünster, 31 Aug 1902). German poet. Mathilde and Otto Wesendonck (a wealthy silk merchant) married in 1848 and settled in Zürich in 1851, where they became acquainted with Wagner the following year. The Wesendoncks placed at Wagner's disposal the little house he named the Asyl, adjoining their villa in the Zürich suburb of Enge; Otto proved to be one of Wagner's most generous patrons. Mathilde enjoyed an intimate relationship with Wagner, which was probably not consummated, but which in part inspired – and was dramatized in – *Tristan und Isolde*. She was also the author and dedicatee of the *Wesendonck Lieder*. The relationship ended in 1858 with Wagner's enforced removal from the Asyl. Mathilde's subsequent prose and poetic works include the five-act drama *Gudrun* (1868), the five-act tragedy *Edith oder die Schlacht bei Hastings* (1872) and the dramatic poem *Odysseus* (1878). The Wesendoncks spelt their name thus; it was not until after 1900 that their son reverted to what was probably the original spelling of the Dutch-derived name, Wesendonk.

BARRY MILLINGTON

Wesley. English family. The relationship of the musical Wesleys to the great 18th-century religious leaders of the same name is most easily shown by a family tree (fig.1). Despite the statements of many writers, there is no evidence to connect this family with that of GARRET WESLEY MORNINGTON.

(1) **John Wesley** (*b* Epworth, Lincs., 17 June 1703; *d* London, 2 March 1791). Clergyman, the founder of Methodism; his views on music were of great importance in English and American musical history.

He was the 15th child of Samuel Wesley (1662–1735), an Anglican clergyman of nonconformist forebears, and Susanna née Annesley (1669–1742), a woman of remarkable learning, was educated at home by his mother and then at Charterhouse and Oxford, and was ordained a

1. Wesley family tree

clergyman of the Church of England. The Methodist movement began in the religious group he founded at Oxford in 1729. During his missionary voyage to Georgia in 1735–8 and subsequently in London he was much influenced by the Moravians, and his first *Collection of Psalms and Hymns* (Charlestown, 1737) contained five translations of German hymns. In 1739 he secured the Foundery at Moorfields which was to remain the headquarters of the London society, and in 1742 he issued the *Foundery Tune Book* which contained the first collection of Methodist church music. Later he produced *Select Hymns with Tunes Annext* (1761), the tunes of which were issued separately as *Sacred Melody* (1765); *Sacred Harmony*followed in 1781 (revised *c*1790), to go with his *Collection of Hymns for the Use of the People Called Methodists* (1780, ed. Hildebrandt and Beckerledge). Much of Wesley's life was spent in incessant travelling, to preach in churches, in meeting-houses and in the open air, and to supervise and inspire the growing numbers of his followers. In face of rising opposition from the Church, he nonetheless maintained his Anglicanism to the last: from many points of view he was a high churchman. His ideas were influential not only on the Wesleyan Methodists, but on the other dissenting bodies and on the Church of England as well. Indeed he was as much the originator of the Evangelical party in the Church of England as of the sect that bears his name. But he eventually parted ways with the majority of them on a theological issue: he was Arminian, they were Calvinist.

Wesley's opinions about music are to be found scattered in his *Journal*, essays, letters and prefaces; in the minutes of the Methodist conferences; and in the selections of tunes which he compiled or approved for Methodist use. He believed in the great power of music over men's hearts and wanted to harness this power for good. Though he himself could on occasion be profoundly moved by purely instrumental music, his Arminian theology led him to take the view that church music must be joined to words, and those words must come from the hearts of the worshippers. He had no puritanical dislike of elaborate music, or of organs: indeed his personal 'conversion' on 24 May 1738 came to him while listening to an anthem at St Paul's Cathedral. But he could not tolerate voluntaries. If a choir sang, they must sing words with a clear meaning and appeal, and so that all could hear them. If the congregation sang, they must sing heartily, standing up, not too slowly, and without vain repetition. At the Bristol Conference of 1768 he attacked 'complex tunes which it is impossible to sing with devotion', long hallelujahs, and 'the repeating the same word so often (but especially while another repeats different words – the horrid abuse which runs through the modern church-music) as it shocks common sense, so it necessarily brings in dead formality and has no more of religion in it than a Lancashire hornpipe'. The type of tune described has often been called 'Methodist', but actually the 'repeating' and 'fuging' tunes were developed in the Anglican parish churches at about the time Wesley began his movement.

The novelty in the Wesleyan tunes was their secularity. Wesley saw no objection to adapting popular or operatic songs to religious words ('plunder the carnal lover', as his brother put it), and the new tunes in the Methodist collections were uninhibited in their adoption of the fashionable *galant* style of the day. It was this that shocked the more conservative element in the Church. But it was hugely effective with the people at large, showing them that religion need not be formal, dreary and old-fashioned. By 1757 Wesley was able to boast of the great superiority of Methodist singing:

> Their solemn addresses to God are not interrupted either by the formal drawl of a parish clerk, the screaming of boys who bawl out what they neither feel nor understand, or the unseasonable and unmeaning impertinence of a voluntary on the organ. When it is seasonable to sing praise to God, they do it with the spirit and the understanding also ... all standing before God, and praising him lustily, and with a good courage.

Until the Church put its house in order, the music of the Methodists was a powerful draw. Dr Vincent in 1787 considered that 'for one who has been drawn away from the Established Church by preaching, ten have been induced by music'. In the USA the Methodists' tunes contained the seeds of the popular religious music so important in the 19th-century evangelical movements.

EDITIONS WITH MUSIC

A Collection of Tunes, Set to Music as they are Commonly Sung at the Foundery (London, 1742)

Select Hymns with Tunes Annext (London, 1761); 2nd edn, with tune suppl. separately titled *Sacred Melody* (1765)

Sacred Harmony, or A Choice Collection of Psalms and Hymns (London, 1781/*R*)

WRITINGS

The Power of Music (1779); repr. in *The Methodist Hymn Book* (1933)

Preface to *Sacred Harmony* (London, 1780)

(2) Charles Wesley (i) (*b* Epworth, Lincs., 18 Dec 1707; *d* London, 29 March 1788). Clergyman and hymn writer, 18th child and youngest son of Samuel and Susanna Wesley. He was educated at Westminster and Oxford and ordained an Anglican clergyman. In 1749 he settled in Bristol, then moved to St Marylebone, London, in 1771. Although remaining more consistently Anglican, he supported and followed his brother John Wesley in all his work. His particular contribution to Methodism was in the writing of hymns. He is said to have written over 8000, and they include some of the greatest in the English language; hundreds are still in use today. They were innovative in their use of the first person, expression of intense personal feeling, and vivid depiction of the suffering of Christ.

As his hymns show, Wesley was profoundly affected by music. His son Samuel recalled that he was 'fond of the Old Masters Palestrina, Corelli, Geminiani, Handel, and among the English chamber composers Croft, Blow, Boyce, Greene'. As an itinerant preacher he made constant use of singing in varying circumstances: Carlton Young has assembled more than 100 references to singing in Wesley's journal (1736–56). He adapted many songs of art and folk music to sacred words, and some of his best-known hymns are pointed religious parodies of secular poems intended for use with their tunes, such as *He comes, he comes, the judge severe* (after Henry Carey's 'He comes, he comes, the hero comes') and *Love divine, all loves excelling* (after Purcell's 'Fairest isle, all isles excelling').

Late in life he encouraged the talents of his two musically gifted sons, (3) Charles and (4) Samuel, despite his brother's disapproval, and placed them under the influence of leading musicians of the day. Between 1779 and 1787 he gave a series of private concerts at his house in Marylebone, entirely secular in content. Their programmes were not unlike those of the Ancient Concerts, with the addition of compositions by the two boys.

(3) Charles Wesley (ii) (*b* Bristol, 11 Dec 1757; *d* London, 23 May 1834). Composer, elder son of (2) Charles Wesley (i). He inherited musical ability from both parents. In infancy he displayed a talent almost without parallel: before he was three years old he could 'play a tune on the harpsichord readily and in just time' and 'always put a true bass to it'. His later development hardly fulfilled this promise. During his childhood and adolescence his father discouraged him from becoming a professional musician, and would not let him take up an appointment as chorister or (later) organist at the Chapel Royal. But under Joseph Kelway he became an excellent organist, and held appointments at several dissenting chapels, the Lock Hospital Chapel (1797–1801) and finally St Marylebone parish church. He learnt composition chiefly from William Boyce, to whom he dedicated his set of string quartets. His brother Samuel called him an 'obstinate Handelian' and indeed his compositions, especially those for organ and piano, are extremely conservative in style. In 1822 he published a revised edition of John Wesley's *Sacred Harmony*.

WORKS

all printed works published in London

INSTRUMENTAL

6 string quartets (*c*1776); nos.1, 2, 5, ed. G. Finzi (London, 1953)
6 concertos, org/hpd, orch, op.2 (*c*1781)
Concerto grosso in 7 parts (*c*1782)
Variations on God Save the King, pf (*c*1799)
6 voluntaries, org (1812)
Sonata, c, pf (*c*1820)

VOCAL

Sacred: 6 Hymns (*c*1795); 15 anthems, 1783–1803, *GB-Lcm*
Secular: 8 Songs, op.3 (1784); Caractacus (cant., W. Mason), 1791, *Cfm*; other songs, duets, glees, *c*1780–1805, *Lcm*

(4) Samuel Wesley (*b* Bristol, 24 Feb 1766; *d* London, 11 Oct 1837). Composer and organist, younger son of (2) Charles Wesley (i). Like his elder brother he was a child prodigy. According to his father's account, he was able to play his first tune before he was three, at four had taught himself to read from a copy of Handel's *Samson*, and at five 'had all the recitatives, and choruses of *Samson* and the *Messiah*: both words and notes by heart'. He had his first organ lessons at the age of six from David Williams, a Bristol organist, and at seven was able to play a psalm tune during the service at St James's Church. He also became proficient on the violin. His fame rapidly spread, and in 1774 William Boyce came to visit the family, saying to Wesley's father, 'Sir, I hear you have got an

English Mozart in your house'. Shortly afterwards Wesley presented Boyce with the score of his oratorio *Ruth*, which he had composed two years earlier, but had only recently learnt to write down.

In 1771 Wesley's father acquired the lease of a large house in Chesterfield Street (now Wesley Street), Marylebone. For a while, the family divided their time between London and Bristol, but in 1776 they moved permanently to London. By this time Charles Wesley had become reconciled to the idea of his sons becoming musicians, despite his own misgivings about the suitability of music as a profession and the disapproval and open criticism of his brother John and many of his Methodist friends. In 1779 the two brothers began to give subscription concerts at the family home, where there was a large room with two organs and a harpsichord. The concerts included instrumental and vocal solos, duets, and orchestral pieces played by a small professional ensemble; they attracted fashionable audiences numbering sometimes over 50, and continued for nine seasons, the last being in 1787. Both 'ancient' music (by Handel, Corelli etc.) and modern works were performed, including compositions and improvisations by both brothers. Among the works written by Wesley for the concerts were symphonies, violin concertos, a Sinfonia obbligato for violin, organ, cello and orchestra, and an organ concerto.

The concerts provided invaluable opportunities for Wesley and his brother to perform a wide range of music and to hear their own compositions. At the same time they were protected from full exposure to London's public music-making; the concerts thus substantially fulfilled their father's aim to provide for his two sons 'a safe and honourable opportunity of availing themselves of their musical abilities', while at the same time keeping them 'out of harm's way: the way ... of bad musicians who by a free communication with them might corrupt both their taste and their morals'.

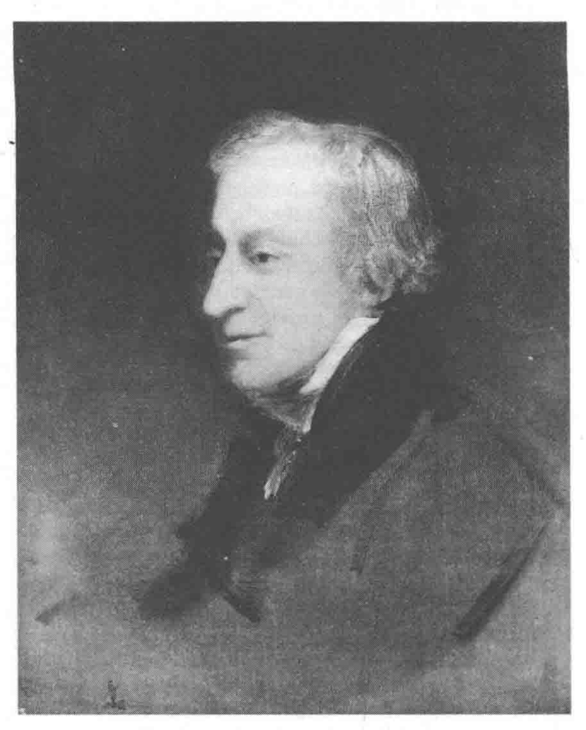
Around 1778, when he was 12, Wesley began to attend services at one or more of the Roman Catholic embassy chapels. It was initially the music rather than the doctrines of Roman Catholicism which attracted him, for it was at the embassy chapels that the most elaborate church music in London was to be heard, performed in surroundings of considerable splendour. At the Portuguese and Sardinian embassy chapels Wesley would have been made welcome by Samuel Webbe (i), who was organist of both chapels and the teacher of a whole generation of Catholic church musicians. The services provided further opportunities for Wesley to compose. His first dated piece of Latin church music was written in November 1780, and many further works for the Roman rite followed in the next four years or so. In 1784, much to the distress of his family, Wesley converted to Roman Catholicism, marking the event by composing an ambitious setting of the Mass which he dedicated to and sent off to Pope Pius VI. The *Missa de Spiritu Sancto*, for six soloists, chorus and orchestra and lasting some 90 minutes, is Wesley's longest choral composition. It appears not to have been performed either in Rome or in London at the time, and the first known performance was in Dublin in 1997.

Wesley's period of wholehearted adherence to Roman Catholicism appears to have been short, and his conversion a cause of subsequent embarrassment to him. In later life he denied that he had ever been a convert, saying that although the Gregorian music had seduced him to their chapels, the tenets of the Romanists had never obtained any influence over his mind. His attitude to Roman Catholicism was characterized by a fascination with its music and liturgy coupled with distaste for its doctrines, well summed up in his remark in a letter to Benjamin Jacob that 'if the Roman Doctrines were like the Roman *Music*, we should have Heaven upon Earth'. His association with Roman Catholic church music continued for much of the rest of his life, most notably during the period *c*1811–24, when he was assistant to Vincent Novello at the chapel of the Portuguese Embassy, for which he wrote further large amounts of Latin church music.

In 1787, according to his obituary in *The Times*, Wesley suffered a serious accident in which he fell into a builders' excavation and severely damaged his skull. According to this account, the accident, and Wesley's subsequent refusal to follow his doctors' advice and undergo the operation of trepanning, was the cause of the attacks of depression to which he was subject for the rest of his life. It is unlikely, however, that such an event could have been the sole cause of Wesley's considerable mental health problems, which in any case appear to have begun well before this date. A more plausible diagnosis, supported by the evidence of other events in his life, his letters, and the pattern of his creativity, in which periods of great productivity alternated with periods of inactivity, is that he suffered from bipolar or manic-depressive illness, the first manifestations of which appeared during his adolescence.

On 5 April 1793 Wesley married Charlotte Louisa Martin, whom he had known since 1782, and with whom he had been living in rural seclusion at Ridge, a small village near St Albans. Wesley and Charlotte had objections to the ceremony of marriage, and their determination to remain unmarried seems to have come to an end only with Charlotte's pregnancy. Their eldest child, Charles, was born on 25 September 1793; two further children (John William and Emma Frances) were born in 1799 and 1806. The marriage was stormy and unhappy from the start, but survived until early 1810, when Wesley's liaison with his 16-year-old housekeeper Sarah Suter precipitated a final separation. Wesley and Sarah subsequently set up house together, and they lived together unmarried until his death. Their eldest child (5) Samuel Sebastian is treated separately below; among six subsequent children to survive to adulthood were Eliza (1819–95), who edited her father's letters to Benjamin Jacob (the *Bach Letters*) and bequeathed many of his manuscripts to the British Museum; Matthias Erasmus (1821–1901), who was treasurer of the College of Organists between 1875 and 1893; and Robert Glenn (1830–1915), who was for a time organist of Wesley's Chapel in City Road.

Wesley's career, particularly in early adulthood, was badly disrupted by periods of depression. The high productivity of the early 1780s, probably coinciding with a hypomanic phase in his illness, was followed by a period in the later 1780s and early 1790s in which he appears to have withdrawn almost completely from public music-making and from composition; the only notable work from this time is the *Ode to St Cecilia* of 1794. During this period he continued to earn his living by teaching at a number of London girls' schools, an occupation he hated and despised as 'ABC drudgery'. A crop of new compositions and concert appearances in the late 1790s



indicates his return to an active involvement in London music-making, on the concert platform, in the Roman Catholic chapels, and in more informal contexts. In 1799 he composed his *magnum opus*, *Confitebor tibi, Domine*, a large-scale setting of Psalm cxi for soloists, choir and orchestra which he may have intended for performance at one of the Lenten oratorio concerts. No performance materialized, however, and it had to wait until 1826 for its première. But Wesley's brilliance as an organist was by now generally recognized, and on 21 April 1800 he was the soloist in one of his own concertos between the acts of one of the first London performances of Haydn's *The Creation*.

The most active and successful period in Wesley's career was from around 1808 to early 1817, when he played a major role in almost every aspect of London's music. He was much in demand as an organist, both as a recitalist and as a soloist in his own concertos. From 1813 to 1817 he was the regular organist at the Covent Garden oratorio concerts, for which he later recalled that he was paid 6 guineas per concert, or 10 guineas if he played a concerto. He also appeared frequently in the provinces: he directed and performed at festivals in Tamworth in 1809 and Birmingham in 1811, and also played at Margate, Ramsgate, Norwich, Great Yarmouth and Ipswich. In addition he promoted his own concerts, gave lectures on music at the Royal and Surrey Institutions, and wrote reviews of music in the *European Magazine*. Although not a founder-member of the Philharmonic Society, he was elected to full membership in June 1815, became a director in November of the same year, and for a short time played an active role in its affairs. It is notable, however, that he never directed a concert of the society, and that only one of his compositions was performed by the society during his lifetime. He was also involved in freemasonry. He had originally joined the Lodge of Antiquity in December 1788; in May 1812 he was appointed Grand Organist (a post created for him by the Duke of Sussex) and in December of that year was organist at the important ceremony marking the union of the two Grand Lodges of England.

Wesley was also a leading member of the English Bach movement. According to his own account in his manuscript *Reminiscences*, he had first been introduced to Bach's music by the violinist and composer George Frederick Pinto, who lent him a copy of *Das wohltemperirte Clavier*. This was probably in 1804 or 1805. Wesley's wholehearted 'conversion' to the Bach cause (to adopt the religious language he himself habitually used) seems to have occurred some time later, probably in the spring or early summer of 1807. From then on, in conjunction with Karl Friedrich Horn, Vincent Novello, Benjamin Jacob and others, he did everything he could to promote Bach's music. He included the keyboard music and the violin music at his own recitals and at a celebrated free concert which he organized with Jacob at the Surrey Chapel on 29 November 1809. In collaboration with Horn he published the six organ trio sonatas in 1809, and the Wesley-Horn edition of *Das wohltemperirte Clavier* followed in four instalments between 1810 and 1813. He subsequently planned to publish an edition of the Credo of the B minor Mass, but failed to receive sufficient subscriptions and had to abandon the enterprise. His enthusiasm for Bach also led to the blossoming of his friendship with Charles Burney from late 1807 until Burney's death in 1814, and to Burney's own involvement with the English Bach movement in the final years of his life.

Wesley's long run of success came to an end with a serious breakdown following the death of an infant child in August 1816. Following an incident in May 1817 in which he threw himself from a window in a fit of delirium, he was confined for some time in a private lunatic asylum. His recovery was slow and at first only partial. Although he was back in his usual position as organist of the Covent Garden oratorio concerts by the beginning of the 1819 season, he remained for some time severely depressed and unable to compose. By 1823, however, he had regained much of his former confidence and optimism. In 1824 he published his Anglican Service in F, parts of which dated back to 1808, and in May 1826 he promoted the first performance of *Confitebor tibi, Domine* at the Argyll Rooms. In 1824 he was appointed organist at the Camden Chapel, his first paid church appointment following many unsuccessful applications elsewhere.

In early 1826 Wesley followed Vincent Novello in obtaining permission from the University of Cambridge to publish music from the collection bequeathed to it by Lord Fitzwilliam in 1816. During a visit to Cambridge in September 1826 he discovered three tunes by Handel to hymns by his father, which he transcribed and published later in the same year. This venture reopened his contacts with Methodism, and in 1828 he published a volume of tunes suitable for the hymns in the Methodist hymnal then in use. During the later 1820s he gave frequent organ recitals and further courses of lectures, at the Royal Institution and elsewhere in London. In 1829 he visited Bristol, the city of his birth, and gave three recitals to open the new organ at St Mary Redcliffe. During this visit he also played at a number of other Bristol churches

2. *Samuel Wesley: portrait by John Jackson, c1815–20 (National Portrait Gallery, London)*

including St James's, the parish church of his boyhood, where his friend Edward Hodges was now organist. He returned to Bristol for the last time in January 1830 to give a course of lectures at the Bristol Institution.

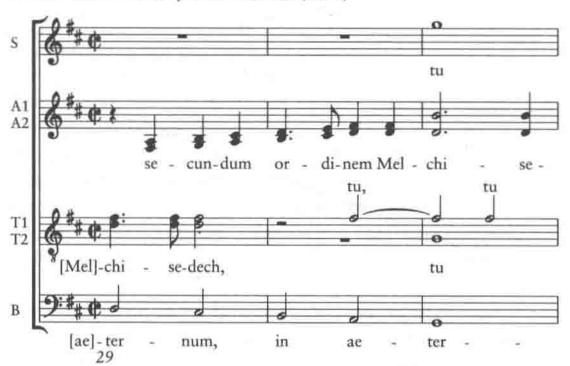
Later in 1830 Wesley suffered another attack of depression which brought his active career to a close. In his final years he rarely performed in public; one of his last public appearances was at his brother Charles's funeral in 1834, where his anthem *All go unto one place* was first performed. In or around early 1836, probably with the encouragement of his family, he wrote his *Reminiscences*, which in their lack of structure, repetitiveness and laboured handwriting show all too clearly his declining mental and physical powers. At around the same time, as his final piece of musical journalism, he contributed an article on the history of music in England to the first issue of the *Musical World*.

Shortly before his death Wesley had a final late flowering of activity. In July 1837 he was able to write out from memory the full score of his *Ode to St Cecilia*, which he had thought lost. On 12 September he attended Mendelssohn's recital at All Saints, Newgate Street, and afterwards was persuaded to play. Mendelssohn was generous in his praise, but Wesley could only say, 'Oh, Sir, you have not heard me play; you should have heard me forty years ago'. He died a little over four weeks later after a short illness.

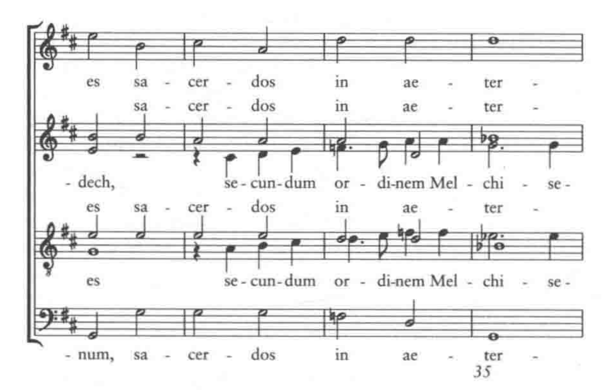
Wesley was an anomalous and maverick figure in English music of the period. Although widely recognized as the most brilliant organist of his age, he never received the recognition that his abilities merited. Unlike his brother Charles he had no taste for court life and manners, held no official appointments, and did not hold a church position until late in his life. His outspoken manner, disrespect for authority and scandalous private life all no doubt contributed to his lack of advancement, both in church and court circles and within the music profession. Despite his very great abilities as a performer, which were apparent to all, he was never fully part of the innermost circle of professional music-making in London. His mental health problems contributed to the erratic and haphazard progress of his career, both as a performer and as a composer. Because of extended periods of depression in early adulthood he was not able to build on the considerable achievements of his compositions of the early 1780s and to consolidate them through the following decade. Although he enjoyed a long period of success between 1808 and 1817 his breakdown in May of that year was a major setback to his career from which he never fully recovered.

In common with most of his London contemporaries, Wesley pieced together a living from a number of different musical activities, of which teaching was the most dependable and regular, if also the most tedious and routine. The range and variety of these activities are reflected in copious quantities of letters to his friends and colleagues in the music profession. Almost half are to Novello, with smaller numbers to Jacob (the *Bach Letters*), the Norwich organist Alfred Pettet, Burney and others. Entertainingly and stylishly written and frequently displaying Wesley's caustic wit, they are the largest and most important collection of letters by an English musician of the period, and are a particularly rich source of information on all aspects of London's musical life during the early 19th century.

Wesley's reputation in his lifetime was chiefly as an organist. He was particularly noted for his improvisations, the brilliance and originality of which are recorded in a number of rapturous first-hand accounts. According to his obituary in *The Times*, 'his resources were boundless, and if called upon to extemporize for half-a-dozen times during the evening, each fantasia was new, fresh, and perfectly unlike the others'. Edward Hodges, hearing him play at Bristol in October 1829, described his performance as 'truly astounding . . . the most wonderful I ever heard, more even than I had before been capable of conceiving; the flow of melody, the stream of harmony, was so complete, so unbroken, so easy, and yet so highly wrought that I was altogether knocked off my stilts'.



During his most active period Wesley earned a good living from his various musical activities. Under the terms of a Deed of Separation drawn up in 1812 following the breakdown of his marriage he agreed to pay maintenance to Charlotte of £130 *per annum*: a figure which suggests an annual income of around £400. This was a considerable amount for a musician. But it was a precarious living, which continued only for as long as he was active: extended periods of illness, as in 1817–18, rapidly brought him to the verge of financial ruin, from which he had to be rescued by subscriptions organized by his musical and masonic friends. Maintenance payments to Charlotte were a continuing drain on his financial resources, and on at least one occasion he was imprisoned for a short time for non-payment.



Wesley's music reflects the wide range of influences to which he was exposed during his early years: the 'ancient' style of Corelli, Handel and other late Baroque composers heard during his childhood, the more 'modern' style of J.C. Bach and C.F. Abel, which he encountered after the move to London, and Gregorian chant and the idioms of continental Roman Catholic church music, which he heard at the embassy chapels. To these were added at various later stages the Haydn of the London symphonies and *The Creation*, and as much of the music of J.S. Bach as was available: the keyboard works, the solo and accompanied violin sonatas, and the Credo of the B minor Mass.

The largest category of Wesley's output is the Latin church music, spanning over 40 years from the early 1780s to the 1820s. Most of this remained unpublished in his lifetime (ex.1), and only a tiny proportion is familiar to modern audiences: the deservedly celebrated setting for double choir, *In exitu Israel*, the eight-part *Dixit Dominus*, and a few others. These show Wesley's deep knowledge of Renaissance and Baroque polyphony, of Gregorian chant, and of more modern styles, and a willingness to combine them in a synthesis which is wholly individual.

Wesley largely abandoned his 'ancient' style in his three largest choral works with orchestra, although all contain large choral fugues at the expected points. In the case of the youthful *Missa de Spiritu Sancto*, the model is clearly a 'cantata' mass of particularly generous dimensions, although it is unclear what works in this genre Wesley could have encountered at this stage in his career. Performances of *Confitebor tibi, Domine* since its publication in Musica Britannica in 1978 have confirmed the accuracy of Wesley's own high opinion of it: of particular note are the extended choral fugue 'Mandavit in aeternum', with its wide-ranging modulations, apocalyptic

Ex.1 from Samuel Wesley: *Tu es sacerdos* (1827)

timpani roll and concluding adagio, and the virtuoso soprano aria 'Fidelia omnium', probably written with the exceptional vocal talents of Elizabeth Billington in mind.

A large proportion of Wesley's instrumental music dates from the early 1780s, a particularly prolific period when the family concerts provided a regular outlet for new compositions of all kinds. Apart from the later organ concertos, his one mature orchestral composition is the splendid Symphony in B♭ of 1802, written for an unsuccessful concert series and apparently never subsequently performed in his lifetime. It is an ambitious and wholly original work, which in the richness of its wind scoring and its well-integrated use of counterpoint nonetheless shows how much Wesley had learnt from the London symphonies of Haydn. The Overture in E formerly ascribed to him is now thought to be by his son Samuel Sebastian.

Given Wesley's fame as a keyboard player, it is not surprising that keyboard music should form an important part of his output, and the largest category of his music published in his lifetime. Despite a good deal of recent publishing activity, however, only a small proportion of his keyboard music is available in modern editions. In the organ music, Wesley's grand manner is heard at its best in the op.6 voluntaries, while a more intimate and miniaturist side to his musical character is apparent in the Twelve Short Pieces. The piano music, written for a burgeoning domestic market, divides into two categories: unashamedly opportunistic potboilers such as the battle-piece *The Siege of Badajoz* and the jubilee waltz *The Sky Rocket* on the one hand, and more serious and substantial works such as the Sonata in D minor and many of the rondos and variation sets on the other.

WORKS

full details of sources in Kassler and Olleson (forthcoming)

printed works published in London unless otherwise stated

exercises, sketches, lost and incomplete works omitted

(5) Samuel Sebastian Wesley (*b* London, 14 Aug 1810; *d* Gloucester, 19 April 1876). Composer and organist, illegitimate son of (4) Samuel Wesley and Sarah Suter. He was the greatest composer in the English cathedral tradition between Purcell and Stanford.

1. Life. He was named after his father and his father's hero, Bach. In his eighth year he was elected a chorister of the Chapel Royal, St James's Palace, under William Hawes, and subsequently also sang regularly in the royal chapel at Brighton, delighting George IV. Like other choristers he was often taken by Hawes to sing at St Paul's Cathedral and at the Madrigal Society and the Concert of Ancient Music. After leaving the choir in 1826 he held several appointments as organist in the London area and assisted his master, Hawes, both as pianist and 'conductor of the chorus' at the English Opera House at the Lyceum, Adelphi and Olympic Theatres (1828–32) and as organist in the Lenten Oratorios (1830–32). At the former he was responsible for the overture and 'melo-dramatick' music to Edward Fitzball's drama *The Dilosk Gatherer*; at the latter he had a setting of the Benedictus performed. During this period he published his first compositions – various songs and pieces for piano and organ, as well as his earliest works for the church. His father and Thomas Adams were both early influences on his work.

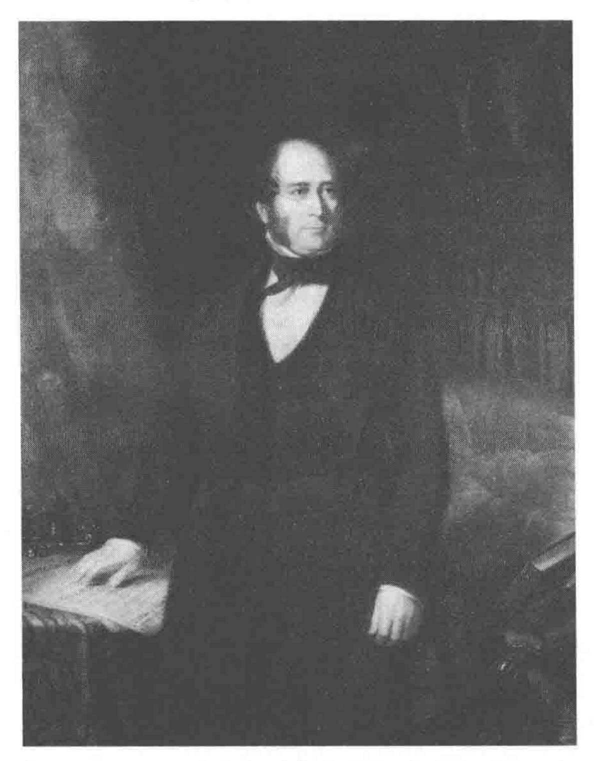
In 1832 Wesley left London and began his long career as a cathedral organist, interrupted only by his term at Leeds Parish Church. The most complete data available about his various appointments are given here:

St James's Chapel, Hampstead Road: appointed 25 March 1826
St Giles, Camberwell: appointed 8 Jan 1829, resigned Nov 1832
St John, Waterloo Road: appointed 29 Nov 1829, resigned 27 March 1831
Hampton Parish Church, Middlesex (evening organist only): appointed 21 Nov 1831, resigned early Sept 1832
Hereford Cathedral: appointed 10 July 1832, began Sept 1832, resigned 2 Sept 1835
Exeter Cathedral: appointed 15 Aug 1835, began 7 Oct 1835, resigned 4 Jan 1842
Holy Trinity Chapel, Exmouth (evening organist only): appointed Easter 1837, resigned Easter 1838
Leeds Parish Church: began Feb 1842, resigned 1849
Winchester Cathedral: appointed 21 Aug 1849, began 5 Oct 1849, resigned 23 Feb 1865
Winchester College (Sunday evenings only): appointed Dec 1850, resigned 1865
Gloucester Cathedral: appointed 18 February 1865, began 24 June 1865, died 19 April 1876

His appointment to Hereford probably owed something to the influence of the recently appointed dean, John Merewether, who had formerly been incumbent at Hampton. Although Wesley was later to regret the move, it had a remarkable effect on his development as a composer: for the opening of the rebuilt cathedral he wrote his famous anthem *The wilderness and the solitary place*, first heard on 10 November 1832. Later in the same year he submitted it for the Gresham Prize Medal, but it was too late for consideration and was held over until the following year. Its contemporary style failed to satisfy the judges, one of whom, R.J.S. Stevens, wrote: 'It is a clever thing, but not cathedral music'. Crotch also condemned it, but it was to prove a landmark in the history of English cathedral music. Another of his famous anthems, *Blessed be the God and Father*, was written for an Easter Day service at Hereford at which, because of the particular circumstances (all of the adult members of the choir being in Holy Orders and holding livings), 'only Trebles and a single Bass voice' were available; it was for similar forces that Wesley first wrote the settings of the Nicene Creed and Responses to the Commandments (no.2), later published in his Service in E.

By virtue of his office Wesley conducted the Three Choirs Festival at Hereford in September 1834, when a manuscript overture (probably that in E major), the sacred song *Abraham's Offering* and a setting of the Sanctus were performed. As his predecessor's pension was deducted from his salary he received only £60 a year, which he supplemented by teaching – a 'degrading occupation' in his view. His runaway marriage at the village of Ewyas Harold to the dean's sister, Mary Anne, on 4 May 1835 doubtless accelerated his departure. Although he arrived in Exeter with high hopes and initially enjoyed an amicable working relationship with the dean and chapter, this quickly soured after the appointment of the precentor as dean in 1839 and thereafter he was almost constantly at loggerheads with his clerical superiors. Despite his growing reputation as organist and composer (attested by Gauntlett's articles in *The Musical World*, 1836), there were few opportunities except cathedral organistships open to him. He therefore decided to take the degrees of BMus and DMus at the University of Oxford, submitting his anthem *O Lord, thou art my God* as an exercise and graduating on 21 June 1839. Thus qualified for an academic appointment he was a candidate for the Reid professorship at Edinburgh in 1841, 1844 and 1845, for the Oxford professorship in 1848, and for that at Cambridge in 1856; but in every case he withdrew or was defeated. Such appointments were still based on influence more than merit and Wesley's abrasive personality had deprived him of the influence his ability deserved.

In addition to his work at the cathedral Wesley was involved with both the Devon Glee Club and the Devon Madrigal Society, frequently chairing the monthly meetings of the latter. He also organized a series of subscription concerts for the 1836–7 season and attempted to form an orchestral society in 1837 and a choral society a year later. None of these ventures was particularly successful, and he was further frustrated by the apparent refusal of the chapter to pay for the copying of the parts for two



further large-scale anthems, *Let us lift up our heart* and *To my request and earnest cry*. As a result neither received a single performance. In such circumstances and with his relations with the cathedral chapter under increasing strain, the offer of the post of organist at Leeds Parish Church – where he had opened the organ on 18 October 1841 – was one he could not refuse, although he was often later to regret leaving Exeter. Provocative to the last, he unilaterally chose to leave his articled pupil, William Spark, to serve out his notice by proxy and then made repeated demands to the chapter for money he claimed was owed to him. Their attitude towards him is probably summed up in the words of the chapter clerk: 'The most to be avoided man I ever met with'.

At Leeds the situation seemed highly promising for Wesley. The high church (but not Tractarian) vicar, Dr Hook, had stimulated the building of a new church, equipped with choir stalls and a new organ. Although unmusical himself, Hook was determined to introduce fully choral services on cathedral lines, and at his own financial risk had formed an efficient surpliced choir that already put most cathedral choirs to shame; Wesley was offered a salary of £200, guaranteed for ten years. His enthusiastic reception stimulated another masterpiece, the service in E (begun at Hereford and continued at Exeter), while he also completed his two sets of Three Pieces for a Chamber Organ, revised his *Selection of Psalm Tunes* and prepared a pointed psalter with chants. The service was published in 1845 with a lengthy preface in which he argued the need for reform in cathedral music and vented some of his bitterness against cathedral clergy in a way that probably did more harm to himself than good to his cause. In December 1847 Wesley, whose great hobby was fishing, fell and suffered a severe fracture of his right leg while returning from an expedition to the river Rye near Helmsley, Yorkshire. During his convalescence he composed the anthems *Cast me not away* and *The face of the Lord*, both of which contain references to bones and injury: Spark believed that the crunching discords at the passage 'the bones which thou hast broken' in the former are more than a metaphorical expression of pain.

As at Exeter, Wesley initially took a prominent part in local music-making, but following the demise in 1845 of the 'new' Leeds choral society (which he conducted) he was seen less in public; that the 'old' choral society meanwhile prospered under his rival, R.S. Burton, must have irked him greatly. He continued to appear as an organist, however, and gave two highly acclaimed performances as solo organist at the Birmingham Festivals of 1843 and 1849; he also gave two series of lectures on choral music at the Collegiate Institution, Liverpool (1844 and 1846), in which he continued his campaign for the improvement of cathedral music and the better treatment of church musicians. Its culmination was reached with his two outspoken pamphlets (*A Few Words on Cathedral Music* and *Reply to the Inquiries of the Cathedral Commissioners*) in which few people's feelings were spared. His relations with Hook gradually cooled: 'Disappointed as I was with Dr Hook & his powers to either aid his Church Music or me – I soon bitterly repented of leaving Exeter'. His departure from Leeds was attended by another dispute, this time with his successor, R.S. Burton, over the sale of his teaching practice; he eventually won an action for £100 at York Assizes.

He took the Winchester appointment partly in order to send his sons to Winchester College. The cathedral chapter, aware of his reputation, tried to anticipate possible difficulties by laying down rules about the organist's duties and attendance; he was required to agree to these conditions, and was then offered the position at the favourable salary of £150. In December 1850 the college organistship was also offered him at a salary of £80, for which he was required only to play for the Sunday evening service. Wesley's attendance at the cathedral was satisfactory at first, and for several years relations were harmonious. During this period he persuaded the chapter to buy a new organ, consisting of about three-quarters of the instrument built by Willis for the Great Exhibition of 1851, and this was installed in 1854. Concurrently Willis had been working on the organ Wesley had designed for St George's Hall, Liverpool. Completed in 1855 (though conceived a decade earlier), it met with a mixed reception. While there was praise for the tone of the stops, Wesley was publicly taken to task over the unadventurous specification and his insistence on the old-fashioned 'G' compass and mean-tone tuning. He conducted his anthem *The wilderness and the solitary place* (with orchestral accompaniments) at the 1852 Birmingham Festival. The performance was poor and criticism of the music harsh. A protracted quarrel in the press, principally between Wesley and Gauntlett, followed. In 1853 he published by subscription his Twelve Anthems. Comprising works written during the previous 20 years, it had first been announced (as a volume of six) in 1836 and printing had begun in 1840, only to cease when the plates were destroyed by fire. Not until his convalescence at Helmsley did Wesley return to it, adding further compositions from his periods in Leeds and Winchester. 'My published 12 anthems is my most important work', he was later to write, and it ranks as one of the most significant church music publications in English history. Thereafter his spare time was increasingly occupied with the harmonization and composition of hymn tunes, which were published in the musical edition of Kemble's *Psalms and Hymns* (1864) and, eventually, in the long-awaited *European Psalmist*, which also contained the largest number of chorale harmonizations by J.S. Bach yet published in England. He was also, from 10 August 1850, the first professor of organ at the Royal Academy of Music.

Following the appointment of a new precentor in 1858 the chapter minutes show signs of tension over Wesley's performance of his duties. When in 1865 he was asked by the dean and chapter of Gloucester to judge candidates for the post of organist, he surprised all by offering to take it himself. He seems to have been no happier in the new situation. The organ was in a poor state; the choir was generally inefficient; the authorities were uncooperative. He wrote in 1870: 'I ever regret leaving Devon, and Gloster is very objectionable. There is however no great demand for any peculiarly experienced musical ability and I must be content to rank with the low ones'. After more than 30 years Wesley found himself once again conductor of the Three Choirs Festival (1865, 1868, 1871 and 1874). At the 1871 festival he introduced Bach's *St Matthew Passion* for the first time. He seems not to have been admired as a conductor; his tempos were too fast, his expression perfunctory. As an organist, however, he was still renowned; many accounts record the thrilling

3. *Samuel Sebastian Wesley: portrait by William Keighley Briggs, 1850s (Royal College of Music, London)*

quality of his performances. Hubert Parry wrote after hearing him play a concluding voluntary at Gloucester in 1865: 'He began the accompaniments in crotchets alone, and then gradually worked into quavers, then triplets and lastly semiquavers. It was quite marvellous. The powerful old subject came stalking in right and left with the running accompaniment entwined with it – all in the style of old Bach'. Wesley's concluding years were clouded by illness and increasing bitterness, though his financial position at least had improved after the sale of most of his copyrights to Novello for £750 in 1868. Having declined the honour of knighthood, he was in 1873 granted a Civil List pension of £100 a year, which was continued after his death to his widow, until her death in 1888. In 1875 Wesley had increasing difficulty in breathing. He played the organ for the last time on Christmas Day. His will is dated 19 February 1876, and he died two months later from Bright's Disease, after a long decline. By his own wish he was buried alongside an infant daughter in the old cemetery at Exeter.

Wesley's professional conduct is difficult to justify, and he failed in many respects to meet the standards he laid down for others. While accusing cathedral bodies (with much justice) of failing in their duty to maintain choral music, he himself failed in that duty by persistently leaving his work to be carried out by inexperienced deputies. He condemned rival candidates for musical professorships because they had used influence instead of relying on their merits, but he offered a bribe to London critics to induce them to review his *European Psalmist* favourably, and asked his sister to try to influence J.W. Davison of *The Times* 'through some intimate friend of his'. He seems to have suffered from acute paranoia in his dealings with superiors and rivals. Yet his pupils and choir members seem to have loved him, and he was unfailingly kind to younger musicians. Parry, in his account of him, made no mention of the eccentricities that have given rise to so many anecdotes; his pupil Kendrick Pyne also dismissed them: 'The most aprocryphal tales are told as to his eccentricites. I lived with him for some time and do not share in the view. He was moody, often absent-minded, nervous, and irritable; but not more than one would expect from an artist, who is usually not accustomed to hide his feelings'. While his opinions on musical matters were unconventional and sometimes irrational, he was not alone in his lack of sympathy for most early English cathedral music or in his admiration for that of Spohr. He admired Bach, and regarded his own father as one of the few representatives of the 'pure style', although he seldom imitated this in his own music. He hated Gregorian psalm tones (though he used a tone-like melody in his Chant Service in F) and was in general hostile to the Tractarian movement; he was contemptuous of the sentimental hymnody of Dykes and Monk. He had a violent dislike of equal temperament and revealed his conservatism by his attachment to the extended English 'G' compass for the organ (which allowed greater use of the left hand in octaves when accompanying vocal music). Yet his Service in E and the anthem *The wilderness and the solitary place* not only modulate freely, but are written in a key which brings out the worst defects of the old mean-tone temperament. When a correspondent pointed out this inconsistency in *The Musical Standard*, Wesley was evasive in his reply. It is difficult to see how he can have preferred to have his own music performed in such a temperament.

Though his compositions have won wide acclaim, contemporaries asserted that – at least as far as the organ was concerned – his improvisations were even more imaginative. *The Musical Examiner* in 1843 pronounced him, 'without disparagement to other men of genius – and before all to Dr. Mendelssohn', to be the 'greatest organist now living'. The poet T.E. Brown imagined Wesley appointed organist in heaven by acclaim of the angelic orders; and when Wesley played there,

> I heard the mighty bars
> Of thunder-gusts, that shook heaven's dome,
> And moved the balanced stars.

Even if such tributes are exaggerated, Wesley's powers were sufficient to induce even cathedral chapters to overlook, as far as they could, the grave defects of his personality and behaviour.

2. WORKS. In youth Wesley tried various kinds of composition, but after his move to Hereford in 1832 he found his true vocation as a composer of Anglican cathedral music. In that field he concentrated his chief creative effort for the rest of his life, though he occasionally used his mastery of choral writing for secular purposes, as in his glees and the chorus *The Praise of Music*. Among his other works are two deeply felt three-movement 'sacred songs' for baritone and orchestra (*Abraham's Offering* and *I have been young and now am old*), some fine pieces for organ (particularly the Introduction and Fugue in C♯ minor and the Andante in F from the first set of Three Pieces for a Chamber Organ), a virtuoso March and Rondo for piano and, in *A Selection of Psalm Tunes*, some outstanding harmonizations of hymn tunes.

Settings of the daily canticles had reached a low point by 1830. They had changed very little in outward

character since the late 17th century, and their performance had long ceased to be anything more than a tedious duty. Wesley's great Service in E, begun at Hereford and completed at Leeds, showed how these familiar texts could be made vehicles for imagination. Written on a scale rarely attempted since the 17th century and with an independent accompaniment which allowed the organ to make its own contribution to the musical argument, it forms a towering monument in the history of English church music. It was well timed to satisfy the growing demand for more meaningful worship in the church and became a direct model for the best settings of the later 19th century. Wesley discovered a practical problem, however: a fully worked-out setting of this kind is too long for frequent liturgical use,

> designed as it is for performance during the very brief space of time allotted to our daily Cathedral worship; a period so brief – while the subjects to be treated are so various, of such grand universal applications – as necessarily to divest composition of its ordinary features; rendering almost every species of amplification of a particular subject either difficult or impossible; and this, too, in connection with words which seem, in the musician's judgement, to demand of him the most exalted efforts of which his art is capable.

His other services are attempts, as he said, 'to attain the utmost brevity without sacrificing *Expression* in setting *Te Deum* &c. to Music'. But the restriction on his creative process was too severe, and these shorter settings have little character.

In the anthems, on the other hand, Wesley was free to choose his texts. In fact he allowed himself much greater licence than had been usual, putting together verses or even portions of verses from different parts of the Bible, mixing the Bible and Prayer Book translations of the psalms, sometimes incorporating parts of the liturgy or a hymn or even (in *By the word of the Lord*) verses from *Paradise Lost*. By these means he could construct a text to his own satisfaction, giving it the desired shape, imagery, dramatic contrasts and climaxes, and avoiding all 'dead' or perfunctory passages. There is evidence in his autographs that he sometimes shaped the text of an anthem while the composition of the music was already in progress. His strong evangelical feeling for the biblical words was closely bound up with his musical sensibility; because of this, his anthems convey a glowing sincerity that is seldom evident in the music of his immediate predecessors – or of his successors. There are moments of inspiration paralleled only in Purcell. Like Purcell's, his church music draws freely on secular influences. The drama of both *The wilderness* and *Blessed be the God and Father* has its roots in the theatre, while the highly coloured and emotionally charged harmonic style of his mature works (seen to perfection in *Let us lift up our heart* and *Wash me throughly*) owes little to the Anglican cathedral tradition.

In short full anthems, such as *Wash me throughly* or *Thou wilt keep him in perfect peace*, Wesley was able to produce some profoundly beautiful effects simply by skilful management of four or five voices in full harmony. The manner was derived from such works as Mozart's motet *Ave verum corpus*; the Roman Catholic influence, absorbed through his father, was a fruitful new element here, and the detail of word-setting was comparatively unimportant. In his longer anthems, some of them almost miniature oratorios, Wesley combined several elements with new effectiveness: the 'learned' fugue, with touches of Bach; the 'full' harmonic style described above; the

Ex.2 S.S. Wesley: *Ascribe unto the Lord*

aria-like solo, influenced at times by Spohr's oratorios; and a kind of recitative, sometimes sung by the men's voices together, which was all his own. In putting these together Wesley seldom lost sight of his dramatic and devotional purpose. *Ascribe unto the Lord*, *Let us lift up our heart*, *O Lord, thou art my God* and *The wilderness and the solitary place* have a monumental integrity rare in anthems of their length.

Wesley's achievement in these and other works is not to be underestimated. Not only had he forged a wholly individual style but, through his willingness to employ elements of the up-to-date idiom he had encountered – and used – in the concert hall and theatre, he had also succeeded in revitalizing the moribund tradition of English cathedral music. Although his early works for the church (*Blessed be the God and Father*, the Creed from the Service in E and *Trust ye in the Lord*, for example) reveal the influence of Mendelssohn and Spohr, he rarely imitated either: the well-known treble duet 'Love one another' from *Blessed be the God and Father* at first recalls Mendelssohn, but its turn of phrase and irregularity of

structure are original. By 1840, however, his music had become increasingly independent of these and other influences and his mature works are characterized by strong diatonic dissonance – particularly the 9th on the mediant (ex.2, bar 13) – which can be traced to his father, the confident handling of chromaticism, and a fondness for bold harmonic effects and textures enlivened by frequent suspensions, appoggiaturas and accented passing notes. They also demonstrate a growing sympathy for the native tradition of cathedral music. The resulting amalgam of the old and the new was aptly described by Spohr: 'The sacred music is chiefly distinguished by a noble, often even an antique style, and by richly chosen harmonies, as well as by surprisingly beautiful modulations'. Works such as the canticles from the Service in E, the bass solo 'Thou, O Lord God' in *Let us lift up our heart* or the beginning of *Ascribe unto the Lord* (ex.2) could be mistaken for no other composer's work.

Because so much of Wesley's music was written for the services of the Church of England it has never been well known on the Continent; neither is it easily placed in the wider framework of European music. Bold and courageous as many of his innovations are in the Anglican context, they are hardly advanced compared with those of Berlioz, Schumann or Chopin. Yet his music possesses great individuality and in a few of the pieces – the fluid, side-stepping chromaticism of *Wash me throughly*, for example – is remarkably forward-looking. With his vivid imagination and firm grasp of the techniques of composition Wesley could, when inspired by the devotional text, rise beyond influence or imitation to the level of genius.

Wesley, Fred. *See* JBS.

Wesley, Garret. *See* MORNINGTON, GARRET WESLEY.

Wesley-Smith, Martin (*b* Adelaide, 10 June 1945). Australian composer. From 1965 to 1967 he studied composition with Peter Tahourdin, Peter Maxwell Davies and others at Adelaide University; there an enduring interest in electronic music was aroused. In 1971 he went to Britain, undertaking postgraduate studies at York University, where he completed the DPhil. In 1974 Wesley-Smith returned to Australia to take up a position as lecturer in electronic music at the Sydney Conservatorium. Here he designed, developed and ran the Electronic Music Studio, a facility which has been central to the teaching of composition at the conservatorium and to the evolution of Wesley-Smith's own compositions. In Sydney his reputation as a composer, teacher and administrator quickly grew, and he received part-time appointments to lecture in electronic music at Sydney's other tertiary music institutions and (later) at Hong Kong University. He has been a member of various important music committees, principally those which focussed on the assessment of grants for composers at the Australian Music Centre and, since 1975, the Australia Council.

Apart from his work as a composer and lecturer, Wesley-Smith has been active as the founder of a number of contemporary music ensembles. These include Watt (1976), a performing group which pioneered audio-visual art in Australia using electronic music integrated with multiple computer-controlled slide projectors, and the Greenway Group (1993), a Sydney Conservatorium ensemble. His passionate concern for environmental and political issues is reflected in the activities of these and other groups and in a number of his compositions, principally the *a cappella* work *Who Killed Cock Robin?* (1979), the tape piece *Vietnam Image* (1969–70), and *Quito* (1994) an audio-visual music theatre composition, with a version for radio (1997). *Quito*, which in 1997 won the prestigious Paul Lowin Award, is one of a number of his works focussing on the East Timor situation.

Wesley-Smith is a prolific composer, with over 140 works extant. Although traditional forms including music theatre, songs, choral works, film scores and orchestral music obtain significant representation, music which involves the use of technology – tape, electronic, computer and multimedia compositions – dominates his output. One such piece, *For Marimba and Tape* (1982) is perhaps his most admired and frequently played composition, with many performances realized both in Australia and internationally.

A strong element of fantasy permeates a number of Wesley-Smith's compositions. This is reflected in his many songs and other compositions for children and particularly in a series of works inspired by the writings of Lewis Carroll, including *Doublets*, *Snark-Hunting* and *White Knight and Beaver* and crowned by the widely acclaimed music theatre piece, *Boojum!*, with text by Peter Wesley-Smith, his twin brother and frequent collaborator.

Wesley-Smith is something of a rarity among contemporary Australian composers in that, since 1979, his music has reached an appreciative and enthusiastic audience. Before then his musical style, although distinctively personal, followed prevailing modernist trends. However, in *Who Killed Cock Robin?*, Wesley-Smith determined that the text demanded more traditional melodic and harmonic treatment. The resultant success of this work and others which followed came at a price for the composer, who came to be regarded by modernists as no longer a serious composer. Today, however, he is widely regarded as being in the vanguard of contemporary composition in Australia.

WORKS
(selective list)

Stage: Pie in the Sky (children's op, P. Wesley-Smith), 1968–71; The Wild West Show (children's music theatre), 1971; Machine (children's music theatre), 1972; Boojum! (music theatre, P. Wesley-Smith), 1985–6; Quito (audio-visual music theatre), 1994 [radio version, 1997]

Inst: Guitar Music 1, gui, 1973; Oom pah pah oom pah, pf, 1989; 3 Little Pf Pieces, 1991; On A.I. Petrof, pf, 1992; Visiting the Queen, mar, Yamaha Disklavier, 1992; Brother Jack, fl, cl, pf, vc, 1994; Janet, fl, mar, pf, 1995; 3 Pieces, 2 mar (4 players), 1996; White Knight Waltz, pf, 1996

ADRIAN A. THOMAS

Wessel, Christian Rudolph (*b* Bremen, 1797; *d* Eastbourne, 15 March 1885). English music publisher of German origin. He emigrated to London, where, with a piano maker named William Stodart, he established the firm of Wessel & Stodart in 1823. They began as importers of foreign music, but also issued their own publications from 1824. Their main interest was piano music, often issued in the form of periodical albums, and besides the usual popular arrangements of operatic airs and dance music they published the sonatas of Beethoven and Mozart, and the works of piano virtuosos such as Heller, Henselt and Thalberg. They also helped at an early date to promote the music of Schubert, Schumann, Mendelssohn, Gade, Liszt and others in England. Stodart retired in 1838 and Wessel continued the business alone until 1839, when he took in Frederic Stapleton as a partner. From 1833 they began to publish Chopin's works and from 1836 entered into a series of contracts with the composer for the exclusive rights to his works in England. The relationship between Chopin and the firm was often an uneasy one, and the composer strongly objected to Wessel's habit of giving his works fanciful titles, and to generally poor business practice. Nevertheless, the firm remained Chopin's sole publisher in England during the composer's lifetime. In 1845 Stapleton left the firm, and Wessel again carried on the business alone. The firm was among those particularly affected by the House of Lords decision of 1854 to declare invalid many copyrights of foreign publications. In 1860 Wessel retired in favour of his managers, EDWIN ASHDOWN and Henry John Parry, and the business eventually became the firm of Edwin Ashdown Ltd.

ALEXIS CHITTY/PETER WARD JONES

Wessely, (Carl) Bernhard (*b* Berlin, 1 Sept 1768; *d* Potsdam, 11 July 1826). German composer. He came from a cultured Jewish family whose circle included Lessing, Moses Mendelssohn and K.W. Ramler. After studying music with J.A.P. Schultz he went to Hamburg to produce his cantata (on Ramler's text) for the coronation of Friedrich Wilhelm II in 1787; Ramler also wrote the text for *Sulamith und Eusebia*, Wessely's cantata on the death of Mendelssohn the previous year. Wessely was appointed second music director of the Berlin Nationaltheater in 1788 and eight years later Prince Heinrich of Prussia made him Kapellmeister at Rheinsberg. When the prince died in 1802 Wessely abandoned his musical career for family reasons and became a government official at Potsdam, where in 1814 he was co-founder of a society for classical music, which he conducted until his death. He was recognized by his contemporaries as an able pianist and composer. His works, according to Härtwig, were endeared to a wide public by having the clarity of Gluck or Mozart. He published a comparison of these composers in *Archiv der Zeit* (November 1795) and also contributed to the *Allgemeine musikalische Zeitung*. Bernhard Flies's setting of F.W. Gotter's lullaby 'Schlafe, mein Prinzchen' has been erroneously attributed to both Wessely and Mozart; Wessely did, however, compose another setting of this text, as did Friedrich Fleischmann and F.H. Himmel.

WORKS
(*selective list*)

Stage: Die Wahl des Helden (ballet), Berlin, 3 Aug 1788; Die Freude des Herbstes (prol, K. Müchler), Berlin, 16 Oct 1789; Psyche (Spl, 2, Müchler), Berlin, 18 Nov 1789, 1st act, *D-Bsb*; Die Sonnenjungfrau (incid music, A. von Kotzebue), 1790; Louis IX en Egypte (op, K. Gaillard), Rheinsberg, 1797; L'ogre (op), Rheinsberg, 1798/9

Cants.: Sulamith und Eusebia (K.W. Ramler), Berlin, 23 May 1786; Kantate auf die Krönung Friedrich Wilhelm II (Ramler), Berlin, 31 Jan 1787; Dankopfer für den Landesvater (Ramler), Berlin, 19 Sept 1787; Mozarts Urne (G.W. Burmann), Berlin, 1791; Trauerkantate auf den Tod des Prinzen Heinrich von Preussen (Wessely), Berlin, 16 Sept 1802, *Dl*

Other: 12 Gedichte (F. von Matthisson), pf acc. (Berlin, 1793); variations on God Save the King, pf (Berlin, 1795); variations on an air from Gluck's Armide, pf (Hamburg, 1799)

DAVID CHARLTON

Wessely, Hans (*b* Vienna, 23 Dec 1862; *d* Innsbruck, 29 Sept 1926). Austrian violinist. He studied with Heissler and Hellmesberger at the Vienna Conservatory, and privately with J.M. Grün. His début in 1883, which elicited praise from the severe Hanslick, led to an important public appearance in 1884, when he gave two concerts in his native city and was subsequently engaged to play Spohr's Seventh Concerto at the Vienna Philharmonic Society under Richter. He spent three years in Berlin, and visited various countries in Europe, eventually making his London début at the Crystal Palace concerts under Manns on 7 April 1888. In 1889 he became a professor at the RAM. His repertory included all the great violin concertos, but it was as a quartet leader that he was best known: the quartet bearing his name, which comprised Spencer Dyke, E. Tomlinson and Patterson Parker, gave a series of concerts annually in London until 1914, and he was noted for his thoughtful interpretations in chamber music. He wrote a set of caprices and other short pieces for violin, edited much violin music and published *A Practical Guide to Violin Playing* (London, 1913).

W.W. COBBETT/DAVID CHARLTON/MALCOLM MILLER

Wessely, Johann (Paul) [Veselý, Jan Pavel] (*b* Frauenberg [now Hluboká], Bohemia, 24 June 1762; *d* Ballenstedt, 1 June 1810). Bohemian violinist and composer. He studied the violin under his uncle, a Benedictine monk in Prague.

From 1797 to 1800 he was first violinist in the count's orchestra in Kassel, and from 1800 was Konzertmeister to the Duke of Anhalt-Bernburg at Ballenstedt. Wessely's best efforts were as a player and composer of chamber music. His string quartets and trios, modelled after Haydn and Ignace Pleyel, were well loved by his contemporaries. He also wrote several concertante orchestral works with solo parts for violin, horn, clarinet and flutes, and composed two comic operas for performance at Ballenstedt about 1800.

WORKS

only those extant

Orch: 8 Variations, cl (Leipzig, 1794); 12 Variations, 2 fl, vn (Leipzig, n.d.); Rondo, hn, op.14 (Brunswick, n.d.); 10 Variations, hn, vn, op.15 (Brunswick, 1802)

Chbr: 2 Str Qts, op.1 (Vienna, n.d.); 2 Str Qts, op.2 (Vienna, 1788); 3 Str Qts, op.4 (Vienna, n.d.); 3 Str Qts, op.8 (Offenbach, 1792); 3 Str Qts, op.9 (Offenbach, 1798); 3 Str Qts (Offenbach, 1798); 3 Str Trios, op.17 (Brunswick, 1804), 1 movt ed. in Das Streichtrio, xiv (1953); 3 Qts, cl, vn, va, pf, op.19 (Offenbach, n.d.)

KURT STEPHENSON

Wessely, Othmar (*b* Linz, 31 Oct 1922; *d* Vienna, 20 April 1998). Austrian musicologist. He attended the Bruckner-Konservatorium in Linz and then studied musicology at Vienna University with Schenk, and theory with Joseph Marx at the Vienna Academy (1940–47). He took the doctorate at Vienna in 1947 with a dissertation on Bruckner in Linz. After working briefly as archivist to the Staatsoper (1948) and secretary to the Gesellschaft zur Herausgabe der Denkmäler der Tonkunst in Österreich (1949), he became an assistant lecturer (1950) at Vienna University's musicology institute; he completed his *Habilitation* at Vienna in 1958 with a work on the life and times of Arnold von Bruck. He was successively a reader at the institute (1959–63), professor of musicology and director of the musicology institute at Graz University (1963–71), professor of musicology and director of the musicology institute at Vienna University (1971–93) and director of the Anton Bruckner-Institut in Linz (from 1982), whose conference reports he regularly edited.

Wessely's particular interest was in 14th-century Italian and Renaissance music, particularly where the music of these periods related to the history of art and language. He also concentrated on the history of music in his own region of Upper Austria and on Austrian music as a whole from 1848 to 1918, and represented these interests for a variety of publications (including *MGG1* and RISM since 1962). In 1963 he became general editor of the Fux collections, and founded and published the series Die grossen Darstellungen der Musikgeschichte in Barock und Aufklärung. He was made a member (1954) and subsequently president (1974–94) of the Gesellschaft zur Herausgabe der DTÖ.

His wife, Helene Wessely, née Kropik (*b* Vienna, 29 July 1924), also studied musicology with Schenk at Vienna University and took the doctorate there in 1950 with a dissertation on Purcell as an instrumental composer. She has made a particular study of the 17th-century composer Lelio Colista, and has edited some of his works for publication.

RUDOLF KLEIN

Wessex Philharmonic. Orchestra formed in BOURNEMOUTH during World War II.

Wessman, Harri (Kristian) (*b* Helsinki, 29 March 1949). Finnish composer. He studied musicology and languages at Helsinki University (1967–73) and composition with Kokkonen, at first privately, then at the Sibelius Academy, Helsinki (1973–8). In its stylistic features Wessman's music is close to neo-classicism, but it differs in its emotional content, warmth of spirit and lyricism. Wessman has described his music half-playfully as 'neo-pathetical'. He relies on traditional motivic development, which is the basis of his swiftly flowing melodies. The bulk of his output consists of chamber music, which includes both intimate small-scale pieces and also works approaching larger-scale Classical-Romantic genres that are also weightier in expression, such as numerous sonatas and trios. Of his orchestral works the majority are solo and concertante pieces. In addition Wessman has composed a good deal of pedagogical music.

KIMMO KORHONEN

Wessnitzer, Wolfgang (*b* Nuremberg, bap. 27 April 1629; *d* Celle, 31 Aug 1697). German organist and composer. He was orphaned at the age of four and his godfather sold his father's estates in 1640. He studied with Heinrich Scheidemann and perhaps J.E. Kindermann. An application for the post of organist at the Jacobikirche, Hamburg, was unsuccessful, but in 1655 he was appointed organist at the court of Duke Christian Ludwig at Celle. In 1663 he developed a proposal for the reorganization of the court orchestra.

Wessnitzer's chorale melodies were included in three collections (some ed. in *ZahnM*). He was editor of the *Vollständige Gesang Buch* (Lüneburg, 1661), which includes 12 of his works. The *Fürstlich-Braunschweig-Lüneburgisches Gesangbuch* (1665) contains 43 of his works, and six more appeared in the *Grosse Cellische Gesangbuch* of 1696. His melodies set texts by Opitz, Fleming, Dach, Harsdörffer and Rist, among others. Wessnitzer was also the composer of some keyboard music, published in the *Celler Clavierbuch* (1662, some ed. M. Böcker, Wiesbaden, 1990).

HARALD MÜLLER

Wesström, Anders (*b* Hudiksvall, 1720/21; *d* Uppsala, 7 May 1781). Swedish violinist and composer. His earliest music education was from his father, organist at the church at Hudiksvall in northern Sweden. In 1738 he was admitted to Uppsala University, which he attended while employed part-time as his father's successor in Hudiksvall. In 1744 he defended his dissertation *De abdicatione regia* and was granted a degree in law; the following year he became a consulting lawyer at the Royal Courts in Stockholm, and in 1748 joined the Hovkapell as an ordinary violinist. From 1756 until 1760 he was abroad on a stipend, studying violin in Padua with Tartini, who considered him one of his most apt students, and in Dresden with Cattaneo. His companion on this tour was the Dresden composer Johann Gottlieb Naumann. In 1760 he was appointed as court musician and became a regular soloist in the Stockholm public concerts (Cavalierskonserter). Further journeys abroad (to Germany in 1761 and England in 1766) enhanced his reputation, but growing debts brought about his dismissal from the Hovkapell in 1773. For three years he supported himself by freelance work, and in 1776 was appointed as musical director and town organist in Gävle, a position he chose over debtor's prison.

Wesström's music, much of which is lost and which appears to have been written during the period 1760–73, shows the influence of Mannheim and the *empfindsamer Stil* of C.P.E. Bach. Much of the melodic material is developed through sequence, but his use of solo instruments and colouristic effects is notable. In particular, the six 'string quartets' are idiosyncratic, with wind instruments added to provide unusual timbres.

BERTIL H. VAN BOER

West, Anthonius. *See* MUSA, ANTHONIUS.

West, William (*b* ?1575–80; *d* London, November 1643). English composer and singer. The Cheque Book of the Chapel Royal records that on 20 August 1604 he was sworn an extraordinary member of the Chapel Royal, in recognition of his services at 'the great solemnity of the league of Spain'. He had for some time before this been involved in Chapel Royal business; his name was attached to a meeting of the Gentlemen on 19 May 1603. In 1605 Thomas Woodson sold his place in the choir to 'Wm. West of Canterbury', and West's name thereafter appears regularly in lists of the Chapel Gentlemen up to 1643. On 25 November of that year William Howes succeeded West, 'tenor deceased'. His extant compositions comprise a verse anthem, *Have mercy, Lord*, a full anthem, *Save me O God*, and a full Sharp Service (all *GB-Lcm*). Both anthems are incomplete.

PETER LE HURAY/JOHN MOREHEN

Westbrook, Mike [Michael John David] (*b* High Wycombe, 21 March 1936). English jazz composer, pianist and bandleader. After working in an accountant's office and studying painting he took up music professionally; he was largely self-taught and has an empirical approach to composition. Around 1960 he organized a jazz workshop in Plymouth, where he wrote for a small ensemble that included John Surman, then in 1962 he moved to London. From that time he has written pieces for a number of his own ensembles: the Mike Westbrook Band (1962–72), the Mike Westbrook Concert Band (1967–71), the multimedia group Cosmic Circus (1970–72), the jazz-rock band Solid Gold Cadillac (1971–4), the Mike Westbrook Brass Band (established in 1973 to perform in the theatre and on television), the Mike Westbrook Orchestra (formed in 1974), A Little Westbrook Music (formed in 1982) and the Dance Band (formed in 1986).

Westbrook is particularly adept at providing jazz improvisers with stimulating themes and settings and then enfolding their contributions within a wider context. He draws his inspiration from a wide variety of styles, and his work (often written in collaboration with his wife, the singer Kate Westbrook) consists of highly personalized statements. Like Duke Ellington before him, he generally writes for specific musicians in his bands, notably the trumpeter Phil Minton and the saxophonist Chris Biscoe; this results in highly coloured music that is subject to few of the clichés of jazz composition. Among his best-known pieces are *Marching Song* (1969, Deram), *Metropolis* (1971, RCA), *Citadel/Room 315* (1975, RCA) and *The Cortege* (1982, Original). Westbrook has worked with other groups and also with a number of theatre companies, notably the National Theatre (1971), the Foco Novo Theatre Company (1985) and the Extemporary Dance Theatre (1986). In addition he has toured widely, appeared at numerous festivals and recorded extensively. From 1985 he has issued a quarterly newsletter, the *Smith's Academy Informer*. He was made an OBE in 1988.

CHARLES FOX/DIGBY FAIRWEATHER

West Coast jazz. A substyle of BOP, serving as a continuation of the preceding COOL JAZZ substyle among predominantly white musicians based in the Los Angeles area in the mid-1950s. Miles Davis's nonet recordings of 1949–50, collected together under the rubric of the 'Birth of the Cool', were particularly influential on the West Coast players. These were less distinguished improvisers than Davis, with the notable exception of Art Pepper, and therefore came to rely on a formulaic approach in which group arrangements tended to be more interesting than individual solos. The style also suffered from its reliance on a small circle of studio musicians (headed by Shorty Rogers), whose appearance in various combinations gave the music a certain sameness. Perhaps its most innovative contributions came in the small group performances involving Shelly Manne (on his album *The Three*, 1954, Cont.) and Jimmy Guiffre, who while working essentially in a bop-derived idiom, also explored ideas that prefigured some of the more delicate qualities of free jazz. Despite the fact that a few important black-American players, most notably Hampton Hawes, were deeply involved in the style, its consideration raises politically charged issues: it is difficult to disentangle West Coast jazz from the notoriously racist policies of the Hollywood studios, in which environment many of its practitioners worked.

BARRY KERNFELD

Westcote [Westcott], **Sebastian** (*b* Chumleigh, Devon, *c*1520; *d* London, 3–14 April 1582). English church musician and theatrical impresario. He signed his name 'Westcote'. In his will he gave 'Chimley in the countie of Devon' as his birthplace; however, as a Catholic layman he cannot be identified with the stipendiary priest of that name recorded at Chumleigh in about 1541. It is possible that he may have been the Sebastian Westcote who appears as a yeoman of the king's chamber in Henry VIII's household in 1545. In October 1547 he appears for certain as one of the six lay vicars-choral of St Paul's Cathedral, London; by Christmas 1548 he had achieved, in addition, appointment as Master of the Choristers, an office in which he had probably served since the death of John Redford in autumn 1547. Throughout his life he remained a stout adherent to traditional religious belief and it was not until 1 February 1554, following the restoration of Catholicism by Mary I, that he received formal appointment by the chapter as Master of the Choristers. In 1557 he made to the queen a New Year's gift of 'a book of ditties'.

The return to Protestantism under Elizabeth I left him open to censure for his obstinacy in imbuing his choristers a Catholic belief; he was soon in trouble with the episcopal authorities and finally, unable to subscribe to the Thirty-Eight Articles, he was deprived of his place as a vicar-choral in 1563 or 1564. His name appears on no subsequent list and it was as 'late one of the vicars' that he received in 1569 a bequest from his sometime colleague the composer William Whytbroke. Nevertheless, he retained his entirely separate appointment as Master of the Choristers and continued to exercise it until his death. He died in office in April 1582. During his long career a number of future composers received from him their initial musical education as choristers of St Paul's, including Peter Phillips, Robert Knight and Nicholas Carlton.

The successive vernacular Books of Common Prayer, in use from 1549 to 1553 and from 1559 onwards, reduced the number of services to be attended by cathedral choristers from ten per day to three. Westcote proved adept at using the spare time to mount theatrical productions – plays with music – presented by the boys. An early endeavour was presented before Princess Elizabeth at Hatfield House during the festivities following Christmas 1551 and, after her accession in 1558, dramatic performances at court by the 'Children of Paul's' made Westcote a firm favourite of the queen. Indeed, it is doubtless to her influence that he owed his relative immunity from persecution, despite his open and unrepentant papistry. From 1575 at the latest Westcote was presenting his choristers as a troupe of professional actors, performing to the public on a commercial basis in their own playhouse near to the cathedral. So gross and opportunistic an abuse of the talents and training of church choristers could only have been possible under the neglectful stewardship of the dean Alexander Nowell. Ironically, and irrespective of his capacities as a musician, it is for his second-string role as inadvertently a seminal figure in the London commercial theatre that Westcote is now most remembered.

ROGER BOWERS

Westenholz [Westenholtz]. German family of musicians.

(1) Barbara Lucietta Fricemelica [Frizemelica] **Westenholz** [née Affabili] (*b* Venice, 1725; *d* Ludwigslust, 20 Sept 1776). Italian soprano, first wife of (2) Carl August Friedrich Westenholz. She came to Germany with an Italian *buffo* troupe, was engaged in 1757 as a singer with the Schwerin Hofkapelle and in 1770 married Westenholz. According to Burney she had a very brilliant and pure voice with a wide range, sure intonation and extraordinary execution in allegro passages. She was among the most respected artists at the Ludwigslust court.

(2) Carl August Friedrich Westenholz (*b* Lauenburg, July 1736; *d* Ludwigslust, 24 Jan 1789). Conductor and composer. He went to school in Lübeck and in 1749 became a choirboy in the Mecklenburg-Schwerin Hofkapelle, where he was taught singing by A.C. Kunzen and the cello by F.X. Woschitka. In 1753, as a tenor, he was appointed *Kammersänger* to the court and at that time may have been C.P.E. Bach's pupil. He succeeded J.W. Hertel as Konzertmeister and director of the Hofkapelle when it was transferred to Ludwigslust in 1767. During his term as Kapellmeister (from 1770) the Kapelle continued to flourish in spite of adverse social conditions, having a reputation as one of the best German court orchestras until 1792.

As a composer of sacred cantatas in the Schwerin tradition of Kunzen and Hertel, Westenholz was among the best Mecklenburg composers at the end of the 18th century. Some of his works in this genre were written for the popular *concerts spirituels* introduced by Duke Friedrich, and his *Die Hirten bey der Krippe zu Bethlehem* (first performed in Hamburg, 1765), *Das Vertrauen auf Gott* (Schwerin, 1787) and *Die Auferstehung Jesu Christi* (first performed posthumously in Ludwigslust, 1805) have been praised as 'the beginning of a German national oratorio' (Schenk). His essentially transitional style was described by Schering as 'fluctuating between the old and the new' and as showing indecision between 'German simplicity and foreign brilliance in the solo parts', popular choral writing and Germanic melodic effusion.

WORKS

MSS in D-SWl unless otherwise stated

Sacred cants.: Die Hirten bey der Krippe zu Bethlehem (K.W. Ramler) (Riga, 1774); Die Auferstehung Jesu Christi (H.J. Tode), 1777; Das Vertrauen auf Gott (Tode), 1787; Ist Gott für mich, 4vv, orch, *D-Bsb*

Other sacred: Golgotha (orat); Ps li [after G. Allegri], with ov. for orch; Ps c, 4vv, orch; Ps ciii; 2 psalms, 1v, choir, orch, *B-Bc*; Mein Jesu süsse Seelenlust, O dass ich tausend Zungen hätte, Befiehl du deine Wege, chorales, 4vv, orch, *Bc*; 2 chorales, 4vv, *Bc*; many chorales, 4vv, some with insts

Secular vocal: Besinget, besinget, Mecklenburgs Flueren, cant. for birthday of Duchess Louise Friderike, 1769; 3 birthday serenatas, 1769–70; Vermählungs-Music, choir, orch, for wedding of Prince Friedrich Franz, 1775; Vermählungs-Music, choir, orch, for wedding of Princess Sophie Friederike; 7 arias to It. ops, S, insts; 6 arias, duet, solfeggi with bc, *D-ROu*; 5 arias, *B-Bc*; Der Herr hilft seinen Gesalbten, birthday serenata, choir, orch; 6 lieder (C.F. Gellert); several more compositions for court in ded. copies

Inst: Hpd Conc., 1775; Hpd Conc., Vc Conc., both *B-Bc*; Sonata, hpd, vn; Rondo alla polacca, hpd, *A-Wgm*; Sinfonia, kbd; org fugue, mentioned in *MCL*

(3) **Friedrich Carl Westenholz** (*b* Cramon, nr Schwerin, 12 Feb 1756; *d* Ludwigslust, 15 March 1802). Instrumentalist, illegitimate son of (2) Carl August Friedrich Westenholz. From 1774 to 1781 he was a cellist in the Hofkapelle at Ludwigslust; after leave for study in Lübeck he again joined the Kapelle (1783) and was responsible for teaching the piano to the duke's children. About 1789 he was also organist at the Ludwigslust Schlosskirche.

(4) **(Eleonore) Sophia Maria Westenholz** [née Fritscher] (*b* Neubrandenburg, 10 July 1759; *d* Ludwigslust, 4 Oct 1838). Pianist and composer, second wife of (2) Carl August Friedrich Westenholz. As a child she studied the piano and singing with the Schwerin court composer J.W. Hertel, and by the age of 16 she may have already been a singer in the Ludwigslust Hofkapelle. In 1777 she married Westenholz. Known by 1799 as the *Kapellmeisterin*, she remained active at the court for more than 40 years (she was pensioned in 1821) and made several concert tours in Germany.

J.F. Reichardt called Sophia Westenholz 'one of the leading female musicians in Europe'. She was admired as a singer, but especially praised as a piano virtuoso in the manner of C.P.E. Bach; the Weimar Hofkapellmeister E.W. Wolf, who dedicated six piano sonatas to her in 1783, and C.F. Cramer were among those who admired her art. Contemporaries also praised her virtuoso performances on the glass harmonica. She composed songs and piano pieces, which she performed at court. Among these the songs are the most noteworthy; they are chiefly in the style of J.A.P. Schulz and J.F. Reichardt, but the later ones imitate the then fashionable sentimental songs of F.H. Himmel, Righini and Pleyel.

WORKS

Vocal: 12 deutsche Lieder, op.4 (Berlin, 1806), 2 ed. B.G. Jackson (Fayetteville, AR, 1987); Gesänge aus Wilhelm Tell (Leipzig, 1807), doubtful; Liebe, nur Liebe, lied, 1811, *D-SWl*; Der Bund (F. von Matthisson), S, 2 vn, va, b, *B-Bc*; 2 arias with orch, *Bc*; 11 lieder, 2 songs, 1 aria with obbl fl, 2 choruses, arr. of F.B. Beneken: Wie sie so sanft ruhen, 4vv, all *Bc*

Kbd: Rondo, op.1 (Berlin, 1806); Thème avec 10 variations, op.2 (Berlin, 1806); Sonata, 4 hands, op.3 (Berlin, 1806); 2 marches, 2 sonatas, *B-Bc*; Sonata, *D-SWl*

(5) **Friedrich Westenholz** (*b* Ludwigslust, 28 May 1778; *d* Berlin, 12 March 1840). Oboist and composer, son of (2) Carl August Friedrich and (4) Sophia Maria Westenholz. He received his first musical training from his mother and later studied with J.F. Braun. He was a chamber musician in the Berlin Hofkapelle, from which he retired in 1828 with a reputation as an excellent oboist. He also composed instrumental music and songs. His brother or half-brother, Wilhelm Franz Westenholz (*d* 1830), was a bassoonist in the Berlin Hofkapelle from 1813 until 1824.

WORKS

all published in Berlin, n.d.

Der König Ankaös, 1v, gui, op.1; Sinfonie concertante, fl, ob, orch, op.6; Sinfonie concertante, bn, ob, orch, op.7; 2 Duos, vn, va; 2 Divertissements, no.1, fl, gui, no.2, vn, gui; Rondo alla polacca, pf; Polonaise favorite, pf; Favorit-Walzer, pf

(6) **Carl Ludwig Cornelius Westenholz** (*b* Ludwigslust, 13 Jan 1788; *d* Ludwigslust, 4 Feb 1854). Pianist and composer, son of (2) Carl August Friedrich and (4) Sophia Maria Westenholz. He was a violinist from 1809 to 1854 in the Ludwigslust Hofkapelle and moved to Schwerin with it in 1837. He also appeared as an excellent pianist at court, after 1813 gradually supplanting his mother there. The Landesbibliothek Mecklenburg-Vorpommern, Schwerin, has in manuscript several keyboard pieces and a divertimento for harpsichord, violin and bass by him.

DIETER HÄRTWIG

Westerberg, Stig (Evald Börje) (*b* Malmö, 26 Nov 1918; *d* 1 July 1999). Swedish conductor and pianist. He studied at the Swedish Royal Academy of Music, 1937–42, and when the war ended took further lessons in Switzerland, with Kletzki in Paris, and in the USA. He was a répétiteur at the Stockholm Royal Theatre, 1943–6, and after a short period at the Oscarsteater in Stockholm, became conductor of the Gävleborg SO until 1953, when he returned to Stockholm as conductor at the Royal Theatre. In 1957 he was appointed principal conductor of the Swedish RSO, which he raised to an international standard; he toured as a guest conductor in Europe and in the USSR. He was an excellent accompanist (making many records in this capacity), and in 1969 began to teach conducting at the Swedish Royal Academy, where he was appointed a professor in 1971. Few conductors did so much for Swedish music: he gave the premières of over 80 Swedish works and recorded much of the Swedish repertory. A precise and elegant technique made him skilled in contemporary works, but he had an extensive repertory covering other periods and was admired for his interpretations of Mahler and other late Romantic composers.

HENRIK KARLSSON

Westergaard, Peter (Talbot) (*b* Champaign, IL, 28 May 1931). American composer, theorist and opera producer. He studied at Harvard University (1949–53), the Aspen Music Festival, the Paris Conservatoire (1951–3) and Princeton University (1954–6); his principal teachers

included Piston, Milhaud, Sessions, Babbitt, Cone and Fortner. Prior to his appointment to the Princeton music department in 1968, he was a member of the board of ISCM (1961–2), the American Society of University Composers (1965–7) and *Perspectives of New Music* (from 1966). As well as serving as department chair at Princeton (1974–8; 1983–6), he has conducted the University Orchestra (1968–73) and directed the University Opera Theater (from 1970), which gave the American stage première of *Leonore* (the original version of *Fidelio*) under his direction in 1982. He has also been active as co-founder and director of the June Opera Festival of New Jersey (1983–6).

Westergaard's music employs a highly chromatic language within clear, polished and transparent textures. To achieve this clarity, he divides 12-note sets into subsets of related pitch cells which are expressed in unfolding polyphony. The syntax that arises from these pitch matrices, while non-diatonic, creates harmonic centres that act as tonal anchors. Rather than simply defining his music harmonically, these centres also carry structural and expressive weight. In his setting of *The Tempest* (1970–90), for example, pitch subsets function in a similar manner to leitmotifs: the hexachord introduced when Prospero sings of his pre-exile spiritual studies ('Being transported and rapt in secret studies') returns as an orchestral subtext in the harp and vibraphone during the finale of Act I, underlining the power of the spell imposed by Prospero on the young Ferdinand. Although modern in language, the work also makes effective use of 18th- and 19th-century operatic set pieces (e.g. arias, ensembles and choruses) and paces these elements in ways familiar from Classical and Romantic styles. Despite its modest forces (soloists, small chorus and chamber orchestra), *The Tempest* sustains a powerful dramatic line more in the tradition of grand opera.

Westergaard's mastery of text setting is apparent in *The Tempest*, as well as in other vocal works. Always following the most natural declamation of the spoken word, his rhythmic articulation makes clear diction easy for the performer to achieve. Such sensitivity to text is apparent in every aspect of his music. In his settings of W.B. Yeats's poems *Byzantium* and *Sailing to Byzantium*, a mixed percussion ensemble accompanies the baritone voice. This instrumentation establishes a general colour that resonates with recurring poetic images in the text ('gold mosaic', '... Grecian goldsmiths make/Of hammered gold and gold enamelling') and captures specific lines of text through new percussion techniques; rapid pianissimo vibraphone and marimba figurations played with the wooden end of the mallet, for example, describe the magic 'Flame that no faggot feeds ... flames begotten of flame'.

Westergaard's work as a theorist has been primarily concerned with two areas: the development of a syntax for tonal music which encompasses both time and pitch; and methods of constructing a polyphony in 12-note music which controls both the intervals between consecutive notes within a single line, and the intervals between simultaneously sounding notes in two or more lines. In all aspects of his work, whether as a composer, theorist, opera producer, translator or teacher, Westergaard has aimed to present complex artistic and intellectual issues in straightforward and unambiguous manners. This concern for clarity imparts a significance to his work that goes beyond the relatively small size of his compositional output.

WORKS
(selective list)

Stage: Charivari (chbr op, 1, Westergaard), Cambridge, MA, May 1953; Mr and Mrs Discobbolos (chbr op, 2, after E. Lear), New York, 21 March 1966; The Tempest (op, 3, Westergaard, after W. Shakespeare), 1970–90, Lawrenceville, NJ, 1992; Chicken-Little (children's op, Westergaard), 1997

Vocal: Cantata I 'The Plot Against the Giant' (W. Stevens), female vv, cl, vc, hp, 1956; Cantata II 'A Refusal to Mourn the Death, by Fire, of a Child in London' (D. Thomas), B, 10 insts, 1958; Cantata III 'Leda and the Swan' (W.B. Yeats), Mez, cl, va, vib, mar, 1961; Cantata IV 'Spring and Fall: to a Young Child' (G.M. Hopkins), S, 5 insts, 1964; There was a little man (trad.), S, vn, 1979; Ariel Music (W. Shakespeare), S, 10 insts, 1987 [from The Tempest]; Ode (B. Jonson), S, fl, cl, vn, va, hp, 1989; anyone lived in a pretty how town (e.e. cummings), SATB, 1997; Cantata V '"Byzantium" and "Sailing to Byzantium"' (Yeats), Bar, perc qt, 1997; There was a lady loved a sow (trad.), 1997; Cantata VI 'To the Dark Lady' (Shakespeare), S, Mez, T, Bar, perc duo, 1999

MICHAEL J. PRATT

Westergaard, Svend (*b* Copenhagen, 8 Oct 1922; *d* Copenhagen, 22 June 1988). Danish composer. After completing a course in business studies in 1943, he entered the Royal Danish Conservatory, Copenhagen, where he obtained a degree as an organist (1945). He later graduated in music theory and history, and as an aural trainer and theory teacher; in addition, he studied composition with Høffding, continuing his studies with Petrassi in Rome (1950–51). Westergaard was music critic of the daily paper *Land og folk* from 1945 to 1952. In 1951 he was attached to the Royal Danish Conservatory as a teacher, and in 1965 he was appointed professor of theory; he held the post of director between 1967 and 1971. He published a *Harmonilaere* (Copenhagen, 1961).

One of the few Danish composers of his generation uninfluenced by the new musical developments of the 1950s and 60s, Westergaard employed a unified style in which tonality and structure are handled in a manner analogous with late Bartók. His output is small, but of consistent quality. In his melody there are points of resemblance with Shostakovich, although the melodic development has a Nordic character close to Nielsen and Sibelius. Some of Westergaard's larger works (such as the Sinfonia, the Cello Concerto and the String Quartet) have a structural unity attained through the development of a few nuclear motifs – often compounded of small intervals – which are exposed in varied tonal and rhythmic relationships. The technique is, to some extent, an evolution from the music of Bentzon and Holmboe, but Westergaard's polyphonic complexity and rhythmic differentiation are rare in Danish music.

JENS BRINCKER

Westerhoff, Christian Wilhelm (*b* Osnabrück, 1763; *d* Bückeburg, 26 Jan 1806). German violinist and composer. His first engagement was as an instrumentalist and composer at the Burgsteinfurt court (1786–90), where Count Ludwig of Bentheim-Steinfurt, in his diary, acknowledged Westerhoff's facility as a composer. He then spent several years on concert tours, appearing in The Hague in 1793. Before taking up an appointment in about 1795 as Konzertmeister at the Schaumburg-Lippe court at Bückeburg he made intermittent appearances in Osnabrück. Reviews in the *Allgemeine musikalische Zeitung* testify to his reputation as a performer and composer, and Gerber's *Neues Lexikon* refers to him as 'a much-praised vocal and instrumental composer, Konzertmeister and fine violinist and viola player'.

Westerhoff's instrumental works, particularly the concertos written either for himself (e.g. the three viola concertos) or for such prominent instrumentalists as the cellist Rackermann, the clarinettist Pierre Ange Wagny and the flautist Weckesek, contributed to the considerable musical renown of the Bückeburg court. Westerhoff's concertos and trios endeared themselves to performers for their effective writing, though of relatively simple execution. The Viola Concerto in C, for example, is idiomatically conceived for the instrument without being unduly demanding. The reported *Simphonie concertante* for clarinet and bassoon (*c*1793) would be one of the earlier German contributions to the genre. A curiosity noted by Gerber is the *Musik zu Ehren der Kuhpocken Einimpfung* ('Music to commemorate the smallpox vaccination', 1801).

Westerhoff's father, Heinrich Philipp Westerhoff (*fl* *c*1760–85), moved from Quakenbrück to Osnabrück in 1763 as a town musician; he composed a *Pastorella auf den Geburtstag Sr. Kgl. Hoheit* (1767) and a Vorspiel, *Die erhörten Wünsche* (1778). From 1784 he was assisted by his eldest son, the cellist Franz Westerhoff (*b* *c*1760), a city musician at Osnabrück until 1814 and composer of a cello concerto (1803).

WORKS

ANDREW D. McCREDIE

Westerhout, Nicola [Niccolò] **van** (*b* Mola di Bari, 17 Dec 1857; *d* Naples, 21 Aug 1898). Italian composer. He was born into a musical family of Dutch origin that had been settled in and around Bari for more than a century. He first studied with his father or his grandfather and from 1876 at the Naples Conservatory, where he was a pupil of D'Arienzo, De Giosa and Lauro Rossi; he also attended courses in aesthetics. He became a well-known pianist. Although not in sympathy with the academicism of contemporary Neapolitan musical culture, he became harmony teacher at the Naples Conservatory in 1897. His opera *Doña Flor* was written for the inauguration of the Teatro van Westerhout, Mola, in 1896. As a composer he was best known for his many songs and piano pieces, which combine French elegance and a tendency towards classicism, modelled on Martucci's style.

WORKS

Ops: Cimbelino (dramma lirico, 4, E. Golisciani, after W. Shakespeare), private perf., Naples, 1887; Rome, Argentina, 7 April 1892 [? rev. of earlier work, Una notte a Venezia; see *SchmidlD*]; Fortunio (Scalinger), Milan, 16 May 1895, vs (Milan, n.d.); Doña Flor (A. Colautti), Mola, Westerhout, 18 April 1896, vs (Milan, n.d.); Colomba (Colautti), Naples, 27 March 1923; Tilde, unperf.

SERGIO MARTINOTTI

Westerkamp, Hildegard (*b* Osnabrück, 8 April 1946). Canadian composer, teacher and soundscape researcher, of German origin. She emigrated to Canada in 1968 and settled in Vancouver where she studied at the University of British Columbia (BMus 1972) and at the Department of Communication, Simon Fraser University (MA 1988).

She began to teach courses in acoustic communication at Simon Fraser in 1982. In 1972 she married the Canadian poet and playwright Norbert Ruebsaat, with whom she has collaborated on a number of projects. Her contact (*c*1969) with R. Murray Schafer through the World Soundscape Project (WSP), a research group at Simon Fraser University dedicated to exploring the sonic landscape, has been very important to her creative work. She joined the WSP as a research assistant in 1973. In 1991 she began the *Soundscape Newsletter*, which was later adopted as the official publication of the World Forum for Acoustic Ecology, an international, interdisciplinary organization formed in 1993. Other important influences have been Pauline Oliveros and fellow WSP member, composer Barry Truax.

As a composer she works primarily with the medium of tape (sometimes in conjunction with live instruments or voices), combining, manipulating and/or processing environmental sounds in ingenious ways. The result is a body of work which possesses a high degree of artistic integrity and which often reflects the WSP's sociological message: the need to listen critically to our acoustic environment. Travel to India, Brazil, Japan and Europe in the early 1990s has had a significant influence upon her work. She divides her output into compositions, sound documents (the audio equivalent of a film documentary, but without narration), and composed environments; the last as a genre lies somewhere between the other two categories. Westerkamp's writings include *ssh … Noise Handbook* (Vancouver, 1974) and *Listening and Soundmaking: a Study of Music-as-Environment* (MA thesis).

WORKS

KIRK MACKENZIE

Westerlinck, Wilfried (*b* Leuven, 3 Oct 1945). Belgian composer. He studied at the Antwerp and Brussels conservatories with Legley, Verbesselt and Sternefeld. He also followed courses with Markevich in Monte Carlo. Since 1968 he has been working for BRTN Radio 3, where he is now head of the chamber music department, and he taught analysis at the Antwerp Conservatory (1970–83). He became composer in residence at the 1983 International Brass Quintet Festival in Baltimore and at the 1995 'I Fiamminghi in Campo' festival in Antwerp; on both occasions several of his works received their first performance. He won several awards in Belgium of which the most important were the Tenuto Prize (1972) for his *Metamorphose* for orchestra and his *Landschappen I* for wind quintet. In 1985 he received the Eugene Baie Prize for his output as a whole.

The roots of Westerlinck's small output lie in the first part of the 20th century, yet he uses a contemporary musical language. From the beginning he has admired the structural beauty of Bartók's string quartets and the omnipresent colour of Messiaen's music. His use of diverse and subtle timbres can be seen in his *Landschappen* series of 1977–83. His compositions are often inspired by personal experiences and visual impressions, and their poetic power is based on development and repetition, with harmony being used to add colour and atmosphere to the melodic turns of the phrase. Rather than seeking for hidden meanings and referential games, Westerlinck's music tends towards a sensuousness that puts him at some distance from the avant-garde or postmodern movements.

Western swing. A style of COUNTRY MUSIC originating largely in the fiddle and guitar bands in Texas during the 1920s. Such groups regularly played traditional frontier dance music at country dances, but they were more innovative than country bands in the Southeast: they were eclectic in their repertory and improvised like jazz bands, from whom they borrowed freely. An early group, the Light Crust Doughboys of Fort Worth, were of the fiddle and guitar tradition but also performed current popular songs, blues and jazz. After 1934 two former members popularized western swing. The singer Milton Brown led one of the most popular country string bands in the Southwest, the Musical Brownies of Fort Worth. Bob Wills formed the Texas Playboys, which performed in Tulsa (1934–42) and later in California and elsewhere; he was a traditional country fiddler, but receptive to innovative and jazz-oriented musicians. The Playboys began as a fiddle-dominated string band, but soon added drums, piano, electric guitars and wind, and became very similar to the big popular swing bands of the 1930s.

The term 'western swing' was not used widely until after World War II, when the bandleader Spade Cooley billed himself as the 'King of Western Swing'. Similar bands led by Tex Williams (1917–85; a former singer with Cooley's band), Hank Penny (*b* 1918), and to a lesser extent Ray Whitley (1901–79) made California the new centre of the style in the 1940s. The western swing bands there, and elsewhere in the USA, influenced the mainstream of country music in the use of drums, walking bass patterns and electric instruments. Western swing experienced a revival in the early 1970s, largely through the performances of such musicians as Merle Haggard, Red Steagall and his Coleman County Cowboys, and, above all, the bands Asleep at the Wheel (led by the guitarist Ray Benson) and Alvin Crow and the Pleasant Valley Boys.

BILL C. MALONE

Western Wind. The name of three early Tudor four-voice masses, one each by Taverner, Tye and Sheppard. All are built on a cantus firmus that somewhat resembles a melody with words beginning 'Westron wynde' found in *GB-Lbl* Roy. App.58, f.5 (ex.1). The melody may be a single voice-part from a courtly polyphonic song, or a popular tune that was sung as it stands: the words certainly seem popular in character. Ex.2, from Taverner's mass, shows the melody used in the *Western Wind* masses. This may have been re-cast from the tune shown in ex.1 to make it more suitable for use as a cantus firmus; it

Ex.1 *GB-Lbl* Roy.App.58, f.5

Ex.2 John Taverner: *Western Wind* Mass (*GB-Ob* Mus.e.1, f.68)

seems not to be a polyphonic voice that could accompany the melody in ex.1.

Taverner, Tye and Sheppard all repeat the cantus firmus throughout their masses, making small rhythmic changes to accommodate new sets of words, and introducing differences of melodic detail at cadences. All three composers sometimes omit the third phrase of the cantus firmus. Whereas Taverner's mass often has the melody in the treble, but sometimes in tenor or bass, Tye's restricts it to the mean (beginning on D), and Sheppard's nearly always has it in the treble. Various two- and three-part scorings are exploited in addition to four-part writing.

The use of a secular cantus firmus, though common on the Continent, was apparently an innovation in the Tudor mass. No close parallel exists even there, however, for the type of variation technique employed in the *Western Wind* masses. A connection has been suggested, however, with the use of well-known secular tunes in Lutheran sacred music. Overt Lutheran influence on liturgy and worship in England is thought to have been possible in the late 1530s and early 1540s, and the masses may date from that time, that of Taverner (the oldest composer) probably being the earliest.

HUGH BENHAM

West gallery music. *See* GALLERY MUSIC.

Westhoff, Johann Paul von (*b* Dresden, 1656; *d* Weimar, bur. 17 April 1705). German composer and violinist. He was given a good education and by 1671 was tutor to the two Princes of Saxony. Like his father, Friedrich von Westhoff, he became a member of the Dresden Hofkapelle, where he served from 1674 to 1697. During these years he made journeys throughout Europe; he played before Louis XIV in Paris in 1682. After a short period as a professor of modern languages at the University of Wittenberg, he became in 1699 chamber secretary, chamber musician and teacher of French and Italian at the court at Weimar. Together with Biber and J.J. Walther he was held by his contemporaries to be one of the leading German violinists of his day. His left-hand technique in particular was highly developed, and he used double stopping up to the fourth position. His music for unaccompanied violin – the suite, which is the earliest piece in this medium in more than one movement, and the short four-movement partitas, discovered by Várnai – offer the most complete picture of his art. Their imaginative polyphony and the severe themes of the partitas are typical of German violin music. On the other hand the sonatas with continuo are certainly influenced by the Italian style.

Westlake, Nigel (*b* Perth, 6 Sept 1958). Australian composer and clarinettist. Son of Donald Westlake, a former principal clarinettist of the Sydney SO, he studied the clarinet with his father. Among his composition teachers were Richard Meale, Richard Mills and Theo Lovendie. Noted for his breath control and for the strength of his tone, Westlake has led his own Magic Puddin' Band (1980–83) and performed with ensembles including the Australia Ensemble (1987–92), resident at the University of New South Wales, and Attacca (1992), guitarist John Williams's group. After making a special study of the bass clarinet with Harry Sparnaay in the Netherlands, he often used the instrument in his springy, energetic compositions, quickly making a reputation for himself with his music for theatre, film, concert hall, circus, television and radio. He served as radio composer-in-residence for the Australian Broadcasting Corporation (1987) and was awarded the gold medal for best original music at the 1988 New York International Radio Festival. His reputation as a concert composer initially rested on such works as *Onomatopoeia* for bass clarinet and digital delay (1984), *Omphalo Centric Lecture* for four marimbas and percussion (1984) and *Fabian Theory* for marimba and digital delay (1987), compositions that feature minimalist and post-minimalist perpetuations of impulse, and intuitive melodic patterning. *Entomology* (1988) and *Refractions at Summercloud Bay* (1989), more extended works for mixed ensembles, display a greater variety of pulse and mood. *Antarctica* (1991) and *Babe* (1995) number among his film scores.

ROGER COVELL

Westminster. American classical record company, founded in 1949 as the Westminster Recording Co. by James Grayson, Michael Naida and Henry Gage. Recordings made in New York and Vienna were issued in April 1950. Henry Swoboda conducted many of them, using the Vienna SO's own studio. By the end of the first year the label had established a solid reputation for quality of performance and engineering with Schubert's 'Trout' Quintet, Haydn's 'Military' Symphony and Bach's Mass in B minor, the last two conducted by Hermann Scherchen, who was identified with the label more than any other artist. Handel's *Messiah* and Bach's *St Matthew Passion* under Scherchen were early examples of Baroque performing practice that foreshadowed a later approach to early music. In 1951 Kurt List became the record producer.

The label penetrated the French market by exchange of masters with Selmer (later called Ducretet-Thomson) from 1952 and Véga from 1957. The label entered the British market by joint productions with Nixa from 1953. Some discs were also licensed from Erato, Argo, Melodiya and other firms. Success brought celebrated conductors to the label: Rodzinski, Leinsdorf (the complete Mozart symphonies), Boult, Monteux and Knappertsbusch. Badura-Skoda and Demus, singly and as a piano duo, and the Vienna Konzerthaus and Barylli quartets recorded regularly, and Julian Bream and Daniel Barenboim made their first records for the label. Stereo recording began in 1956, marketed first on open-reel tape and later on LP discs. Music of the Baroque and Classical periods dominated the catalogue, but all periods were broadly represented. The original owners sold their interest in December 1959,

but the new owners sold the company to ABC Records a year and a half later. Recording continued in Vienna and elsewhere until 1965. The ABC labels were sold to MCA in 1979 and a new series of recordings as well as reissues appeared on the Westminster Gold label. MCA (USA), MCA Victor (Japan) and Millennium (UK) have reissued some items on CD.

JEROME F. WEBER

Westminster Choir College. School of music in Princeton, New Jersey. It had its origins in a 60-voice choir at Dayton (Ohio) Westminster Church, formed in 1920 by John Finlay Williamson; in 1926 he began to offer training for music directors of Protestant churches. The school moved to Ithaca, New York, in 1929 and to Princeton in 1932. It merged with Rider University in 1991. Westminster Choir College has influenced American choral art through performances, recordings, broadcasts and publications. It offers a specialized programme, with strong emphasis on choral and sacred music. Enrolment in 1996 was approximately 400.

Westmorland, 11th Earl of. *See* BURGHERSH.

Westphal, Rudolf (Georg Hermann) (*b* Obernkirchen, 3 July 1826; *d* Stadthagen, 10 July 1892). German writer on ancient Greek music. He studied at Marburg and held posts at Breslau (1857–62) and Moscow (1875–81), but for most of his life worked privately. Though he was trained as a comparative philologist, he devoted himself mainly to the study of Greek music, on which he wrote prolifically, his energetic and fertile mind ranging over the whole field. If he sometimes went beyond the evidence, as in his views about Greek polyphony, he was capable of changing his opinions. He stated and restated his views in a whole series of publications, but the most comprehensive treatment was given (in collaboration with August Rossbach) in *Theorie der musischen Künste der Hellenen* (1885–9). He also edited and translated the treatises of Aristoxenus and Pseudo-Plutarch (1866). He had a special interest in rhythm and metre, basing his theories on the work of Aristoxenus. Metrical studies have changed direction in the 20th century, and most of his theories in this area have fallen out of fashion.

R.P. WINNINGTON-INGRAM/THOMAS J. MATHIESEN

Westrup, Sir **Jack Allan** (*b* London, 26 July 1904; *d* Headley, Hants., 21 April 1975). English musicologist and conductor. He was educated at Dulwich College (1917–22) and at Balliol College, Oxford, where he read classics (BA and BMus 1926); he was musical director of the Oxford Opera Club (1927). Between 1926 and 1928 he collected noëls in Provence before returning to Dulwich College for six years as a classics master; during this time he conducted at the London Opera Festival (1929–30). He subsequently joined the *Daily Telegraph* as a music critic (1934–9) and worked as editor of the *Monthly Musical Record* (1933–45), as a lecturer at the RAM (1938–40) and as a teacher at St Paul's School (1939–41). In 1941 he was appointed lecturer in music at King's College, Newcastle upon Tyne, where he conducted the Newcastle Bach Choir; in 1944 he took the Peyton and Barber Chair of Music at Birmingham. In 1946 the University of Oxford awarded him the honorary DMus, and in 1947 he returned to Oxford as Heather Professor of Music. He remained there until 1971, guiding his faculty through its organization of undergraduate music teaching. He was again musical director of the Oxford Opera Club (1947–62), and conductor of the Oxford University Orchestra (1954–63), the Oxford Bach Choir and the Oxford Orchestral Society (1970–71).

Westrup became chairman of the editorial board of the *New Oxford History of Music* in 1947, and editor of *Music & Letters* in 1959. He was elected a Fellow of the British Academy in 1954 and knighted in 1961. He served as president of the Royal Musical Association (1958–63) and the Royal College of Organists (1964–6). In 1971–2 he was Master of the Worshipful Company of Musicians. He was chairman of the Purcell Society committee from 1957 until his death.

Westrup's research ranged widely from medieval subjects to the mid-20th century, with particular emphasis on music of the 17th and 19th centuries, opera and English music. His first scholarly articles appeared soon after he graduated, and while teaching at Dulwich he contributed to the second edition of the *Oxford History of Music*. His first book, *Purcell* (1937), is a thorough study which, with regular revision, long remained definitive. Smaller biographies of Handel (1938) and Liszt (1940) followed. His *Sharps and Flats* (1940), a collection of his newspaper and periodical articles, re-examines the familiar, makes provocative conjectures, and espouses the unfamiliar. Westrup's concern for an effective application of historical method to the study of music is expressed in *An Introduction to Musical History* (1955). An extensive study *Music and Society under the Stuarts*, intended to draw together a lifetime's work, remained unfinished at his death.

Westrup began his work as an editor while still an undergraduate; his edition of Monteverdi's *Orfeo* for its first complete stage performance in modern times, at Oxford in 1925, initiated the revival of interest in Monteverdi and the early Baroque period. His edition of Monteverdi's *L'incoronazione di Poppea* was produced

at Oxford in 1927, and his edition of Locke's and Christopher Gibbons's *Cupid and Death* in London in 1929. For the Oxford Opera Club he conducted annual productions including the first performance of Wellesz's *Incognita* and the first stage performances in England of Stravinsky's *Oedipus rex* and Ravel's *L'enfant et les sortilèges*; a number of these productions, notably that of Berlioz's *Les troyens*, introduced masterpieces which were then unfamiliar. He edited *The Masque in Timon of Athens* for the Purcell Society (1975). Westrup's first compositions were published while he was an undergraduate. He continued to compose when he became involved in teaching and writing; his works include Three Shakespeare Songs (1948), several anthems, the eight-part *When Israel came out of Egypt* (1940), a divertimento for bassoon, cello and piano (1948) and a passacaglia for orchestra (1946).

PETER DENNISON/R

West Syrian rite, music of the. *See* SYRIAN CHURCH MUSIC.

Wettergren [Pålson-Wettergren], **Gertrud** (*b* Eslöv, Malmö, 17 Feb 1897; *d* Stockholm, 26 Nov 1991). Swedish contralto. She studied in Stockholm, and made her début there in 1922 as Cherubino. Engaged at the Stockholm Royal Opera for more than 25 years, she also sang all over Europe and in the USA, making her Metropolitan Opera début in 1935 as Amneris, and her Chicago début the following year as Carmen. First heard at Covent Garden in 1936 as Amneris, she returned in 1939 as Azucena, a performance preserved on disc. Her large repertory included several Wagner roles – Brangäne, Venus, Fricka – as well as Delilah, Mignon, Herodias (*Salome*), Marina (*Boris Godunov*) and Marfa (*Khovanshchina*). She also appeared in many Swedish operas, including Peterson-Berger's *Adils och Elisiv* and *Domedagsprofeterna*, Rosenberg's *Resa till Amerika*, Atterberg's *Bäckahästen* and Gunnar de Frumerie's *Singoalla*, in which she created the title role in 1940. She took part in the Swedish première of *Peter Grimes* (1945) and continued to appear in Stockholm until 1952. Her voice, a true contralto, was firm and well projected, while her strong personality made her a fine interpreter of such roles as Carmen or Delilah, whose arias she recorded. Her autobiography *Mitt ödes stjärna* ('My lucky star') was published in Stockholm in 1949.

ELIZABETH FORBES

Wetz, Richard (*b* Gleiwitz, upper Silesia [now Gliwice, Poland], 26 Feb 1875; *d* Erfurt, 16 Jan 1935). German composer and teacher. He studied at the Leipzig Conservatory but soon moved to Munich, where he studied privately with Thuille (1899–1900) and attended lectures at the university. After two years as Kapellmeister in the theatres of Stralsund and Barmen he returned to Leipzig. In 1906 he moved permanently to Erfurt, where he took over the direction of the Musikverein and the Singakademie. He taught composition and music history at the Erfurt Conservatory (1911–14) and at the Weimar Musikhochschule (after 1916). In 1920 he was made professor and in 1928 he was elected, alongside Stravinsky, to the Berlin Akademie der Künste.

Wetz's earlier music was strongly influenced by Wagner and Liszt, but his initial encounter with Bruckner during the first years of the 20th century caused him to modify his outlook and adopt an increasingly conservative position within German musical life. The First Symphony

(1914–17) manifests considerable indebtedness to Bruckner coupled with a richly contrapuntal musical language, a style which is further refined in his later symphonic works. During the 1920s Wetz remained defiantly aloof from modern developments, pouring much of his creative energy into two large-scale and highly Romantic choral works, the Requiem and the *Weinachtsoratorio*. At the end of his life Wetz enjoyed the patronage of the Nazis, though despite the efforts of such influential musicians as Peter Raabe, President of the Reichsmusikkammer, who established the Richard-Wetz Gesellschaft in 1943, his work was performed very rarely and has only been revived infrequently since World War II.

CHARLOTTE ERWIN

Wetzler, Hermann (Hans) (*b* Frankfurt, 8 Sept 1870; *d* New York, 29 May 1943). American conductor, composer and organist. Born of American parents, he spent his childhood in the USA, but went in 1882 to the city of his birth for his musical education, studying at the Hoch Conservatory, with Clara Schumann among others. He then settled in New York, where from 1897 to 1901 he held the post of organist at Old Trinity Church. In 1903 he organized the Wetzler Symphony Concerts, as the conductor of which Richard Strauss appeared for the first time in the USA. Two years later Wetzler returned to Germany, holding posts as an operatic conductor at Hamburg, Riga, Halle, Lübeck and Cologne. After 1923 he had no permanent post but appeared as a guest conductor with various important orchestras, such as the Royal Philharmonic societies of London and Berlin, and the Gürzenich orchestra of Cologne. He retired to Ascona, Switzerland, but in the end returned to New York.

Wetzler's compositions are rooted in the post-Romantic style; he was particularly influenced by Richard Strauss. His virtuoso treatment of the modern orchestra and preference for symphonic programme music are evident in the Symphonic Fantasy, *Visionen*, the *Symphonie concertante* for violin and orchestra, and the symphonic legend *Assisi*, which among 84 works submitted was awarded a prize of $1000 by the Chicago North Shore Festival Association. Although his chief work was operatic conducting, he wrote only one opera, *Die baskische Venus*. He also composed chamber music, songs and choruses.

WORKS
(*selective list*)

Stage: As You Like It (incid music, W. Shakespeare), op.7, 1917; Die baskische Venus (op, P. Mérimée), op.14, 1928

Chbr works, incl. Str Qt, op.18, 1937

Vocal works, incl. Magnificat, op.16, S, boys'/women's vv, org, 1936; choruses and songs

KARL GEIRINGER/MICHAEL MECKNA

Weutz, Giulio. *See* VIOZZI, GIULIO.

Wexford. Town and port in south-east Ireland. It attained international musical fame in October 1951, when a festival was founded by T.J. Walsh, a local doctor with a passion for opera. Walsh remained artistic director until 1966; after the first year when Balfe's *Rose of Castille* was given at the Theatre Royal, the repertory (with the annual number of operas growing from one to three) consisted almost entirely of 19th-century Italian works: Rossini, Donizetti, Bellini and early Verdi. French operas were sometimes included, but usually sung in Italian. An exception was Massenet's *Don Quichotte*, conducted by Albert Rosen, who took part in over 20 festivals between 1965 and 1994. Walsh had a special aptitude for discovering young singers: among those who appeared at Wexford early in their careers were Mirella Freni, Graziella Sciutti, Janet Baker, Fiorenza Cossotto, Alain Vanzo and Giacomo Aragall.

Brian Dickie, artistic director from 1967 to 1973, extended the repertory back to Haydn and Mozart, and forward to Janáček and Britten. He also billed French operas by Delibes, Gounod and Bizet, mostly conducted by David Lloyd Jones, and two Russian works: Glinka's *A Life for the Tsar*, in which the Finnish bass Matti Salminen made his West European début as Ivan Susanin, and Prokofiev's *The Gambler*. Thomson Smillie (1974–8) pushed the repertory yet further back to Cavalli, while consolidating the French element with Lalo and more Massenet. Adrian Slack (1979–81) found a new seam to mine in *verismo* composers such as Montemezzi and Wolf-Ferrari.

During Elaine Padmore's directorship (1982–94) Wexford flourished as never before. The theatre auditorium and backstage area were enlarged and the festival extended to 18 days, while the repertory also expanded: Rossini, Donizetti and Bellini still found a place, as did French opera, from Boieldieu and Hérold to Thomas (*Mignon*) and more little-known Massenet. Padmore disinterred works by Alfano, Catalini, Giordano and Mascagni and presented German operas from Marschner and Humperdinck to Goetz and Weill. Her final festival consisted of Wagner's *Das Liebesverbot*, Leoncavallo's *La bohème* and Rubinstein's *The Demon*, an archetypal Wexford programme. She introduced new singers (Cynthia Clarey, Bruce Ford, Raúl Giménez, Sergey Leiferkus), conductors (Yan Pascal Tortelier) and directors (Declan Donnellan, Francesca Zambello, Lucy Bailey). Luigi Ferrari succeeded Padmore as the festival's director in 1995.

ELIZABETH FORBES

Weyer. *See* WIER.

Weykmann, Matthias. *See* WECKMANN, MATTHIAS.

Weynert, Antoni. *See* WEINERT, ANTONI.

Weyse, Christoph Ernst Friedrich (*b* Altona, nr Hamburg, 5 March 1774; *d* Copenhagen, 8 Oct 1842). Danish composer. He was sent to Copenhagen in 1789 to study with J.A.P. Schulz, musical director of the Kongelige Teater and remained in the city for the rest of his life. He served as organist firstly at the Reformed Church from 1792, and then from 1805 at Copenhagen Cathedral. In 1816 he was made titular professor at the University of Copenhagen (where he was given an honorary doctorate in 1842) and in 1819 became court composer with the obligation to produce cantatas and operas for the Kongelige Teater. He was known as an excellent pianist, in his youth especially for his performances of Mozart's piano concertos, and he particularly distinguished himself at improvisation, both at the piano and the organ. He was esteemed for his artistic taste in music and other matters, and in his later years he was the leading authority in Copenhagen's musical life. He had an unhappy love affair in 1801 and remained unmarried.

A conservative by nature, Weyse was rooted in 18th-century musical ideals, extending from Bach and Handel to Gluck and Haydn, but not beyond Mozart, and he did not sympathize at all with the new trends in Beethoven's works. He composed seven symphonies (1795–9) that demonstrate Haydn's influence, some of which were partly re-used for overtures and incidental music in his theatrical works. More personal are his piano compositions, also mostly written in his youth. They consist of two volumes of *Jugendarbeiten 1790–94* with many *Allegri di bravura*, a genre (fast movements in sonata form) which he invented and explored with two further collections (1796 and 1809). All these works show a development from the north German pre-classical keyboard style, especially of C.P.E. Bach (with whom he had unsuccessfully sought lessons as a youth), to that of the Viennese Classical tradition of Haydn, Clementi and Mozart. The famous Bohemian pianist and composer Ignaz Moscheles, who visited Copenhagen in 1829, inspired Weyse to return to piano composition and was the dedicatee of the *Allegro di bravura* op.50. Two sets of *Etudes*, opp.51 and 60, followed; these brilliant pieces, demanding an advanced technique, are among Weyse's best piano works (praised by Schumann) and contain his only music to embrace the Romantic style of the period.

It is as a vocal composer, however, that Weyse is most remembered. He composed a large number of cantatas and minor works for soloists, chorus and orchestra for major public occasions, consisting of arias, ensembles, recitatives and choruses (many in fugal style and as chorales) written in a solemn, rather old-fashioned style, but very highly regarded in his lifetime.

His theatrical works are made up of six Singspiel-type operas and some incidental music. The charming music of *Sovedrikken* (The Sleeping-Draught, 1809) – a comedy similar in character to Dittersdorf's *Doktor und Apotheker* – made it his most performed and only successful opera. Of the following operas *Ludlams Hule* (Ludlam's Cave, 1816) is a melodramatic ghost story set in Scotland, while the incidental music to Shakespeare's *Macbeth* (1817) contains interesting music for the witches' choruses and the banquet scene. His later operas, particularly *Floribella* (1825) and *Festen paa Kenilworth* (The Feast at Kenilworth, 1836), are conceived on a larger scale with extended forms and more varied harmonies. But on the whole Weyse lacked the dramatic flair of his contemporary Friedrich Kuhlau. In his stage works the finest numbers are the shorter arias and ensembles, many of them lyrical, strophic songs in moderate 6/8 time derived from the siciliana, with a characteristically Danish melodic structure, typical of his attractive *romance* style.

Weyse also wrote many songs, extending from the early simple songs in the manner of Schulz's *Lieder im Volkston*, to the mature works, the summit of which are the famous *Morgen- og Aftensange* (Morning and Evening Songs, 1837 and 1838). These songs were published together with some romances from his stage works in two volumes after his death and soon became the most popular music in Denmark in the 19th century. With his unique feeling for the intimate connection of words and music and his great melodic gift it was certainly as a composer of songs that Weyse stood out, and it is for this that he is remembered in Danish music history.

WORKS

for fuller lists and thematic catalogue see Berggreen (1876) and Fog (1979)

many MSS in DK-Kk

printed works published in Copenhagen unless otherwise stated

STAGE

all first performed at Kongelige Teater, Copenhagen

Sovedrikken [The Sleeping-Draught] (Spl, 2, A. Oehlenschläger, after C.F. Bretzner), 21 April 1809, also in *B-Br*, vs (1815–16)

Faruk (Spl, 3, Oehlenschläger), 30 Jan 1812, ov. and excerpts, vs (1817–28)

Ludlams Hule [Ludlam's Cave] (Spl, 4, Oehlenschläger), 30 Jan 1816, vs (1821–2)

Floribella (lyrical-romantic drama, 3, entr'acte, C.J. Boye), 29 Jan 1825, vs (1837)

Et eventyr i Rosenborg Have [An Adventure in Rosenborg Gardens] (Spl, 1, J.L. Heiberg), 26 May 1827, vs (1833)

Festen paa Kenilworth [The Feast at Kenilworth] (romantic Spl, 3, H.C. Andersen, after W. Scott), 6 Jan 1836, vs (1877)

Incid music: Macbeth (W. Shakespeare), 1817; Balders Død [The Death of Balder] (J. Ewald), 1832

CHORAL

Miserere, double chorus, orch, 1818 (1845)

25 cants. and 10 minor choruses, acc. pf/other insts, incl.: 3 Reformation cants., 1817, 1836, 1839, 3 for Christmas, 1818, 1834, 1836, 2 Passion cants., 1819, 1825, 1 for Whitsunday, 1820, 2 for Easter, 1821, 1829, 1 for New Year, 1822

75 chorales and 25 choruses, a cappella, 3–4vv: for schools, 1838, 1841

Den Ambrosianske lovsang [The Ambrosian Hymn of Praise] (1826)

Several cants. for major public occasions

SONGS

all with piano accompaniment

18 early songs in Jugendarbeiten, 1790–94, some in Vermischte Compositionen (1799)

Dybt Skoven bruser [Forest Murmurs] (F. von Schiller and Oehlenschläger) (1802)

Various songs, 1814–35

9 Sange (1837)

8 Morgensange for børn (B.S. Ingemann) (1837)

7 Aftensange (Ingemann) (1838)

8 Gesänge (1838)

Romancer og sange (1852–60), comprehensive posthumous collection

PIANO

all ed. in Dania Sonans, viii (Copenhagen, 1997)

[6] Allegri di bravura (Berlin, 1796); repr. as Nägeli's Répertoire des clavecinistes, vii (Zürich, 1803)
3 sonatas in Vermischte Compositionen (1799)
[4] Allegri di bravura (Zürich, 1809)
Sonata (1818)
24 écossaises (1823)
Allegro di bravura, a, op.50 (1830)
8 Etudes, op.51 (1832)
4 Etudes, op.60 (1838)
Jugendarbeiten, 1790–94, incl. 4 minor pieces, 5 fugues, fantasia, 4 sonatas, 8 Allegri di bravura

MISCELLANEOUS

7 syms., orch, 1795–9; no.6 as op.1 (1799/*R*); no.7 (Vienna, 1803); ed. in Dania Sonans, ix (Copenhagen, 1998–)
38 canons, before 1817
Choral-Melodier til den evangelisk christelige Psalmebog (1839)
100 gamle Kaempevise Melodier [folksong collection], voice, pf (1840–42)
32 lette orgelpraeludier (1843/*R*)

JENS PETER LARSEN/GORM BUSK

Weyts, Nicasius (*fl* early 15th century). Theorist. He was a Carmelite friar, perhaps of the Netherlands, who probably lived in Italy. His brief treatise, *Regule* (ed. in *CoussemakerS*, iii, 262–4), is appended to the manuscript *I-FZc* 117 (pp.58–9), known as the Bonadies Codex. It also appears in a Bologna manuscript, *I-Bc* A 32. Describing the note forms of early 15th-century mensural music, including semiminims and void semiminims called *crome*, Weyts outlined the principles of mensuration as expounded by Johannes de Muris. He mentioned, but did not explain, the breve with a downward tail on the left. Near the end are the normal mensuration signs showing the relation between minim and semibreve (prolation) and semibreve and breve (time), followed by numerals indicating the number of breves to the long (mood) and longs to the maxima (*maximodus*). Two final paragraphs on the tone and semitone seem foreign to the treatise.

ANDREW HUGHES

Whaley, Royce & Co. Canadian publisher, instrument maker and dealer. It was founded in Toronto in 1888 by Eri Whaley and G.C. Royce, with a branch in Winnipeg 1889–1922. Its earliest publications were deposited at the copyright office in 1890 and by 1920 the firm's output (*c*1500 pieces) surpassed that of all other Canadian music publishers. Unlike most of its competitors, Whaley, Royce & Co. owned a printing plant and functioned also as a job printer. Evidence of the firm's enterprise is contained in its *Descriptive and Select Catalogue of Sheet Music and Music Books published and for sale by Whaley, Royce & Co.*(1895). Besides the usual popular and light classical repertory, the company published serious works including a piano arrangement of Sibelius's *Finlandia* (1894) and Rhakmaninov's Prelude op.3 no.2 (1923), as well as the music of many Canadian composers, notably R.S. Ambrose, Gena Branscombe, W.O. Forsyth, C.A.E. Harriss and Clarence Lucas. Calling itself 'Canada's Greatest Music House', the firm also produced songbooks, operatic vocal scores, cantatas and oratorios, educational music and two periodicals. Its publishing activities waned considerably from 1920 and had virtually ceased, apart from reprints, by 1940. From the beginning Whaley, Royce & Co. also sold a wide variety of band instruments, pianos and organs, and manufactured brass and percussion instruments until 1975. (*EMC2* (H. Kallman))

MARIA CALDERISI

Wheatstone. English firm of music publishers and instrument makers. Although supposedly established in London about 1750, the earliest identifiable figure in the business was Charles Wheatstone (1768–1823), who came from a Gloucester family, and who was active in London from about 1791. The firm was known as Wheatstone & Co. from about 1815. Charles's brother William (*b* Gloucester, 17 Aug 1775; *d* London, 12 July 1854) moved with his family to London in 1806, where he became a flute teacher and manufacturer and music seller on his own account from about 1813, holding patents for improvements to the instrument. He also published a number of books of airs for the flute.

His sons, the future Sir Charles Wheatstone (*b* Gloucester, 6 Feb 1802; *d* Paris, 19 Oct 1875) and William Dolman (*b* Gloucester, 1804; *d* London, 30 Aug 1862) entered their uncle's business, which they took over following his death, and William senior then amalgamated his own business with theirs about 1826. From his youth onwards the younger Charles's attention was largely directed towards scientific subjects, including optics, sound vibrations and electricity. He was famous for his inventions in telegraphy, but he also invented the English CONCERTINA, the patents for which were taken out between 1829 and 1844 and held by the Wheatstone firm for many years. He became a Fellow of the Royal Society, and was knighted in 1868.

The Wheatstone firm published a prodigious amount of sheet music, mostly of a popular nature but including several interesting collections of glees such as *The Naval and Convivial Vocal Harmonist* (*c*1807). It also did an extensive trade as makers of and dealers in musical instruments, especially concertinas.

The firm's fortunes declined during the 20th century, and the concertina business was acquired by Besson &

Co. about 1944, that firm being itself taken over by Boosey & Hawkes in 1948. Small-scale production of Wheatstone concertinas was maintained until the mid-1970s, when the name, machinery and stock were sold off to Steve Dickinson, who continued to manufacture instruments under the Wheatstone trade mark.

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES

Wheeler, Paul. *See* POLEWHEEL.

Wheeler, Scott (*b* Washington DC, 24 Feb 1952). American composer and conductor. He studied at Amherst College, the New England Conservatory and Brandeis University (PhD 1984); his principal teachers included Arthur Berger, Harold Shapero and Malcolm Peyton. He pursued further study at the Tanglewood Music Center, the Dartington School (with Peter Maxwell Davies) and privately with Virgil Thomson. In 1975 he co-founded Dinosaur Annex, a chamber ensemble devoted to the performance of contemporary music; he became the group's sole artistic director in 1982. The ensemble has given the US premières of works by composers such as Davies, Judith Weir, Philip Grange and Anthony Powers. In 1989 Wheeler joined the music department at Emerson College, Boston, where he has also worked as a music director in the theatre department. His honours include a Guggenheim Foundation Fellowship (1988–9) and a fellowship from the American Academy of Arts and Letters (1994).

Wheeler's compositions remain tonally grounded, although polychordal harmonies and elements of modified serialism often run through his works. His writing is also characterized by strong rhythms and lucid textures. His vocal works are distinguished by clear, natural text settings, refined expressivity and wit. The dramatic cantata, *The Construction of Boston* (1988) reveals a sure theatrical sensibility.

WORKS

DRAMATIC

The Construction of Boston (dramatic cant., K. Koch), solo vv, chorus, chbr orch, 1988, rev. 1989 [arr. 2 pfmrs]; Maryushka and Baba Yaga (incid music, C. Korty), 1994

ANTHONY TOMMASINI

Whelpdale, Maxwell & Codd. British firm of piano makers. The firm was founded in 1876 by W.M.Y. Maxwell to import and distribute Blüthner pianos from Leipzig to the British Isles. Later, he entered a partnership with W.J. Whelpdale (*d* 1913) and, following a fire at the uninsured London factory of Squire and Longson in 1934, they hired the staff from this firm, acquired premises and began manufacturing an upright piano which they named the Welmar after the two directors. In 1939 the company was renamed Whelpdale, Maxwell & Codd Ltd, after the directors of the time. The firm was allowed to continue manufacturing instruments during World War II and due to wartime regulations five other manufacturers were taken under its wing. The factory of one of these firms, Sir Herbert Marshall & Sons Ltd, makers of Marshall & Rose upright Pianos, suffered considerable bomb damage during the war, and Whelpdale, Maxwell & Codd have continued to produce these instruments to the present day. Following the liquidation of the Bentley Piano Company in 1993, Whelpdale, Maxwell & Codd took over the manufacture of Bentley, Rogers, Hopkinson and Knight upright pianos. The firm also produces Broadwood upright pianos under licence, as well as uprights under the names of Steinberg & Lipp. It continues to manufacture a Welmar grand piano of 183 cm in length, alongside several Welmar upright pianos. The company endeavours to patronize British suppliers wherever possible, buying its actions from Herrburger Brooks in Nottingham. Some of its directors served their apprenticeships with Blüthner, of whose pianos they remain the main British importers, and the Welmar piano retains a reputation for good quality and reliability.

MARGARET CRANMER

Whettam, Graham (Dudley) (*b* Swindon, 7 Sept 1927). English composer. Largely self-taught, his early musical training included orchestrating film scores. He received encouragement from Boult and Fenby, and in 1953 the première of his Oboe Concertino was given at the Proms, performed by Goossens. Whettam's style owes much to Bartók and Mahler, particularly the strident orchestration, energetic rhythms, intervallic harmonies and colourful textures, all evident in his large-scale orchestral works. The first, *Sinfonia contra Timore* (dedicated to 'Bertrand Russell and other people who suffer . . . for their beliefs'), was given its première by the CBSO in 1965, while the ambitious *Sinfonia intrepida*, broadcast in 1984 to mark the 50th anniversary of the Dresden bombing, contrasts Waltonesque opulence in the outer movements with ethereal lyricism in the central movement, the latter echoed later in the evocative *Hymnos* for strings (1978, rev. 1999), one of Whettam's most popular works. During the late 1980s and the 1990s he focussed on works for solo percussion. These share with the string chamber works a revitalized approach to traditional forms and counterpoint, as in the *Lento and Fugue* for marimba and

Suite for timpani (both written for the composer's son) or the three solo violin sonatas. He has served as chairman of the Composers' Guild (1971, 1983–6), director of the PRS (1988–94) and as vice-chairman of the British Copyright Council (1972–94).

MALCOLM MILLER

Whichello [Wichello], **Abiell** (*b* 1 March 1683; *d* London, bur. 16 Aug 1747). English composer and organist. According to Hawkins he frequented the concerts of Thomas Britton at Clerkenwell, was assistant organist to Philip Hart and later organist at the church of St Edmund the King and Martyr, and 'taught the harpsichord in some of the best families in the city'. He was one of the original subscribers (1738) to the Fund for the Support of Decay'd Musicians or their Families (later the Royal Society of Musicians).

Whichello's vocal music includes two italianate cantatas to words by Henry Carey, *Virtumnus and Pomonia* and *Apollo and Daphne*. These have usually been dated about 1725 and 1730 respectively, but they must have been written some time before then since not only were they both printed in *XII Cantatas in English … being a Curious Collection of the Compositions of Several Authors*, published by Walsh & Hare in 1723, but the latter (also set by Daniel Purcell in 1713) had also been included in the February 1720 issue of *The Monthly Mask of Vocal Musick*. Though they are inferior in quality to the cantatas of Pepusch, on which they were probably modelled, they must be among the earliest English compositions bearing the title 'cantata'. Whichello's other songs (published separately and in miscellaneous collections) were apparently very popular in their day, but they too are mostly uninspired and conventional.

Whichello's only instrumental music is a volume of *Lessons for the Harpsichord, or Spinett*, printed 'for the author' in 1707, and almost certainly intended as teaching pieces for his pupils. Arranged by key in four suites of between three and six movements each, they are all relatively simple, and entirely predictable harmonically; one or two movements (such as the 'Almond' of the A minor suite), however, do show just a bit more life than does most of the vocal music.

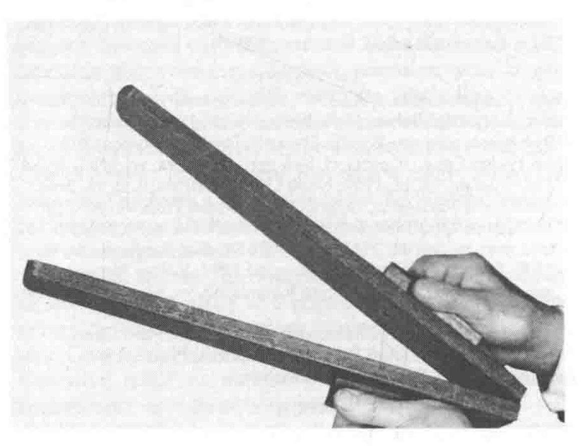
MALCOLM BOYD/H. DIACK JOHNSTONE



Whip [clappers, slapstick] (Fr. *fouet*, *claquette*; Ger. *Holzklapper*, *Peitsche*; It. *frusta*). A percussion effect imitating the sound of a whip crack; it is a concussion idiophone, or CLAPPERS. The whip consists of two pieces of wood about 10 cm wide and 45 cm in length, hinged at one end and provided with straps or handles; the player slaps the two surfaces together. A variant known as a slapstick incorporates a spring and requires only one hand to operate. The effect of several whip cracks in rapid succession is created by a 'double whip': two whips mounted side by side on a board, one operated by each hand.

The sound of a whip has been connected with musical activity for many centuries. An Assyrian bas-relief from Nimrud shows a dancer carrying a whip in his right hand which he appears to be using as a timekeeper. A similar custom exists to this day in eastern Europe.

Composers to make use of the whip effect include Adolphe Adam (*Le postillon de Lonjumeau*, 1836), Mahler (e.g. Seventh Symphony, 1904–5), Ravel (to open his Piano Concerto in G, 1929–31) and Britten (*The Young Person's Guide to the Orchestra*, 1946; *Noye's Fludde*, 1957, in which the whip is used in Mrs Noah's admonition of Mr Noah; and *The Burning Fiery Furnace* (1966), in which a multiple whip of four different sounds/pitches is required).

JAMES BLADES/JAMES HOLLAND

Whistle (Fr. *sifflet*; Ger. *Pfeife*, *Signalpfeife*; It. *fischietto*; Sp. *silbato*). A short, usually high-pitched flute ('edge aerophone'), either without finger-holes or with no more

Whip

than one (e.g. the cuckoo whistle; therefore, the PENNYWHISTLE, which has six finger-holes, is a duct flute, but not a whistle within this definition). Whistles may be of wood, cane, metal, plastic, glass, stone, shell or any other material capable of containing a column or body of air. The distinction between flutes and whistles is difficult to establish (a small organ flue-pipe or a tube of a disjunct panpipe, such as is used in Lithuania and by the Venda people of southern Africa, could be defined in the same way); it is normally considered that flutes are used for music and whistles for signalling, leaving a grey area for those instruments which are used, either by the same or by different peoples, for both purposes (e.g. SWANEE WHISTLE). Whistles are blown in all the ways used on flutes: via a duct (*see* DUCT FLUTE), across the side (*see* FLUTE, §I) or the end, or into a notch (*see* NOTCHED FLUTE). Whistles may be multiple (e.g. the police whistle) or single, and either tubular or with a vessel as the body, in the latter case sometimes with a captive pellet to add a roll to the sound as with the football referee's whistle. They have been known to most cultures from prehistoric times to the present day.

JEREMY MONTAGU

Whistle flute. A common term for DUCT FLUTE. *See* also PENNYWHISTLE, TIN WHISTLE and WHISTLE.

Whistling. German family of publishers. Carl Friedrich (*b* Kelbra, Thuringia, 1788; *d* after 1849) studied in Leipzig and after 1811 worked in the Bureau de Musique of Franz Anton Hoffmeister and Ambrosius Kühnel, from 1814 C.F. Peters. Whistling's *Handbuch der musikalischen Literatur*, a serious attempt at a list of music in print, was first issued in 1817 by Anton Meysel, whose shop Whistling acquired on 13 November 1821. Friedrich Hofmeister issued Whistling's supplements to the *Handbuch* between 1819 and 1825, although Whistling's own imprint appears after 1826. On 28 May 1830 Hofmeister purchased both the shop and the *Handbuch*, which by then had evolved into a current list of new music publications, edited by Whistling and later his sons, Friedrich Wilhelm (1809–61) and August Theodor (1812–69). Carl Friedrich later had a music shop in Hamburg, eventually in Vienna, while Friedrich Wilhelm in Leipzig became a publisher in his own right in 1835, introducing important works by Schumann, songs by Robert Franz and other serious vocal and chamber music. In 1858 part of the publishing firm was sold to Gustav Heinze. August Theodor, a senior employee at C.F. Peters in 1855, in 1861 maintained the Whistling imprint, which was dissolved in 1870.

Whitaker. *See* BUTTON & WHITAKER.

Whitbroke, William. *See* WHYTBROKE, WILLIAM.

White, Alice Mary. *See* SMITH, ALICE MARY.

White, Barry (*b* Galveston, TX, 12 Sept 1944). American soul singer, songwriter and producer. Moving to Los Angeles at a young age, White immersed himself in the local rhythm and blues scene, making recordings under the name Barry Lee and playing, writing, arranging and producing recordings for others. His breakthrough came in 1969 when he began producing for the female vocal trio Love Unlimited. Their hit *Walking in the Rain* (1972) featured what were to become White's trademarks: sound effects, lush orchestrations, sensitive and unabashedly romantic lyrics and White's speaking voice. Commercial success came in 1973, as a solo singer (*I'm gonna love you just a little more baby* and *Never never gonna give ya up*), and as a writer, producer and arranger for the Love Unlimited Orchestra (*Love's Theme*), a 40-piece group which also performed on White's solo work.

White has a rich baritone voice which he uses in his characteristic seductive speaking role as well as in a tender singing mode. It is supported by swirling strings, flutes, harpsichords, pianos and wah-wah guitars, combined with meticulously crafted funk-influenced grooves and memorable melodies. These sumptuous productions dwarfed previous excursions into opulent soul, rivalling those of Gamble and Huff's Philadelphia International in their grandeur, and anticipated the disco craze of the mid- to late 1970s. After a run of hits from 1973 to 1975, including the number one songs *Can't get enough of your love, babe* and *You're the first, the last, my everything*, White's success declined. He experienced a resurgence of popularity in the late 1980s and 90s, notably with *Put me in your mix* (1991) and *Practice what you preach* (1994).

DAVID BRACKETT

White, Benjamin Franklin (*b* nr Spartanburg, SC, 20 Sept 1800; *d* Atlanta, GA, 5 Dec 1879). American singing-school teacher, composer and tune book compiler (*see* SHAPE-NOTE HYMNODY, §2). A self-taught musician, he wrote three-part tunes using four-shape notation. In collaboration with Elisha J. King he published *The Sacred Harp* ([Hamilton, GA] Philadelphia, 1844, 3/1859/*R*, 4/1869), one of the most significant shape-note tune books of the pre-Civil War South and the longest-lived tune book in four-shape notation. Several editions were produced in White's lifetime, and the book is still used, in a number of revised versions, at singing conventions in the South and has also spread to other areas. His brother-in-law was William Walker, whose *Southern Harmony* (1835) and *Christian Harmony* (1867) were the chief rivals of *The Sacred Harp*.

BUELL E. COBB, HARRY ESKEW

White, Charles A(lbert) (*b* Taunton, MA, 20 March 1829; *d* Boston, 13 Jan 1892). American composer and publisher. In 1868 he, W. Frank Smith and John F. Perry formed the publishing house of White, Smith & Perry; the next year they began to issue *The Folio*, an important monthly music periodical. After Perry withdrew in 1872 the firm became White-Smith & Co.; Smith died in 1891 and White became sole owner. White's son and grandson

managed the company until 1942, when its holdings were transferred to Edward H. Morris & Co. (which was absorbed in turn by MPL Communications in 1976).

The firm's success was largely attributable to White's over 1000 compositions. His greatest success, *Marguerite* (1883), sold over one million copies in eight years and was reissued as late as 1945. Though he dabbled in minstrelsy and comedy, White was best in serious genres: simple 'home songs' promoting motherhood, temperance, and other virtues (*The Poor Drunkard's Child*, 1871); through-composed 'descriptive songs' (*The Fisherman and his Child*, 1879); 'waltz songs', often with pictorial cadenzas (birds were a favourite subject) (*When 'tis Moonlight*, 1875); and 'romanzas', with melodramatic texts supported by throbbing triplets and fervid melodies (*Marguerite*). Although White wrote in all four genres through most of his career, many of the 'home songs' date from the 1870s; these overlapped the 'waltz songs' of 1875–85, which in turn gave way to the 'romanzas' of the 1880s. A prudent businessman and a versatile, industrious composer, White was one of the most successful and influential songwriters of his generation.

WORKS

(*selective list*)

all 1v, pf, and published in Boston; texts by White unless otherwise stated

No tongue can tell (1869); Put me in my little bed (D. Smith), (1869); Come, birdie, come (C.A. White), (1870); Moonlight on the Lake (White), (1870); O Restless Sea (1871); The Poor Drunkard's Child (1871); That Little Church around the Corner (Smith), (1871); I've gathered them in (1873); Mother's with the angels there (Smith), (1873); I'se gwine back to Dixie (White), (1875); When 'tis Moonlight (1875); The Fisherman and his Child (White), (1879); Song of the Whippoorwill (White), (1879); When the Leaves Begin to Turn (White), (1879); A Bird from o'er the Sea (1880); The Huntsman's Horn (1881); Marguerite (White), (1883); When the Blue Birds Build Again (1884); Evelena (White), (1889); Come, silver moon (1890); Only Tired (1890)

WILLIAM BROOKS

White, Clarence Cameron (*b* Clarksville, TN, 10 Aug 1880; *d* New York, 30 June 1960). American composer and violinist. He studied the violin from an early age and as a teenager composed works inspired by his acquaintance with Joseph Douglass and Will Marion Cook. He later studied at the Oberlin Conservatory (1896–1901), but left to accept a teaching position in Washington DC, before completing his degree. His first important appointment was at the Washington [DC] Conservatory (1903–7), a pioneering institution for black classical music founded by his friend Harriet Gibbs Marshall. He undertook further studies in Europe (1906, 1908–10) with Samuel Coleridge-Taylor and Michael Zacharewitsch, and later with Raoul Laparra (1930–32). Considering Boston his primary residence, he toured extensively as a violinist, accompanied by his wife Beatrice Warrick White. From 1922 to 1924 he served as president of the National Association of Negro Musicians, an organization he had helped to found in 1919. He taught at West Virginia State College (1924–30) and was music director of the Hampton Institute, Virginia, until the department closed (1932–5). During the last decade of his life, he lived and worked in New York. His awards include two Rosenwald Fellowships, the Bispham Medal (1932) for his opera *Ouanga*, a Harmon Foundation award, the Benjamin Award (1955) for his orchestral *Elegy*, and two honorary degrees.

White's early works are traditional, exemplified by a restrained set of salon pieces that grew out of his studies with Coleridge-Taylor. His mature compositions demonstrate a neo-Romantic style flavoured with black American folk idioms. He was particularly inspired by African American spirituals, of which he composed several arrangements. Many of his most successful works are for strings and piano, particularly *Levee Dance* (1927); his operatic works enjoyed concert performances in Carnegie Hall and the Metropolitan Opera House (1956). His articles appeared in the *Negro Music Journal*, *Music and Poetry*, the *Musical Observer* and *The Etude*.

T. RIIS

White, Eric Walter (*b* Bristol, 10 Sept 1905; *d* London, 13 Sept 1985). English writer on music and administrator. After studying at Clifton College, Bristol, he read English at Oxford (1924–7). He worked for the League of Nations in Geneva (1929–33) as a translator and for the National Council for Social Service in London (1935–42), before becoming assistant secretary to the Council for the Encouragement of Music and the Arts (from 1946 the Arts Council of Great Britain), a post he held until 1971. He commissioned Tippett to compose his cantata *Crown of the Year* for the centenary celebrations of Badminton School, Bristol, in 1958. As a writer he concentrated on two areas: the music of Stravinsky and opera in England. His most important book, *Stravinsky: the Composer and his Works* (1966), was the climax of over 40 years of close interest in the composer. His investigation into performances of the late 17th and early 18th centuries represents an important contribution to the understanding of early English opera.

DAVID SCOTT/R

White, Harry (*b* Dublin, 4 July 1958). Irish musicologist. He completed degrees in English and music at University College, Dublin (1976–81), and in musicology at the University of Toronto (1981–4) and Trinity College, Dublin (1984–6), where he took the doctorate in 1986 with a dissertation on the oratorios of J.J. Fux. After teaching for a year at St Patrick's College, Maynooth, he became a lecturer in music at University College, Dublin, in 1985 and professor there in 1993. His principal areas of research are Irish musical history and Fux. The leading Irish musicologist of his generation, he is a productive scholar and has also been instrumental in establishing musicology as a legitimate discipline in Ireland. He instituted the series Irish Musical Studies with G. Gillen, and with P.F. Devine organized the first international musicological conference in Ireland in 1995. He is also editor of the Fux collected edition for which he has prepared *Il trionfo della fede* and *Il disfacimento di Sisaro*.

ROBIN ELLIOTT

White, John (*b* Berlin, 5 April 1936). English composer and performer. He studied composition with Bernard Stevens and the piano with Arthur Alexander and Eric Harrison at the RCM (1955–9). He has been professor of composition at the RCM (1961–7), teacher of composition and improvisation at the Yehudi Menuhin School (1974–7), head of keyboard studies at Leicester Polytechnic (1979–87), and was appointed head of music at the Drama Centre, London in 1991.

A performer of versatility, White established himself as an interpreter of avant-garde music in the 1960s and took part in many performances of the music of Cardew and American composers, including Cage, Feldman and Wolff. In the 1970s he played the tuba in the London Gabrieli Brass Ensemble (1971–2) and co-founded a number of small ensembles with fellow musicians such as Christopher Hobbs, Dave Smith and John Tilbury: the Promenade Theatre Orchestra (1970–72), Garden Furniture Music Ensemble (1977–9), Instant Dismissal Symphony Orchestra (1980–81), the Zhdanov Duo (after 1989) and Live Bats (after 1990).

As a composer White first attracted attention with his Piano Sonata no.1 (1957) and he has since written a further 135. These are mainly short, one-movement works, so called after the example of Domenico Scarlatti. White has described them as constituting a kind of musical diary in which his musical enthusiasms and instances of amusement have been observed. The unique ability of the piano to suggest a variety of instrumental timbres other than its own has been a constant source of inspiration. Satie is a central figure of influence and the works of lesser known, but pianistically articulate composers such as Dussek, Alkan, Reger, Busoni, Szymanowski and Medtner have also played an important part in the development of White's compositional language in respect of gesture, figuration and form.

White's involvement, as a performer, with the English experimentalists informs a number of ensemble pieces called '*Readymades*' for which he has drawn on a wide range of source material from *The Mulliner Book* and Bach's *Musical Offering* to tutors on rock drumming, electric bass guitar playing and breaks and riffs from jazz piano and swing. Elements from these sources, all of which avoid any kind of 'heightened expressivity' are subjected to all manner of deconstruction: mechanistic repetitions, bizarre juxtapositions, and various systems of encoding material; for example, every F♯ to be played on a woodblock, every semibreve to denote switching on the radio for that duration, changing clef to involve moving to another instrument. The systemic treatment of material is not confined to the '*Readymades*'; in White's extended Piano Sonata no.50 (1969), dedicated to Cardew, the sparse texture is totally organized by means of chess moves across grids containing information on pitch,

register, number of notes in chords, placing and duration of rests, etc.

White has compared the spirit in which these works were written to the rebellion of Les Six; but while the French group had turned to the music of the cabaret, circus and military band, White entered into a sound-world of reed-organs, toy pianos and small percussion instruments. He also adopted compositional methods based, for example, on the procedures of traditional change-ringing within a regular pulse and on American minimalism.

The series of '*Machine*' pieces, which also incorporate the use of '*Readymades*', was inspired by the sculpture of Jean Tinguely with their comic and sometimes dysfunctional mechanisms, the early percussion pieces of Cage, the musical research of the futurists and dadaists, the ingeniously crafted work of Spike Jones and the City Slickers and, in particular, the works of Satie's Rosicrucian period.

White has written extensively for the theatre including incidental music in diverse styles and 30 ballet scores. The music for *They are Not Like Us* (1980), choreographed by Virginia Taylor for her company Kickstart, includes an electronically enhanced piano that heralded a period in which electronic instruments figured prominently in his work. Since 1982 White has produced a large number of compositions for 'low-tech', home electric instruments, such as Casio miniature keyboards. His first work in this medium was music for the Royal National Theatre's production of Kleist's *Prinz Friedrich von Homburg*.

In the latter part of the 1990s White turned to vocal writing, having written little since the Christian Morgenstern settings 25 years earlier. In particular he has employed dada and surrealist texts translated into English; this creates a double distancing of meaning leaving the composer free to create a wide range of musical imagery unhampered by the demands of more expressive, traditional poetry.

WORKS
(*selective list*)

Stage: 35 ballets, 1957–93; 3 operas, 1974–80
Inst: 136 pf sonatas, 1957–96; Hpd Conc., 1957; 8 pf sonatinas, 1959–63; 26 syms., 1965–90; Pf Conc., 1966; Conc., 11 brass, 1967; Sym., org, 6 tuba, 1967; Machine, tuba, vc, 1968; Brass Qnt, 1969; Les enfants de Salieri, brass qnt, 1991; Doggerel Machine, brass qnt, 1996; Concertino, b cl, str trio, 1996

JOHN TILBURY

White, Josh(ua Daniel) [Pinewood Tom] (*b* Greenville, SC, 11 Feb 1915; *d* Manhasset, NY, 5 Sept 1969). American blues, gospel and folk singer and guitarist. He grew up in a religious family, and as a child in South Carolina led street evangelists and blind gospel singers, from whom he learnt a wide range of songs, and eventually a prodigious guitar technique. He was only 13 when he recorded with Blind Joe Taggart, singing falsetto and playing guitar on *There's a hand writing on the wall* (1928, Para.). In 1932 he commenced a long recording career, often using the name Pinewood Tom for blues issues, for example *Mean Mistreater Mama* (1934, Ban.), made with Leroy Carr; as Joshua White, the 'Singing Christian', he recorded such titles as *There's a man goin' around taking names* (1933, Ban.). He possessed a light voice with considerable range and used a glottal stop to great, and sometimes excessive, effect. By 1940 he was well established in New York, where he performed with Leadbelly, Woody Guthrie, the Union Boys and his own group the Carolinians, with which he recorded some rather inauthentic work songs, such as *Told my Cap'n* (1940, Col.). His recording of the indictment of lynching, *Strange Fruit* (1941, Key.) was issued in an entire album of socially committed songs, but in general White's work became more sophisticated, appealing to a broad audience. He performed at the White House, teamed with the popular torch singer Libby Holman, appeared in the film *The Crimson Canary* and sang with Paul Robeson, popularizing folk songs and blues such as *The House of the Rising Sun* (1957, ABC). Although by the 1950s he suffered considerable pain from wounds to his fingers, he still played with technical brilliance, but his cabaret-styled approach to music alienated the blues audience.

PAUL OLIVER

White, Matthew (*d* by 16 Oct 1641). English composer. A minister from Wells, he was admitted Gospeller of the Chapel Royal on 2 November 1613. His signature against a minute of a Chapel Vestry meeting on 19 May 1603 was added at the time of his admission. In 1614 he resigned his place, and on 2 July 1619, with Cuthbert Joyner, Clerk of the Vestry, a 'Matthew Wight of London' received a grant of the 'surveyorship' of lands belonging to rectories, vicarages and rural prebends in England and Wales. He took the BMus and DMus at Oxford in July 1629. By 22 September 1635 and until at least 20 March 1639 he was vicar-choral at Hereford Cathedral; in 1640 he was at St Nicholas's, Hereford. Catches by 'Mr White' are in the first and subsequent editions of John Hilton's *Catch that Catch Can* (1652). An incomplete anthem by 'White', *If ye love me*, is in the British Library. Other anthems by Robert Parsons (i), Mundy, Robert White and William White have been variously attributed to Matthew White, but the only extant anthem that appears to be his is the incomplete *Zache stood forth* (*GB-Lcm*).

PETER LE HURAY/ANDREW ASHBEE

White, Maude Valérie (*b* Dieppe, 23 June 1855; *d* London, 2 Nov 1937). English composer. She studied composition with George Macfarren and Frank Davenport at the RAM in London from 1876 to 1881. In 1879 she was the first woman to win the coveted Mendelssohn Scholarship

and she began to attract critical acclaim in the early 1880s when Charles Santley started to champion her songs at the Popular Concerts and the Crystal Palace. After a period in Chile (1881–2) she returned to London where she embarked on a professional musical career, encouraged by patrons such as May Gaskell, Spencer Lyttelton and Frank Schuster. In 1883 she spent six months studying with Robert Fuchs in Vienna. From the 1890s she organized regular concerts, largely of her own music, with the aid of friends and colleagues. From 1901, prompted by both recurrent ill-health and her love of travel, White spent much of each year in Italy. In 1914 her ballet *The Enchanted Heart* was rehearsed for performance in Rome, whilst an orchestral suite from the work was scheduled by Henry Wood for the 1915 Promenade Concerts. In the event, both performances had to be cancelled. A proficient linguist and engaging writer, White published translations of several literary texts and two volumes of memoirs: *Friends and Memories* (London, 1914) and *My Indian Summer* (London, 1932).

Apart from her ballet, an unfinished opera, some early choral works and a few piano pieces, White concentrated on writing songs. She was attracted to a wide range of lyrics, setting Spanish, Italian, French, German and English poetry from the 17th, 18th and 19th centuries, varying her musical style to suit each chosen text. Her settings of Suckling and Herrick, for example, have an old-fashioned quality in their figuration, lightness of texture and narrow vocal and pianistic ranges, while her German settings tend to use an approach closer to that of mid-19th-century Lieder. White nevertheless has a distinctive musical voice, which clearly expresses the passion and unashamed emotion with which she lived her life. It is characterised by careful word setting, expansive melodies, a sense of rhythmic propulsion and an avoidance of clear-cut cadences, as can be heard in one of her most enduring songs *So we'll go no more a'roving* (Byron). Music that White experienced during her travels to South America, Scandinavia, North Africa, Russia and in Europe frequently influenced the rhythms and melodies of her own music; she also arranged German and Italian folksongs. In several later songs, such as *Isaotta Blanzesmano* (d'Annunzio) and *Le Foyer* (Verlaine), White created a languid, dream-like atmosphere through improvisatory motifs or repeated figures of open fourths or fifths. Although her music had fallen from critical favour by the end of her life, as part of the general reaction against Victorian art, its influence had already been heard in the songs of younger British composers such as Vaughan Williams and Quilter.

WORKS

(*selective list*)

Stage: Smaranda (op, 3, A. Strettell), 1894/5–1911, unfinished; The Enchanted Heart (ballet), 1912–13; incid scores

Vocal: *c*245 partsongs, duets and songs incl., Farewell, if ever fondest prayer (Byron) (1874); Zwei Lieder von Heine (1878); Two Songs (R. Herrick and the Marquis of Montrose) (?1879); Absent Yet Present (E. Bulwer-Lytton) (1880); I prithee send me back my heart (J. Suckling) (1880); Chantez, chantez jeune inspirée (V. Hugo) (1881); To Music to Becalm his Fever (Herrick); To Mary (P.B. Shelley) (1882); The Devout Lover (W.H. Pollock) (1883); My Soul is an Enchanted Boat (Shelley) (1883); Ich habe gelebt und geliebt (J.C.F. von Schiller) (1884); Four Songs from Tennyson's *In Memoriam* (1885); Maude Valérie White's Album of German Songs (Various) (1885); To God (Herrick) (1886); Hidden Love (D. Kaerlighed and B. Bjørnson) (?1887); Hungarian Gypsy Song (A. Petöfi) (?1887); Ich-bas (A. Sully Prudhomme) (?1887); New Albums of Songs with German and English Words, vols.1 and 2 (Various) (?1888); So we'll go no more a'roving (Byron) (1888); The Throstle (Tennyson) (1890); John Anderson, my Jo (R. Burns) (1891); 6 Volkslieder (1893); Slumber Song (W. Sharp) (1902); Isaotta Blanzesmano (G. d'Annunzio) (1906); 3 Chansons Tziganes (L. Tolstoy) (1913); Two Songs (Verlaine, Hugo) (1924); Leavetaking (W. Watson) (1927)

Inst: Rondo scherzando, pf (1879); 8 South American Airs, pf duet (1882); Pictures from Abroad, 14 pieces, pf (1892); Naissance d'amour, vc, pf (1893); Serbian Dances, orch, ?1916; other piano pieces

SOPHIE FULLER

White [Whyte], **Robert** (*b c*1538; *d* London, Nov 1574). English composer. In 1553 the parish of St Andrew's, Holborn, gave 'yong Whyte' a payment 'for ye gret orgayns w[hich] his father gave to ye church'. This almost certainly refers to Robert White, for in 1572, when the Whites were living in Westminster, the instrument was sold by one of the Holborn parishioners to John Thomas and Robert White (probably the composer's father) and installed in the Abbey. According to Thomas Whythorne 'mr Whyt waz of Trinite Collez in Cambridz when hee Commensed'. His name occurs frequently in the college accounts for the period 1555–62, first as a chorister under Thomas Preston and later as one of the *cantores*. The University Grace Book 1542–88 records that White, after ten years of study, was granted the degree of MusB on 13 December 1560, with the condition that he compose a Communion service to be sung at 'Act Time' the following year in St Mary the Great's. At Michaelmas 1562 he became Master of the Choristers at Ely (a post previously held by his father-in-law, Christopher Tye) and remained there until 1566. At Annunciation 1567 a musician named White received a quarterly payment of £4 3s. 4d. as Master of the Choristers of Chester Cathedral; that this was Robert White is supported by Thomas Tomkins's annotated copy of Morley's *Plaine and Easie Introduction*, where Robert White is described as 'first of Westchester [Chester] and Westminster'. The cathedral accounts and those of the Smiths, Cutlers and Plumbers of Chester show that the cathedral musicians were actively involved in the Chester mystery plays, and White received particularly generous payments for his services. He probably became Master of the Choristers at Westminster Abbey shortly before Christmas 1569, but his appointment was not confirmed until 3 February 1570. He died of the plague in 1574, leaving property of some substance in Sussex (his will is reproduced in TCM, v, 1926/*R*).

Almost half of White's vocal works consist of settings of complete Latin psalms or formal sections from the extended Psalm cxviii (Vulgate no.). The texture and structure of seven of these compositions look back to the large-scale votive antiphon of the early 16th century, and three even retain the old division into triple- and duple-time halves; the remaining five psalm motets are distinguished by continuous full treatment in imitative style. The antiphons and *alternatim* works are doubtless among

the composer's juvenilia. The latter include a *Magnificat* on the first tone in the florid manner of Taverner, and four settings of the Lenten compline hymn *Christe qui lux es et dies* (each beginning 'Precamur'); however, the responsory *Libera me*, which sets polyphonically the verses as well as the respond, could have been written as late as 1570. The two sets of Lamentations are particularly fine and represent a high point of Elizabethan choral music. In general White's anthems lack the technical mastery of his motets, and indeed, apart from the adaptations, only one can unequivocally be attributed to him. The instrumental pieces may well date from his youth; compared with Tye's idiomatic and adventurous string compositions, they are straightforward and unremarkable and may have orginated as teaching pieces for the Ely choristers.

Despite the limitations of his imitative technique, White's influence on his contemporaries was considerable. His fantasias (originally for viols) are among the earliest English examples of the genre, and his hymns served as models for two of Byrd's settings of *Christe qui lux es*. John Baldwin mentioned him in a poem of 1591 as one of the principal musicians of his generation, and Robert Dow, after his copy of the five-part Lamentations (in the Dow Partbooks, *GB-Och* 984–8), added in Latin: 'Not even the words of the gloomy prophet sound so sad as the sad music of my composer'. Certainly both Lamentations and the setting of the *Miserere* (Psalm l) clearly demonstrate White's ability to manipulate large musical structures while at the same time exploiting the expressive potential of the text.

IRWIN SPECTOR, DAVID MATEER

White, Ruth (S.) (*b* Pittsburgh, 1 Sept 1925). American composer, pianist and educator. White began composing at the age of eight and, since the age of 15, has produced a steady stream of works in a variety of styles and genres. She studied with Nikolai Lopatnikoff at the Carnegie Institute of Technology (later Carnegie Mellon University: BFA 1948, piano and composition; MFA 1949, composition), then continued with John Vincent at UCLA (1950–54). She studied privately with George Antheil (1951–4), learning from him the important underlying principles of Classical sonata form, which provided 'the key to writing larger works that were structurally sound'.

White's involvement in electronic music was precipitated by a belief that all the experiments in traditional media, from Impressionism to atonality, polytonality and the like, were closed paths – that 'this medium ... had reached its zenith by the end of the nineteenth century, and, since then, its basic principles were being systematically destroyed'. She also found much of the early electronic music 'chaotic and senseless', concluding that those 'unshaped and arbitrary sounds being made were noise and just that'. After building her own electronic music studio (1964–70; now on display at the Kenneth G. Fiske Museum of Musical Instruments), she developed her own brand of electronic music, which explored new timbral and harmonic resources without renouncing the order and logic instilled by her classical training. *Short Circuits*, among her best-known compositions, consists of electronically orchestrated versions of familiar pieces by composers from Couperin and Scarlatti to Shostakovich. Other electronic works, such as *Pinions*, *Seven Trumps from the Tarot Cards* and *Flowers of Evil* are notable for their inventiveness, power of communication and melodic appeal.

White's career has followed many paths. In education, she has created a large library of materials that teach children through music, dance and film; in visuals, she has experimented with analogue animation (manipulation of visual sound waves) and other video and electronic music combinations. One of her art pieces, *Steel*, received an Atlanta Film Festival award (1971). A continuing project is a science fiction opera trilogy, for which she is writing both the text and score. Using analogue and electronic music, choreography and digitally controlled visuals, this work represents a convergence of her many different paths.

WORKS
(*selective list*)

Stage: The Owl and the Pussycat (children's ballet, after E. Lear), nar, fl, cl, bn, 2 pf, perc, 1965

ALLAN B. HO

White, Willard (*b* St Catherine, Jamaica, 10 Oct 1946). Jamaican bass. After studying in New York, he made his début in 1974 at Washington, DC, as Trulove, then sang with New York City Opera. He made his British début with the WNO in 1976 as Osmin and has since sung Massimiliano (*I masnadieri*), Orestes (*Elektra*), Zaccaria and Boris Godunov. For the ENO he has sung Seneca, Hunding, Achillas (*Giulio Cesare*), Ivan Khovansky (*Khovanshchina*) and the Dutchman. His Glyndebourne roles include the Speaker, Colline, King of Clubs (*Love for Three Oranges*) and Porgy. At Amsterdam he has sung Oroveso, Banquo, the Forester (*The Cunning Little Vixen*), Prince Gremin, Berlioz's Méphistophélès and Golaud. White made his Covent Garden début in 1980 as Don Diego (*L'Africaine*), returning for Klingsor, Timur, Fafner and Pizarro; he was also a magnificent Porgy in the first performance of Gershwin's opera in that theatre (1992). His other roles include Sarastro, Leporello, and Wotan (*Das Rheingold* and *Die Walküre*), which he has sung for Scottish Opera. He took the role of Moses in *Moses und Aron* at Edinburgh (1992) and sang Claggart (*Billy Budd*) in Geneva in 1994. Among his recordings are Handel's Polyphemus, Pluto in Monteverdi's *Orfeo*, the Ballad Singer (*Gloriana*) and two complete versions of *Porgy and Bess*. A powerful singer with a ripe, resonant voice capable of both mellow lyricism and imposing declamation, he is a superb actor who has played Shakespeare's Othello in the theatre.

ELIZABETH FORBES

White, William (bap. Durham, 17 May 1571; bur. Durham, 11 Feb 1634). English composer. It seems likely that White was the chorister of this name at Durham between 1580 and 1587, then becoming a king's scholar until 1590. White was among the singing-men of Westminster allowed mourning livery at the funeral of Queen Elizabeth I (28 April 1603). Around this time nine of them (including White) petitioned against Edmund Hooper for arrears. No other mention of him at Westminster is known and it may be significant that his name is absent from the list of Westminster singing-men at the funeral of James I (5 May 1625), although 'Robert White, pettycanon' does appear. Thomas Tomkins dedicated a song to him in his 1622 publication and seems to have been a friend with whom White exchanged music. In a manuscript in Durham Cathedral (*GB-DRc* A1, f.280) the copyist Henry Palmer wrote 'Will: White of Durham' after *Behold now praise the Lord*. It is reasonable to suppose that White returned to Durham in his later years: James Mickleton, a local historian writing later in the century called him 'a celebrated doctor who lived in Elvet' (in Durham), perhaps a reason for him forsaking a singing career.

14 pieces of consort music for viols from two to six parts are contained in several late-Jacobean and Caroline sources; those of five and six parts were especially popular. They are of very good quality and exhibit a high degree of contrapuntal skill, flexibility of texture and idiomatic invention; in style they are similar to those by Orlando Gibbons, but they lack his individual harmonic and melodic traits. All were written by about 1630, since they appear in copies by Myriell and in manuscripts owned by John Browne. It seems unlikely that catches by 'Mr White' that appeared in John Hilton's collection of 1658 and in other collections by John Playford between 1663 and 1673 are by William.

WORKS

3 full anthems, 4, 5, 8vv, *GB-Cp, Cu, DRc, Lbl, LF, Ob, Och, Ojc, Y, US-BEm*; 1 verse anthem, *GB-Lbl* (inc.)
2 fantasias, 2 b viols, 1 fantasia, a 3, *Ckc*
3 fantasias, a 5, *IRL-Dm, GB-Lbl, Ob, Och*; 2 ed. G. Dodd, *'Diapente': Two Fantasies a 5 (Meyer nos.1 and 3)* (London, 1973); 1 ed. P. Connelly, *William White: Fancy a 5 (Meyer no.2) and Two Pavans a 6* (Albany, CA, 1992)
6 fantasias, a 6, 2 pavans, a 6, *IRL-Dm, GB-Lbl, Ob, Och, US-NH*; ed. D. Beecher and B. Gillingham, *William White: the Six Fantasias in 6 Parts* (Ottawa, 1982); ed. P. Connelly, *William White: Fancy a 5 (Meyer no.2) and Two Pavans a 6* (Albany, CA, 1992)

NORMAN JOSEPHS/ANDREW ASHBEE

Whitechapel Bell Foundry. Since 1968 the official name of a bellfoundry located in Whitechapel Road, east London. The lineage of the foundry can be traced back to at least 1420. From 1570 its bells have been produced by master bellfounders of the following families: Mot (16th century); Carter, Bartlett and Clifton (17th century); Phelps, Lester, Pack, Chapman and Mears (18th century); Mears, Stainbank and Lawson (19th century); and Hughes (from 1904). From 1865 to 1968 the foundry was known as Mears & Stainbank. It has been principally engaged in making tower bells, both single and in short-range diatonic series: the latter mostly for swinging in the manner of English change-ringing, but some to be rung hanging stationary, as chimes. From the early 19th century or before, it also made musical handbells. At first these were mostly sets of 8 to 12 bells in diatonic series that were used for practising change-ringing; but with the increasing popularity of handbell music in the 20th century (*see* HANDBELL) it began to produce sets of 25 to 60 bells in chromatic series. Early in the 20th century the firm made sets of hemispherical bells, but has since given this up. It has also produced several carillons.

Bell-casting at the Whitechapel Bell Foundry

The Whitechapel Bell Foundry is now widely known for the fine tone and tuning of its handbells. In tuning large bells for change-ringing, its present founders (along with others in England in the first part of this century) replaced the dissonant augmented 7th interval between the lowest two partials with a full octave. Many older ringers complained that changes on such bells did not sound so pleasing (*see* BELL (i), §2), and it was found particularly inappropriate to extend or replace parts of an old set with parts of a new one. Consequently the Whitechapel foundry now usually adheres to a refined form of the old standard when restoring or enlarging peals of bells.

The two most famous individual bells by Whitechapel founders are the first Philadelphia Liberty Bell (cast 1752, cracked in the same year) and the second Big Ben of Westminster (cast 1858, still in use). Big Ben weighs 13.5 tonnes and is the largest bell ever cast by this foundry. Whitechapel continues to cast bells for sites throughout the world. In 1999 it was making 58 bells to replace those of the carillon at the Riverside Church, New York, for proposed installation in the year 2000.

PERCIVAL PRICE/CHARLES BODMAN RAE

Whitehead, Alfred (Ernest) (*b* Peterborough, 10 July 1887; *d* Amherst, NS, 1 April 1974). Canadian organist, choir director, composer and teacher of English birth. Taught by C.C. Francis and Haydn Keeton, both of Peterborough Cathedral, and later by A.E. Hull, he moved in 1912 to Canada, where his chief posts were at St Peter's, Sherbrooke (1915–22), Christ Church Cathedral, Montreal (1922–47) and Trinity-St Stephen's United Church, Amherst (1953–71). From 1947 until his retirement in 1953 he was head of music at Mount Allison University, New Brunswick. He took the degrees of BMus (Toronto) and DMus (McGill), and the diplomas of FRCO (with which he was awarded the Lafontaine Prize) and FCGO (1913, the first Fellow by examination in the new guild, which had been formed in 1909 and some ten years later became a college), and was awarded several honorary degrees. He was president of the (Royal) Canadian College of Organists (1930, 1935–7), honorary vice-president (1972) and honorary president (1973). An organist and choirmaster of distinction, Whitehead composed over 400 choral works in a traditional but individual and expressive idiom and some organ pieces. Well over 100 of his works were published and achieved widespread distribution throughout North America; the sacred music in particular is of high rank. As a choir director and teacher he combined consummate technique and high standards with unfailing courtesy and good humour. He became the leader of Montreal's Protestant church music and his Cathedral Singers frequently performed with the city's major orchestras. In addition to his musical interests, Whitehead was an authority on some aspects of philately and a noted painter. (*EMC*, G. George)

WORKS
(*selective list*)

Choral: Bell Carol (L.M. Bowman), SATB (1928); Jesus, the Very Thought of Thee (St Bernard of Clairvaux, trans. E. Caswall), SATB, 1930; Christ the Lord is Risen (I. Watts), SATB, org (1932); Evening Hymn, SSAA, 1932; Golden Grain, Harvest Bringing, SATB, org/pf (1932); Most Glorious Lord of Life (E. Spencer), double SATB, opt. org (1932); Almighty God, Whose Glory (Bible), SATB (1933); Awake! The Morn is Here (Gk. Service Bks,

trans. J.B. Lee), SATB, org, 1933; Light's Abode, Celestial Salem (St Thomas à Kempis, trans. J.M. Neale), SATB (1933); Watchman, from the Night Beholding (Pss xxii, xxvii, cxviii, hymns), S, Bar, SATB, org, 1933; Benedicite, omnia opera, SATB, org (1936); O Mighty Soul of England (F. Scott), SATB, org/pf (1936); If Ye Then Be Risen With Christ (Bible: *Colossians*), S, Bar, SATB, org (1937); Praise Him, Ye that Fear Him (Bible: *Revelation*), S, C, T, B, SATB (1937); I Beheld a Great Multitude (Bible: *Revelation*, after J. Rheinberger: *Vision*), 1938; I Have Longed for Thy Saving Health (Ps cxi, arr. W. Byrd), SATB, 1940; Now God Be With Us (P. Herbert, trans. C. Winkworth, Franklin), SATB, org (1940); The Gate of Life Stands Wide (Franklin), SATB, org (1943); Eternal Ruler of the Ceaseless Round (J.W. Chadwick), SATB, org (1944); Challenge to Free Men (J. Lowell), unison chorus, org (1951); House to Let (Franklin), unison chorus, 1964; God of Mercy, God of Grace (H. Lyle), SATB, org (1970); arrs. of folksongs, hymn tunes and carols

Org: Prelude on Winchester Old, 1937; Prelude on a Theme by Orlando Gibbons, 1940; arr. of H. Purcell: The Westminster Suite

MSS in *CDN-On*

GRAHAM GEORGE/KELLY RICE

Whitehead, Gillian (*b* Whangarei, 23 April 1941). New Zealand composer. Part-Maori, she was born into a musical family and began composing at an early age. After attending the University of Auckland (1959–62) and Victoria University, Wellington (BMus 1964), she studied composition with Sculthorpe at the University of Sydney (MMus 1966). Maxwell Davies's lectures in Adelaide (1966) stimulated her to continue studying with him in England the following year. She was composer-in-residence at Northern Arts, Newcastle upon Tyne, 1978–80, before joining the staff at the Sydney Conservatorium of Music in 1981, where she later became Head of Composition. After leaving the Conservatorium in 1995, she continued to divide her time between New Zealand and Australia as a freelance composer.

Whitehead, a prolific composer working regularly to commissions, described her musical language as Expressionism; it is invariably atonal, apart from sparing use of quotation in stage works. Tightly constructed linear writing reveals European sources, and in the stage works the passionate vocal lines are placed in coherent harmonic and melodic networks related to plot and characterization. The influences of the Maori spirituality of her heritage and the New Zealand landscape have also been increasingly acknowledged in her works.

The success of her first chamber opera, *Tristan and Iseult* (composed 1975, first performed 1978), was followed by numerous music theatre works composed in collaboration with two writers, London-based New Zealand poet Fleur Adcock and the Australian writer Anna-Maria dell'Oso. With Adcock she wrote a number of large-scale vocal works, including an opera *The King of the Other Country* (1984) and three monodramas: *Hotspur* (1980), *Eleanor of Aquitaine* (1982) and *Out of this Nettle, Danger* (1983), the last named based on the writings of Katherine Mansfield. The Australian collaborations with dell'Oso produced three significant operas, *The Pirate Moon* (1986), *Bride of Fortune* (1988) and *The Art of Pizza* (1995).

WORKS
(*selective list*)

Stage: Tristan and Iseult (chbr op, M. Crowthers and M. Hill), 1975; The Tinker's Curse (children's op, J. Aiken), 1979; Requiem, Mez, org, dancers, 1981; The King of the Other Country (chbr op, F. Adcock), 1984; The Pirate Moon (chbr op, A.-M. dell'Oso), 1986; Bride of Fortune (chbr op, dell'Oso), 1988; Angels Born at the Speed of Light (C. McQueen), 1992, choreog. B. Judge; The Art of Pizza (chbr op, dell'Oso), 1995

Orch: Te Tangi a Apakura, str, 1975; Tirea, ob, vn, vc, hpd, str, 1978; Hoata, chbr orch, 1979; Resurgences, 1989

Choral: Missa brevis, SATB, 1963; 5 Songs of Hildegard von Bingen, SATB, 1976; The Inner Harbour (Adcock), SATB, chbr orch, perc, 1979; Low Tide, Aramoana (McQueen), Mez, SATB, 3 tpt, 2 trbn, timp, 1982; The Virgin and the Nightingale (5 songs, Adcock, after medieval lyrics), S, Mez, C, T, Bar/B, chorus/sextet, 1986; Moments (McQueen), SATB, 1993; Tongues, Swords, Keys (R. Stow), SSAATTBB, 4 perc, 1985

Other vocal: Pakuru, S, fl, cl, va, vc, hpd, perc, 1967; Whakatau-ki (Maori proverbs), male v, chbr ens, 1970; Bright Forms Return (K. Raine), Mez, str qt, 1980; Hotspur (Adcock), S, ens, 1980; Pao, S, cl, pf, 1981; Eleanor of Aquitaine (Adcock), Mez, ens, 1982; Out of this Nettle, Danger (Adcock, after K. Mansfield), Mez, ens, 1983; These Isles your Dream (Raine), Mez, va, pf, 1983; Awa Herea, S, pf, 1993

Chbr and solo inst: Okuru, vn, pf, 1979; Antiphons, 3 tpt, 2 hn, 3 trbn, tuba, 1980; Ahotu (o matenga), ens, 1984; Manutaki, fl, cl, vn, vc, pf, 1985; Windstreams, perc, 1985; Napier's Bones, 24 perc, improvised jazz pf, 1989, also arr. 6 perc, improvised jazz pf; Angels Born at the Speed of Light, str qt, 1990; Moon, Tides and Shoreline, str qt, 1990; The Journey of Matuku Moana, vc, 1992

Pf: Fantasia on 3 Notes, 1966; La cadenza sia corta, 1974; Voices of Tane, 1976; Tamatea Tutahi, 1980; Lullaby for Matthew, 1981; 5 Bagatelles, 1986

J.M. THOMSON/ELIZABETH KERR

Whitehill, Clarence (Eugene) (*b* Marengo, IA, 5 Nov 1871; *d* New York, 18 Dec 1932). American baritone and bass-baritone. His vocal talent was discovered in Chicago in 1896 by Melba, who advised him to study in Paris; his teachers there were Giraudet and Sbriglia. He made his début in Brussels in 1898. After performing in Europe and the USA, and further study with Julius Stockhausen in Frankfurt, he undertook engagements in several German cities, studied the Wagner repertory at Bayreuth, appeared there very successfully as Wolfram (1904) and Amfortas (1908), and was also the much applauded Wotan in Richter's English-language Covent Garden *Ring* of 1908 and 1909. His début with the Metropolitan company (15 November 1909, Brooklyn) as Wolfram, and at the Metropolitan Opera House (25 November 1909) as Amfortas began a long and successful, though not entirely harmonious, association with that house, where his Hans Sachs was particularly admired. His Metropolitan career lasted until 1932, the year of his death. Whitehill was an outstanding singer and artist, notable for beauty of tone and for nobility and dignity of style. The best of his many recordings are the earlier ones, in which he sang his Wagner excerpts in the original German. His 1914 version of Amfortas's Prayer is unsurpassed in its combination of pure line, perfect enunciation and poignant intensity.

DESMOND SHAWE-TAYLOR

White Lafitte, José [Joseph] (Silvestre de los Dolores) (*b* Matanzas, 17 Jan 1836; *d* Paris, 12/15 March 1918). Cuban violinist and composer. Pierre gave his birthdate as 31 December 1837, which might suggest that he misrepresented his age on entering the Paris Conservatoire, where he studied the violin with Alard, winning a *premier prix* in 1856. In 1857–8 he was first violinist in a quintet and also gave concerts, but then left Paris to return

to Cuba, where he gave concerts with Gottschalk. Based in Paris again (1861–74), he increased his reputation as a soloist and chamber player. In 1866 he became a member of the Société des Concerts du Conservatoire; among his students were Enescu and Thibaud. He toured Europe, and from the early 1870s performed frequently with his wife, also a brilliant violinist. In 1874 or 1875 he went to the USA and then, after a brief visit to Paris at the end of 1876, to South America, where he toured widely, eventually becoming court violinist to the emperor Dom Pedro II of Brazil; with Napoleão dos Santos, he founded the Sociedade de Conciertos Clásicos there. From 1889 he lived in Paris and later gave a masterclass at the Conservatoire. His few compositions, most of them highly influenced by European models such as Wieniawski and Vieuxtemps, include a violin concerto, string quartet, a Bolero for violin and orchestra, *Variaciones* for harpsichord and orchestra, six concert studies for violin and several pieces for violin and piano, including *La bella cubana*, a kind of Cuban national air based on the rhythms of the old Haitian *guaracha* and the Dominican *merengue*. His manuscripts are in the Biblioteca Nacional, Havana.

AURELIO DE LA VEGA

Whiteley, William (*b* Lebanon Goshen [now Lebanon], CT, 1789; *d* Knoxboro, NY, 25 March 1871). American instrument maker. He also sold 'Bassoons, Clarionets, Flageolets, Flutes, Bugles, Serpents, Fifes' in Utica, New York, from 1810 to 1853. He wrote *The Instrumental Preceptor* (Utica, 1816), the third instrumental method published in the USA, unique for its scoring in four parts. Though he may well have been the first American woodwind maker, his historical importance lies rather in the fact that the contents of his workshop, discovered almost intact in 1965, show the actual process of manufacture of pre-industrial boxwood instruments from raw materials to the finished product. Finished Whiteley instruments are in the Dayton C. Miller collection of flutes at the Library of Congress and the private collection of F.R. Selch, New York. There are also unfinished instruments, parts, tools, and models in the Selch collection.

VICTOR FELL YELLIN

Whiteman, Paul (*b* Denver, 28 March 1890; *d* Doylestown, PA, 29 Dec 1967). American jazz and dance-band leader. He played the viola in the Denver SO from 1907 and in the San Francisco SO from 1914. During World War I he led a 40-piece navy band, playing march tunes by day and show music by night. Sensing new dimensions for popular music in the transition from ragtime to jazz, he organized a dance band in San Francisco in 1919, and later moved to Los Angeles and Atlantic City, New Jersey, before settling in New York in 1920. There he soon became the best-known American bandleader, particularly with his recording of *Whispering* and *Japanese Sandman* (1920, Vic.), which sold more than a million copies. By the early 1920s his lush orchestral style was widely copied on countless bandstands at home and abroad. He toured the British Isles in 1923 and Europe in 1926.

For his first extended concert tour of the USA Whiteman commissioned George Gershwin to write *Rhapsody in Blue*, which, as part of Whiteman's concert called 'An Experiment in Modern Music', was performed with the composer as soloist in Aeolian Hall, New York, in 1924. Favourable publicity prompted Whiteman to stage seven performances of this kind between 1925 and 1938, thereby obtaining wide exposure for such American composers as Victor Herbert, William Grant Still and Duke Ellington (*see* SYMPHONIC JAZZ). Between 1928 and 1952 Whiteman's orchestras were featured on many network radio shows and took part in several films, beginning with *King of Jazz* (1930). He provided music for six Broadway shows and produced more than 600 phonograph recordings. Later he served as music director for ABC.

Whiteman was a key figure in American popular music. While jazz purists accused him of diluting the character of early jazz for commercial purposes, less biassed observers applauded the high polish and versatility of his orchestras, which had to be as comfortable in the concert hall as at a college dance. He employed a number of talented musicians: in the original arrangement of *Rhapsody in Blue* three of his reed players were required to play a total of 17 instruments. Although his dance music tended to be sedate, there were occasional jazz solos from musicians such as Bix Beiderbecke, Frankie Trumbauer, Eddie Lang, Bunny Berigan and Jack Teagarden.

Whiteman's musical memorabilia, including his large library of more than 3000 arrangements, were bequeathed to Williams College in Williamstown, Massachusetts, where they now form the Whiteman Collection.

CARL JOHNSON

Whitfield, John (*fl* 1588–*c*1620). English composer. Only three compositions, all for the lute, survive with his name attached. One, untitled, is in *GB-Cu* Dd.2.11, and two are in the Pickering manuscript (*Lbl* Eg.2046): *The English Huntsuppe* and *Daphney and Corridon*.

DIANA POULTON

Whithorn [May-horn, peeling-horn]. An oboe constructed of green willow bark twisted into a conical shape and fastened with hawthorn spines (see illustration). It has a double reed made of the 'inside willow' as described by William Kimber. It is widely used in Europe, mainly by herdsmen for signalling; in England it was used in the Savernake Forest, Wiltshire during the Whit Monday hunt and by Morris dancers in Headington, Oxfordshire, to announce May morning. It is also used as a children's toy and by itinerant vendors and tradesmen. It produces one loud sound which may be caused to fluctuate in pitch by a variation of breath pressure. For further information see H. Balfour: 'A Primitive Musical Instrument (the Whit-Horn)', *Reliquary and Illustrated Archaeologist*, ii (1896), 221–4.

HÉLÈNE LA RUE

Whithorn, English, late 19th century (Pitt Rivers Museum, Oxford)

Whithorne, Emerson (*b* Cleveland, OH, 6 Sept 1884; *d* Lyme, CT, 25 March 1958). American composer and pianist. He studied the piano in Cleveland with James H. Rogers and at the age of 15 made the first of two successive yearly concert tours on the Ohio 'Chautauqua' circuit. In 1904 he went to Europe, where he was a pupil of Leschetizky (piano), Fuchs (theory and composition) and Schnabel (piano). From 1907 to 1909 he was concert manager for the pianist Ethel Leginska, whom he had married in 1907 and divorced in 1916. While living in London (1907–15) he taught the the piano and theory and wrote critical articles for *Musical America* and the *Pall Mall Gazette*; he studied examples of Asian music and subsequently composed several works based on Japanese and Chinese themes. Again in the USA, he served as executive editor of the Art Publication Society (St Louis, 1915–20). In 1920 he moved to New York and there held the post of vice-president (1921–2) of the Composers' Music Corporation, and was an active member of the League of Composers. After 1922 he devoted all his professional efforts to composition.

Whithorne's early works were described as quite modern but without 'the tendency of some modern writers to do away with melody'. Some of these compositions, including *Adventures of a Samurai*, Chinese Songs, *The Yellow Jacket* and *Greek Impressions*, were heavily tinged with Impressionism and ethnic elements. The piano suite *New York Days and Nights* (1922) indicated a style change in which his awareness of polytonality was evident. This suite represented American composition at the Salzburg Chamber Music Festival (1923), where it was highly successful. In the orchestral version it was played by jazz bands as well as symphony orchestras. In 1934 the Cleveland Orchestra gave the première of his Symphony no.1 in C minor, op.49. In a newspaper interview the composer stated that he 'tried to write a good symphony, logical, without shying at melody, with no attempt to be ultra modern'. His Second Symphony (1935), also introduced by the Cleveland Orchestra, won the Juilliard School competition for the publication of orchestral works by an American composer in 1939.

Whithorne's music, frequently described as 'American', did not resort to such obvious devices as jazz clichés and quotations of American themes, although jazz rhythms sometimes are heard. His compositions were frequently played during his lifetime, but they have rarely been performed since his death.

WORKS

Orch: The Rain, c1913; La nuit, 1917; Adventures of a Samurai, suite, 1919; Ranga, sym. poem (1920); Fata morgana, sym. poem, op.44, 1927; Poem, op.43, pf, orch, 1927; Vn Conc., op.46, 1928–31; Sym. no.1, op.49, 1929; Dream Pedlar, sym. poem, op.50, 1930; Fandango, 1931; Fandance, 1932; Moon Trail, sym. poem, 1933; Sym. no.2, op.56, 1935; Sierra morena, 1938; Strollers' Serenade, str (1943); The City of Ys, sym. poem; numerous others

CHARLES H. KAUFMAN

Whiting, Arthur Battelle (*b* Cambridge, MA, 20 June 1861; *d* Beverly, MA, 20 July 1936). American pianist and composer. He first appeared as a concert pianist in Worcester, Massachusetts, at the age of 13. He studied at the New England Conservatory under William Sherwood and Chadwick, and in 1883 went to Germany, where he studied with Rheinberger at the Munich Conservatory until 1885. For the next ten years he worked in Boston, after which he moved permanently to New York. In addition to teaching, he was active as a concert pianist, appearing as soloist with several American orchestras in performances of his Concerto in D minor and Fantasia op.11. In 1905 he was elected to the National Institute of Arts and Letters. After 1907 he gave a series of 'chamber music expositions' at Harvard, Princeton and Yale universities.

As a composer he was not prolific and restricted himself, in the main, to small forms. He was essentially a Classicist whose music betrayed the influences of Bach and Brahms.

He was also drawn to early music, playing the harpsichord in a series of concerts in 1911 and publishing *The Lesson of the Clavichord* in 1908. His compositions were described by Daniel Gregory Mason as espousing the subtle and suggestive as opposed to the 'brute sensationalism [then] prevalent in contemporary music' (1938). Whiting's works achieved a modest reputation, which did not outlive him.

WORKS
(*selective list*)

CHARLES H. KAUFMAN

Whiting, George E(lbridge) (*b* Holliston, MA, 14 Sept 1842; *d* Cambridge, MA, 14 Oct 1923). American organist and composer. He began his studies with his brother Amos at the age of five. In 1858 he succeeded Dudley Buck as organist of the North Congregational Church at Hartford, where he also organized a Beethoven Society. In 1862 he moved to Boston, where he served briefly as organist of the Mount Vernon Church and the Tremont Temple. He soon left for organ study under George W. Morgan in New York and in 1863 with William T. Best in Liverpool. Returning to the USA, he spent three years at St Joseph's, Albany, and then five years at King's Chapel in Boston, where he also served as organist of the Music Hall for one season.

In 1874 he went to Berlin for study under Haupt and Radecke, returning to Boston two years later as organist of the Church of the Immaculate Conception (until 1910) and head of the organ department of the New England Conservatory (until 1898). He remained in Boston for the rest of his life except for three or four years as head of the organ department at the College of Music in Cincinnati, at the invitation of Theodore Thomas. His compositions include an opera, *Leonora* (1893), a symphony in C minor, a piano concerto in D minor, a suite for cello and orchestra, choral works, service music, numerous organ compositions and partsongs. He also wrote several volumes of studies for beginning organists. His music was popular with his contemporaries and was admired by Elson for its melodic charm and well-mannered dramatic effects.

WILLIAM OSBORNE

Whiting, Richard A. (*b* Peoria, IL, 12 Nov 1891; *d* Beverly Hills, CA, 10 Feb 1938). American songwriter. He taught himself the piano and music theory, and induced his father to publish his first songs. In 1912 he became manager of the Detroit office of the music publisher Remick, who also issued some of his songs. Among his earliest successes were *It's tulip time in Holland* (1915), *Mammy's Little Coal Black Rose* (1916), and *Till We Meet Again* (1918). In 1919 he moved to New York where he wrote songs for the revue *Toot Sweet* and George White's first *Scandals*; his best-known songs date from the 1920s and include *Japanese Sandman* (1920), *Ain't we got fun?* (1921), and *Breezin' Along with the Breeze* (1926). Whiting became one of the first important Hollywood composers, beginning as a writer of music for silent films; later works include *Innocents of Paris* (1929), *Monte Carlo* (1930), *Ready Willing and Able* (1937) and *Hollywood Hotel* (1938). He was one of the most successful Tin Pan Alley songwriters of the 1920s and 1930s. Although he wrote lyrics, these were often naive; his melodies, however, with their recurrent motifs and unusual intervals following sudden harmonic shifts, often have a graceful and effortless style. His daughters, Margaret and Barbara Whiting, were popular singers.

WORKS
(*selective list*)

Selective edition: *Ain't We Got Fun: the Great Songs of Richard Whiting* (Secaucus, NJ, 1991)

STAGE
(*dates are those of first New York performance*)

Toot Sweet (R.B. Egan), 7 May 1919

George White's Scandals of 1919 (A. Jackson), 2 June 1919

Free for All (O. Hammerstein and L. Schwab), 8 Sept 1931

Take a Chance (B.G. DeSylva and Schwab), collab. V. Youmans, N.H. Brown, 26 Nov 1932 [incl. Eadie was a lady, You're an old smoothie]; film, 1933

FILMS
(*lyrics by L. Robin unless otherwise stated*)

Close Harmony, 1929 [incl. I'm all a-twitter]; The Dance of Life, 1929 [incl. True Blue Lou, King of Jazzamania]; Innocents of Paris, 1929 [incl. Louise]; Sweetie (G. Marion), 1929 [incl. My Sweeter than Sweet, Prep Step]; Let's go Native (Marion), 1930 [incl. Let's go native, Don't I do?]; Monte Carlo, 1930, collab. W.F. Harling [incl. Beyond the Blue Horizon, Always in All Ways]; Playboy of Paris, 1930, collab. N. Chase [incl. It's a great life, My Ideal]; Safety in Numbers (Marion), 1930 [incl. My future just passed]

One Hour with You, 1932, collab. O. Straus [incl. One Hour with You]; Bright Eyes (S. Clare), 1934 [incl. On the Good Ship Lollipop]; Ready Willing and Able (Mercer), 1937 [incl. Too Marvelous for Words]; Varsity Show (Mercer), 1937 [incl. Have you got any castles, baby?]; Hollywood Hotel (J. Mercer), 1938 [incl. Hooray for Hollywood, I'm like a fish out of water]

SONGS
(*all printed works published in New York*)

It's tulip time in Holland (D. Redford) (1915); Where the Black-Eyed Susans Grow (Redford) (1916); Mammy's Little Coal Black Rose (Egan) (1916); Till We Meet Again (Egan) (1918); I guess I'm more like mother than like father (Egan), in A Lonely Romeo, 1919; Japanese Sandman (Egan) (1920); Ain't we got fun? (Egan, G. Kahn) (1921); Sleepy Time Gal (J.R. Alden, Egan) (1925); Breezin' Along with the Breeze (1926); Horses (B. Gay) (1926); When did you leave heaven? (W. Bullock), in Sing, Baby, Sing (film), 1936; I can't escape from you (L. Robin), in Rhythm on the Range (film), 1937

DEANE L. ROOT

Whitlock, Percy (William) (*b* Chatham, 1 June 1903; *d* Bournemouth, 1 May 1946). English organist and com-

poser. He was assistant organist at Rochester Cathedral, 1921–30. From 1930 to 1935 he was director of music at St Stephen's, Bournemouth, and from 1932 until his death borough organist at the Municipal Pavilion there. He won a considerable reputation as a recitalist and broadcaster. He wrote a number of slight but attractive compositions, mostly for organ or choir; the harmonic idiom is conservative for its time but imaginative use is made of limited resources. Of the organ works, the *Plymouth Suite* and Five Short Pieces in Various Styles are still performed. His church music includes a Communion Service in G.

STANLEY WEBB

Whitman, Walt(er) (*b* West Hills, Long Island, NY, 31 May 1819; *d* Camden, NJ, 26 March 1892). American poet. The self-proclaimed 'poet of Democracy', he inaugurated a radical freedom from dogma and hierarchy in art, politics and sexuality. His rugged egalitarianism, rhythmic elasticity, sexual electricity and freewheeling mysticism have inspired more than 1200 vocal and instrumental settings, from the modernist asperity of Ruggles's *Portals* to the romantic expansiveness of Vaughan Williams's *Sea Symphony*. Beginning with Parry and Stanford, some of the earliest settings were by English composers, who saw in Whitman a liberation from jingoism, prudery and prejudice. Despite the popular association of Whitman with undisciplined looseness, his concise, lesser-known later poems yielded more settings that the more rhetorical early ones. The searing humanity and compassion of his Civil War poems made them popular during both World Wars, inspiring settings by Holst, Weill, Hanson, Hindemith and others.

With its first-person intimacy and openness to experience, Whitman's poetry has a peculiar universality, connecting with scenarios as varied as Holst's transcendental mysticism (*Ode to Death*, 1919), Weill's 1947 New York *Street Scene* and John Adams's evocation of the AIDS crisis (*The Wound Dresser*, 1987). The most daring and original settings, Delius's *Sea Drift* (1903–4) and *Songs of Farewell* (1930), eschew the cheery communalism attractive to so many composers to reveal a rarified aloofness and tranquility in the face of death. Although his popularity began mainly in Europe, in music as well as literature, numerous American composers including Luening, Sessions, Thomson, Carter, Starer, Bernstein, Hoiby, Rorem, Crumb and Persichetti contributed settings in the later 20th century.

JACK SULLIVAN

Whitney, Robert (Sutton) (*b* Newcastle upon Tyne, 9 July 1904; *d* Louisville, KY, 22 Nov 1986). American conductor and composer of English birth. He grew up in Chicago and attended the American Conservatory of Music, studying composition with Arthur Olaf Andersen and Leo Sowerby, and the piano with Max Oberndorfer and Rudolph Reuter. After making his début as a pianist in Chicago in 1925 he founded the Whitney Trio, which broadcast regularly on local radio until 1930. Whitney then began to study conducting with Eric De Lamarter and Frederick Stock and made his début with the Chicago Civic Orchestra in 1933. His Concerto Grosso was performed by the Chicago SO under Stock in 1934. In 1937 he founded the Louisville SO, which he gradually made an experienced, full-size ensemble. After further studies with Koussevitzky at the early sessions of the Berkshire Music Center (1940–41), Whitney initiated at Louisville, in 1948, a policy of commissioning and recording symphonic music; over 100 works by Berkeley, Blacher, Cowell, Dallapiccola, Hovhaness, Tcherepnin and Whitney, among others, were performed as part of this scheme. Whitney was dean of the music school of Louisville University, 1956–72, and closely bound the school's instrumental teaching with the orchestra's work. He retired from the orchestra in 1967, and his policy was continued by his successor, Jorge Mester, though not by later music directors.

RICHARD BERNAS

Whittall, Arnold (Morgan) (*b* Shrewsbury, 11 Nov 1935). English musicologist. He read music at Emmanuel College, Cambridge (1956–62, BA 1959), where he took the doctorate in 1963 with a dissertation on the Querelle des Bouffons. He subsequently held posts as lecturer at Nottingham University (1964–9), lecturer (1969–71) and senior lecturer (1971–5) at University College, Cardiff and reader at King's College, London (1976–81), where in 1981 he became the first professor of musical theory and analysis in the United Kingdom. He retired from London University in 1996 and subsequently taught at institutions across England and Europe. In 1985 he was Visiting Professor at Yale University. His chief interest has been 19th- and 20th-century music, with special reference to modern British composers and, in his later writings, to Wagner. His major publications include *Musical Composition in the Twentieth Century* (1999), an enlarged version of his earlier work *Music Since the First World War* (1977). His extensive work for radio included introducing the BBC College Concerts from 1977 to 1983, which amounted to 36 major broadcasts and was an activity underlining his lifelong commitment to providing access to contemporary music.

JONATHAN DUNSBY

Whittenberg, Charles (*b* St Louis, MO, 6 July 1927; *d* Hartford, CT, 22 Aug 1984). American composer. After graduating from the Eastman School (BA 1948), where he was a composition pupil of Burrill Phillips and Bernard Rogers, he undertook an investigation of the music of Stravinsky, Schoenberg and Webern and of serial procedures in general. These studies were radically to affect his development as a composer. He taught at Bennington College (1962) and at the Center of Liberal Studies, Washington DC (1965), and was then appointed associate professor at the University of Connecticut (1967), where he taught for ten years. From 1961 to 1963 he edited the *American Composers Alliance Bulletin*, and he worked at the Columbia-Princeton Electronic Music Center in 1962, coming under Luening's influence. He received two Guggenheim fellowships (1963–5) and the Rome Prize of the American Academy (1965–6). Whittenberg considered as highly significant his connection from 1961 with the American Brass Quintet, for which he wrote some of his most striking music; the association led him to compose agile, elegant, soloistic chamber music for brass instruments, an innovation that influenced other composers. In Whittenberg's music rapidly shifting, timbrally defined blocks and sharply contoured angular lines are woven together, interspersed and superimposed; high energy and constant change are lifelong characteristics.

WORKS

Orch: Composition for Winds, before 1969; Correlatives, 1969; Serenade, str orch, 1971–3

Inst: Dialogue and Aria, fl, pf, 1959; Concert-Piece, bn, pf, 1961, rev. 1971; Triptych, brass qnt, 1962; Chbr Conc., vn, 7 insts, 1963; Sonata, vc, pf, 1963; Variations for 9 Players, wind qnt, tpt, trbn, vn, db, 1964, rev. 1970; Str Qt, 1965; Sextet, fl + pic, cl, bn, vn, vc, db, 1967; Games of 5, wind qnt, 1968; Iambi, 2 ob, 1968, rev. 1972; Conc., brass qnt, 1969; Str Qt no.2, 1974–5; In Memoriam Benjamin Britten, perc, 1977; other works

ELAINE BARKIN

Whittle and dubb [dub]. Obsolete names for the PIPE AND TABOR.

Whizzing bow. A type of musical bow sounded by swinging it rapidly around as with a bullroarer. It is found in West Africa, China, Indonesia and parts of Latin America, and is classified in the Hornbostel-Sachs system as a free AEROPHONE (whirling). *See* MUSICAL BOW, §§2 and 3.

Who, the. English rock group. It was formed in West London in 1964 by Pete Townshend (Peter Dennis Blandford Townshend; *b* Chiswick, London, 19 May 1945; guitar and vocals), Roger Daltrey (Roger Harry Daltrey; *b* Hammersmith, London, 1 March 1944; lead vocals), John Entwistle (John Alee Entwistle; *b* Chiswick, 9 Oct 1944; bass guitar) and Keith Moon (Keith John Moon; *b* Wembley, London, 23 Aug 1947; *d* 23 Aug 1978; drums). They began playing rhythm and blues covers, like most contemporary London bands, but Townshend started to write original material in order to capitalize on the band's mod following engineered by then manager Pete Meaden. *My Generation* literally spoke for this audience, although Townshend claimed most of his songs were born of his intense loneliness; he avoided love-song clichés in favour of the documentary approach taken by Ray Davies of the Kinks.

The Who's early sound was founded on Townshend's guitar style. In the context of Merseybeat and London rhythm and blues, the band's use of only one guitarist was an important step, laying a crucial foundation for the power trio represented by Cream and the Jimi Hendrix Experience, and later, the Jam. In effect, Townshend played both lead and rhythm guitar, often switching functions within a song. He did not consider himself an adequate lead guitarist, a belief which led to his development of power chords (often played with a ferocious attack achieved by propelling his right arm in a windmill fashion) and the control of feedback which changed his instrument from an amplified guitar to something quantitatively different. The absence of a rhythm guitar from the texture was counterbalanced by Moon's manic drumming, who seized more space and presence than any rock drummer had done previously.

The release of Townshend's *Tommy* (Track, 1969) seemed to indicate a change of direction. Following the Pretty Things' *S.F. Sorrow* it was an early rock opera concerned with the search for identity, and was filmed to great success in 1975. Like the Beatles' *Sgt. Pepper* album two years earlier, the response to *Tommy* was particularly overblown in the USA. A second piece, *Quadrophenia* (Track), followed in 1973 and, although similar, it was more down-to-earth and probably less successful; it too was filmed in 1979. These pieces marked the Who's experiments with progressive rock, and as that style's fortunes waned, so did the status of *Tommy*. Although by the 1990s it was critically disregarded, new productions on Broadway and in London in the middle of that decade were well received.

The Who were successful with both singles and albums, itself a rare feat. They achieved 13 hit singles in the UK top ten (one in the USA) from 1965 (*I can't explain*) to 1981 (*You Better You Bet*). *My Generation* (Brunswick, 1965) was the first of 13 top ten albums (eight in the USA), the last being the compilation *Who's Better Who's Best* (Polydor 1988). They were one of the few earlier bands acknowledged as influences during the heyday of punk by such groups as the Sex Pistols, the Clash and the Jam, not least for their aggressive nature: they tended to play at extremely loud volumes (they were once measured at 120 decibels at a live show) and Townshend would sometimes smash his guitars on stage, a habit which stretched to his and Moon's destroying hotel rooms.

In 1969 Townshend became a disciple of the guru Meher Baba, a move that reflected the deep thinking behind his lyrics. It subsequently developed into an overt social concern: he has performed in aid of Amnesty International, Rock Against Racism, the Prince's Trust and his own anti-drug charity. In 1978 Moon died from an overdose of the drug he was taking to control his alcoholism and although the band continued with the ex-Small Faces drummer, Kenny Jones, they finally split up in 1983. They reformed for the occasional performance, such as Live Aid in 1985. Townshend, Daltrey and Entwistle all undertook solo projects from about 1972, which continued into the 1990s. Daltrey has also taken a number of film roles, notably that of Liszt in Ken Russell's *Lisztomania*.

ALLAN F. MOORE

Wholefall. A type of ornament. *See* ORNAMENTS, §6.

Whole note. American term for SEMIBREVE. *See also* NOTE VALUES.

Whole tone. The interval equal to the sum of two semitones. *See* TONE (i).

Whole-tone scale. A scale that divides the octave into six equal-tempered whole tones: C–D–E–F♯–G♯–A♯(=B♭)–C or its sole transposition, D♭–E♭–F–G–A–B(=C♭)–D♭. Since all the intervals between adjacent degrees are the same, the scale is tonally unstable, that is, a centre can be formed only by emphasizing one of its notes to give it artificial prominence. Moreover, it lacks the fundamental harmonic and melodic relationships of major–minor tonality, namely those of the dominant (perfect 5th) and the leading note (minor 2nd).

Whole-tone melodic passages within the diatonic system were explored fairly extensively by Russian composers in the 19th century. A passage near the end of Glinka's overture to *Ruslan and Lyudmila* (1842), given in ex.1, shows how a whole-tone scale in the bass can be

Ex.1

harmonized by a series of transitions, all keeping within the bounds of traditional tonality. Dargomïzhsky, in *The Stone Guest* (*c*1866–9), came much nearer to using it as an autonomous system, generating contoured melodic lines as well as harmonies (for instance, in the passage from Act 3 quoted in ex.2). But it was in the works of the French Impressionists, particularly Debussy, that it was first used in opposition to the major–minor system, as a

means of suspending tonality. The pervasion of the whole-tone scale in Debussy's piano prelude *Voiles* (from book 1, 1910) is exceptional, though it figures significantly in the harmony of many of his earlier works, including *Pelléas et Mélisande* (1902; see ex.3, from Act 4 scene ii) and *La mer* (1905). It was also an important transitional element in the development of an atonal idiom in Germany in the decade before World War I. Messiaen classified it as the first MODE OF LIMITED TRANSPOSITION.

H.K. ANDREWS/R

Whytbroke [Whitbroke], **William** (*b c*1501; *d* between 14 March and 2 April 1569). English church musician and composer. During 1525, at Lichfield Cathedral where he was a vicar choral, he took all holy orders up to the priesthood. By 1529–30 he was employed as one of the chaplains of John Taverner's choir at Cardinal College, Oxford. In 1531 Whytbroke was appointed one of the 12 minor canons (chaplains of the choir) of St Paul's Cathedral, London. (The date of his admission (Hennessy) has not been verified but is probably correct.) He evidently enjoyed outstanding qualities since by 1534 he was appointed sub-dean (senior minor canon), a position he held for nearly 30 years. His knowledge of musicians at Lichfield and Oxford seems to have contributed substantially to the repertory preserved in the Gyffard Partbooks (*GB-Lbl* Add.17802–5), which probably represent the repertory of four-part music performed at St Paul's during the reign of Mary I. In 1563 Whytbroke found himself unable to subscribe to the protestantism of the Thirty-Eight Articles and in February 1564 he was ejected from his position at the cathedral. Nevertheless, he clearly remained on good terms with his former colleagues. In his will, which discloses that he died a wealthy man, he requested burial in the cathedral cloister near to the grave of John Redford. His legatees included the composors Philip ap Rhys and Edmund Strowger.

Whytbroke's optional extra part for John Taverner's responsory *Audivi vocem* engages a rhythmically active and expansive style which accords well with Taverner's own part of the composition. A tendency towards vigorous and florid writing is present also in the Mass *Apon the Square*, one of Whytbroke's two surviving larger-scale works. His scheme for this work is similar to all the masses which use squares (*see* SQUARE), with three-part writing as the norm and only occasional use of the full choir. The work is highly segmented, and phrases of the appropriate melody are present throughout as cantus firmi, moving from voice to voice and often highly elaborated. In its choice of squares this mass is almost a twin to the second of William Mundy's square masses, for it differs from Mundy's only in its choice of Kyrie melody, which with Whytbroke is the 'Leroy' tune. The style of these masses, which in intricacy often look like the reduced sections of big festal works rather than short masses, is one which obviously suited Whytbroke, whose music shows his assurance in the pre-Reformation style, essentially non-imitative and with long, ornate phrases. The votive antiphon *Sancte Deus* is in a less exuberant idiom, such as seems to have been common for antiphons after about 1530. It is a setting of a text commonly used as a Jesus antiphon, of moderate length (about 150 breves), sectionalized as is usual, but employing few reduced 'soloist' sections. This rather unusual structure, together with the fact that the piece is in duple time throughout, suggests an unorthodox approach to the making of a votive antiphon. Whytbroke's two known English pieces probably date from the Edwardian period. Both are examples of the simplest type of Reformation service music, for the most part homophonic and with one note to a syllable. A *Nunc dimittis* is appended to the *Magnificat* in two sources (1560[26], *GB-Ob*), but these are two different settings and unattributed; neither is likely to be by Whytbroke.

DAVID CHADD/ROGER BOWERS

Whyte, Ian (*b* Dunfermline, 13 Aug 1901; *d* Glasgow, 27 March 1960). Scottish conductor and composer. He studied the piano at the RCM in London and composition with Stanford and Vaughan Williams. He returned to Scotland in 1923, first as music director to Lord Glentanar, who mounted productions of Mozart and Sullivan at Aboyne in Aberdeenshire, then from 1931 as the BBC's

head of music in Scotland, an appointment he held for 14 years. Whyte's insistence that Scotland should originate its own music broadcasts had its most important outcome in the founding in 1935 of the BBC Scottish Orchestra, with a fellow Scot, Guy Warrack, as its conductor. Warrack developed the orchestra (later renamed the BBC Scottish SO) into a versatile ensemble with an adventurous repertory. In 1945 Whyte himself became its conductor and continued its enterprising policies until his death. His musical acumen was demonstrated not only in his qualities as a conductor – his exceptionally acute ear and the lucidity of his performances – but also in his choice of assistants. These included, very early in their careers, Alexander Gibson and Colin Davis. During Whyte's terminal illness much of his work was taken over by Bryden Thomson.

Whyte's responsiveness to Scottish traditional music is demonstrated in his numerous song and dance arrangements. Many of these were initially prepared for a radio series 'Music from the Scottish Past': they include madrigals, choral pieces and music for strings, all restored from fragments. Several of his original works received performances at the Edinburgh Festival, among them a piano concerto and a symphony. His ballet *Donald of the Burthens*, produced at Covent Garden in 1951, incorporated bagpipes (not entirely unsuccessfully) in an otherwise conventional orchestra. His *Eightsome Reel* for orchestra, and other pieces of the kind, could be said to have paved the way for Scottish-based entertainment music by Arnold, Hamilton, Musgrave and others.

WORKS
(*selective list*)

Ops and operettas: Comala (after Ossian), The Forge, The Tale of the Shepherd

Ballets: Goblin Haa; The Trout; Donald of the Burthens, 1951

Orch: 2 syms.; concs. for pf, vn, va; Edinburgh, Tam o' Shanter, The Rose Garden, sym. poems; Concert Ov.; Oragif Ov., 1940; The Treadmill, ov.; Dunfermline, prelude; Dark Lochnager; The Isle of Skye; Glamis Castle; A Prayer (by Robert Burns); Fighting for the Empire; Intermezzo; Eightsome Reel; Scottish Dances; Poem (Sweet Allander Stream), small orch

Str orch: Poem; The Ghost of the Strath; Airs and Dances from the Scottish Past, 2 vols.; Sir Walter Scott, air; Interlude; Elegy; Melody

Vocal: Sonnet (W. Wordsworth), 1v, chorus; The Beatitudes, S, chorus, str; partsongs, SATB/male vv; hymns and carols, SATB; numerous songs, 1v, pf/orch/str/insts

Chbr and solo inst: 3 str qts; pieces for wind insts, pf; An Edinburgh Suite, pf; Pittencrieff Suite, pf; Canzonetta, pf, 1943

Principal publishers: Chester, Universal

CONRAD WILSON/R

Whyte, Robert. *See* WHITE, ROBERT.

Whythorne, Thomas (*b* Ilminster, 1528; *d* London, *c*31 July 1596). English lutenist and composer. The discovery in 1955 of his autobiography (written *c*1576) has made Whythorne the most intimately revealed personality among Elizabethan musicians. After six years at Magdalen College School, Oxford, he matriculated at Magdalen College. His academic career ended with the death of the uncle who had supported him, after which Whythorne became 'servant and scholar' to John Heywood for over three years. There, Whythorne 'learned to play on the virginals, the lute, and to make English verses'. Later he worked as serving-man and music tutor, rising to employment with the Duchess of Northumberland. After the accession of Mary Tudor, Whythorne left for the Continent. His route to and from Naples can be traced in some detail, but he reported little about music or musicians in Italy.

By 1555 Whythorne had become re-established in England as a music tutor. In 1557 he served Lord Ambrose Dudley, son of the Duchess of Northumberland, and he later occupied similar positions in other eminent households. From 1560 to 1562 he acted as a private tutor at Trinity College, Cambridge, to William Bromfield, son of a rich merchant. Later, when the merchant served as Lieutenant General of Ordnance for the expeditionary force at Le Havre, Whythorne became entrusted with Bromfield's business affairs. These responsibilities had ended early in 1565, when Whythorne resolved to give himself wholly to the profession of music.

Remembering the popularity of madrigal books in Italy, Whythorne decided that he would make himself known to many 'in the shortest time' by publishing a collection of his own *Songes for Three, Fower and Five Voyces* (London, 1571; ed. in McQuillan), the first work of its kind to be published in England. No perfect set of the five books now exists. Publication of the *Songes* gained Whythorne an appointment as master of music in the chapel of Archbishop Parker, where he set Parker's versions of Psalms lxxxvi and cvii to music (now lost). Parker's death in 1575 is the last event recorded in Whythorne's autobiography. Other records reveal that he married in May 1577.

Thomas East printed his *Duos, or Songs for Two Voices* in London in 1590. Whythorne made it clear that the music was intended either for voices or combined instruments and voices. The preface shows that he offered the duets to fill a need in areas where singers were difficult to bring together. The volume contains a woodcut portrait of the composer. The first 22 duets were 'made for young beginners', or 'for a man and a childe to sing, or otherwise for voices or Instruments of Musicke, that be of the like compasse or distance in sound'. The second group consists of 15 songs 'made for two children to sing. Also they be aptly made for two treble Cornets' or other voices or instruments of similar compass. The remaining 15 compositions were 'all Canons of two parts in one', and are intended for voices or instruments 'of divers compasses or distances'.

Although Whythorne particularly acknowledged Italian influences, and chiefly that of the *napolitana*, many of his partsongs owe much to English dance and popular song. The principal interest is normally in the upper voice, the lower voices adding a semi-contrapuntal and non-imitative accompaniment. Particularly characteristic are his restrained use of dissonance and simple chordal structures contrasted with occasional instances of false relations, hemiola rhythms, syncopation and unexpected chords. Few of the texts that Whythorne set offer great scope for dramatic development, nor indeed did the composer make any great use of chromaticism and dissonance for expressive purposes. False relations occasionally appear on affective words such as 'pierce' and 'protest' but they are found in neutral emotional contexts, as in much English music from the middle of the century. *Since I embrace the heavenly grace* (from the 1571 volume) is representative at once of his more extended work and of his most dynamic style, ending as it does in a sequence of vigorously contrapuntal melismas to the word 'rejoice'. Whythorne's most effective pieces are among the three- and five-part settings, which are

predominantly secular. The four-part 'Grace' anthems (in the 1571 volume) show his awareness of the simpler aspects of the current liturgical style; like the curiously square *Venite*, however, these fall below the level of the best that Whythorne's contemporaries were producing.

Whythorne's writings are also significant. His is, in the modern sense, the first sustained English autobiography (see Osborn). For social historians, it provides evidence of the manners and customs in great houses, both above and below stairs. For literary historians, it proves a mine of proverbs and of phonological evidence, since Whythorne attempted with Hart's 'new orthography' to record 'words as they be sounded in speech'. His 200 poems, though they are neither better nor worse than those of his master, John Heywood, increase the corpus of 'drab poetry' before the dawn of the golden age. His autobiography reveals many details about the state of music and the condition of musicians in the early years of Elizabeth's reign. It takes us into the 'secret purposes' of an introspective, yet serious, composer with a lofty concept of his calling, a man who rose to success in his profession.

JAMES M. OSBORN/ROBERT McQUILLAN

Wicel, Georg. *See* WITZEL, GEORG.

Wich, Günther (*b* Bamberg, 23 May 1928). German conductor. He studied the flute with Gustav Scheck at Freiburg, 1948–52, and later turned to conducting. His début was in 1952 at the Städtisches Theater in Freiburg, where he became chief opera conductor and remained until 1959. Thereafter he was successively appointed opera director at Graz from 1959; Generalmusikdirector at Hanover from 1961, and at the Deutsche Oper am Rhein, Düsseldorf/Duisburg, from 1965 to 1980. While at Hanover he conducted the first production of Schoenberg's three one-act operas (*Erwartung*, *Die glückliche Hand*, *Von heute auf morgen*) as a triple bill in 1963, later taking it to the Venice Biennale. He was also professor of conducting at the Folkwang Hochschule, Essen, 1969–73, and in 1982 became a professor at the Musikhochschule, Würzburg, a post he held until 1994. His work at Düsseldorf was distinguished by his performances of contemporary operas, notably Zimmermann's *Die Soldaten*, in addition to those of Berg and Schoenberg, and he toured with the company to leading European festivals (including the 1972 Edinburgh Festival with the British première of *Die Soldaten*). A frequent guest conductor at other opera houses, he made his Covent Garden début in 1968 with *Die Zauberflöte*, and conducted major orchestras in many European countries and in Japan. His repertory was wide-ranging, from Baroque music, which he conducted with the Capella Coloniensis, through the standard repertory and the Second Viennese School to contemporary works. He was an expressive conductor in the Furtwängler tradition, but with his own generation's feeling for clarity and transparence (especially in Wagner). His recordings include works by Corelli, Handel, Mozart and Pfitzner.

WOLFRAM SCHWINGER/MARTIN ELSTE

Wichello, Abiell. *See* WHICHELLO, ABIELL.

Wicke, Peter (*b* Zwickau, 17 June 1951). German musicologist. He completed his first degree in musicology in 1974 at the Humboldt University, Berlin, where he worked as an assistant and took the doctorate in 1980. In 1983 he founded the Forschungszentrum Populärer Musik at the Humboldt University and completed the DSc in 1986. In 1988 he joined the faculty of Carlton University, Ottawa as an adjunct professor and returned to the Humboldt University that same year to fill the post of chief research assistant in musicology. He was appointed lecturer at the university in 1990 and professor of popular music in 1993. He was a member of the editorial staff for *Beiträge für Musikwissenschaft*, 1974–84; other professional appointments include president (1985–93) and general secretary (1987–91) of the International Association for the Study of Popular Music, member of the editorial board of *Popular Music* (from 1990) and *Cultural Studies* (from 1991), editor-in-chief of *PopScriptum* (from 1992), adviser on music for the Goethe Institute (from 1992), editor of the series Populäre Musik und Jazz in der Forschung (from 1993) and president of the Kulturpolitische Gesellschaft of the Bundesrepublik.

Wicke was one of the earliest champions of popular music as an area of musicological investigation and his pioneering writings on the aesthetics and sociology of rock music have become standard works in the field. In addition to authoring dictionaries on popular music he has edited and contributed to many other music dictionaries and encyclopedias covering the late 20th-century generally. He has also written on jazz and music historiography. His writings are informed by a historical materialist perspective and are focussed on the relationship between the political culture of a country (particularly the former German Democratic Republic) and its rock music.

Wicks. American firm of organ builders. It was founded as Wicks Organ Co. in 1906 by the brothers Louis J. Wick (1869–1936), Adolph Aloys Wick (1873–1943), and John Frank Wick (1881–1948), who had built their first organ in Highland, Illinois, in 1899, while Louis and John were working as watch makers and Adolph as a cabinet maker. While their first organs employed mechanical or tubular-pneumatic action, the firm developed and patented a direct-electric action in 1914 which, unlike the electro-pneumatic actions used by most other builders of the period, opened the individual pipe valves without pneumatic assistance. Refinements of this action, which facilitates the unification or duplexing of small organs, were patented in 1922 and 1929. The Wicks Organ Co. has continued to use this form of action and has always done a brisk trade in small 'stock' organs as well as medium and large instruments. John Henry Wick (1912–40) and Martin M. Wick (*b* 1919), sons of John Frank, entered the firm, Martin becoming president in 1948. John Sperling was appointed tonal director in 1957. Technical innovations include the first large-scale use of transistorized switching (1960s) and 'opti-key' switching (1990s). The firm's most important instruments include those in Temple Beth El, Detroit (1935), Sacred Heart Cathedral, Rochester, New York (1966), the First United Methodist Church, Peoria, Illinois (1977), Morehouse College, Atlanta, Georgia (1982), and the First Baptist Church, Memphis (1986).

BARBARA OWEN

Wicks, (Edward) Allan (*b* Harden, Yorks., 6 June 1923). English organist and choirmaster. The son of a clergyman, he studied with Thomas Armstrong at Christ Church, Oxford, where he was organ scholar. He took the MA and FRCO after war service. He became sub-organist of York Minster in 1947, organist of Manchester Cathedral in 1954 and organist of Canterbury Cathedral in 1961, retiring in 1988 at the conclusion of that year's Lambeth Conference. A highly popular recitalist, possessed of a fine technique, his wide-ranging recital programmes included first performances of works by British composers including Peter Maxwell Davies, Iain Hamilton and Malcolm Williamson, and he made several tours of the USA and Europe. He had exceptional power to communicate excitement whether as an organist, conductor or orator, and his Canterbury choir performed with a rare freshness and spontaneity; his service lists were adventurous and progressive without being eccentric, the music of Alan Ridout appearing regularly alongside Bach motets and other works not often then tackled by British cathedral choirs. He collaborated with Christopher Dearnley (organist of St Paul's Cathedral) in composing strong, simple music for the Anglican Series 3 rite for Holy Communion. He received the Lambeth degree of MusD in 1974 and an honorary DMus from the University of Kent in 1985, and was made a CBE in 1988.

STANLEY WEBB/R

Wicumbe, W. de. *See* WYCOMBE, W. DE.

Widdop, Walter (*b* Norland, nr Halifax, 19 April 1892; *d* London, 6 Sept 1949). English tenor. He joined the British National Opera Company in 1923 and made his début as Radames. He appeared at Covent Garden first as the protagonist in *Siegfried* (1924), his other Wagnerian roles there being Siegmund (1932) and Tristan (1933, 1937, 1938). In 1928 he sang with Frida Leider in Gluck's *Armide* and the following year created the role of Bagoas in Goossens's *Judith*. In 1936 he sang the title role in the British première of Stravinsky's *Oedipus rex*. Abroad, he was heard in Spain, the Netherlands and Germany. His operatic repertory included some of the heavier Italian roles, and in oratorio he brought an able technique as well as an ample voice to such music as 'Sound an alarm' in *Judas Maccabaeus*. Making one of his rare postwar appearances, he sang Lohengrin's Farewell at a London

Promenade concert the night before he died. Records made around 1930 show a firm resonant voice and a virile style, confirming his place among the best heroic tenors of the century.

J.B. STEANE

Wideburg, Michael Johann Friedrich. *See* WIEDEBURG, MICHAEL JOHANN FRIEDRICH.

Widerkehr [Wiederkehr, Viderkehr] [*l'aîné*], **Jacques (-Christian-Michel)** (*b* Strasbourg, 18 April 1759; *d* Paris, April 1823). Alsatian composer and cellist. According to Choron and Fayolle he was a pupil of F.X. Richter. In the title-pages of his works his name appears as J. Widerkehr *l'aîné* and in his six violin duos opp.3 and 4 (*c*1794) he identified himself as the pupil of Dumonchau, professor of the cello in Strasbourg and father of the pianist Charles-François Dumonchau. Choron and Fayolle maintained that Widerkehr came to Paris in 1783 as cellist of the Concert Spirituel and the Concert de la Loge Olympique; however, the absence of his name among the cellists in *Les spectacles de Paris* (1794–1800) and other almanacs implies that he never held a regular post in a major Parisian orchestra. He probably made his living as a teacher, occasionally as a performer, and as a composer of instrumental works, which appeared regularly from the early 1790s.

Widerkehr achieved considerable fame as an instrumental composer, above all for his *symphonies concertantes* for several wind instruments, of which Fétis, seconding the opinion of Choron and Fayolle, wrote: 'These works and those of Devienne were for many years the best of that genre known in France'. Around 1800, when most of Widerkehr's works in this form were written, the *symphonie concertante* was more popular than the symphony itself on French concert programmes. Widerkehr's 12 to 15 essays in this genre were written for a variety of solo combinations, predominantly two or three wind instruments; they were performed by outstanding virtuosos in several Parisian concert halls and 'chez le Premier Consul'. No.4 in F was ambitiously orchestrated for clarinet, flute, oboe, horn, two bassoons and cello as solo instruments, with an orchestra of strings, two oboes and two horns. The few extant examples of these works are melodious, well-wrought and light in mood.

Widerkehr's chamber works, written mainly for the large amateur market of the time and frequently allowing for the substitution of instruments, were likewise successful. His ten string quartets are tuneful and show the hand of an experienced string player; the two quintets have rather demanding first violin parts, but the other parts are simple and purely accompanimental. The *Mercure de France* (August 1794) described his *Trois duo concertants* op.4 as delighting both amateurs and artists alike, and one of his *Trois duos pour piano et violon ou hautbois* was quite favourably received in Germany (G.L.P. Sievers: 'Musikalisches Allerley aus Paris, vom Monate July' *AMZ*, xx, 1818, cols.641–6, esp.642).

Widerkehr is sometimes confused with Philippe Widerkehr *le jeune* (*fl* Paris, 1793–1816), a trombonist, composer and teacher who may have been his brother. The name appears several times in *Les spectacles de Paris* among the trombonists, and as the composer of a two-volume *Pot-pourri pour le forte piano* (Paris, *c*1803). In 1793 he was a corporal and trombonist in the Parisian National Guard, and from 1795 to 1816 he was a professor of solfège at the Conservatoire.

WORKS

all printed works published in Paris

ORCHESTRAL

numbers taken from FétisB and from BrookSF

Symphonies concertantes, extant: no.2, C, ob, bn (*c*1800); no.4, F, cl, fl, ob, hn, 2 bn, vc (*c*1800); no.9, C, cl, fl, bn (*c*1800), also arr. fl, ob, bn (n.d.); no.14, F, 2 hn (*c*1801)

Symphonies concertantes, lost, possibly incl. duplicates or arrs. (sources noted in parentheses): no.5, hn, bn (FétisB); no.6, ob, bn (FétisB); no.7, cl, fl, bn (FétisB, ? = no.9); no.10, hn, bn (FétisB); no.11, ob, bn (FétisB); no.13, 2 bn (EitnerQ); no.1, cl, bn (*c*1800) (FétisB; Pierre, 1895, p.149); no.8, pf, cl (*c*1800) (FétisB); no.15, hp, hn (*c*1800), perf. 1820 (Decourcelle); no.3, hn, bn (*c*1801) (FétisB); no.12, cl, ob, bn (1801) (Pierre, 1895, p.149)

2 symphonies à grand orchestre, cited in *Choron-FayolleD* as pubd and in *FétisB* as MS, lost, ?identical with symphonies concertantes

Romances and arrs. in contemporary anthologies

CHAMBER

2 sonates, pf, with vn, b acc. (n.d.); [6] Duo concertants, 2 vn/vn, vc, opp.3–4 (*c*1794); 3 quatuors concertants, str qt, op.6 (1797, 2/*c*1801 as op.1); 3 quatuors, 2e livre (*c*1803); 2 nocturnes, pf, bn/vn (*c*1807), no.1 lost; 1er [–2e] quintetto, 2 vn, 2 va, vc (*c*1808); 3 duos, pf, vn/ob/cl (*c*1817); 4 quatuors, 3e livre (*c*1819); 3 trios, fl, hn, bn (*c*1820)

Cited in *FétisB*: 6 sonatas, pf, vn, vc; 3 trios, fl, cl, bn, op.12; 6 qnts, pf, fl, cl, hn, bn

VOCAL

Oreste (op), unperf., *F-Po*

Revolutionary hymns (*c*1794): Chant de guerre (J.B. Lucas Rochemont), Les mannequins d'Autriche, Ode sur l'enfance (J.-F. Paulin Crassous)

Widerkehr, Philippe [*le jeune*]. Possibly the brother of JACQUES WIDERKEHR.

Widhalm, Leopold (*b* ?Nuremberg, 2 Oct 1722; *d* Gostenhof, Nuremberg, 10 June 1776). German violin maker. He was the most important 18th-century German violin maker outside Mittenwald. Widhalm often selected the most handsome material available, and the sharpness and good taste of his work show him to have been an excellent craftsman. He was doubtless influenced by these same qualities in the instruments of the celebrated Nuremberg lute makers, but his primary inspiration was Jacob Stainer, from whose model he appears never to have departed. Widhalm's best instruments have a soft orange or orange-red varnish, others light brown. Occasionally he made dark, almost black violins of small merit. He made very good cellos and violas. Instruments of the same character as his, and with the same label and interior brand 'L.W.', are seen dated after 1800, from which one may infer that the family business continued in the hands of his sons.

CHARLES BEARE

Widmann, Erasmus (*b* Schwäbisch Hall, bap. 15 Sept 1572; *d* Rothenburg ob der Tauber, 31 Oct 1634). German composer, organist, instrumentalist, teacher and poet.

1. LIFE. Widmann came of a well-educated family. The Lateinschule at Schwäbisch Hall provided a good musical training in the 1580s under Johannes Crusius, and young Widmann 'sang a good discant' there and learnt to play the organ, harpsichord, lute, zither, viol, flute and trombone. On 28 April 1589 he entered the University of Tübingen and passed his bachelor's examinations in 1590; at the university, students could study plainsong, notation and polyphony. Widmann is next heard of as an organist at Eisenerz, Styria, in 1595, and from 1596 until 1598 he held a similar position at Graz. He was a Lutheran, but since the Peace of Augsburg (1555) Protestantism had spread in Austria, and during the 1570s it was even tolerated. In 1598, however, on the orders of Duke Ferdinand, Lutheran ministers were given two weeks to leave. Moreover, in the same year Widmann almost lost his position because of trouble with women: two young women accused him of breach of promise, while he professed to wish to marry a third (he married Margarethe Ehetreiber on 12 June). Because of the action against Lutherans he returned in late 1598 or early 1599 to Schwäbisch Hall, where he became Kantor, a position demanding both academic teaching and musical activity; as in his other positions, it was the musical duties that interested him most.

Early in February 1602 Widmann became *Präzeptor* and organist at the court of Count Wolfgang von Hohenlohe at Weikersheim. One of his references stated that he was 'a good musician and composer but rather worldly and somewhat of a dandy'. His new duties, as well as being grounded in humanistic studies, required experience in both vocal and instrumental music. In 1607 the duke made plans to expand his Kapelle and freed Widmann from academic teaching. Widmann submitted an hourly schedule of rehearsals, music teaching, compositions, instrument repairs and related activities from 7 a.m. to 3 p.m. six days a week. The other hours were to be used 'to study authors, stories and comedies': Widmann was interested in literature and wrote the words of his secular works. In 1610 Count Wolfgang died, and his successor required Widmann to resume academic teaching in addition to continuing his duties as Kapellmeister and organist. He began to seek a new post, and there are reports that his teaching was unsatisfactory.

In August 1613 Widmann went to Rothenburg ob der Tauber as *Präzeptor* and Kantor, and he became organist of the Jacobskirche the following year. Again he had hoped to devote himself to musical activities alone, but some teaching of other subjects was demanded of him. Before 1627 he was awarded the poet's crown, for he identified himself as 'laureatus' in *Libellus antiphona* of that year. The sufferings of the Thirty Years War inspired his *Piorum suspiria* (1629), for Rothenburg was not spared the ravages of war – siege, lack of food and money, and illness. Widmann's wife and daughter fell victims to the plague, which then caused his own death. He was survived by a son, Georg Friedrich, and three other daughters, Johanna, Magdalina and Helina Margaretha.

2. WORKS. Widmann's music is notably diverse. His secular songs, which are both polyphonic and homophonic, treat subjects ranging from student life and love to classical myths and also include settings of moralizing texts. His sacred works employ both German and Latin texts, both biblical passages and devotional poetry. His instrumental dances are important transitions to the suite, and his canzonas helped to establish the intermediate, variegated stage of the genre. In *Libellus antiphona* he sought to provide a version of some service music that was easier to sing because the text was set with close attention to natural accent – an important humanist goal of the period.

About 140 secular pieces by Widmann survive. *Musicalisch Kurtzweil*, the most varied collection, contains love- and drinking-songs as well as moralizing and didactic works. The ballett appears, with its fa-la-la chorus and chordal texture, while other lieder are markedly polyphonic. Widmann included some monodic writing in the 1623 edition. *Musicalischer Studentenmuht* shows comparable diversity, and Widmann's own texts based on myth and history reveal his classical education. Although most of the contents are in a conservative, late Renaissance style, others employ antiphonal effects and the separation of characters in a dramatic manner. He may have written this collection for his son Georg Friedrich (*b* 8 March 1603), who succeeded him as organist of the Jacobskirche, Rothenburg; five pieces by him appear in it. The *Geistliche Psalmen und Lieder* includes works in the customary Renaissance imitative style with both syllabic and more melismatic melodic writing; there are also examples of antiphonal textures.

Most of Widmann's collections are described as suitable for voices and instruments, and some of them include separate instrumental pieces. He also published one collection solely for instruments, *Gantz neue Cantzon, Intraden, Balletten und Courranten*, as well as a large number of instrumental pieces in the *Musicalischer Tugendtspiegel*. His dances, like his vocal works, are, with a few exceptions, modal, and many retain the original rhythms clearly enough for them to be used for dancing. The canzonas are generally considered Widmann's finest instrumental works. They are composed in the newer style described by Praetorius as 'fresh, joyful and fast'. Although the importance of their first themes and the absence of ritornello and variation links them with the earlier, more polyphonic type, they are modern in sound and harmony. Like others of his works they provide a microcosm of late Renaissance style tempered by tendencies typical of the new age.

WORKS

Edition: Edition: *E. Widmann: Ausgewählte Werke*, ed. G. Reichert, EDM, Sonderreihe, iii (1955) [R]

SACRED

[107] Geistliche Psalmen und Lieder, a 4 (Nuremberg, 1603); some ed. in Schmidt

Martinsganss. von der wunderbarlichen Geburt, löblichen Leben . . . warumb die Gänse Jährlichen auff S. Martini Fest geschlachtet, gebraten, und mit Freuden verzehrt werden (J. Olorinus), sacred cant., a 4 (Magdeburg, 1609)

Ein hochzeitlich Ehrengesänglein, a 4 (Nuremberg, 1615)

[20] Neue geistliche teutsche und [11] lateinische Moteten, a 3–6, 8 (Nuremberg, 1619); some ed. in R

Libellus antiphona, hymnos, responsoria (Rothenburg, 1627)

Piorum suspiria . . . auch etliche nach der newen Viadanischen Art gesetzte Moteten und Gesäng, a 3, 4 (Nuremberg, 1629); some ed. in R

SECULAR

Erster Theil neuer teutscher Gesänglein, a 4 (Nuremberg, 1606)
Musicalisch Kurtzweil . . . Gesänglein, Täntz und Curranten, a 4, 5 (Nuremberg, 1611) [enlarged edn of Erster Theil]; some ed. in R
Neue musicalisch Kurtzweil, a 4, 5 (Rothenburg, 1618) [enlarged edn of Musicalisch Kurtzweil]
Musicalischer Tugendtspiegel ganz neuer Gesäng . . . auch newe Däntz und Galliarden, a 5 (Nuremberg, 1613); some ed. in R; ed. B. Thomas, *Twenty Dances* (London, 1977); ed. R. Petersen (Celle, 1983)
Gantz neue [14] Cantzon, [12] Intraden, [2] Balletten, [8] Courranten, a 4, 5 insts (Nuremberg, 1618) [also incl. 2 galliards]; some ed. in R and in Reichert; selections ed. H. Mönkemeyer (Wilhelmshaven, 1963); ed. B. Thomas, *Canzonas and Intradas* (London, 1979)
Ein schöner newer Ritterlicher Auffzug von Kampff und Streyt zwischen Concordia und Discordia, dramatic work, a 3, 4 (Rothenburg, 1620)
Musicalischer Studentenmuht, a 4, 5, 1622[16]; some ed. in R and in Vetter
Ander Theil neuer musicalischer Kurtzweil, a 4 (Nuremberg, 1624)
Helden-Gesäng dem . . . Gustav Adolpho von Schweden, a 4 (Rothenburg, 1633)
14 songs, 1622[15]; some ed. in R

LOST WORKS

complete list in Reichert

Heroischer Frawenpreiss (Nuremberg, 1617); Ander Theil musicalischen Studentenmuhts; Christliche Danksagung . . . Te Deum sampt Litaney, a 8 (Nuremberg, n.d.); Augustae Vindelicorien gratiae, Danck- und Lobgesang für die Erlösung aus päpstlicher Trangsal, a 4 (Rothenburg, 1633)

JOCELYN MACKEY

Widmann, Joseph Victor (*b* Nennowitz, Moravia, 20 Feb 1842; *d* Berne, 6 Nov 1911). Swiss librettist. He was a protestant clergyman at Frauenfeld for a year before becoming head of a school in Berne (1868–80). From 1880 he was editor of the *Berner Bund*. Of his many planned works for the musical theatre only seven librettos were completed and set to music: *Die heiligen drei Königen* (H. Goetz, 1866), *Der Widerspänstigen Zähmung* (Goetz, 1874), *Francesca da Rimini* (Goetz, 1877), *Der Sturm* (E. Frank, 1887), *Das steinerne Herz* (I. Brüll, 1888), *Manuel Venegas* (R. Heuberger, 1889) and *Fürst und Sänger* (F. Mottl, 1893). These reflect an idyllic and romantic view of nature, also present in his many fairy-tales. Widmann also wrote texts for lieder, cantatas and oratorios. Among his writings are *Johannes Brahms in Erinnerungen* (with Albert Dietrich, 1898) and accounts of three journeys he made with Brahms to Italy.

Widmanstetter, Georg (*d* Graz, 20 May 1618). Austrian printer. One of an artisan family of Nellingen bei Ulm, he was in Bavaria by 1564. He married the daughter of the printer Daser, and between 1568 and 1584 was employed as a typesetter and proof corrector by the music printer Adam Berg of Munich. In 1585 Widmanstetter travelled to Graz, where he was appointed as 'katholischer Hofbuchdrucker' to the court, and to the Jesuit College and the university. His salary was 100 florins a year with a free house. He remained there as a printer until his death, with a total production of over 200 titles. He exhibited at the Frankfurt book fairs between 1588 and 1596 (after which date no Graz names appear in the list for 70 years), including some music in his catalogue. His music production was not very large, and surprisingly does not include the music of the Italians who were employed at Graz. (Almost all of this was first printed in Venice.) His most famous titles were Lassus's *Cantiones sacrae* (1594), Ferdinand de Lassus's *Cantiones sacrae* (1587) and Beuttner's *Catholisch Gesang–Bůch* (1602 and later editions).

Widmanstetter's son Ernst took over the firm's work in 1610, taking charge of it completely on his father's death. The firm continued until 1806 but did not print any music.

STANLEY BOORMAN

Widmer, Ernst (*b* Aarau, 25 April 1927; *d* Aarau, 3 Jan 1990). Brazilian composer and teacher of Swiss birth. He studied with Burkhard, Frey and Hoerler at the Zurich Conservatory, graduating in composition, piano and music education in 1950. After working as a private teacher and choral conductor in Switzerland he went to Salvador, Bahia, in 1956 on the invitation of Koellreutter, director of the Seminários Livres de Música. There he taught the piano, composition, orchestration and music literature, also conducting the Bahia University Madrigal Group (1958–67). On Koellruetter's departure from Bahia in 1963, Widmer was appointed chief composition professor at the Federal University of Bahia, and took up the directorship of the Seminários (1963–5, 1967–9, 1976–80), later renamed the Escola de Música e Artes Cênicas then the Escola de Música. He had a pivotal role in making the city of Salvador one of the most important centres of new music activity from the 1960s to the 80s. As a teacher he exerted a profound influence on his students, many of whom became successful composers, and he espoused the rejection of all principles in order to cultivate independent development in the Grupo de Compositores da Bahia, which he founded in 1966. After retiring from the university in 1987 he renewed his earlier ties with his native city in Switzerland, and along with receiving premières of several works, the Ernst Widmer Gesellschaft was established in 1988 to promote his music.

Widmer learnt from Burkhard the value of following a path of maximum independence, yet his output shows him to be an eclectic. Before the age of 21 he had what he later described as a 'reactionary attitude', from which he moved to a moderate modernist style when he had fully assimilated the lesson of Stravinsky, Bartók and Hindemith; then, in the 1960s, he displayed intermittent and often unexpected avant-garde interests. His career can be considered as a gradual convergence of intuition and intellect, of originality and traditionalism. This complex of attitudes has resulted in what he has called 'progressive' and 'regressive' phases, often in co-existence. The progressive works include the Wind Quintet (1954), *Ceremony after a Fire Raid* (1962–3), *Pulsars* (1969), *Sinopse* (1970), *Quasars* (1970) and *Convergência* (1973). Among those of the opposite tendency are the *Chinesische Lieder* (1948), *Hommages à Stravinsky, Frank Martin et Bela Bartok* (1960) and *O homem armado* (1967). His output reached opus 173, with an additional 30 transcriptions and arrangements. He was particularly prolific in the 1970s and 80s, when he revealed a tendency toward timbral and textural experiment, indeterminacy and musical theatre, as demonstrated in Nogueira's study (1997).

Awards won by 24 of his compositions include the Hugo von Senger Prize of the Swiss Jeunesses Musicales (1960), the prizes of the Congrès pour la Liberté de la Culture (1963) and the Comissão Estadual de São Paulo (1968), and the first prizes of the second Guanabara Festival (1970), the I Tribuna Nacional de Compositores (1971) and the national competition organized by the Brazilian Society of Contemporary Music and the Goethe Institute in Brazil (1974). In recognition of his artistic and pedagogical work, he was made a Commander of the Order of Merit of the State of Bahia and was inducted into the Brazilian Academy of Music (1988).

WORKS

GERARD BÉHAGUE

Widor, Charles-Marie(-Jean-Albert) (*b* Lyons, 21 Feb 1844; *d* Paris, 12 March 1937). French organist, composer and teacher known primarily for his organ symphonies.

1. LIFE. His mother was of Italian ancestry, and his paternal grandfather was an organ builder of Hungarian descent; his father was both an organ builder and performer who gave Widor his first lessons. The boy showed great ability and at the age of 11 became the organist at the lycée in Lyons. Upon the recommendation of Cavaillé-Coll, Widor went to Brussels, where he studied composition with Fétis and the organ with J.-N. Lemmens. Lemmens, who was the most recent member of a line of teachers connected directly to Bach, taught him traditional German interpretations of Bach to which he remained loyal for the rest of his life. He played the organ at St François in Lyons from 1860 and performed frequently in the provinces until 1870, when he was given a provisional one-year appointment succeeding Louis Lefebure-Wély at St Sulpice in Paris; there he remained for 64 years. In the 1870s he produced numerous compositions in various genres, and in 1880 his first stage work, the ballet *La korrigane*, was successfully produced at the Paris Opéra. At about the same time he became a music critic for the daily *L'estafette*, signing his articles with the pen name 'Aulétès'. He also conducted the Concordia, a choral society which specialized in oratorios. On the death of Franck in 1890, Widor became professor of organ at the Paris Conservatoire; six years later, when Théodore Dubois assumed direction of the Conservatoire, Widor replaced him as professor of composition. He was elected to the Académie des Beaux-Arts in 1910 and became the permanent secretary four years later. During World War I he used his numerous contacts to obtain money for artists who had suffered misfortunes. In 1916 he introduced the idea of founding the Casa Vélazquez, a counterpart to the Villa Medicis, at which French artists could study Spanish culture. This project came to fruition at Madrid but the building was apparently destroyed in the 1930s. Widor continued to perform regularly until

the age of 90; he was succeeded at St Sulpice by Marcel Dupré.

2. WORKS. At the core of Widor's varied compositional achievement lie the ten organ symphonies which, taking Franck's *Grande pièce symphonique* and Alkan's Symphonie from op.39 for piano solo as their starting-point, ambitiously combine the style of 19th-century orchestral and piano music with an exploration of the sonic possibilities of the Cavaillé-Coll organ. The op.13 set (nos.1–4, 1872) seems more like a series of suites, so eclectic is the range of styles; the op.42 set (nos.5–8, 1887) contrastingly displays Widor's intellectual force and imaginative power, and produces a high level of argumentative cogency and formal unity within astonishingly large-scale structures. Although these works reflect the experience gained from composing his first two orchestral symphonies, Widor's expertise in instrumentation led him clearly to perceive the essential differences between the organ and the orchestra. Indeed, he constantly warned against regarding the former as a substitute for the latter. The Fifth Organ Symphony (with the Toccata as its finale) is the most frequently performed today, while the Seventh and Eighth are comparatively neglected. Uncompromising in their demands on both player and listener, they reveal an unexpectedly austere and even harsh dimension of Widor's personality not usually presented to the public. It is as if he were challenging the organ itself to the limits of its aesthetic potential. The Third Symphony (for orchestra and organ, 1894), however, is compromised by its obvious formal resemblance to Saint-Saëns's own Third Symphony. Striving for international acclaim with this work, written for the opening of the Victoria Hall, Geneva, Widor adopted a strongly Central European manner and idiom for the celebratory orchestral music; but this unfortunately jars with the more hierarchical tone of the chorale-style writing for the organ. His last two organ symphonies are based on cyclically treated Gregorian themes, reflecting the Catholic ethos of the Schola Cantorum, founded by Franck's disciples Bordes, d'Indy and Guilmant. But whereas the *Gothique* (1895) is deliberately archaic in style, the *Romane* (1900), with its Lisztian impressionistic textures, looks ahead to Tournemire's *L'orgue mystique*.

Widor also set out to rival Saint-Saëns and Fauré in the fashionable salons of the capital. The songs and chamber music written for this ambience combine an easy tunefulness with more advanced tendencies, as in the Schumannesque mélodies *Incantation* and *Contemplation*, and there are a number of Victor Hugo settings which reflect contemporary taste.

His relatively lightweight scores for *La korrigane* (1880) and *Conte d'avril* (1885) enjoyed considerable popularity in various arrangements, while the opera *Maître Ambros* (1886) attracted critical attention as a semi-Wagnerian adaptation which also contained rousing Meyerbeerian crowd scenes. His apparent tendency to capitalize on the successes of others is exemplified in *Les pêcheurs de Saint-Jean* (1905), subtitled *Scènes de la vie maritime*: for d'Indy's *L'étranger* (1898–1901) had been similarly set in a closed fishing community, and evoked the fury of the elements.

A rare insight into Widor's private existence is glimpsed in the superb Piano Quartet in A minor (1891), inspired by his passionate affair with Countess Emmanuela Potocka; its expression of intimate erotic feeling in the slow movement is enhanced by the piano's Lisztian flutterings and tremblings. Moreover, the use of a cyclic theme – psychologically meaningful as it is here – also suggests Widor's fear of being left behind by new cultural trends: the rise of the post-Franckian movement.

When Widor succeeded Franck as organ professor at the Conservatoire in 1891, he had a tough time introducing his own methods, and attracted considerable envy and obstructiveness as he was regarded by many colleagues as an outsider. However, he surmounted these problems through force of character, and during his tenure he introduced rigorous technical discipline and a purportedly authentic style of playing Bach; his pupils included Tournemire and Vierne. In 1896 he became professor of composition, but here found himself in bitter rivalry with Fauré, who was more attuned to the contemporary cultural climate of symbolist art and poetry and thus attracted many outstanding students, including Ravel. Yet Widor's solid expertise in counterpoint, fugue and orchestration, together with his profound knowledge of the Austro-German tradition, proved valuable to Honegger, Varèse, Milhaud and Dupré, and he remained in the post until 1927.

As his creative powers began to wane, Widor turned to writing textbooks, notably the excellent *Technique de l'orchestre moderne* (1904), full of detailed information, and examples from Wagner's operas. In collaboration with his organ pupil Albert Schweitzer, a theologian from Alsace, he embarked on a complete edition of J.S. Bach's organ works, in the form of an urtext with commentaries. From 1914 he devoted a great deal of his energies to his post as permanent secretary to the Académie des Beaux-Arts, establishing pockets of French culture in London and Madrid, and contributing moral support to the war effort. He had thus achieved his personal ambition of full integration into the heart of his country's intellectual system, but at the cost of being regarded as a pillar of an antiquated establishment by the radical young postwar generation. Ultimately his reputation lies in his consummate mastery of the organ, which provided the greatest fulfilment of his compositional genius.

WORKS

published in Paris unless otherwise stated

STAGE

all first performed in Paris

La korrigane (ballet, 2, F. Coppée, L.F. Mérante), Opéra, 1 Dec 1880 (1880)

Conte d'avril (incid music, A. Dorchain, after W. Shakespeare: *Twelfth Night*), op.64, Odéon, 22 Sept 1885 (1891)

Les Jacobites (incid music, Coppée), 21 Nov 1885 (1885)

Maître Ambros (drame lyrique, 4, Coppée, Dorchain), OC (Favart), 6 May 1886, vs (1886)

Jeanne d'Arc (ballet-pantomime, 4, Dorchain), L'Hippodrome, 1890, vs (1891)

Les pêcheurs de Saint-Jean (drame lyrique, 4, H. Cain), OC (Favart), 26 Dec 1905, vs (1905)

Nerto (drame lyrique, 4, M. Léna, after F. Mistral), Opéra, 27 Oct 1924, vs (1924)

OTHER VOCAL

Sacred: O salutaris, 1v, vn/vc, org, op.8 (n.d.); Tantum ergo and Regina coeli, chorus, org, op.18 (1874); Ps lxxxiii, 4vv, 2 org, str qt ad lib, op.23 no.1 (1875); Tu es Petrus, double choir, 2 org, op.23 no.2 (1875); Sacerdos et Pontifex, chorus, 2 org, op.23 no.3 (1875); Ave Maria, Mez, hp, org, op.24 (n.d.); Mass, double choir, 2 org, op.36 (1878); Ave Maria, 1v, org, op.59 (n.d.); O salutaris, 1v, vc/vn, org, op.63 (n.d.); Ps cxii, double choir, 2 org, orch (1879); Ave verum (*c*1930)

Secular choral: 3 choruses, 4vv, op.25 (n.d.); Chant séculaire, S, chorus, orch, op.49 (n.d.)

Other secular (1v, pf, unless otherwise indicated): 6 mélodies, op.14 (1872); 6 mélodies, op.22 (1875); 3 mélodies, op.28 (1876); 2 duos, op.30 (1876); 3 mélodies italiennes, op. 32 (1876); 3 mélodies italiennes, op.35 (1878); 6 mélodies, op.37 (c1877); 2 duos, op.40 (1876); 6 mélodies, op.43 (1878); 6 mélodies, op.47 (1879); 2 duos, op.52 (1881); 6 mélodies, op.53 (1881); Soirs d'été, op.63 (1889); Vieilles chansons pour les petits enfants (?c1890); other songs

ORCHESTRAL

Syms.: no.1, F, op.16 (1873); no.2, A, op.54 (1882); no.3, org, orch, op.69 (Mainz, 1895); Symphonie antique, org, orch (1911) [with choral finale]; Sinfonia sacra, org, orch, op.81 (Leipzig, 1908)

Other orch: La nuit de Walpurgis, sym. poem, chorus, orch, op.60 (1888); Ouverture espagnole (1898)

Solo inst with orch: Grande Phantasia, org (1865); Pf Conc., op.39 (1876); Vn Conc. (1877); Vc Conc., op.41 (1878); Fantaisie, pf, op.62 (1889); Choral et variations, hp (1900); Pf Conc., no.2, op.77 (1905)

OTHER INSTRUMENTAL

Chbr: Pf qnts, opp.7, 68 (1868, 1894); Pf Qt, op.66 (1891); Pf Trio, op.19 (1874); Sonatas, vn, pf, op.50 (1881), op.79 (1907); Vc Sonata, op.80 (1907); Sérénade, pf, fl, vn, vc, hmn, op.10 (?1883) [many arrs.]; 3 valses, vn, pf, op.18 (n.d.); 3 pièces, vc, pf, op.21 (n.d.); 4 pièces, pf, vn, vc (1890); Suite, fl, pf, op.34 (1898); Soirs d'Alsace, pf, vn, vc, op.52 (1908); Cavatine, vn, pf, op.57 (n.d.); Introduction et rondo, cl, pf, op.72 (1898); Suite, vn, pf, op.76 (n.d.); 3 pièces, ob, pf (1909); Suite, vc, pf (1912); Suite florentine, pf, fl/vn (1920); other pieces

Pf: Airs de ballet, op.4 (n.d.); Scherzo brillant, op.5 (n.d.); Sérénade, op.6 (n.d.); La prière, op.7 (n.d.); L'orientale, scherzo, op.8 (n.d.); Caprice, op.9 (n.d.); 3 valses, op.11 (n.d.); Impromptu, op.12 (n.d.); Variations de concert sur un thème original (1867); 6 morceaux de salon, op.15 (1872); Prélude, andante et finale, op.17 (n.d.); Scènes de bal, op.20 (n.d.); 6 valses caractéristiques, op.26 (1877)

12 feuillets d'album, op.31 (1877); Dans les bois, op.44 (n.d.); Romance, op.46 (n.d.); La barque, fantaisie italienne (1877); La corricolo, fantaisie italienne (1877); Scherzo-valse (1878); Suite polonaise, op.51 (?1885); Suite, op.58 (c1887); Carnaval, op.61 (n.d.); Conte d'automne (1904); Suite écossaise, op.78 (?1905); Fileuse (1909); Pages intimes (n.d.)

Pf, hmn: 6 duos (Mainz, 1891)

Org: 10 syms.: nos.1–4, op.13 (1872), nos.5–8, op.42 (1887), Symphonie gothique, op.70 (Mainz, 1895), Symphonie romane, op.73 (1900); Suite latine, op.86 (1927); 3 nouvelles pièces (1934)

Org, brass: Salvum fac populum tuum, 3 tpt, 3 trbn, perc, org, op.84 (1917)

Widowe, Robert. *See* WYDOW, ROBERT.

Wiechowicz, Stanisław (*b* Kroczyce in Miechów district, 27 Nov 1893; *d* Kraków, 12 May 1963). Polish composer, conductor and critic. He studied successively at the Conservatory of the Kraków Music Society, the Dalcroze Institute at Hellerau near Dresden, the St Petersburg Conservatory and the Paris Schola Cantorum. In 1931 he took examinations as an external candidate in composition at the Warsaw Conservatory. From 1921 he taught in Poznań, first at the Academy, then, from 1923, at the Conservatory. From 1921 to 1939 he was also active as a choral conductor, working in particular with the Koło Śpiewackie Polskie (singing society) and the Chopin and Moniuszko choirs. From 1945 he was a professor at the State Higher School of Music in Kraków.

During the inter-war period he was chief editor of *Przegląd muzyczny* and music reviewer for the *Kurier poznański* and *Muzyka polska*. From 1946 he edited the series Polska Literatura Chóralna published by the Polish Music Publishers (PWM). He was a founding member, and vice-chairman, of the Society of Young Polish Musicians in Paris (1926), and artistic director of both the Wielkopolski Związek Kół Śpiewaczych (the singing society of Greater Poland) (1929) and the Union of Polish Vocal and Instrumental Ensembles (1947; from 1961 he was an honorary director). In 1926 he conducted the Polish première of Honegger's *Le roi David* and in 1933 the world première of Maliszewski's Requiem. Among the awards he received were the State Prize (1939, 1950 and 1962), the prize of the Union of Polish Composers (1953) and the music prize of Polish Radio (1962); in 1959 he was made a Commander of the Rebirth of Poland.

Wiechowicz's works stem from a national tradition, and he was inspired by social issues to compose in a communicative and direct manner. The most significant of his works are those for chorus, which brought to Polish music new compositional techniques found in the instrumental repertory. Characteristic of his choral writing are the dialogues between vocal registers and variability of voice structures. The melodic style of his songs owes much to Polish folk music, elements of which he either imitated or took directly from folk sources. One of his best choral works is the *Kantata żniwna* ('Harvest cantata'), which received a medal at the Polish Krajonym Konkursie Olimpijskim (National Olympic Competition) in 1948. Other important works are the *Kantata romantyczna* ('Romantic cantata'), a piece full of lyrical atmosphere and strong drama, and *List do Marc Chagalla* ('Letter to Marc Chagall'), which is dedicated to the victims of the Holocaust, and is the only work by

Wiechowicz devoid of folk elements. His greatest achievement, however, is *Gołębica* ('The Dove', 1959–63), a work of mystical character and cast in a freely atonal idiom, with an emphasis on melodic recitative. Of his orchestral works, *Chmiel* ('Hops'), a wedding dance, was awarded a gold medal at the Paris Exhibition of 1937, and *Koncert staromiejski* ('Old-Town Concerto', 1954) is among the best examples of the trend in Polish music of the period towards neo-classicism.

WORKS
(selective list)

Acc. choral: Dzień słowiański [The Slavonic Day] (cant., E. Zegadłowicz), chorus, brass, 1928; Suita pastoralna [Pastoral Suite] (T. Czyżewski and others), male spkr, chorus, orch, 1929, unfinished; Kantata romantyczna [Romantic Cant.] (A. Mickiewicz), S, chorus, orch, 1934, rev. 1955; Pragną oczki [My Eyes' Desire] (trad.), chorus, 2 pf, 1943; Na glinianym wazoniku [On a Little Clay Pot] (J. Porazińska), chorus, 2 pf, 1946, orchd 1947; A czemużeś nie przyjechał [Why did you not come?] (rustic scene, trad.), chorus, orch, 1948; Kujawiak, G (trad.), chorus, orch, 1952; Pado dysc [The Rain Falls] (trad.), chorus, orch, 1953; Gołębica [The Dove] (cant., S. Wyspiański), S, chorus, orch, 1959–63; List do Marc Chagalla [Letter to Marc Chagall] (dramatic rhapsody, J. Ficowski), male spkr, female spkr, 2 solo vv, chorus, orch, 1961

Unacc. choral: Kolędziołki beskidzkie [Songs from the Beskid Mountains] (Zegadłowicz], female chorus, 1925, rev. 1953; Słowo o Jakubie Szeli [A Word about Jakub Szela] (B. Jasieński), 1927; Oj, ty, wolo [You Will!] (Jasieński), 1928; Mruczkowe bajki [Tales of the Purring Cat] (variations, Porazińska), 1934; Kantata żniwna [Harvest Cant.] (trad.), 1940–47; Kujawiak–ballada (trad.), 1944; Passacaglia i fuga (trad.), 1960; *c*150 choral songs

Other works: Chmiel [Hops], sym. scherzo, orch, 1927, rev. 1949; 2 Mazurkas, vn, pf, 1942; Kasia, folk suite, 2 cl, str, 1946; Koncert staromiejski [Old-Town Conc.], str, 1954; Szyszki [Pine Cones], sym. rondo, orch, 1954; 28 songs

Wieck. German family of musicians.

(1) (Johann Gottlob) Friedrich Wieck (*b* Pretzsch, nr Torgau, 18 Aug 1785; *d* Loschwitz, nr Dresden, 6 Oct 1873). Music teacher and writer on music. He attended the Torgau Gymnasium from 1800 to 1804, and had piano lessons with J.P. Milchmeyer. Despite his profound interest in music, he began a four-year course of theological study in Wittenberg, then worked as a private tutor in Thuringia and Saxony. His teaching activities gave him an insight into contemporary questions of education and upbringing, and he also encountered the works of such educationists as J.H. Campe and A.H. Niemeyer. Wieck's *Wöchentliche Bermerkungen über den Schüler Emil von Metzradt*, an essay written in 1809 in Pielitz near Bautzen, was the outcome of this early work as a teacher. Turning more intensively to music, not least as a result of his collaboration with the piano teacher Adolph Bargiel, he settled in Leipzig in 1813 or 1814 as a piano teacher. His house soon became a meeting-place for musicians and artists. With his first wife Mariane Tromlitz Wieck opened a business selling instruments and a music lending library. He continued running the library until 1835 and selling instruments until he left Leipzig in 1840. By this time his second wife Clementine Fechner was assisting him in his business ventures; Wieck had been divorced in 1824, and had married again in 1828. During his years in Leipzig he lavished particular care on the musical education and career of his daughter Clara. In 1840, the year of Clara's marriage to Schumann, Wieck left Leipzig and moved to Dresden, where he was much in demand as a teacher. He held regular private concerts at the house in Loschwitz where he spent the summers, teaching a large number of pupils. Through his acquaintance with G.W. Teschner and Johannes Mieksch, he also began to teach Italian vocal technique. Although Wieck devoted himself almost exclusively to music teaching, he occasionally helped his nephew Wilhelm Wieck, a Dresden instrument maker, with the sale of his pianos. He also published works on music and wrote music criticism.

Wieck devoted special attention to elementary piano teaching. Building on the system of J.B. Logier, he combined technical practice with the teaching of theory. On this basis, he developed a system in which the pupil initially, and for quite a long time, played small pieces without musical notation. During this phase the pupil's touch was trained without impairment to his pleasure in music or his musical spontaneity. Influenced by the English school of Field, among others, Wieck aimed for a singing, expressive tone. He preferred grand pianos made in the Viennese style because of their bright sound and ability to express nuance. His teaching was also based on the close connection between instrumental and vocal training. Wieck's large circle of pupils included his two daughters Clara and Marie, as well as musicians who stayed with him for only a short time, suh as Schumann, Gustav Merkel, Isidor Seiss and Friedrich Reichel. Wieck summed up his methods in his book *Klavier und Gesang* (Leipzig, 1853, enlarged 3/1878; Eng. trans., 2/1875). He also wrote for the *Neue Zeitschrift für Musik*, *Cäcilia* and *Signale für die Musikalische Welt* under the pseudonym DAS ('Der alte Schulmeister'). In his last years of life he put together a collection of humorous aphorisms entitled *Musikalische Bauernsprüche* (Dresden, 1871, 2/1878). Wieck also composed a number of songs, as well as studies and other educational pieces for the piano.

(2) Clara (Josephine) Wieck (*b* Leipzig, 13 Sept 1819; *d* Frankfurt, 20 May 1896). Pianist, composer and teacher, daughter of (1) Friedrich Wieck. *See* SCHUMANN, CLARA.

(3) (Friedrich) Alwin (Feodor) Wieck (*b* Leipzig, 27 Aug 1821; *d* Dresden, 21 Oct 1885). Violinist and piano teacher, son of (1) Friedrich Wieck. His father taught him the piano, and he studied the violin with Ferdinand David. In 1843 he left Dresden to become an orchestral player in Reval (now Tallinn), and from 1849 he played in the orchestra of the Italian opera in St Petersburg. He returned to Dresden in 1859 to teach piano by his father's system. While he was in St Petersburg he wrote *Methode zur gründlichen Unterweisung im Pianofortespiel nach Friedrich Wieck's vieljährigem und erprobtem Verfahren*, with a Russian translation (MS in *D-Zsch*). He also published *Materialen zu Friedrich Wieck's Pianoforte-Methodik* (Berlin, 1875) and *Vademecum perpetuum für den ersten Pianoforte-Unterricht nach Friedrich Wieck's Methode* (Leipzig, *c*1880).

(4) (Johanna) Marie Wieck (*b* Leipzig, 17 Jan 1832; *d* Dresden, 2 Nov 1916). Pianist and teacher, daughter of (1) Friedrich Wieck. She learned the piano from her father. After her first public appearances in 1843–4, she began studying the piano intensively and undertook further concert tours in Germany and elsewhere in Europe. In 1857 she was appointed court and chamber virtuoso to Leopold, Prince of Hohenzollern. She lived chiefly in Dresden, where she gave piano lessons, often with her father, and held soirées. After Friedrich Wieck's death she continued teaching by his method and published several of his educational works, including *Pianoforte Studien von Friedrich Wieck* (Leipzig, *c*1875) and *Friedrich Wiecks Singübungen* (Leipzig, *c*1877). She also composed short piano pieces, a fantasy on Scandinavian folksongs for piano and cello or viola, and several songs.

CATHLEEN KÖCKRITZ

Wiedebein, Gottlob (*b* Eilenstedt, nr Halberstadt, 21 July 1779; *d* Brunswick, 17 April 1854). German organist, conductor and composer. Born into a family of Kantors, he first disclosed his musical gifts as a boy soprano, singing in the choirs of Halberstadt Cathedral and of his school at Magdeburg, where he studied with Zachariä. Later he moved to Brunswick, where he spent the rest of his life. He studied with his uncle and with J.G. Schwanenberger, succeeding the former as organist at the Brüdernkirche; his decision to accept the position rather than to venture upon a career as a freelance composer and teacher in Vienna was wholly due to the advice of Beethoven, whom he had consulted by letter in 1804. Wiedebein's few published piano compositions appear to date from this period. In 1810, at considerable personal sacrifice, he was at last able to visit Vienna, where he spent three months and made Beethoven's personal acquaintance. Later Wiedebein was obliged to support his family by teaching, but in 1816 he embarked on a new career as principal conductor of the court orchestra and from 1818 of the opera as well. In 1817 he travelled together with A. Klingemann through Germany to gather support for a national theatre, which was inaugurated the following year. As operatic director of this theatre in Brunswick he contributed substantially to its artistic success, and he brought new life to the subscription concert series. He also spent two years in Italy (1820–22). He was made Hofkapellmeister by Duke Karl II in 1824 (previously his piano pupil) on the strength of his oratorio *Die Befreiung Deutschlands* of *c*1822; he composed the overture *Huldigung* for the Duke's accession and participated in the institute for military music established by the Duke to provide musicians for the Brunswick Hofkapelle and music corps.

A man of considerable culture and progressive musical tastes, Wiedebein amply deserved the gratitude and affection bestowed on him by Brunswick's musical public and he enjoyed a great reputation. Contemporary writings speak with great admiration of his musical abilities and describe his local fame as entirely worthy of respect. His compositions show individuality of melody and harmony, a sure technique, and above all, a serious idealism, notably in his approach to the poetic content of his songs. His reviews and letters strengthen the impression of a receptive personality. The appearance of nine Lieder in 1826 or 1827 widened his reputation as a composer and earned him the lasting gratitude of Schumann, who in 1828 wrote to him for guidance and later regarded Wiedebein's encouragement as representing a turning-point in his compositional career, retaining a vivid impression of these songs (his op.4 no.2 contains a reminiscence of Wiedebein's *Gretchens Klage*). Wiedebein's conducting career was cut short by a rheumatic ailment in 1830; he was officially replaced by Methfessel in 1832, when he retired. One of his daughters later became a pupil of Clara Schumann in Düsseldorf.

WORKS

published in Brunswick unless otherwise stated

Vocal: Friedens-Kantate (biblical), solo vv, 2 choruses, ?orch (n.p., *c*1815); [6] Romances and Songs, 1v, pf (?1815–23); Die Befreiung Deutschlands (orat), *c*1822, unpubd; Huldigung (A. Klingemann), ov. and final chorus, ?1823, ov. pubd; [9] Lieder, 1v, pf (?1826–7); motets, cants., unpubd

Pf (all pubd before 1810): Variations, op.4; Variations, on 'Zu Steffen sprach', op.5; Rondo, on a theme from Martín y Soler's L'arbore di Diana, op.7 (Leipzig, n.d.); Thème varié, on 'Ich bin liederlich' (Leipzig, ?1809); other works, unpubd

Org pieces, unpubd

PIERO WEISS/MICHAEL MUSGRAVE

Wiedeburg [Wideburg], **Michael Johann Friedrich** (*b* Hamburg, 3 Oct 1720; *d* Norden, Ostfriesland, 14 Jan 1800). German teacher. Born into a family of musicians, he was taught music by his father, Matthias Christoph Wiedeburg (*b* Berlin, 1 March 1690; *d* Altona, 17 Jan 1745), who from 1728 was Kapellmeister and Kantor at the court of Prince Georg Albrecht of Cirksena in Aurich (a post for which Telemann had recommended him). His grandfather was organist at the Marienkirche in Berlin.

As a teenager he was a frequent participant in the twice-weekly court recitals organized by his father; he also assisted him as a substitute organist in the court chapel. In 1741 Wiedeburg competed unsuccessfully for the prestigious post of organist at the Ludgeri-Kirche in Norden, but was appointed vice-principal at the local Latin school. He competed again for the organist's post in Norden less than seven years later, this time successfully, and remained there until his death.

Wiedeburg's most important legacy was a substantial body of pedagogical work. In 1765 he issued the first volume of his treatise on keyboard playing for beginners, *Der sich selbst informirende Clavier-spieler*, and two more volumes followed in 1767 and 1775 respectively. This huge work of more than 1600 pages, the largest 18th-century published treatise on keyboard playing, was designed as a compendium of the musical knowledge that one might need to learn to play the keyboard. Volume one deals with basic keyboard skills such as note-reading, rhythm and fingering, volume two teaches the principles of thoroughbass, and volume three deals with improvisation. Two years after the appearance of volume three, Wiedeburg published a collection of 24 graded preludes and variations entitled *Practischer Beÿtrag* and intended to accompany the instruction in note-reading in volume one; the same pieces appeared with 24 additional preludes of slightly greater difficulty in a second collection, entitled *Vermehrter practischer Beÿtrag*, in the following year. Wiedeburg also developed a musical card game, *Musicalisches Charten-Spiel*, by means of which beginners could learn to compose, and compiled an unpublished *Choral-Buch* containing settings of 154 well-known chorales, probably in order to help his nephew, Hinrich Ufen Straten, learn to accompany hymns. An unpublished theological manuscript in Wiedeburg's handwriting, entitled *Die Lust und Freude der Kinder Gottes*, also survives.

ELIZABETH HARRISON

Wiedeman, Carl Friedrich. *See* WEIDEMAN, CARL FRIEDRICH.

Wiedemann, Hermann (*b* 1879; *d* Vienna, 1 Jan 1944). German baritone. He made his début at Elberfeld in 1904 and sang at Brno and Hamburg until 1914; in 1912 he took part in the première of Busoni's *Die Brautwahl* in Hamburg. He was a member of the Vienna Hofoper from 1916 (singing in the German language première of *Jenůfa* in 1918) and appeared at Salzburg until 1941, notably as Faninal, and as Beckmesser in the performances of *Die Meistersinger* conducted by Toscanini in 1937. At Zoppot (now Sopot), Buenos Aires, Munich and the Berlin Hofoper he was successful as Guglielmo and Alberich, and in Italian opera. His only Covent Garden appearances were in 1913 as Faninal, in the London première of *Der Rosenkavalier*, and in 1938 as Beckmesser.

DAVID CUMMINGS

Wiederholung (Ger.). *See* REPEAT.

Wiedermann, Bedřich Antonín (*b* Ivanovice na Hané, 10 Nov 1883; *d* Prague, 5 Nov 1951). Czech organist and composer. He studied at the theological faculty in Olomouc (1904–8), occasionally deputizing for the organist or the conductor of the choir at Olomouc Cathedral. He abandoned his theological studies to concentrate on music and studied the organ at the Prague Conservatory with Josef Klička (until 1909) and composition with Vítězslav Novák (1909–10). He was organist at Brno Cathedral (1910–11), at the Emmaus monastery in Prague (1911–17), and was director of the choir at Prague University (1917–19). At the same time he played the viola with the Czech PO. From 1917 he taught at the Prague Conservatory and from 1944 at the Masters School there; he was professor at the Prague Academy of Arts from 1946. He made his début in 1905 and after his arrival in Prague he gave regular recitals at the Emmaus monastery and, in the years 1920–32, at Sunday matinées at the Smetana Hall. In his concerts, in addition to Bach, Handel and Franck, he played the works of Czech Baroque masters such as Černohorský, Zach and Seger. He appeared in England and New York (1924), Germany (1925), Sweden (1926) and Belgium (1935), gave many recitals in Prague and provincial churches and gave frequent broadcasts. Wiedermann was an organist of virtuoso manual and pedal technique who boldly sought after unusual registers and took advantage of the organ's potentials for colour. As a composer his style springs from the late Romanticism of Liszt, Wagner and Tchaikovsky, which he made richer with new harmonic effects. His compositions for organ show the influence of plainchant, of which he was a connoisseur. He also wrote articles on the organ and organ playing.

ALENA NĚMCOVÁ

Wiedner, Johann Gottlieb [Karl] (*b* ?Schwerta, Upper Lusatia [now Świecie, Poland], *c*1714; *d* Leipzig, 17 Nov 1783). German organist and composer. He presumably studied with the organist and Kantor active in Schwerta from 1720 to 1753, Johann Christoph Wiedner, who was certainly a relative if not his father. From the Gymnasium in Zittau he went to the University of Leipzig in 1739. As early as 1741 he assisted J.G. Gerlach at Leipzig by playing the violin and organ and obtaining singers and musicians for the Neukirche. He competed unsuccessfully for the position of Kantor at the Thomaskirche in 1755, but upon Gerlach's death became organist and director of music at the Neukirche (July 1761). Wiedner was also active in other aspects of Leipzig's musical life and played first violin and solo harpsichord in the Grosses Concert

from 1746. Gerber praised his fluent, pleasing gift for melody. There are often stronger moments in the cantatas, for example the brilliant *Jubelkantate* (1755), but whatever local reputation Wiedner enjoyed as a composer seems not to have outlived him. Eitner's list may subsume the cantatas of G.G. Petri's library (see Gondaletsch); unfortunately none of these manuscripts, the Good Friday music or other numerous vocal and instrumental works that Breitkopf offered are extant. There are however two cantatas, a concerto for flute and one for oboe (*D-SWl*), a symphony arranged for keyboard by Hiller in *Raccolta delle megliore sinfonie* (vol.ii, Leipzig, 1761), and, according to Paulke, 16 cantatas (*D-LUC*).

HUGH J. McLEAN

Wiegenlied (Ger.: 'cradle song'). A song actually or supposedly designed to lull children to sleep; the German equivalent of the English LULLABY and the French BERCEUSE. Numerous examples of the Wiegenlied exist in German folk music (see E. Gerstner-Hirzel: *Das volkstümliche deutsche Wiegenlied*, Basle, 1984), and its influence can be discerned in many of the settings with piano accompaniment that belong to the 19th-century lied tradition, notably those of Bernhard Flies (wrongly attributed to Mozart as K350) and Brahms (op.49 no.4). Both these songs are typical of the genre in their use of flat keys (F major and E♭ major) and in their time signatures (6/8 and 3/4 respectively). Brahms's *Geistliches Wiegenlied* for alto, viola and piano op.91 no.2 actually uses a folk melody, 'Josef lieber, Josef mein', and Brahms also included a Wiegenlied among the 14 folksong arrangements he made about 1858 for Clara Schumann's children. Schubert's well-known *Schlafe, holder, süsser Knabe* D498 (like two other cradle songs by him, D304 and D867) is unusual in being in quadruple metre.

Other examples among German lieder include those by Spohr (op.25 no.1; op.103 no.4), Weber (op.13 no.5), Cornelius (op.1 no.3), Reger (op.43 no.5; op.51 no.3; op.97 no.2; op.142 no.1), Strauss (op.41 no.1; op.49 no.3) and Wolf. As might be expected, the Wiegenlied is almost always written for solo (usually female) voice; in Schumann's Wiegenlied op.78 no.4, however, the ailing child is sung to by both parents (soprano and tenor). Examples of the operatic Wiegenlied include the Sandman's song in Act 2 scene i of Humperdinck's *Hänsel und Gretel* (1893) and Marie's lullaby in Act 2 scene i of Berg's *Wozzeck* (1917–22).

MALCOLM BOYD

Wiegold, Peter (John) (*b* Ilford, Essex, 29 Aug 1949). English composer, conductor and music educationist. He took both bachelor's and master's degrees in music at the University of Wales, Aberystwyth, between 1967 and 1972 and gained the doctorate in composition (with Lumsdaine) at Durham University in 1975. In 1973 he had founded the 20th-century music ensemble Gemini, which he went on to direct for the next eleven years. During his period of study, his compositions underwent a maturation towards increasing formal clarity and textural transparency; works from the mid-1970s onwards show the deepening impact on Wiegold of non-Western (especially Indian) musics and philosophies, which meshed with a pre-existing concern to emphasize a spiritual dimension in music.

In the late 1970s he developed a practical interest in organizing workshops where people of all degrees of musical experience (including none) could become creatively involved together in composition and performance. This led in the 1980s to a shift of focus towards his activity as artistic director of the Performance and Communications Skills department of the GSMD (until 1996) and as director of training and performance projects with orchestras including the LSO and RPO.

RICHARD BARRETT

Wiel, Taddeo (*b* Oderzo, 24 Sept 1849; *d* Venice, 17 Feb 1920). Italian musicologist. While studying law and philosophy in Venice he was taught harmony and counterpoint by Tonassi and Maggi. He became one of the first active musicologists in Italy, serving as an assistant librarian of the Biblioteca Marciana in Venice and head of the Venetian chapter of the Associazione dei Musicologi Italiani, under whose auspices he began the catalogue of the Marciana's extensive musical holdings (first section published 1915–16). His most important publication, *I codici musicali contariniani del secolo XVII* (1888), became fundamental to scholarship on Venetian seicento opera, subsequently developed in the studies of Kretzschmar (1892) and Goldschmidt (1893).

His particular interest in Francesco Cavalli, whose operas constitute the largest single section of the Contarini collection, yielded one of the first significant documentary monographs on that composer. As president of the concert society of the Liceo Musicale (later the Conservatorio Nazionale di Musica Benedetto Marcello) in Venice he organized one of the first concerts devoted exclusively to Cavalli's music (1913). In *I teatri musicali veneziani del Settecento: catalogo delle opere in musica* (1897) he provided the first comprehensive survey of musical life in 18th-century Venice.

He wrote four librettos for the composer A. de Lorenzi-Fabris (*Berta di Sopramontano*, 1890; *Gli adoratori del fuoco*, 1891; *Maometto II*, 1892; *Il re s'annoia*, 1901), a volume of *Versi per musica* (1889) and several musical

compositions, including *Italia e Savoia*, a hymn (1915), *Vigilia nuziale* for violin and piano (1917), *Liriche* for voice and piano, and some piano music; he also published several translations of English poetry, an essay on Byron and a guide to Titian's paintings in Venice.

ELLEN ROSAND

Wieland, Christoph Martin (*b* Oberholzheim, nr Biberach, 5 Sept 1733; *d* Weimar, 20 Jan 1813). German poet, dramatist and librettist. He studied law at Tübingen and then visited Zürich. After a period as a private tutor he returned home in 1760. His novel *Geschichte des Agathon* (1766–7), with its Greek background and striking psychological insight, won him a chair of philosophy at Erfurt, and in 1772 he moved to Weimar, to take up the post of tutor to the young dukes. He founded *Der teutsche Merkur* in 1773, in imitation of the *Mercure de France*, and took a lively interest in the movement to found a German national Singspiel; his essays in *Der teutsche Merkur* include 'Briefe an einen Freund über das deutsche Singspiel Alceste' (1773, no.1, and 1774, no.1), 'Ueber einige ältere teutsche Singspiele' (1773, no.4), and 'Versuch über das teutsche Singspiel' (1775, nos.3–4). In 1780 he published one of his most successful works, the verse epic *Oberon*; this oriental tale was later the basis for operas by Wranitzky (1789), Weber (1826) and others. Novels, philosophical writings, translations (including 23 of Shakespeare's plays, 1762–6) and editorial work occupied him fully, and after a period of retirement (1797–1803) he returned to Weimar; after Schiller's death (1805) he was considered the most prominent German writer apart from Goethe.

Wieland's libretto for Schweitzer's *Alceste* (performed at Weimar in 1773) earns an honourable place in the annals of German opera, though his other texts for Schweitzer, *Aurora* (Vorspiel, 1772), *Die Wahl des Herkules* (1773) and *Rosamunde* (1780) are of more limited importance, and some of his other texts for music or arrangements for Singspiele are of purely antiquarian value. Easily Wieland's most influential work from a musical viewpoint is *Dschinnistan oder Auserlesene Feen- und Geister-Mährchen* (3 vols.; Winterthur, 1786–9); this work was edited by Wieland, its contents being partly new, partly translated and adapted, and stories from it gave birth to the Schikaneder-Mozart *Die Zauberflöte*, the Perinet-Müller *Kaspar der Fagottist* and several other operas and Singspiele.

PETER BRANSCOMBE

Wielecki, Tadeusz (*b* Warsaw, 5 July 1954). Polish composer and double bass player. He studied the double bass and composition (with Kotoński) at the Warsaw Academy between 1974 and 1982; further studies in composition took him to Germany to study with Isang Yun in Berlin (1986, on a Lutosławski scholarship) and with Klaus Huber in Freiburg (1987). He was artistic director of the ISCM World Music Days in Warsaw (1992), and in 1994 and 1999 he became artistic director of the city's Okopowa cultural centre and of the Warsaw Autumn festival of contemporary music.

In miniatures such as *Collage-tango* and in small ensemble pieces Wielecki's music is sensuous and betrays a quizzical outlook. His music's expressive means, embracing the jokey and the existential, rely on his use of collage, heterophony (sometimes folk-based), and fragmentary and repetitive motifs frequently at odds with centrifugal tonal forces. The struggle between continuum and intervention can be quasi-theatrical, as in *Tchnął nań* ('He Breathed upon him', 1992) for bassoon, strings and mime, or symphonically intense, as in *Id* (1996). The late tape pieces are uninhibited text-based explorations of the human condition. His chamber and solo works often contain virtuoso writing.

ADRIAN THOMAS

Wielen [Wiele], **Jan Pieterszoon vander** (*b* 1644/5; *d* Ghent, 22 Aug 1679). Flemish composer. He was employed at St James, Ghent, from 1657 to 1661 as a master of the choirboys, then as a singer and (from 1663) as a singing teacher. In 1666 he was probably ordained, since he was paid for celebrating masses. His only known publication, *Cantiones natalitiae 4 & 5 tam vocibus quam instrumentis decantandae* (Antwerp, 1665/*R*1970 in CEMF, xxiv), consists of 12 Christmas motets, 11 to Dutch texts and one to a Latin text. They are written for a solo voice, followed by choruses for three, four or five voices with continuo; the three-part *Cleyne kintjen grooten Godt* is also accompanied by two violins. In an inventory of music (1734) at St Walburga, Oudenaarde, three motets for five voices and one for a solo bass, all with three instruments, are listed under the names Vande Ville and Vande Veele. As Vander Straeten assumed, they are most probably synonymous with Vander Wielen.

GODELIEVE SPIESSENS

Wielhorski [Vel′gorsky, Viyel′gorsky], Count **Mateusz** [Matvey Yur′yevich] (*b* St Petersburg, 15/26 April 1794; *d* Nice, 5 March 1866). Russian cellist and patron, brother of MICHAŁ WIELHORSKI. He pursued a military career, fought in the war of 1812, and retired in 1826 with the rank of colonel. He studied the cello with Adolph Meinhardt and Bernhard Romberg, and became well known as a performer both in Russia and abroad, partnering such eminent musicians as Liszt, Henselt and Vieuxtemps. From 1826 he lived with his brother in St Petersburg, maintaining the house as a centre of musical culture. A number of leading composers of the day dedicated works to him, including Anton Rubinstein (Third String Quartet), Mendelssohn (Second Cello Sonata) and Romberg (Seventh Cello Concerto). After his brother's death in 1856 he continued his work as an impresario, and was instrumental in inaugurating the St Petersburg branch of the Russian Musical Society in 1859. His extensive music library and many of the important instruments in his private collection were donated to the St Petersburg conservatory.

GEOFFREY NORRIS

Wielhorski, Count **Michał** [Viyel′gorsky, Mikhail Yur′yevich] (*b* St Petersburg, 31 Oct/11 Nov 1788; *d* Moscow, 28 Sept/10 Oct 1856). Russian composer and patron. Son of a Polish diplomat at the Russian court, and brother of Mateusz Wielhorski, he received a broad musical education from several famous teachers, notably Martin y Soler. He played the violin and piano, and when only 13 composed his first pieces, a set of songs with orchestral accompaniment. Later he wrote a number of sentimental ballads, including *Otchego* ('Why?') to Lermontov's poem, and settings of Pushkin, Myatlyov and Prince Pyotr Vyazemsky. In 1804 he travelled with his family to Riga, where he studied counterpoint with a local organist and played in quartets with his father and two of his brothers, Iosif and Aleksandr. He then moved to Paris (1808), took lessons from Cherubini and met Beethoven in Vienna. When he returned to Russia (1810) he settled in St Petersburg and swiftly established himself as a patron of music; but in 1816 he was banished from court for marrying his first wife's sister and had to live on his estate, Fateyevka (later renamed Luizino), in the Kursk government. Even here he did much to promote interest in music, performing in concerts himself and arranging for his private orchestra to play major works by Western composers, including Beethoven's symphonies. In 1823 he was given permission to move to Moscow, and in 1826 he returned to St Petersburg, where he lived with his brother Mateusz Wielhorski and became friendly with Glinka: in fact a number of Michał Wielhorski's suggestions were incorporated into *A Life for the Tsar* and *Ruslan and Lyudmila*; he was highly critical of the latter. In 1856 he moved to his estate, Sennitsï, near Moscow, where he died.

The Wielhorski brothers were at least as important to concert promotion during the first half of the 19th century as the Rubinstein brothers were in the second. They introduced many contemporary Western composers to Russia, and they encouraged Liszt, Berlioz, Schumann and other important composers and artists to take part in their concerts. As a composer Michał Wielhorski is known for an unfinished opera, *Tsïgane* ('The Gypsies'), symphonic and chamber music, keyboard pieces and numerous songs.

Wien (Ger.). *See* VIENNA.

Wiéner [Wiener], **Jean** (*b* Paris, 19 March 1896; *d* Paris, 8 June 1982). French composer and pianist. He studied with Gédalge at the Paris Conservatoire, where he also began a lifelong friendship with Milhaud. In December 1921 the groundbreaking series of Concerts Wiéner (1921–4) introduced to Paris such works as Schoenberg's *Pierrot lunaire*. In 1924 Wiéner and Stravinsky gave the first performance of Stravinsky's two-piano arrangement of his Concerto for piano and wind instruments and

subsequently toured with it. In the same year, a commission from the Princesse de Polignac enabled Wiéner to write his *Concerto franco-américain*, which juxtaposed neo-Bachian passages (harmonically closer to Gédalge than Stravinsky) with French popular song, music hall styles and jazz (both written and improvised). After its successful first performance in October 1924 the work was widely performed, especially in an arrangement for two pianos. From the success of the Concerto also arose a second and lucrative career as a duo-pianist in partnership with the Belgian Clement Doucet. With programmes dominated by arrangements of 'classic' American jazz and popular song unobtrusively interspersed with classics (notably by Bach and Mozart), they gained star-billing in the major revue theatres, variety houses and music halls of Europe and America from 1925 until 1938. In this period Wiéner returned to Paris only occasionally to write film scores which were conducted by Roger Desormière; the threat of war brought him back more permanently in 1939.

After the German occupation of Paris, Wiéner worked anonymously and underground, Desormière lending his name to the film scores which provided Wiéner's only livelihood. After 1945, he continued to work mostly in French cinema, which gave him his first major success in the 1950s with the number 'Le grisbi', a last-minute addition to Jacques Becker's gangster film *Touchez pas au grisbi*. Wiéner's postwar affiliations with the French political left and specifically with the Moscow-orientated communist party are reflected in some of his works for film and radio, and in three unpublished cantatas. He was also regarded as one the few Frenchmen to have kept alive the spirit of Satie without seeking to imitate his music. His belief in the power and survival of music are represented in his memoirs, *Allegro appassionato* (Paris, 1978). His music remains for the most part unpublished and assessment of his influence is difficult. He described in his autobiography, with characteristic modesty, the *Concerto franco-américain* as 'bien sûr ... pas un chef d'oeuvre', although it had a definable influence on Jean Françaix and may have played a small part in the circus and music-hall aspects of Shostakovich's First Piano Concerto (1933). In the 1960s and 1970s he was still stoutly defending the technically sophisticated but now superseded French tradition of 'light music', in such works as the *Concert pour orchestre et un piano principal* and the Accordion Concerto – the latter successfully integrating the disparate idioms that tend to be merely juxtaposed in the works of the 1920s. Perhaps the most telling of his postwar works, however, is the little *Suite de danses* (1947). Its unusually cogent variation form and memorable theme evoke a world of clandestine activity and nocturnal meetings redolent of France in the occupation years.

WORKS
(selective list)

DRAMATIC

Operetta: Olive chez les nègres, ou Le village blanc (H. Falk), 1926
Incid music: Winterset (M. Anderson), 1946; Androcles and the Lion (G.B. Shaw) 1951; La farce des ténebreux (Ghelderode), 1952; La punaise (Mayakovsky), 1959; Biedermann et les incendiaires (M. Frisch), 1966; Mockinpott (P. Weiss), 1969; A la belle étoile (J. Prévert); Pygmalion (Shaw)
*c*70 scores for feature films, incl. Knock (L. Jouvet), 1932; L'homme à l'hispano (J. Epstein),1933, [incl. Conc. pour automobile et orchestre]; L'aventurier (M. L'Herbier), 1934; Pacquebot Tenacity (J. Duvivier), 1934; La bandéra (Duvivier), 1935; Le crime de Monsieur Lange (J. Renoir), 1935; Les bas-fonds (Renoir), 1936; Nuits de feu (L'Herbier), 1939; Mariage de chiffon (C. Autant-Lara), 1943; Le père Goriot (R. Vernay), 1944; Le rendez-vous de juillet (J. Becker), 1949; Sous le ciel de Paris (Duvivier), 1950; Touchez pas au grisbi (Becker), 1953; On ne badine pas avec l'amour (J. Desailly), 1954; Futures vedettes (M. Allégret), 1954; La garçonne (J. Audry), 1956; Pot-bouille (Duvivier), 1957; La femme et le pantin (Duvivier), 1958; Le démon de minuit (Allégret), 1961; La création du monde (J. Effel), 1961; Le tigre se parfum á la dynamite (C. Chabrol), 1964/5; Révolution d'octobre (F. Rossif), 1966; Une femme douce (R. Bresson), 1968; La faute de l'Abbé Mouret (G. Franju), 1969; Golem (J. Kerschbron), 1975
*c*200 scores for short films (documentaries, films for young audiences, and advertisements), incl. L'épouvantail (P. Grimault), cartoon, 1943; Zanzabelle à Paris (Starevitch), 1948

Wiener Philharmoniker. The Vienna Philharmonic Orchestra. *See* VIENNA, §§5(iv) and 6(ii).

Wiener Philharmonischer Verlag. Austrian firm of music publishers. It was founded in Vienna on 5 April 1923 by Alfred Kalmus (*d* 1972). The firm is best known for its series of Philharmonia miniature scores. Kalmus established the company after working 14 years at Universal Edition. From the start there was a close relationship between the two firms, though Wiener Philharmonischer Verlag was initially an independent company in which UE were shareholders. In 1923 Wiener Philharmonischer Verlag published a notable group of facsimiles: Bach's Coffee Cantata, Mozart's Jupiter Symphony and Strauss's *Tod und Verklärung*. The firm also issued books, including Hans Gál's *Anleitung zum Partiturlesen*, Eckstein's *Erinnerungen an Anton Bruckner* and a new edition of Sechter's analysis of the finale of Mozart's Jupiter Symphony. In 1925 UE purchased the firm; since then, Philharmonia miniature scores have been issued by UE, with a separate series of plate numbers. (*Wiener Philharmonischer Verlag: September 1924*, Vienna, 1924 [catalogue])

Wiener Sängerknaben. *See* VIENNA, §6.

Wiener Urtext Edition. Music publishing company, founded in 1972 by Schott's Söhne, Mainz, and Universal Edition, Vienna. It continues the work of the Wiener Urtext Ausgabe of Universal Edition, which originally published 18th- and 19th-century music for practical and scholarly use. An initial collection of 39 volumes of works by Bach, Mozart, Haydn, Beethoven, Schubert,

Schumann, Chopin and Brahms appeared in 1973. The series, which now comprises approximately 130 volumes, has expanded to include works by 20th-century composers, such as Debussy, Hindemith, Bartók and Schoenberg.

LENNART REIMERS/REINHOLD KUBIK

Wieniawski. Polish family of musicians.

(1) **Henryk** [Henri] **Wieniawski** (*b* Lublin, 10 July 1835; *d* Moscow, 31 March 1880). Violinist and composer. The most celebrated member of the family, he was the son of Regina Wieniawska (née Wolff), a professionally trained pianist and the sister of the noted pianist Edouard Wolff. Henryk's exceptional talent for the violin was discovered very early by his first teacher, Jan Hornziel, who had moved to Warsaw in 1841 to become leader of the opera orchestra, and Stanisław Serwaczyński. When the Czech violinist Panofka visited Warsaw and heard the eight-year-old boy play, he exclaimed: 'He will make a name for himself'. After playing a brilliant audition for the Paris Conservatoire in the autumn of 1843, Henryk was admitted to the class of J. Clavel and was transferred to the master class of Lambert Massart a year later. He was awarded first prize in the violin in 1846 and studied two more years as Massart's private pupil. After a concert in Paris on 30 January 1848, at which Henryk was assisted by his younger brother (2) Józef Wieniawski at the piano, Henryk departed for St Petersburg, where he gave five successful concerts and earned the praise of Vieuxtemps, at that time solo violinist at court. In 1848 Henryck played in Helsinki, Riga, Vilnius, Warsaw, Dresden and Breslav (now Wrocław). In the autumn of that year he Henryk returned to Poland, where he became friends with Moniuszko. By that time he had begun to compose and felt the need for further study; he re-entered the Paris Conservatoire in 1849 to study harmony with H. Collet. In 1850 he was made an honorary member of the Societé Philharmonique and received the Cercle-des-Arts.

His apprentice years completed, Wieniawski embarked on a career of a travelling virtuoso. He spent the years 1851–3 in Russia and gave some 200 concerts in collaboration with his younger brother, who had developed into an accomplished pianist. Although they were generally received enthusiastically, there were also critical voices, among them that of Serov, who warned against excessive praise of child prodigies and saw nothing but a 'gift for virtuosity' in the brothers. However, Henryk soon proved that he was more than a mere virtuoso. By 1853 he had composed and published some 14 opus numbers, including the Polonaise no.1, the *Souvenir de Moscou* op.6, several mazurkas, *L'école moderne* and the Violin Concerto no.1 in F♯ minor. With this last work, a tour de force of brilliance and Romantic dash, he achieved his first great success in Germany, at the Leipzig Gewandhaus in 1853. His fame grew rapidly, and he gave many concerts in Germany, Austria, Holland, Belgium and France. In 1858 he played with Anton Rubinstein in Paris, and in the autumn he travelled to Britain and gave concerts in London, Manchester, Brighton, Glasgow, Leeds, Liverpool, Birmingham, Dublin and Belfast; in 1859 he appeared in London at the Beethoven Quartet Society concerts, playing both the violin and the viola, and also at the chamber concerts of the Musical Union. He married Isabella Hampton, the niece of George Osborne, in 1860 and dedicated his famous *Légende* op.17 to her.

At this time Anton Rubinstein, who was making a determined effort to improve musical conditions in Russia, urged Wieniawski to join him. Wieniawski settled in St Petersburg from 1860 to 1872 and exerted a decisive influence on the growth of the Russian violin school. He was extremely active, being solo violinist to the tsar, leader of both the orchestra and the string quartet of the Russian Musical Society and from 1862 to 1868 professor of the violin at the newly established conservatory. The Russian years contributed significantly to his growth as an interpreter of great music and as a composer; these were the years when he wrote the *Etudes-caprices* op.18, the *Polonaise brillante* op.21 and his finest work, the Second Violin Concerto in D minor op.22. He played it for the first time in St Petersburg on 27 November 1862 under the baton of N. Rubinstein, and two days later Cui, a severe critic, wrote to his friend Balakirev: 'I still haven't recovered from the impact of that first Allegro'.

Wieniawski resumed his world travels in 1872, starting with a two-year tour of North America. He gave 215 concerts the first year with Rubinstein, and both artists were near exhaustion at the end. Wieniawski remained for a second year and shared the stage with Paulina Lucca, earning a fortune but endangering his health; upon his return to Europe, he accepted the offer in 1875 to replace Vieuxtemps as professor of the violin at the Brussels Conservatory. He kept this post until 1877 but continued to give concerts extensively, making a German tour in 1876 that brought him into competition with Sarasate. In

Beethoven Quartet Society, London, 1859: (from left to right) Alfredo Piatti, Henryk Wieniawski, Joseph Joachim and (seated) Heinrich Wilhelm Ernst

1878 he accepted the invitation of Nikolay Rubinstein to perform in Paris at the Russian Concerts organized for the world exposition, and here he played his Second Concerto and the *Souvenir de Moscou*. Despite his deteriorating health (he suffered from a severe heart condition), he continued his travels and appeared in London in February and June, and Berlin in November of that year. On 11 November he was to play his Second Concerto, but he broke down during the performance. As he was carried off the platform, his colleague Joachim, who was in the audience, hurried backstage and a few minutes later stepped before the audience with Wieniawski's violin in hand, announcing: 'Although I cannot play my friend's wonderful concerto, I shall play Bach's Chaconne'. At the end of Joachim's imposing performance, Wieniawski, slightly recovered, embraced his colleague on the stage.

Although his health was shattered, Wieniawski, in financial need, continued his tour to Russia. At a concert in Moscow on 17 December 1878, he had to interrupt his performance of the 'Kreutzer' Sonata after the first movement, but his playing was still magnificent when he felt well. Early in 1879 he began a Russian tour with the singer Desirée Artôt but was taken to hospital in Odessa in February. By April, he had recovered sufficiently to give a farewell concert in Odessa, after which he returned to Moscow. In November he was admitted to the Mariinsky Hospital, and on 14 February 1880 he was taken to the palatial home of Madame von Meck, the patroness of Tchaikovsky. His friends rallied around him: a benefit concert was arranged in St Petersburg to raise money for his life insurance policy, which was about to expire and thus leave his family in dire need. He died two months before his youngest daughter, Irene, was born.

Among the violinists of the generation after Paganini, Wieniawski must be ranked very near the top. His playing was shaped by a combination of French schooling and Slavonic temperament. He could toss off technical fireworks, but also move his listeners to tears. The emotional quality of his tone was heightened by an intensified vibrato which he 'brought to heights never before achieved', according to Kreisler. 'Il faut risquer' was his motto, and occasionally he missed. But at his best he was incomparable. Anton Rubinstein called Wieniawski 'without doubt the greatest violinist of his time'. Sam Franko, a violinist in the Paris orchestra which accompanied Wieniawski in 1878, recalled 50 years later: 'I was electrified by his playing. I have never heard anyone play the violin as he did, either before or since. His wonderfully warm, rich tone, his glowing temperament, his perfect technique, his captivating élan – all this threw me into a kind of hypnotic trance'.

Leopold Auer, who succeeded Wieniawski in his posts at St Petersburg, also reminisced about his 'altogether individual talents ... He was entirely different from any other violinist of his day ... in his manner of playing. Since his death no violinist has ever seemed able to recall him'. Moser summarized his impression of Wieniawski as 'unquestionably a violinist of genius, one of the greatest of all times'. Yet, Moser also criticized his bowing as 'indescribably stiff' and having a 'disastrous' influence on the younger generation. Wieniawski's method of bowing was indeed unconventional for his time: he held his right elbow rather high and pressed the bow with his index finger above the second joint (he produced his phenomenal 'devil's staccato' – the virtuoso effect of playing many staccato notes on a single string – by a complete stiffening of his arm). Some violinists, particularly of the Russian school, adopted this method; Flesch called it the 'Russian bow grip', though it can be traced to Wieniawski.

As a composer, Wieniawski combined the technical advances of Paganini with Romantic imagination and Slavonic colouring. His Polish nationalism is evident in his mazurkas and polonaises. His major works are the two concertos. The first overstresses virtuosity (a problem in his early works) but has some musically redeeming features. The second (dedicated to Sarasate) is a minor masterpiece, full of Romantic sweep and emphatic expression; the virtuosity is still present but it is more restrained and is subservient to the needs of expression and the concept of form. These works have become an indispensable part of a violinist's repertory. His collections of études (*L'école moderne* and *Etudes-caprices*) are, next to Paganini's Caprices, the most musical and demanding study works for the violin. A projected nine-volume collected edition of his works was begun in Kraków in 1962.

The first Henryk Wieniawski Violin Competition was organised in Warsaw in 1935. Since 1952 the Henryk Wieniawski International Violin Competition has taken place at five-yearly intervals.

(2) **Józef Wieniawski** (*b* Lublin, 23 May 1837; *d* Brussels, 11 Nov 1912). Pianist and composer, brother of (1) Henryk Wieniawski. After early piano studies with Franciszek Synek in Lublin, he entered the Paris Conservatoire in 1847, where his piano teachers were P.J.G. Zimmermann and A.F. Marmontel. He won a second prize in the piano and solfège in 1848, and first prize the following year. He left the Conservatoire in 1850 with a second prize in harmony. In 1851–3 he gave joint concerts with his elder brother throughout Russia. They performed together regularly across Europe until 1855. A scholarship from the tsar enabled him to study with Liszt in Weimar (1855–6); from there he proceeded to Berlin to complete his theoretical studies with A.B. Marx (1856–8). He re-established himself in Paris, played for Napoleon III, and won the friendship and admiration of many musicians, including Berlioz, Gounod and Auber.

In 1864–5 Wieniawski was active as a piano teacher in Moscow, where the Russian Musical Society had established music courses. This led to the founding of the Moscow Conservatory in 1866, under the directorship of Nikolay Rubinstein, and Wieniawski became a member of the piano faculty. However, he left the Conservatory after one term of teaching and returned to his private piano classes. He was a co-founder of the Warsaw Music Society, and was elected to its board in 1871. In 1875–6 he was active in the Warsaw Musical Society as director, conductor and chamber music player. In 1878 he accepted an appointment as professor of the piano at the Brussels Conservatory, a post he kept until his death.

As a pianist, Wieniawski was distinguished by fine musicianship, elegance, accomplished technique and great facility in sight-reading, transposing and accompanying. Yet he seemed to have lacked the overpowering temperament and personality of his brother. He was a very conscientious teacher and provided his students with written instructions which Bülow, one of his admirers, described as a 'veritable résumé of piano teaching'.

Wieniawski collaborated with the piano manufacturer Mangeot in building a piano with two keyboards, the second of which was tuned in reverse. It was patented in 1876 and first played at the Paris Exposition in 1878, but did not find wider acceptance. As a composer, Wieniawski was far more versatile than his brother, yet his works are almost totally forgotten. The works were, generally speaking, influencd by Schumann and Mendelssohn. His symphonic works are characterized by colourful instrumentation with wind instruments to the fore, and by the opposition of groups of low-pitched instruments against those of higher registers. In his piano worls two genres become apparent: salon and concert pieces. In the latter there are obvious influencs from Chopin and from the piano technique of Liszt (e.g. in the Concert Studies and the *Tarangella* op.35). His *24 études de mécanisme et du style* summarize his teaching experience over many years. He maintained a lifelong interest in Polish music, particularly in the works of Moniuszko, which he strove to make known in the West.

(3) **Adam Tadeusz Wieniawski** (*b* Warsaw, 27 Nov 1879; *d* Bydgoszcz, 19 April 1950). Composer, nephew of (1) Henryk and (2) Józef Wieniawski. He began his studies as a child at Warsaw Conservatory with H. Melcer-Szczawiński (piano) and Z. Noskowski (composition). He continued his composition studies with Bargiel at the Berlin Hochschule für Musik and also studied art history and literature at the university there. In 1906 he moved to Paris, where he became a pupil of d'Indy at the Schola Cantorum and later of Fauré and Gédalge at the Conservatoire; his first symphonic poem, 'Pieśń Kamaralzamana' ('The Song of Kamaralzaman'), was performed in 1910 by the Orchestre Lamoureux. During World War I he was an officer in the French army. He returned to Warsaw in 1918 and was appointed to the Chopin Music School; from 1928 to World War II, and for a brief period after 1945 he was its director. In 1928 he also took over the leadership of the Warsaw Musical Society. He was organizer of the 2nd (1932) and 3rd (1937) Chopin Piano Competitions and the president of their jury. He was also initiator, organizer and president of the jury of the Henryk Wieniawski Violin Competition, initiated in 1935. In 1932 he was elected chairman of the Union of Polish Composers and received the medal of the City of Warsaw in 1936 in recognition of his organizational work. He was also active as a music critic and wrote the first monograph on the Polish composer Ludomir Różycki. After World War II he resumed the directorship of the Chopin Music School for a brief period.

As a composer, Wieniawski did not exert any major influence on Polish music. He continued the style of late French impressionism at a time when it had begun to be outmoded. Only his later works show stronger Polish national characteristics.

WORKS

THEATRICAL

Megaë (op, 2, M. Synnestredt and A. Wieniawski), Warsaw, 28 Dec 1912, vs (Paris, 1910), fs, reorchd, 1947, *PL-Wtm*

Lalita (ballet, 8, C. Jelenty), 1922

BORIS SCHWARZ/ZOFIA CHECHLINSKA

Wieprecht, Wilhelm (Friedrich) (*b* Aschersleben, 10 Aug 1802; *d* Berlin, 4 Aug 1872). German musician and instrument designer. He was the most important member of a prominent German musical family. After receiving instruction in wind instruments from his father, Wilhelm studied in Dresden and Leipzig and in 1824 took up a professional appointment as a royal chamber musician in Berlin. In 1825 he reorganized a military band, introducing some valved instruments. From 1828 to 1843 he accepted various positions of leadership, ranging from the regimental band of the Royal Life Guards to the entire Prussian military musical establishment, with Wieprecht all the while remaining a civilian. At the founding of the German Empire in 1871, Wieprecht's musical organization was introduced in all the other German states.

His interest in wind instruments brought him into contact in 1828 with the firm of Griesling & Schlott, the makers of the first really practical piston valves. Soon after, he entered into a long-lasting association with J.G. and C.W. Moritz. Wieprecht's name has been associated since Kalkbrenner's time with the plump looking Berlin valve (Ger. pl. 'Berliner Pumpen'), for which he was refused a Prussian patent in 1833. Heyde has shown, however, that there were actually two types of Berlin valve. Wieprecht's (which he called a 'Stecherbüchsen-Ventil') is distinguished by its valve loops, the inlets and outlets of which are on opposite sides of the valve casing, while a model devised by Stölzel (called by him a 'Röhrenventil') and for which a patent had also been refused in 1827 has slides, their inlets and outlets being on the same side of the casing. Patent or not, the Berlin valves were so successful that Adolphe Sax fitted out many of his instruments with them, calling them 'cylinders'. (These are not to be confused with rotary valves, collectively called 'Zylinder-Maschine' in German.) A meeting between Sax and Wieprecht in Koblenz in 1845 was inconclusive.

In 1835, with J.G. Moritz, Wieprecht was granted a Prussian patent for a revolutionary new instrument, the wide-bore chromatic *Bass-Tuba* with five valves (later expanded to six; *see* TUBA (i)). His preoccupation with the problems of intonation presented by the combination of two or three valves led to his invention in 1838 of the 'piangendo', a device allowing valved brass instruments to play portamento.

Wieprecht's enthusiasm for military music was not confined to brass; in 1839 he devised the Bathyphon, a military-style contrabass clarinet, made by the firm of Skorra. He also invented the '16füssiger Orgelbass' (1845), a wide-bore brass contrabassoon with a novel mechanism; it was played by one hand on a one-octave keyboard. This led to C.W. Moritz's development of the 'Claviatur-Contrafagott', patented in 1856.

Wieprecht's letters to various German musical papers (*c*1845) give the most complete near contemporary account of early valve mechanisms.

PHILIP BATE/EDWARD H. TARR

Wier [Weyer]. German crumhorn makers active from the late 15th or early 16th century to the mid-16th century in Memmingen. Their instruments are marked with a single, double or triple reverse 'f' (see illustration); this symbol corresponds to an 'I' or 'J' in contemporary script. There appear to have been two or three crumhorn makers of this name: Jörg (i) (*d* ?before 1530), Jörg (ii) (*b* *c*1485–90; *d* ?1549) and Jörg (iii) (*fl* ?1557–65). References occur to a 'Jörg Weyer' in Memmingen records of 1513, 1518 and the 1520s, sometimes describing him as a town musician; these could concern Jörg (i) or Jörg (ii) or both of them. The listing of voters for the referendum in 1530 on the proposals of the Augsburg Reichstag includes only one Jörg Weyer (he was one of the small minority of voters who rejected the Reformation proposals); it seems

Maker's mark used by Jörg Wier (ii) on a bass crumhorn (Musikinstrumenten-Museum, University of Leipzig)

therefore that Jörg (i) had died before 1530. References to the name after that date must be to Jörg (ii), as are probably those to an unnamed Memmingen crumhorn maker. In 1549 the records of Nuremberg, which had bought crumhorns from Memmingen in 1539, mention the death of 'the crumhorn maker', believed to be Jörg (ii). However, a great bass crumhorn marked with the double reverse 'f' (Prague) survives from the Rožmberk (Rosenberg) court band, which was established in 1552; this suggests that crumhorns were still being made with the Weir mark after the death of Jörg (ii). The maker may have been the 'Jörg Weyer' mentioned in the Memmingen records in 1557 and 1565, probably a son of Jörg (ii). No other crumhorn makers are known to have been active in Memmingen or Nuremberg.

The assertion that there was more than one maker with the same name rests largely on the evidence provided by the makers' marks on surviving Wier instruments. Two crumhorns of type III (*see* CRUMHORN, §2), with decorated key covers dated 1522 and 1524 (now in the Kunsthistorisches Museum, Vienna, and the Museo di Strumenti Musicali, Rome), carry the name 'Ioerg Wier' and a double reverse 'f' mark (the instrument in Rome is marked with a triple reverse 'f', the only known occurrence of this form). The double mark is found only on instruments of type III. Other crumhorns, mainly of type II, bear a single version of the mark. The fact that the Schnitzer family of wind-instrument makers, active at the same period in Nuremberg and Munich, used a similar system of single and double marks, together with the presence of the single mark on a type II crumhorn and its absence from larger sizes of crumhorns with keys, suggests that the single mark belonged to an earlier maker than the double one; it seems reasonable to infer, therefore, that the different versions of the reverse 'f' mark represented several generations of the Wier family.

29 Wier crumhorns are known (more than half of all surviving crumhorns), most of which were made by Jörg (ii); all sizes, from soprano ('Exilent') to great bass are represented. The instrument dated 1522, an extended tenor, is the earliest dated crumhorn with extension keys, and the Wiers may have been responsible for developing the classic type III crumhorn. Wier crumhorns were greatly sought after; the courts at Dresden, Ambras (near Innsbruck), Rožmberk and Trent (the prince-bishop's court) are all known to have owned sets, as did the city of Nuremberg and probably Augsburg. A set in the old cathedral in Salamanca is thought to have been there since the 16th century.

Wierzbięta, Maciej. *See* WIRZBIĘTA, MACIEJ.

Wierzbiłłowicz, Aleksander (*b* St Petersburg, 8 Jan 1850; *d* St Petersburg, 15 March 1911). Polish cellist and teacher. He studied in Warsaw, and at the Conservatory in St Petersburg in the class of Karl Davïdov. In 1877 he succeeded Davïdov as concertmaster of the Italian Opera in St Petersburg, and in about 1885 (perhaps as early as 1882) was appointed concertmaster of the [Russian] Imperial Opera. After the death of Davïdov, in 1889 he became professor of cello at the St Petersburg Conservatory, where his pupils included Leopold Rostropovich, father of Mstislav. He travelled widely, achieving considerable success as a soloist and chamber musician. At the initiative of Anton Rubinstein he was invited to Paris to participate in the renowned series of 'Concerts populaires' (before 1894), and from there he set out on an extensive European tour to Vienna, Berlin, Leipzig, Copenhagen and later Italy. In 1898 he gave concerts in Kiev, Kharkov, Odessa, Minsk, Moscow, Vilnius and Łódź. He appeared in Warsaw for the first time in 1872 and subsequently in 1875, 1895–1900, 1904 and 1909. There he established his own trio with Stanisław Barcewicz (violin) and Aleksander Michałowski (piano), and together they also gave concerts abroad (1898). Two concerts in particular, by the Wierzbiłłowicz Trio, received critical acclaim: on 24 November 1900, when Alexander Ziloti played the solo piano part (in a new trio in D minor, by Arenski); and on 20 November 1909, when the young Artur Rubinstein performed in the A minor trio of Tchaikovsky.

Wierzbiłłowicz liked to perform miniature pieces for the cello written by Polish composers. He also took part in the presentation of other more substantial chamber works, then little known in Poland, such as the Piano Quartet in B♭ by Saint-Saëns (29 January 1896), and the String Quartet in A minor op.41 by Schumann (February 1899). At the St Petersburg Conservatory from about 1893, Wierzbiłłowicz gave evenings of chamber music with the violinist Leopold Auer and the pianist Anna Essipov; and in 1899 he played there with Auer and Ignacy Paderewski. On 25 November 1892 he took part in the first performance of the String Sextet op.70 by Tchaikovsky.

Wierzbiłłowicz was known for the beauty and fullness of his tone, for his excellent sense of style and perfect technique. He achieved particular critical acclaim for his performances of trios from the classical repertory, as well as the D minor trio by Mendelssohn and the Chopin sonata.

BARBARA CHMARA-ŻACZKIEWICZ

Wiesel, Uzi (*b* Tel-Aviv, 9 Jan 1927). Israeli cellist and teacher. He studied at the academies in Jerusalem and Tel-Aviv, at the Juilliard School in New York and with Pablo Casals. In 1953 he won the Piatigorsky Prize, and he also won prizes in the International Cello Competition in Moscow and the Pablo Casals International Competition in Israel. Wiesel was the first to perform the full cycle of Bach's cello suites in Israel, as well as concertos by Berio, Ligeti and Lutosławski. As dedicatee he has given

the first performances and made recordings of concertos and pieces for unaccompanied cello by many Israeli composers. Wiesel was also a founder member of the Tel-Aviv String Quartet (1959–93). He was appointed professor at the music department of Tel-Aviv University in 1965, and has taught many of Israel's leading cellists. He has given masterclasses in cello and chamber music internationally, and has been a jury member in international cello competitions. He specializes in Baroque repertory, and has contributed many articles to *The Strad*.

Wiesenthal, T(homas) V(an Dyke) (*b* Chestertown, MD, 1790; *d* Portsmouth, VA, 21 March 1833). American composer. He was trained as a physician in Philadelphia and between 1814 and 1829 was in the navy. He was composing throughout this period, and although little is known about his musical career, he was apparently associated with Benjamin Carr in Philadelphia and Gottlieb Graupner in Boston.

Wiesenthal produced fewer than 40 songs and piano pieces, but several were among the most successful of the day and remained popular far longer than many by his better-known contemporaries. His output ranged from hymns to ornate ariettas with accompaniments that were especially idiomatic and sensitive. He was among the first Americans to write in a simple, direct style, and his three most popular pieces were adaptations of folk melodies. *Fading, still fading* is included in such 20th-century collections as *Heart Songs* (1909/*R*). *The Ingle Side*, to a text by the Scottish-American poet Hew Ainslie, was issued in sheet-music editions throughout the 19th century. Another Ainslie setting, *On with the Tartan*, was reworked after Wiesenthal's death into the well-known *Wait for the Wagon*.

Wietor [Büttner, Philovalensis, Doliarius], **Hieronim** (*b* Lubomierz, Silesia, *c*1480; *d* 1546/7). Polish printer, publisher and bookseller. Probably a pupil of JAN HALLER he worked in Vienna from 1510 to 1517 and moved to Kraków in 1519. Around 1527 he became 'royal printer'. He was the first in Poland to use an italic type and the first to print music from movable mensural type in double- and, later, single-impression methods. Among his music publications were treatises, songbooks and numerous anonymous secular and sacred partsongs. After his death Łazarz Andrysowicz (*b* Stryków; *d* Kraków, 1577) married Wietor's widow and took over the firm. He published many works by Polish composers, mostly popular partsongs, psalms and hymns. After his death his son Jan Łazarzowicz Januszowski (*b* Kroki, 1550; *d* Kraków, 1613) continued the printing firm. Known for publications of a high standard, he too became 'royal printer'. In music he widened the firm's output to include lute tablatures, missals and other service books, as well as treatises and partsongs.

Wiggen, Knut (*b* Buvika, nr Trondheim, Norway, 13 June 1927). Swedish pedagogue, administrator and composer. As well as studying the piano with G. Boon and H. Leygraf and composition with Blomdahl, he completed a business course, and composing has always taken second place to his administrative work. Up until 1962 he taught the piano, including in Darmstadt (1953–5). As the energetic chairman of Fylkingen (1959–69) he established an electronic music studio for the Workers' Educational Association and organized the congresses 'Art and Technology' (1966) and 'Music and Technology' (1970) in Stockholm. With technical assistance he invented Music Box, a programme for computer music generation, and the Music Machine no.1, which produced random, complex sound structures and gave birth to the idea of a much larger Music Machine no.2. In 1964 he was commissioned by Swedish radio to build up an advanced electronic music workshop (known from 1968 as the Electronic Music Studio), which he directed from 1969 to 1976. In 1962 he was responsible for the first Swedish 'happening'.

ROLF HAGLUND

Wigglesworth, Frank (*b* Boston, MA, 3 March 1918; *d* New York, 19 March 1996). American composer. He studied at Columbia University (BS 1940) and Converse College (MMus 1942), taking composition with Ernest White, Luening, and Cowell. Wigglesworth also worked

with Varèse for three years (1948–51). From 1947 to 1951 he was chairman of the editorial board of the New Music Edition and New Music Recordings. He held teaching appointments at a number of institutions, including Converse College (1941–2), Greenwich House, New York (1946–7), Columbia University and Barnard College (1947–51), Queens College , CUNY (1955–6), and the New School for Social Research, New York (from 1954, as chairman of the music department from 1965). He was a Fellow at the American Academy in Rome (1951–4) and later returned as composer-in-residence (1969–70). Among other honours, he received the Alice M. Ditson Award (1945), an award from the American Academy of Arts and Letters (1951), and two MacDowell Colony fellowships (1965, 1972). He served as president of the Composers' Forum, New York, and in 1981 was elected president of the ACA: in 1989 he received from the latter organization its second Laurel Wreath for outstanding contribution to American music.

Wigglesworth was an iconoclastic composer, whose New England heritage had its roots in the works of Lowell Mason, Billings, and other early American composers; a grand-nephew of Elizabeth Sprague-Coolidge, he was strongly influenced by the New England chamber-music tradition. He also had an unusual insight into 20th-century trends in American composition. His interest in the French Ars Nova, in particular the works of Machaut, was stimulated by Varèse.

Wigglesworth's compositions use sharply defined motifs that expand into phrases and melodic lines, mostly lyrical in character but sometimes abstract and even harsh in their effect. Such melodic lines often develop into long linear statements with harmonies used both as punctuation and as chordal accompaniment. His works can be tonal, atonal, and sometimes polytonal and polymodal (as in the virtuoso Duo for oboe and viola or clarinet). In the atonal opera with slides, *The Willowdale Handcar*, transparent contrapuntal accompaniments, sudden tempo changes, simple rhythmic contrasts, and clear vocal prosody enhance the lyric-dramatic fantasy of the text and pictures. *Telesis* (1951) and *Three Portraits for Strings* (1970) demonstrate Wigglesworth's brilliant command of orchestral resources, while the chamber works, right up to the late duo *Trillium* (1992) are notable for their textural lucidity and often playful counterpoint. The polymodal setting of Psalm cxlviii and the two Short Masses (1961, 1970) are striking examples of the composer's sacred music.

OTTO LUENING/R

Wigglesworth, Mark (Harmon) (*b* Ardingly, West Sussex, 19 July 1964). English conductor. He graduated from Manchester University and studied at the RAM, principally with George Hurst. He won first prize in the Kirill Kondrashin International Conducting Competition in the Netherlands in 1989, which brought him engagements with leading Dutch orchestras, the Czech PO and the Moscow State SO. In 1989 he also formed the Premiere Ensemble, a chamber group committed to giving a première in each programme, with which he made the first recording of *Das Lied von der Erde* in Schoenberg's chamber arrangement. He was associate conductor of the BBC SO, 1991–3, and music director of Opera Factory, 1991–4, with which he made his opera début with *Don Giovanni* in 1990 and also conducted *The Rake's Progress* and Birtwistle's *Yan Tan Tethera*. His American début was with the Chicago SO in 1994, and he first conducted the Berlin PO that year; in 1996 he was appointed music director of the BBC National Orchestra of Wales. Wigglesworth has also appeared with the WNO, at the Salzburg Festival and in the Concertgebouw Mahlerfest in 1995. Although his tempos can be idiosyncratic, his conducting combines a sharp sense of rhythm with a secure command of musical architecture.

Wigthorp, William (*b* ?1579; *d* after 1609). English composer. He was a chorister at Winchester Cathedral from *c*1592 to 1597, and matriculated at New College, Oxford, in May 1598, where he acted as organist until 1610. In 1605 he attained the BMus. Although he wrote music for the church, he is known principally for his consort songs, all of which are in one set of partbooks which may be in his own hand or that of a close associate. In addition to the pieces attributed to him in this source several unascribed arrangements, including the anonymous *Daphne* and *Sweet was the song* and Robert Jones's *There is a garden in her face*, may be his work.

Wigthorp's consort songs are close in style to lute ayres. He arranged the ayres by Dowland and Bacheler for voice and viols by preserving the vocal line and bass and adding new inner parts. The results are simpler and more homophonic than the older, more contrapuntal play songs of the Elizabethan period, and reflect one aspect of the consort song's development during the first decade of the reign of James I.

CRAIG MONSON

Wihan, Hanuš (*b* Police u Broumova, north-east Bohemia, 5 June 1855; *d* Prague, 1 May 1920). Czech cellist and teacher. At the Prague Conservatory he was a pupil of František Hegenbarth whom he succeeded in 1888 as professor of cello and chamber music. Previously, Wihan had been a member of orchestras in Nice, Prague, Berlin, Sondershausen and Munich, and he finished his training under Karl Davïdov, whose methods formed the basis of his own teaching. Having taught the players of the Czech Quartet, which he founded, he took the place of his dying pupil Otto Berger in it, and remained a member of the quartet for 20 years, throughout its most glorious period. Having retired in 1914, he returned to the conservatory in 1919. During his career as soloist over all Europe he became acquainted with Wagner, Liszt, Bülow and Strauss, who wrote for him the Sonata in F. Dvořák composed some works for him, among them the Cello Concerto, although the first performance of this work was in fact given by Leo Stern.

Wihan Quartet. Czech string quartet. It was founded at the Prague Academy of Musical Arts in 1985 by Leoš Cepický, Jan Schulmeister, Jiří Zigmund and Aleš Kasprík. Its teacher was Antonín Kohout of the Smetana Quartet and it took the name of Hanuš Wihan (1855–1920), cellist and *spiritus rector* of the Bohemian Quartet. In 1988 it won the Prague Spring International Competition, in 1990 the chamber music competition at Trapani, Sicily, and in 1991 the London International String Quartet Competition. Since then it has toured extensively, winning praise for its tonal quality, fine intonation and stylistic sense. Its performances and recordings of the works of Dvořák and Janáček have reached a particularly high standard but it has also had success with the Beethoven quartets, all of which it has recorded.

Wiklund, Adolf (*b* Långserud, Värmland, 5 June 1879; *d* Stockholm, 3 April 1950). Swedish composer, pianist and conductor. He studied at the Stockholm Conservatory with Lindegren (composition) and Andersson (piano). A state scholarship enabled him to study in Paris (1903–4), where he was organist of the Swedish church, and a Jenny Lind Stipend took him to Germany for further education (1905–7). There he had lessons with Kwast in Berlin, conducted at Karlsruhe (1907) and served as coach at the Berlin Opera (1908). He made his début as a conductor at the Royal Theatre, Stockholm, in 1911, and was then conductor of the Royal Orchestra (1911–24) and the Concert Society Orchestra (1925–38); he also conducted in several European cities. As a pianist he played his own concertante pieces and appeared as an accompanist. In 1915 he was elected to the Swedish Academy of Music. He composed in a national Romantic style, at first influenced by Brahms and Stenhammar but later dominated by Impressionist features with a great feeling for melody and harmony. Among the best works of his small output are the two piano concertos (which are among the most important Swedish compositions in the genre), the symphonic poem *Sommarnatt och soluppgång*, the Symphony and the Violin Sonata.

BERTIL WIKMAN

Wikmanson [Wikman], **Johan** (*b* Stockholm, 28 Dec 1753; *d* Stockholm, 10 Jan 1800). Swedish composer and organist. The son of an impoverished dyer, he studied thoroughbass and the keyboard with H.P. Johnsen. In 1770 he was sent by his parents to Copenhagen to learn mathematics and instrument making. He returned to Stockholm in 1772 and entered the civil service as an accountant in the royal lottery. During the 1780s he studied composition with Abbé Vogler and with his friend J.M. Kraus; in 1788 he was elected a member of the Royal Academy of Music, Stockholm, where he became the director of education (1796) and a teacher of harmony and theory (1797). As the organist at the Dutch Reformed Church (1772–81) and at the Storkyrka (from 1781), where he helped to rebuild the organ during the 1790s, he became one of the most important organists in Sweden. He also played a number of other instruments and was particularly proficient on the cello.

Wikmanson translated theoretical works by Tartini (from the French), and by Vogler, for whom he was also a linguistic adviser. His works resemble Kraus's in their sense of form and technical mastery; his *Häckningen*, written for the Palmstedt literary circle, is a charming Rococo piano cantata in Kraus's manner. The three surviving string quartets, based on Haydn's style but with idiomatic harmony and counterpoint, were posthumously published by his friend G.A. Silverstolpe with a dedication to Haydn, who praised them highly. His piano music was influenced by C.P.E. Bach, Haydn and probably Johann Schobert, and includes a Sonata in C with a brief, humorous movement entitled 'Hönshuset' ('Henhouse'), and a cycle of miscellaneous pieces entitled *Fragmenter för min lilla flicka*, composed for his daughter. Wikmanson was also a significant Swedish lied composer, and set over 30 poems during the 1790s.

C.-G. STELLAN MÖRNER/BERTIL H. VAN BOER

Wikström, Inger (*b* Göteborg, 11 Dec 1939). Swedish pianist, composer and conductor. She studied the piano with Gottfried Boon in Stockholm and with Ilona Kabos in London. In 1959 she made successful débuts in Stockholm, London and Berlin, and in New York in 1964; her subsequent career as a pianist included world-wide tours. In 1977 she founded the Nordic Music Conservatory and in 1980 the Nordic Chamber Opera. During the late 1970s she also began to compose and to conduct. Most of her compositions are vocal works; her music is lyrical, but with elements of expressionism and Swedish neo-romanticism, especially in the Rilke songs and the opera *Den Fredlöse*.

WORKS

Stage: Junker Nils (family op, A. Lindgren), 1982; Den fredlöse [The Outlawed] (op, after A. Strindberg), 1985; Elddonet [The Tinderbox] (musical, after H.C. Andersen), 1990; Den brottslige modern [The Guilty Mother] (after P.-A. Beaumarchais), 1992; Näktergalen [The Nightingale] (after Andersen), 1993; Aladdin, 1995; Peter Pan, 1997
Vocal (for 1v, pf, unless otherwise stated): 6 Lieder, op.10 (R.M. Rilke), 1982; Orpheus-Euridike-Hermes, op.11 (Rilke), 1982; 3 Lieder, op.12 (Rilke), 1983; 3 sånger, op.15 (P.F. Lagerkvist), 1983; 3 Shakespeare Sonnets, 1995; 3 Stockholm Songs (B. Bergman), 1996; Lamentatio, solo and chor, 1997

EVA ÖHRSTRÖM

Wilars [Wilart] **de Corbie.** *See* VIELART DE CORBIE.

Wilby, Philip (*b* Pontefract, 18 July 1949). English composer. Encouraged to take up composition by Herbert Howells, Wilby graduated from Keble College, Oxford, in 1970. After a year as a professional violinist, he was invited by Alexander Goehr, then professor of music at Leeds University, to join his staff. He has been the senior tutor in composition there since 1984. For Wilby composing is an act of worship, and most of his major works are expressions of his Christian faith. He is happy to tailor his versatile technique to the very different demands of the skilled amateur in a brass or wind band, both in Britain and in the United States, to the church or cathedral choir or to the finest professional soloist or orchestra.

Wilby has developed a musical language characterized by directness and sincerity. He is attracted by opposites: on a musical level, combining music from the past with his own; on an expressive level, the interplay between light and dark, as in his *Symphonia sacra* 'In Darkness Shine' (1986), chaos and order, violence and tranquillity. Two of his larger sacred choral works, *Cantiones sacrae* (1987) and *A Passion for our Times* (1997), include a dance element. His reconstructions of two Mozart fragments have been widely performed. His evocative Second Symphony 'Voyaging', composed for the BBC Philharmonic in 1991, underpins a personal spiritual journey with music of energy and drive. Wilby has also composed two colourful symphonies for brass band, 'Dance before the Lord' (1994) and 'Revelation' (1995). These and other works of substance, like the *Paganini Variations*, a BBC commission from 1991, and *Lowry Sketchbook* (1992), have rejuvenated the repertory of the medium.

WORKS
(*selective list*)

Orch: Firestar, wind orch, 1983; Sym. no.1 (Symphonia sacra 'In Darkness Shine'), wind orch, 1986; Wings of Morning, 1988; Sym. no.2 'Voyaging' (Psalm viii), children's chorus, orch, 1991; Conc., perc, orch, 1993; Laudibus in sanctis, wind orch, 1994
Brass band: The New Jerusalem, 1990; 'Paganini' Variations, 1991; Lowry Sketchbook, 1992; Masquerade, 1992; Shadow Songs, 1992; Sinfonia 'Dance Before the Lord', brass band, live elecs, 1994; Revelation (Symphony for Double Brass after Purcell), 1995; Conc., euphonium, brass band, 1996; 'Jazz' Symphonic Dances, 1996
Choral: The Temptations of Christ (*Matthew*, iv, 1–11), S, mixed vv, orch, elec, 1983; Cantiones sacrae, T, mixed vv, nar, dancer, perc, org, 1987; St Paul's Service, treble vv, org, 1988; Trinity Service, mixed vv, org, 1992; Evening Liturgy, double choir, org, 1994; A Passion for our Times, celebrant, nar, mixed vv, org, wind orch, 1997; anthems and motets
Vocal: Winter Portrait in Grey and Gold (K. Smith), S, 3 insts, 1977–85; 10 Songs of Paul Verlaine, Bar, pf, 1983; To the Green Man (M. Jarman), S, pf, 1990; Unholy Sonnets (M. Jarman), high voice, pf/brass band, 1995

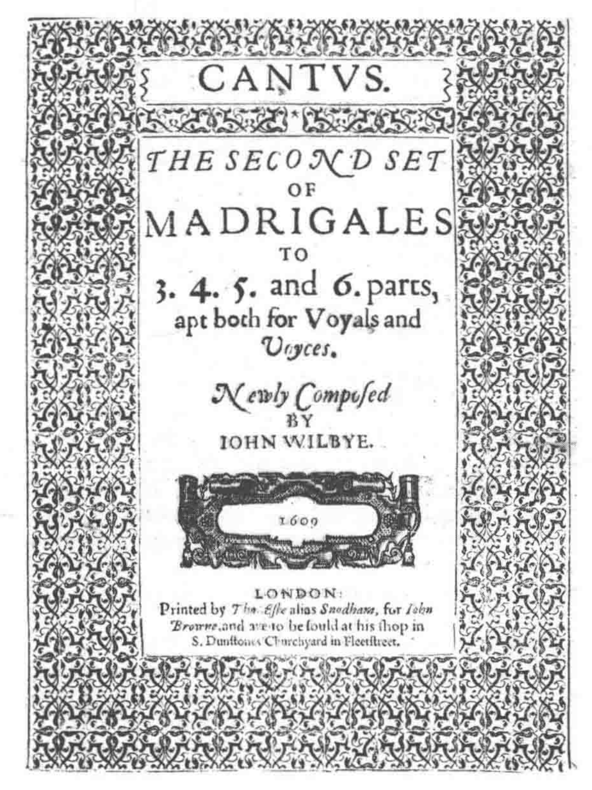
PAUL HINDMARSH

Wilbye [Willoughbye], **John** (*b* Diss, bap. 7 March 1574; *d* Colchester, Sept–Nov 1638). English composer and musician. He was one of the finest English madrigalists.

1. LIFE. Wilbye was the third son of Matthew, a prosperous tanner, and Fellowes (1914–15) suggested that it was through the Cornwallis family, who lived at Brome Hall, near Diss, that he entered the service of the Kytsons at Hengrave Hall, outside Bury St Edmunds (Lady Elizabeth Kytson, the wife of Wilbye's master, was a Cornwallis). The Kytsons had strong, active interests in music, and their establishment was splendidly equipped with both instruments and music books. Wilbye was certainly working for them by 1598, when he published his first volume of madrigals. The dedication of this collection was inscribed from the Kytsons' town house in Austin Friars, London, showing that Wilbye could have had active contacts with the capital's musical circles. In 1600 Wilbye and Edward Johnson, who had also been employed as a domestic musician at Hengrave Hall as early as 1572, were involved in the negotiations for the publication of Dowland's second book of lute-songs. From 1598 for the greater part of the next 30 years Wilbye was at Hengrave, where he lived not only as a domestic musician but also clearly as an honoured retainer who progressively built up his own material wealth. His only other collection of madrigals appeared in 1609 (he had contributed a madrigal to Morley's *The Triumphes of Oriana*, RISM 1601[16]). In 1613 he was granted the lease of a particularly valuable sheep farm in the area, and Fellowes suggested that from this time he may have concentrated all his attention on his worldly affairs (fig.1). His only subsequent publications were two contributions to Leighton's *Teares or Lamentacions of a Sorrowful Soule* (1614[7]). His compositions surviving in manuscript are few and mostly unimportant.

1. Autograph letter (September 1628) from Wilbye to Mrs Camocke (GB-Cu Hengrave 88, ii, item 131)

On the death of Lady Elizabeth Kytson in 1628 the Hengrave establishment was dispersed. Wilbye was unmarried, and evidently he moved to Colchester apparently to spend the last ten years of his life with Lady Rivers, the youngest daughter of Lady Kytson, with whom he had long had a close friendship. In his will, made on 10 September 1638 (proved on 30 November), he made numerous bequests of land and property, disposed of some £400, and left his 'best vyall' to the Prince of Wales (later Charles II). He was evidently buried in Holy Trinity, Colchester.



2. WORKS. The most important formative influences on Wilbye's music were Morley's canzonet manner and, to a lesser extent, the madrigalian idiom of Alfonso Ferrabosco (i). It is probable that the polished and sensitive style of Kirbye, who was a domestic musician at Rushbrooke Hall, a few miles from Hengrave, also played a general part in the formation of his style. On the other hand, the example of Byrd's sturdy or turbulent polyphony does not seem to have had the same importance for Wilbye as it did for Weelkes. The most marked influence of Morley is to be heard in the three-voice pieces that open Wilbye's *First Set of English Madrigals* (1598). Here Wilbye already shows a firm command of Morley's facile canzonet style, generating fluent little paragraphs that are as polished as they are unenterprising. Signs of Ferrabosco's influence may be most clearly discerned in certain of the five-voice works of this collection, with their more staid expression and counterpoint. *Lady, your words doe spight mee* actually uses a text already set by Ferrabosco (in Yonge's *Musica transalpina*, 1588[29]), and is the only example of Wilbye's borrowing some musical material from an earlier setting. The best of the five-voice pieces is *Flora gave mee fairest flowers*, a far more canzonet-like piece, whose clearcut paragraphs and specially sprightly conclusion contrast sharply with the amorphous counterpoint and relatively neutral expression of its companions.

Among the six-voice works, the sonnet setting *Of joys and pleasing paines* (2p. *My throte is sore*) is an impressive exploration of a full-textured pathetic vein, whose dissonance-filled sonorities could readily be associated with Weelkes. By contrast, *When shall my wretched life give place to death* shows a marked expressive restraint, its archaic idiom clearly prompted by the text, which has a native pre-madrigalian seriousness. The best of the six-voice pieces is undoubtedly *Lady, when I beehold*, a thoroughly light piece, yet one which shows an inventiveness and musical substance that far transcends the limitations of the conventional canzonet.

It is, however, the four-voice works that form the most consistently interesting group in the volume. For *Alas, what hope of speeding* Wilbye borrowed a text from Kirbye's 1597 volume, but whereas Kirbye had merely provided a line-by-line setting of the text, Wilbye evolved a fuller musical experience which transcends the mere matching of words. The four-voice setting of *Lady, when I beehold* (which has no relationship with the six-voice setting, except for the final line) is the clearest example in this collection of Wilbye's grasp of the effectiveness of repetition and sequence, the conventional canzonet repetitions being supplemented to build a clearcut *AABBCDDEE* structure. The most beautiful and penetrating piece is *Adew, sweet Amarillis*, which heightens its resigned pathos by turning to the tonic major for the

final section, an effect that Wilbye was to exploit in several pieces in his second collection.

Wilbye's *Second Set of Madrigales* (1609) is the finest English madrigal collection (fig.2). There is still some evidence of a pre-madrigalian style in the six-voice settings of *O wretched man* and *Where most my thoughts* (2p. *Dispightfull thus*), but in *Happy, O happy he* this restrained seriousness is blended with a more madrigalian language to produce one of the noblest pieces in the volume. In general, however, Wilbye used a thoroughly madrigalian style that is fully formed and consistent. His exploitation of repetition, and especially of sequences, is here greatly extended to become one of the most notable features of his style. He showed far less interest than Weelkes in long-range repetition or in thematic relationships between different sections as a means of establishing an integrated structure, but he sometimes repeated substantial phrases or whole sections for structural clarification, as in *Yet sweet take heed* (the second part of *Sweet hony sucking bees*), where a statement and two repetitions of a 13-bar phrase for three voices form a very substantial centre to five-voice flanks. Wilbye fully appreciated the value of immediate repetition, both as a means of musical expansion and of expressive reinforcement. His most characteristic form of sequence is built from a three-voice phrase in which two voices move largely in 3rds over a mainly static bass, and a further fingerprint of his style is the subsequent addition, to a sequence or repetition, of a more mobile counterpoint which is often as brief as it is striking, as when the opening music returns at the centre of *Draw on sweet night*. The canzonet manner remains a major factor in the collection, but it is now used with far more resourcefulness so as to produce, in such pieces as the madrigal *Sweet hony sucking bees*, one of the most extended and impressive pieces in the volume. A strengthening of counterpoint is seen in other pieces, where a more complex texture is generated by shapely yet sinewy points deployed in broader paragraphs. This feature is found in *Fly not so swift* and *Love not me for comely grace*; the latter, a setting of a cynical poem on woman's perversity, starts with guileless homophony, but in increasingly strong counterpoint reflects something of the strength of feeling latent in the lyric. Wilbye's ability to penetrate beneath the surface of a text was unsurpassed among the English madrigalists, and his control of an evolving or changing emotional state is splendidly exemplified in *All pleasure is of this condition*, which proceeds from joy to grief, and *Stay Coridon thou swaine*, which unfolds an experience of mounting excitement.

CANTVS.

THE SECOND SET OF MADRIGALES TO 3. 4. 5. and 6. parts, apt both for Voyals and Voyces.

Newly Composed BY IOHN WILBYE.

1609

LONDON: Printed by Tho. Este alias Snodham, for Iohn Browne, and are to be sould at his shop in S. Dunstons Churchyard in Fleetstreet.

2. *Title-page of Wilbye's 'Second Set of Madrigales' (London: John Browne, 1609)*

Wilbye's expressive insight is matched by his textural and tonal subtlety. In sharp contrast to Weelkes, who habitually used full textures, Wilbye favoured finer and far more varied sonorities. Nor did Wilbye have Weelkes's interest in the more emotional or bizarre types of chromaticism which direct the music along an eccentric course. Wilbye's only passage of extended chromaticism (in *Oft have I vowde*) is simply a rich colouring of a G minor context. What Wilbye did recognize was the expressive potency of major–minor alternations. Sometimes he simply inflected a passage with one or two chromatic notes from the other mode, but at other times he reinforced the expressive power of a whole section by transferring it bodily into the other mode, as at the end of *Oft have I vowde* and *Yet sweet take heed*. Wilbye's most subtle use of this major–minor ambivalence occurs in *Draw on sweet night*, a work remarkable for its intense yet poised melancholy. This piece is also notable for its structural features; after the first two substantial sections have been unfolded (the first in the tonic major and the second in the minor) the opening words and music return to be developed further. After a fresh sequential passage the music gradually returns to the second (minor) section; thus the piece is both firmly integrated in structure, and gains in expressive focus. *Draw on sweet night* is not only Wilbye's finest single achievement, but perhaps also the greatest of all English madrigals. He used some material from this piece to open *O God, the rocke of my whole strength*, one of his two contributions to Leighton's 1614 collection.

Only one of Wilbye's manuscript works (*Homo natus de muliere*) in any way matches the best of his madrigals. His sole keyboard piece, composed by August 1612, is a simple arrangement of Dowland's 'Frogge' galliard, a piece which may have had some special appeal for Wilbye, for the end of *Lady, your words doe spight mee* from his first madrigal collection seems to be a quotation from the opening of the same piece. Wilbye's one complete string fantasia is a sterile contrapuntal exercise.

WORKS

MADRIGALS

The First Set of English Madrigals, 3–6vv (London, 1598/*R*; ed. in EM, vi (1914, 2/1966) [1598]

The Second Set of Madrigales, 3–6vv (London, 1609/*R*); ed. in EM, vii (1914, 2/1966) [1609]

1 Madrigal in 1601^{16}; ed. in EM, vi (1914, 2/1966), xxxii (1923, 2/1962)

Adew, sweet Amarillis, 4vv, 1598

Ah, cannot sighes, nor teares, 6vv, 1609

Ah, cruell Amarillis, 3vv, 1609

Alas, what a wretched life is this, 5vv, 1598
Alas, what hope of speeding, 4vv, 1598
All pleasure is of this condition, 5vv, 1609
As fayre as morne, 3vv, 1609
A silly silvan, 5vv, 1609
As matchlesse beauty thee a Phoenix proves, 4vv, 1609
Away, thou shalt not love me, 3vv, 1598
Ay mee, can every rumour, 3vv, 1598
Change me O heavens, 4vv, 1609
Come shepheard swaynes, 3vv, 1609
Cruell, behold my heavie ending, 6vv, 1598
Deere pitie, how? ah how?, 3vv, 1598
Downe in a valley (2p. Hard destinies are love and beauty), 5vv, 1609
Draw on sweet night, 6vv, 1609
Dye hapless man, 5vv, 1598
Flora gave mee fairest flowers, 5vv, 1598
Flourish yee hillockes, 3vv, 1609
Fly Love aloft to heaven, 3vv, 1598
Fly not so swift, 4vv, 1609
Happy, O happy he, 4vv, 1609
Happy streames whose trembling fall, 4vv, 1609
I alwaies beg (2p. Thus love commaunds), 5vv, 1598
I fall, I fall, O stay mee (2p. And though my love abounding), 5vv, 1598
I live, and yet me thinks I do not breath, 3vv, 1609
I love alas, yet am not loved, 4vv, 1609
I soung sometimes my thoughts and fancies pleasure, 5vv, 1598
Lady, when I beehold, 4vv, 1598
Lady, when I beehold, 6vv, 1598
Lady, your words doe spight mee, 5vv, 1598
Long have I made these hils and valleys weary, 6vv, 1609
Love not me for comely grace, 4vv, 1609
Of joys and pleasing paines I late went singing (2p. My throte is sore, my voice is horse with skriking), 6vv, 1598
Oft have I vowde, 5vv, 1609
O what shall I doe, 3vv, 1609
O wretched man, 6vv, 1609
Softly, O softly drop mine eyes, 6vv, 1609
So light is love, 3vv, 1609
Stay Coridon thou swaine, 6vv, 1609
Sweet hony sucking bees (2p. Yet sweet take heed), 5vv, 1609
Sweet love, if thou wilt gaine a monarches glory, 6vv, 1598
The lady Oriana, 6vv, 1601[16]
There is a jewell, 3vv, 1609
There where I saw her lovely beauty painted 5vv, 1609; *risposta* to I live and yet me thinks I do not breath
Thou art but young thou sayst, 6vv, 1598
Thus saith my Cloris bright, 4vv, 1598
Unkind, O stay thy flying, 5vv, 1598
Weepe O mine eies, 3vv, 1598
Weepe, weepe mine eyes, 5vv, 1609
What needeth all this travaile (2p. O fooles, can you not see), 4vv, 1598
When Cloris heard of her Amintas dying, 4vv, 1609
When shall my wretched life give place to death?, 6vv, 1598
Where most my thoughts (2p. Dispightfull thus unto my selfe), 6vv, 1609
Why dost thou shoot, 6vv, 1598
Yee restlesse thoughts, 3vv, 1598
Yee that doe live in pleasures, 5vv, 1609

SACRED

I am quite tired, anthem, 4vv, 1614[7]; ed. in EECM, xi (1970), 79; EM, vi (1914, 2/1966)
O God, the rocke of my whole strength, anthem, 5vv, 1614[7]; ed. in EECM, xi (1970), 171; EM, vi (1914, 2/1966)
O who shall ease me, anthem, 6vv, inc., *GB-Ob* Mus.f.20, 22–4
Homo natus de muliere, 6vv, *Ob*; ed. in The Old English Edition, xxi (London, 1898); ed. D. Brown (London, 1976)
Ne reminiscaris, 1v, 4 viols, *Lbl*; ed. in MB, xxii (1967), 73
3 madrigals, 3vv, from the Second Set of Madrigales (1609) have sacred texts in *Och* 1074–7: At mercyes throne (= As fayre as morne); Flowe, oh my teares (= Flourish yee hillockes); How fading are the pleasures (= Ah, cruell Amarillis)

DAVID BROWN

Wilcke, Jodocus. *See* WILLICH, JODOCUS.

Wild, Earl (*b* Pittsburgh, 26 Nov 1915). American pianist and composer. A prodigy, he studied with Selmar Janson (a pupil of Scharwenka and d'Albert), Paul Dogureau (a pupil of Ravel) and Egon Petri (a pupil of Busoni). Thanks to his brilliant technique and phenomenal sight-reading ability, he became the pianist of the Pittsburgh SO under Klemperer and others. From 1937 to 1944 he was the pianist of the NBC SO under Toscanini, with whom he played Gershwin's *Rhapsody in Blue* in 1942, and from 1945 to 1968 he was staff pianist for the ABC Network. During those years he gave recitals throughout the USA and also appeared with orchestras. He gave the première of Paul Creston's Piano Concerto (1949), Martinů's Cello Sonata no.2 (1950, with George Ricci) and Marvin David Levy's Piano Concerto (1970, Chicago SO under Solti). Wild has taught at many American conservatories, including the Manhattan School and Juilliard, and has given masterclasses throughout the world. He began to make recordings in 1934, and his extensive discography encompasses over 30 piano concertos, several chamber works and more than 600 solo pieces. He has made virtuoso transcriptions of music by Gershwin, Tchaikovsky, Rachmaninoff and others. His original compositions include the Easter oratorio *Revelations*, commissioned by the ABC, another commissioned choral work *The Turquoise Voice*, and the Doo-Dah Variations for piano and orchestra, based on a Stephen Foster song.

As a pianist Wild combines the best aspects of the late-Romantic piano tradition within a more modern, relatively sober metrical framework. His playing, backed by a perfect virtuoso technique and tonal control, is seldom metrically eccentric; he understands rubato without abusing it; his lines are strong and clear. A specialist in 19th-century repertory, he is particularly noted for his

Liszt playing, and in 1986 was awarded the Liszt Medal of Hungary. His Chopin and Rachmaninoff performances are greatly praised. He has also played and recorded the music of such lesser Romantics as Herz, Medtner, Paderewski, Scharwenka, d'Albert, Moszkowski and Balakirev. In his later years he was recognized, along with Shura Cherkassky, as the last great exponent of the Romantic tradition.

HAROLD C. SCHONBERG

Wild, Jodocus. *See* WILLICH, JODOCUS.

Wildberger, Jacques (*b* Basle, 3 Jan 1922). Swiss composer. He studied at the Basle Konservatorium with Eduard Ehrsam (piano, teaching diploma 1944) and Gustav Güldenstein (music theory). From 1946 he worked as a répétiteur at the Basle Stadttheater and wrote articles for the theatre's journal. He joined the communist Partei der Arbeit (PdA) in 1944, firmly placing himself against the prevailing Swiss Zeitgeist; in 1947 as the crimes of Stalin became known, he left the PdA and depoliticized himself. Hitherto self-taught as a composer, he became acquainted with the music of Wladimir Vogel and decided to study with him in the Ticino. Vogel instructed him in Schoenberg's 12-note technique (1948–52) and influenced him to achieve a meaningful relationship between language and music. Wildberger's 12-note Quartet for flute, clarinet, violin and cello (1952), written as an apprentice piece, received its first performance at the 1952 Darmstadt summer courses. In 1953 his *Tre mutazioni* for chamber orchestra, which like the Quartet shows the influence of Webern as well as Schoenberg, received its première in Donaueschingen. Despite his growing international reputation, Wildberger was ostracized and ignored in his home country, where he was regarded as a communist and a '12-note composer'. It was not until 1959 that he gained regular employment as a lecturer at the Badische Hochschule für Musik in Karlsruhe. In 1966 he was appointed head of harmony and counterpoint at the Conservatory of the Musik-Akademie der Stadt Basel, a position he held until his retirement in 1987. As the Cold War mentality waned, he gradually received modest recognition in Switzerland. His honours include the Fondation BAT (1975), the composition prize of the Swiss Composer's Union (1981) and the arts prize of Riehen (1987).

In addition to Vogel, Schoenberg and Webern, Wildberger was influenced by Boulez, who conducted the première of his orchestral work *Intensio – Centrum – Remissio* in Aix-en-Provence in 1958. After this encounter, Wildberger expanded the domains in which he employed serial structuring: in his Music for strings (1960), for example, durations are structured serially; and in the third movement of the cantata *In my end is my beginning* (1964) articulation and duration are linked. He also refined his tone colours through the use of elaborate instrumentation.

In 1967, as the beneficiary of a scholarship from the Deutscher Akademischer Austauschdienst, Wildberger lived in Berlin and was repoliticized by the student movement, becoming one of the generation of 1968. *La notte* (1967), the key work from this period, was followed by a two-year break in composition. This time of creativity and reflection, the subject of his essay 'Über die Schwierigkeit, heute noch zu komponieren' (1968, in Wildberger, 1996), divides his oeuvre into two phases: if formulations of inner musical and aesthetic questions predominated up until Berlin, there now occurred in his works, the majority of which make use of text, a thematization of the relationship between art and society, as well as a critical examination of the expressive and communicative limits of music, indeed of art in general. From this time on he aimed in his compositions 'to define his position as an artist in the human community and his responsibility towards it', and to raise 'an objection to all socio-political violence and injustice'.

After 1967 Wildberger occasionally wrote 'musica pura', in which a concentration on musical material predominates, or in which the performer 'is allowed to fan his virtuosic tail' (*Diario* for clarinet, 1971–5, *Prismes* for alto saxophone, 1975, Concerto for Orchestra, 1991–2). Other instrumental works, however, come closer to political engagement through the cross-referencing of musical quotations or other semantic procedures (*Diaphanie* for viola, 1986; *Los pajarillos no cantan* for guitar, 1987, *Commiato* for string quartet, 1997). As a musical thinker he has contributed to many radio programmes (mostly for German institutions) and written essays, a collection of which was published in 1996.

ANTON HAEFELI

Wildbrunn [Wehrenpfennig], **Helene** (*b* Vienna, 8 April 1882; *d* Vienna, 10 April 1972). Austrian soprano. She studied with Papier-Paumgartner in Vienna, where she sang small roles at the Volksoper in 1906. Engaged at Dortmund (1907–14) as a contralto, she sang Ortrud, Fricka, Amneris and Delilah, but at Stuttgart (1914–18) she moved into the soprano repertory, including Leonore, Amelia, Kundry, Isolde and the Marschallin. She was engaged at the Berlin Staatsoper (1918–25), the Vienna Staatsoper (1919–32) and the Berlin Städtische Oper (1926–9), where her Electra was acclaimed by Strauss. She also sang Kundry at La Scala (1922); Brünnhilde, Isolde, Kundry and the Marschallin at Buenos Aires (1922–3); Donna Anna at Salzburg (1925); Leonore at Covent Garden (1927) and Isolde and Brünnhilde (*Die Walküre*) at the Paris Opéra (1928). Recordings of extracts from her major roles show the strength and security of her voice and her dramatic flair.

LEO RIEMENS/ALAN BLYTH

Wilde, Oscar (Fingal O'Flahertie Wills) (*b* Dublin, 16 Oct 1854; *d* Paris, 30 Nov 1900). Irish writer. His plays, most notably *Lady Windermere's Fan* (1892) and *The Importance of Being Earnest* (1895), brought to the Victorian stage a wit that was both scintillating and subversive. Wilde cultivated the image of an aesthete and flouted convention at every turn. He was lampooned (in the decadent character of Bunthorne) by Gilbert and Sullivan in *Patience* (1881), and a musical 'Travestie Suggested by *Lady Windermere's Fan*' was produced at the Comedy Theatre in 1892. Following Wilde's imprisonment in 1895 for homosexual acts, the composer Dalhousie Young published a pamphlet entitled *Apologia pro Oscar Wilde*; after his release Wilde planned a libretto for Young's opera *Daphnis and Chloë*, but the scheme never materialized. Wilde died prematurely in exile, and it was German (largely operatic) interest in his work that was to revive his reputation, beginning with Max Reinhardt's Berlin production of *Salomé* in 1902, and Richard Strauss's operatic version of the same play. In the mid-20th century Wilde's plays became material for the musical stage, in such entertainments as Noël Coward's *After the Ball* (1954), Vivian Ellis's *So Romantic* (1950) and *Half in Earnest* (1957), and Anne Croswell's *Earnest in Love* (1960), with music by Lee Pokriss. Wilde himself had more sympathy with the visual arts than with music, but he tried to place the latter within his aesthetic scheme in the essay 'The Critic as Artist' (in his book *Intentions*) and in the preface to his novel *The Picture of Dorian Gray*. His prose style was widely praised for its 'limpid and lyrical effects' (Max Beerbohm) and its 'sonorous and majestic music' (H.L. Mencken).

ANTHONY PARR

Wilde Alexander, Der. *See* ALEXANDER, MEISTER.

Wilder, Alec [Alexander] **(Lafayette Chew)** (*b* Rochester, NY, 16 Feb 1907; *d* Gainesville, FL, 24 Dec 1980). American composer and arranger. After studying privately at the Eastman School he became active in the early 1930s as a songwriter and arranger in New York. Many of his songs were composed for and/or performed by such singers as Mildred Bailey, Cab Calloway, Bing Crosby, Ethel Waters, Mabel Mercer and, in the 1940s, Frank Sinatra. In 1939 Wilder attracted attention with a series of octets with whimsical titles, for example *Sea Fugue Mama*, *Neurotic Goldfish*, *Amorous Poltergeist* and *The Home Detective Registers*. Scored for winds and rhythm section (including harpsichord), these airy, elusive pieces blended popular melodies and swing rhythms with classically orientated forms.

In the early 1950s Wilder turned from the world of popular song to chamber and orchestral music and opera. His more than 300 compositions, written for almost every conceivable instrumental combination, are characterized by his unique melodic gift, a harmonic language alternating between French Impressionism and modal (often fugal) writing, and a preference for loosely linked suite forms. Although his works were much admired and performed by certain musicians, whether in jazz (Stan Getz, Gerry Mulligan, Marian McPartland and Roland Hanna) or classical music (John Barrows, Bernard Garfield, Harvey Phillips and Gary Karr), Wilder's style was largely rejected by both musical establishments.

An unclassifiable 'American original', Wilder drew on a wide variety of personal musical influences. In his best works he was able to forge a style uniquely his own, distinguished by those elements he most cherished in other composers: an absence of clutter, honest sentiment, unexpectedness, singing melodies and sinuous phrases. Wilder also wrote (in collaboration with James T. Maher) *American Popular Song: the Great Innovators, 1900–1950* (New York, 1972), a lovingly insightful study, and *Letters I Never Mailed* (Boston, 1975).

GUNTHER SCHULLER

Wilder, Philip van. *See* VAN WILDER, PHILIP.

Wilder, (Jérôme-Albert-)Victor (van) (*b* Wetteren, nr Ghent, 21 Aug 1835; *d* Paris, 8 Sept 1892). Belgian music critic, translator and writer. He studied philosophy and law at the University of Ghent and music at the Artevelde Conservatory. He began his career as a music critic with the *Journal de Gand*, but about 1861 moved to Paris, where he wrote in particular for *Presse théâtrale*, *L'évènement*, *L'opinion nationale*, *Parlement*, *Gil-Blas* and then for *Le ménestrel*, which he left in 1884, probably because he disagreed with its aesthetic viewpoint. In 1887 he joined the ranks of *Guide musical*, a refuge for Wagner admirers; he also worked for *Presse musicale*. A passionate Wagnerian, he acted as adviser to Lamoureux when the latter staged *Lohengrin* in Paris, and translated all of Wagner's operas from *Lohengrin* on. Cosima Wagner preferred Wilder's translations to those of Nuitter, which were previously in use, but Wilder's librettos were soon rejected by the fanatics of the *Revue Wagnérienne*, who demanded that Ernst's be used. According to Pougin (supplement to *Biographie universelle*), Wilder translated at least 500 German or Italian texts, including those of major works by Handel, Paisiello, Mozart, Weber, Schubert, Mendelssohn and Schumann. Among Wilder's own librettos are *La fête de Piedigrotta*, 1869, with Luigi Ricci, and (with André Delacour) *Prinz Methusalem*, 1877, set by the younger Johann Strauss. Wilder published (in *Le ménestrel*) a reduction of Mozart's long-lost ballet *Les petits riens*, for which he had discovered a score in the Opéra library, and collected and published *Chansons populaires flamandes des XVe, XVIe, et XVIIe siècles* (1890). He also wrote two biographies: *Mozart: l'homme et l'artiste* (Paris, 1880) and *Beethoven: sa vie et son oeuvre* (Paris, 1883).

ELISABETH BERNARD

Wilderer, Johann Hugo von (*b* Bavaria, 1670/71; *d* Mannheim, bur. 7 June 1724). German composer. He was an important figure at the courts of Düsseldorf, Heidelberg and Mannheim. In 1692 he was court organist at St Andreas in Düsseldorf. A document prepared by Giorgio Maria Rapparini as a Festschrift for the birthday of Elector Johann Wilhelm in 1709, entitled *Le portrait du vrai mérité dans la personne serenissime de Monseigneur L'Electeur Palatin*, includes biographical sketches of the five most important musicians in the court Kapelle (see Croll). Rapparini testified to Wilderer's Bavarian origins and his studies with the famous Italian musician 'Negrentius', i.e. Giovanni Legrenzi. However, no evidence has been found to suggest when Wilderer may have been in Venice. Wilderer was already vice-Kapellmeister at the Düsseldorf court in 1696, and in 1703 he was advanced to court Kapellmeister. He married Maria Lambertina Dahmen on 11 March 1698, and she bore him nine children.

Wilderer's operas were composed largely for the Düsseldorf court between 1695 and 1713. In 1716 the Elector Johann Wilhelm died and was succeeded by his brother Karl Philipp, who had maintained a court at Innsbruck. Subsequently he joined together the Innsbruck and Düsseldorf musical establishments, first in Heidelberg and in 1720 in Mannheim, where he undertook the building of a new palace. These combined groups, under the joint directorship of Wilderer and Jakob Greber from Innsbruck, later became the basis for the famous orchestra of the 'Mannheim School', supported generously by the Elector Carl Theodor. Wilderer remained active in the dual capacity of Kapellmeister and composer until his death. His final major work was the sacred opera *Esther*, performed as an oratorio at Heidelberg in 1723 and as an opera at Mannheim, 17 March 1724.

Wilderer's importance as a composer results in part from his fortuitous employment by the prince-electors of Düsseldorf-Mannheim. Musical activities at these courts influenced both the history of German opera in the late 17th century and the early stages of the musical developments leading to the Mannheim composers of the early Classical period. The Düsseldorf court assembled numerous talented musicians, and they in turn attracted many distinguished composers, such as Steffani, who produced three of his operas at Düsseldorf: *Arminio* (1707), *Tassilone* (1709) and *Amor vien dal destino/Il turno Enea* (1709). Handel visited the court in 1710, 1711 and 1719. Wilderer's extant operas show a predictable similarity to Venetian operas of the late 17th century. Recitatives and arias are usually joined together freely without the severe contrasts of dramatic function found in operas of the later 18th century. Elements of French music are also evident in these works, as in most German operas of the period, and ballets frequently appear, especially as the conclusion to the final act (their music, as well as the independent orchestral movements such as the overtures, were composed not by Wilderer but by the court musician Georg Andreas Kraft). The arias are predominantly with continuo accompaniment and display some form of *ABA'* design, with a written-out *A'* section. Many of the arias with instrumental accompaniment show colouristic uses of solo instruments, very much in the manner of Reinhard Keiser's Hamburg operas (see Steffen for a thorough discussion). Among Wilderer's small number of sacred pieces is a *Missa brevis* in G minor, extant in a remarkable copy in the hand of J.S. Bach (*D-Bsb* Mus.23116/10). Wolff noted important similarities between the Kyrie of Bach's Mass in B minor and Wilderer's score.

WORKS

OPERAS

first performed in Düsseldorf unless otherwise stated

Giocasta (3, S.B. Pallavicino), 1696, *A-Wn*

Il giorno di salute, ovvero Demetrio in Athene (3, ?Demanstein), 1697, *Wn*

Quinto Fabio Massimo (3, G.M. Rapparini), 1697, only lib extant

La monarchia risoluta (1), ?1697, *Wn*

L'Armeno (3, Rapparini), ?1698, *D-WD*, *E-Mn*

La forza del giusto (3, Rapparini), 1700, only lib extant

La monarchia stabilita (3), 1703, *A-Wn*

Faustolo (pastorale, 5, ?Pallavicino), 1706, only lib extant

Amalasunta (?Pallavicino), 1713, only lib extant

Coronide (pastorale, 3), Heidelberg, 1722, lost

Esther (poema sacro drammatico, 2), Heidelberg, 1723, revived Mannheim, 1724, only lib extant

ORATORIOS AND CANTATAS

D'incontre avventurato, orat, 1v, chorus, orch, *D-WD*; Eurilla, cant., S, bc, *Bsb*; Il trionfo di placido, orat, Mannheim, 1722, only lib extant; In occasione del felice passaggio, cant., 4vv, 1722, only lib extant; Pupillette sdegnosette, cant., 1v, 2 vn, va, *WD*; Vaghe labbra di Filli, cant., 1v, ob, insts, *A-Wn*

LITURGICAL

Modulationi sacre [10 motets], 2–4vv, vns (Amsterdam, *c*1700)

Ky, Gl, g, 4vv, str, bc, *D-Bsb*; Custodi me Domine, motet, *KA*; Laudate pueri Dominum, S, A, ob, bn, vns, va, bc, *WD*

GEORGE J. BUELOW

Wildgans, Friedrich (*b* Vienna, 5 June 1913; *d* Mödling, 7 Nov 1965). Austrian clarinettist, composer and writer on music. The son of well-known author and Vienna Burgtheater director, Anton Wildgans, his early violin and piano instruction was followed, at the age of 12, by theory and composition lessons with Joseph Marx. After further instrumental study, Wildgans taught the clarinet, chamber music and theory at the Salzburg Mozarteum (1934–6). From 1936 until his arrest by the Nazis in 1939, he played the clarinet in the Staatsoper orchestra and served as coach at the Burgtheater. After the war, he was appointed artistic director and head of the theory and performance departments of the Vienna Musikhochschule (1945–7), music advisor to the city of Vienna (1947–51) and president of the Austrian section of ISCM. In 1950 he accepted a post at the Vienna Music Academy, which he held until his death.

Wildgan's compositional approach was grounded in the styles of Hindemith and Stravinsky. He adopted the melodic subtlety, polyphonic technique and transparent textures associated with these composers, as well as exploring polytonal, atonal and serial structures. Among his compositions are expressive works of great difficulty and easier pieces for solo instruments and small ensembles. His writings include numerous articles in the *Österreichische Musikzeitschrift* and a book, *Anton Webern* (London, 1966/*R*). An important figure in post-war Austria, his international reputation grew out of his performances as a clarinettist, rather than out of his work as a composer.

WORKS

DRAMATIC

Der Baum der Erkenntnis (op, F.T. Csokor), 1932, unfinished; Der Diktator (operetta, G. Herrmann), 1933, lost; incid music for theatre, film and radio

GEROLD W. GRUBER

Wilensky, Moshe (*b* Warsaw, 17 April 1910; *d* Tel-Aviv, 2 Jan 1997). Israeli composer of Polish birth. Through the Zionist youth movement Ha-shomer ha-sa'ir he met Isaac Adel, who founded and conducted a youth choir that sang Hebrew songs. Adel had a huge influence upon Wilensky, directing him towards study in composition and conducting at the Warsaw State Conservatory. On the completion of his studies in 1932, Wilensky emigrated to Palestine. Working as a pianist in the Mandate (Broom) Theatre, he became acquainted with the Yemeni singer Esther Gamlilit. He wrote a few songs for her in a typical Yemeni style. He also composed music for the documentary film company Carmel. In 1944 he was appointed in-house composer of the Li-la-lo theatre company. There he met the singer Shoshana Damari, who subsequently became the distinguished performer of his songs. During the Independence War, Wilensky and Damari toured and entertained troops; after the war in 1949 they toured the USA. From the 1950s onwards, he composed hundreds of songs, some of them for army bands, and musicals such as *Shulamit* (1957), *Fishke* and *Sameaḥ ba-namal* ('Fun in the Harbour').

Wilensky's were the first Israeli songs to win international recognition in popular music competitions. Both *Stav* ('Autumn') and *Laylah ve-ashan* ('Night and Smoke') took second prize in the International Pop Festival in Poland (1962, 1963). Published and recorded by the hundreds, his songs also appeared in the following collections: *Tamid kalaniyot tifraḥna* ('The Poppies will always Blossom', 1978); *Al ha-kvish yareaḥ* ('A Moon on the Road', 1982) and *Moshe Wilensky zer kalaniyot* ('Wilensky's Poppy Garland', 1990). A founder of ACUM (the Israeli society of composers and authors) in 1936, Wilensky served as the director of light music for the Kol Yisrael radio station for many years (from 1961). He received the Israel Award in 1983.

NATAN SHAHAR

Wiley, Roland John (*b* Indio, CA, 27 Jan 1942). American musicologist and dance historian. He studied choral literature with Harold Schmidt at Stanford University (1959–63), and undertook postgraduate courses in musicology with John M. Ward at Harvard University (1967–74). He has taught at the University of Michigan

since 1974 and is currently professor of music there. He became associated with the Royal Opera House, London, in 1983, and has served as production consultant for the Royal Ballet's revivals of *Swan Lake* and *The Nutcracker*. Wiley's principal academic interests are 19th-century Russian music and ballet. He has written extensively on Tchaikovsky, discussing both the music and choreography of the ballets and the ballet music of *Yevgeny Onegin*. His writings range in topic from ballet in 18th-century London to discussions of Stravinsky's ballet music. He is also the author of essays on dance notation and of articles on the Romantic ballerinas Fanny Elsler and Marie Taglioni.

PAULA MORGAN

Wilfflingseder [Wilflingseder], **Ambrosius** (*b* Braunau; *d* Nuremberg, 31 Dec 1563). German theorist and poet. In 1550 he was appointed schoolmaster and Kantor at St Sebaldus, Nuremberg, where Sebald Heyden was Rektor; he became deacon there in 1562. Carbach wrongly gave the date of his death as 1574. Wilfflingseder's school music treatise, *Musica teutsch, der Jugendt zu gut gestelt* (Nuremberg, 1561), was the first of several such treatises in German, but it presented the subject matter more fully than the textbooks based on Heinrich Faber's *Compendiolum* (1548). In addition to the basic chapters on keys and solmization he discussed the eight ecclesiastical modes, intervals and, in most detail, mensural theory. In his second treatise, *Erotemata musices practicae* (Nuremberg, 1563), he extended this chapter and illustrated it with numerous music examples to form a 242-page 'Liber secundus De musica mensurali'. While younger writers concentrated on contemporary composers such as Clemens non Papa and Lassus, Wilfflingseder quoted from older composers, including Ockeghem, Finck, Isaac, Josquin, Obrecht and Senfl, to whose works an explanation of mensural theory was relevant (hence Schilling's mistaken description of the *Erotemata* as a 'collection of classical compositions'). Most of the examples are taken from Heyden's *Musica* (1537), and some from Gaffurius's *Practica musice* (1496). The first part of the *Erotemata* also develops material dealt with in *Musica teutsch*. The forewords of the two textbooks differ fundamentally; the Latin foreword to the *Erotemata* praises the powers and virtues of music, quoting from the Bible and classical authors, whereas the foreword to *Musica teutsch* is addressed to less educated readers. Wilfflingseder's only other known work is the text of *Der LXIII Psalm des Konigklichen Propheten Davids, zu beten oder zu singen* (Nuremberg, n.d.), a 12-verse metrical psalm to be sung to either the melody *Es spricht der Unweisen Mund wohl* or *Aus tiefer Not*.

MARTIN RUHNKE

Wilhelm, Carl (*b* Schmalkalden, 5 Sept 1815; *d* Schmalkalden, 26 Aug 1873). German composer and conductor. He learnt the violin and the piano from his father at an early age and decided on a musical career when he was quite young. He took harmony, thoroughbass and organ lessons from the organist Burbach and in 1832 went to Kassel to study the violin and the piano with Anton Bott and theory with Baldewein; he completed his music education in Frankfurt, studying the piano with Aloys Schmitt and theory with Johann André. After public performances as a pianist, he went to Krefeld in 1840, where he took over the conductorship of the Liedertafel from 1841 and the Singverein from 1849. He also founded and directed song festivals in the Lower Rhine area. In 1865 he returned home to Schmalkalden after increasing ill-health and bad nerves, partly the consequences of alcoholism.

Wilhelm is remembered for his male-voice setting of Max Schneckenburger's poem *Die Wacht am Rhein*. His friend Wilhelm Greef had given him the text, which he set on 10 March 1854 and his setting appeared in Greef's *Liedersammlung* in May. Its popularity increased through performance at the song festivals and it was sung by 20,000 voices at a Dresden song festival in July 1865. In 1871 Bismarck wrote him a letter of recognition and awarded him an annual pension for his setting, which had become one of the most popular patriotic songs, almost reaching the status of a national anthem, during the Franco-Prussian War.

GAYNOR G. JONES

Wilhelm, Karl (*b* Lichtental, Romania, 5 July 1936). Canadian organ builder of German ancestry. He was apprenticed to Laukhuff between 1952 and 1956, and later worked for Metzler & Söhne in Zürich. In 1960 he emigrated to Canada to head the department of mechanical-action organs at Casavant Frères. He set up his own business in 1966 at St Hyacinthe, Quebec, delivering his first instrument to Christ Memorial Lutheran Church, Montreal (1966). His opus 5 (two manuals, 19 stops),

built the following year for St Bonaventure, Montreal, stands out as an exceptional example of his early work. His first three-manual organ was built in 1972 for Trinity Church, Southport, Connecticut; this was immediately followed by the magnificent instrument for St Matthias Anglican Church, Westmount, Montreal. The latter organ is arguably one of his best three-manual instruments. In 1974 he moved to Mont-St-Hilaire, Quebec. By 1997 he had completed nearly 150 organs, including 12 three-manual instruments. His organs are found throughout Canada and the USA, and as far east as Korea.

Wilhelm builds exclusively mechanical-action instruments in a range of styles (French, German, Italian, or a mixture). His organs remain faithful to the principle of the 17th- and 18th-century *Werkprinzip*, incorporating tracker action, suspended action and flexible winding systems, as well as the use of unequal temperaments. The tonal layout and voicing of his instruments are patterned after the best classical organ-building traditions. His individual stops are noted for their purity of sound, his well-balanced ensembles for their fullness of tone. His small instruments are regarded as highly as his larger organs with several manuals.

KARL J. RAUDSEPP

Wilhelmiana Musikverlag. German branch of HANSEN, Danish firm of music publishers.

Wilhelmi de Grudencz, Petrus (*b* Grudziądz, *c*1400; *d* ?Silesia, *c*1480). Poet and composer, probably of German descent. From 1418 he studied at the University of Kraków, taking the BA in 1425 and the MA in 1430. In the 1430s and early 40s he was probably active in Vienna: his *Presulem ephebeatum* survives in the St Emmeram codex (*D-Mbs* Clm 14274). He was associated with the Council of Basle, writing the poem *Pontifices ecclesiarum* in its support, and with King Friedrich II, from whom he received *littera familiaritatis* in 1442. He probably lived and worked in Czech lands at some time in the 1440s or 50s, since four-fifths of the surviving manuscripts of his works are found there. He may have spent the last years of his life, from the mid-1460s, in Silesia, possibly in Grünberg, Glogau or Sagan, and he may have compiled the so-called 'Glogauer Liederbuch' (this is suggested by the satirical text of his motet *Probitate/Plobitando*).

Wilhelmi's works (ed. Černý, Kraków, 1993) include a Kyrie setting with tropes 'Fons bonitatis' and 'Sacerdos summe', seven motets and 15 songs. Stylistically similar to Du Fay's early works, the Kyrie is found in four sources: *I-TRmp* 90, *TRcap* (twice), and *D-Mbs* 14274 (with ascription). The texts of the other works contain all or part of the acrostic PETRUS WILHELMI DE GRUDENCZ, for example *Presidiorum Erogatrix Tutrix Rei Virens Satrix*. The majority of the musical settings make use of the forms and styles of late medieval polyphony as practised in central and eastern Europe about 1400, modernized in line with some elements of early Renaissance music, especially harmony. The works were originally meant for amateur performances at schools, monasteries and other institutions, and were widely distributed across central Europe.

JAROMÍR ČERNÝ

Wilhelmj, August (**Emil Daniel Ferdinand Viktor**) (*b* Usingen, 21 Sept 1845; *d* London, 22 Jan 1908). German violinist. He studied the violin with Konrad Fischer at Wiesbaden and played at a charity concert on 8 January 1854; later, at the Wiesbaden court theatre, he is said to have astounded his audience. Prince Emil von Wittgenstein sent him to Liszt, who in turn sent him to David at Leipzig in 1861 with the words 'Let me present to you the future Paganini!'. At the Leipzig Conservatory he studied harmony and composition with Hauptmann and Richter, and in 1864 he went to Frankfurt for further study with Raff.

In 1865 Wilhelmj began a series of concert tours that took him to Switzerland, Holland and London (1866), France and Italy (1867), St Petersburg (1868), Berlin (22 October 1872) and Vienna (22 March 1873). In 1876 he was Konzertmeister at the Bayreuth Festival, and the following year he brought Wagner to London to conduct at the Albert Hall; Wilhelmj led the violins and organized two extra concerts on 28 and 29 May. From 1878 to 1882 he toured successfully in North and South America, Australia and Asia.

On his return Wilhelmj founded a violin school in conjunction with Rudolf Niemann in Wiesbaden, but it was not successful. In 1885, at the invitation of the Sultan of Turkey, he had the unusual experience of playing before the ladies of the harem. In 1894 he was appointed principal violin professor at the Guildhall School of Music, London.

Wilhelmj was one of the greatest violinists of his day; his qualities may be summed up in the force of his personality, the great certainty of his technique, his rich tone, cultivated interpretation and splendid poise. He stood for dignity and breadth, and he aimed at an exact balance of intellect and imagination, conveying a suggestion of reserve force that was essentially majestic. However, he was also responsible for the ill-judged arrangement of the Air from Bach's orchestral Suite in D major, which became known as the 'Air on the G String'.

In his later years Wilhelmj took an active interest in the technique of violin making and was a fervent patron and champion of more than one continental maker. He composed several violin pieces and also wrote a *Modern School for the Violin* with James Brown.

E. HERON-ALLEN/LYNDA MACGREGOR

Wilhelm of Hirsau [Wilhelmus Hirsaugiensis] (*b* Bavaria; *d* Hirsau, 4 July 1091). Benedictine writer on music and astronomy. Wilhelm was educated in the monastery of St Emmeram, Regensburg, where his works are commonly believed to have been written. He was made abbot of the monastery of Hirsau in the Black Forest in 1069, actually assuming office two years later. Although not known as a composer, he was said by one early biographer to have corrected many errors in songs, presumably plainchant; he was thus a participant in the widespread attempts of that epoch to bring traditional chant into line with new modal theories. His major work on music is presented as a dialogue with his learned teacher, Otloh of St Emmeram, although the special advantages of that method of exposition are not exploited. Possibly the work was originally conceived in another form, then mechanically transformed into a dialogue. Two of the four manuscripts of the complete text present it as one book; the other two have it as two, but divided at different points. The texts, however, appear to be substantially the same.

The work deals for the most part with the fashionable topics of Germanic music theory of the time: species of intervals, tetrachords, the relation of both to octave scales and the technical description of the eight church modes in terms of those concepts (*see* MODE, §II, 3(ii)(b)). Wilhelm described his treatise as a kind of introduction (*isagoge*) leading towards the unknown and having, as a particular advantage, a mixture of ancient ideas (e.g. those of Boethius) and modern (e.g. those of Hermannus Contractus). At any rate, the work is not for beginners, a point reflected both in its rather unclear organization and in its belletristic style. One of Wilhelm's chief concerns is an elaborate and somewhat obscure diagram of the modes coordinated with a divided monochord, designated 'Theorema troporum' or 'Cribrum monochordi' by him, and 'Quadripartita figura' by other authors. Wilhelm is thought by some present-day scholars to have concerned himself with organ pipe mensuration on the basis of citations contained in the text of Aribo (*GerbertS*, ii, 223*a*) and Eberhard von Freising (*GerbertS*, ii, 281*a*), but the question is still undecided.

It is sometimes stated that a second substantial work of Wilhelm's entitled *De musica et tonis* was found in a manuscript owned by the German antiquarian Theophil von Murr in the 18th century but now lost. It appears, however, that the manuscript survives (as *D-Mbs* Clm 14965*b*) and that the work itself is a ghost. Critical assessment of Wilhelm's work varies widely. Where some claim for him a great influence on the development of medieval music theory, others see him as somewhat isolated and of purely local significance. The influence of his work is difficult to detect, with the one exception of a very close relationship to the, on many accounts superior, work of his pupil Theogerus of Metz (*GerbertS*, ii, 182–96).

LAWRENCE GUSHEE

Wilhem, Guillaume Louis Bocquillon (*b* Paris, 18 Dec 1781; *d* Paris, 26 April 1842). French teacher. He was the originator of a system of teaching sight-singing to classes of adults and children which in 1840 was adapted by John Hullah for English use. He was the son of an army officer and after a short period as an army cadet was admitted to the Paris Conservatoire in 1801. He then became teacher of music successively at the Military Academy of Saint-Cyr and the Lycée Napoléon. When the monitorial system of teaching was introduced in Paris in 1815, Wilhem devised a musical manual laid out in the form of question and answer to enable monitors to undertake the elementary instruction of a class of children. After four years' experimental use his system was formally adopted in 1820 in the monitorial schools controlled by the Society for Elementary Instruction in Paris. In 1835 its use was extended to the city's municipal schools.

In 1833, for the benefit of his former pupils, Wilhem established a choral society which eventually grew into a national institution known as L'Orphéon; and it was in order to provide tenors and basses to join these young singers that in 1835 he organized his first singing classes for adults. By 1836 Wilhem ran ten weekly classes at Guizot's Association Polytéchnique, each one attended by hundreds of artisans. Wilhem's system, published as *Manuel musical* (Paris, 1836) in many revised editions, contained few original teaching devices. It employed 'fixed' sol-fa, presented a series of exercises successively based on the various diatonic intervals, and included original songs which followed the same principle. As the system owed most of its success to Wilhem's own energy and established position it did not long survive his death, except in England and in Hullah's adaptation (London, 1842/*R*).

Wilkes, Josué T(eófilo) (*b* Buenos Aires, 8 Jan 1883; *d* 10 Jan 1968). Argentine musicologist and composer. He entered the National Conservatory in Buenos Aires (1905), where he studied harmony and composition with Williams, the cello with Marchal and singing with Rinaldi. In 1908 he left for Europe and in 1910 was a student at the Schola Cantorum in Paris; he also worked with Lyapunov in St Petersburg during this period. Returning to Argentina in 1914, he spent many years teaching at primary schools. Later he taught music in the adult school at Quilmes, near Buenos Aires (1946), and music history at the Universidad del Litoral, Santa Fé (1948–56). He devoted himself principally to the study of colonial and indigenous music.

JOHN M. SCHECHTER

Wilkinson [first name unknown] (*fl* ?1575–?1612). English composer and possibly singer. He may be identifiable with the Thomas Wilkinson who was a lay clerk at Norwich Cathedral between 1575 and 1580 (the cathedral account for 1581–2 contains a payment to him for composing church music) and at King's College, Cambridge, between 1580 and 1595, where in 1587–8 he was senior lay clerk and for a time he seems to have had some responsibility for teaching the choristers. With the appointment of Edward Gibbons in 1592–3 as *Informator choristarum* Wilkinson was demoted to second place. The two rather dull full anthems *O Jerusalem* and *Why art thou so full of heaviness?* (*GB-Y*) may be by this composer and date from this period.

A man known only as 'Wilkinson' replaced John Hilton as organist and master of the choristers at Trinity College, Cambridge, sometime between March and September 1609; he was still there in May 1612. This man, who in 1610 and 1612 received payments from the Senior Bursar for viol strings and repairs, may be either the ex-King's College lay clerk, or a different, younger man. One Wilkinson played the part of lutenist in a Trinity College play in 1602–3 and was an undergraduate chorister there in 1605–6, taking the BA in 1606.

Whether or not the Trinity Wilkinson is one and the same composer as Thomas Wilkinson of Norwich and King's, the former is almost certainly the composer of the large quantity of music with viols, as there is no evidence that King's College maintained a viol consort at this period. There are three fragmentary five-part pavans ascribed to 'Mr Wilkinson' in a Cambridgeshire source that also contains music by John Amner and 'Mason' as well as an anonymous *Trinitye Colledg pavan* (*Lbl* Add.30826–8). Music by Thomas Wilkinson also appears with that of another Trinity College musician, Robert Ramsey (in *Lbl* Add.29366–8), adding further weight to the argument that he is the Trinity College Wilkinson.

Wilkinson's many verse anthems with accompaniment for viols, probably for use at Trinity College, are unusual in conforming largely to a strict alternation of verse and chorus sections, generally three of each. Their style is essentially polyphonic with restrained touches of harmonic colour. The texts are composite, assembled mostly from the Psalter, and the majority are penitential.

PETER LE HURAY/IAN PAYNE

Wilkinson, C(olm) T(homas) (*b* Dublin, 5 June 1944). Irish tenor. From a musical family, he toured the USA in a folk-rock band at the age of 16, and in 1978 represented Ireland in the Eurovision song contest with his own *Born to Sing*. After taking the role of Judas in Rice and Lloyd Webber's *Jesus Christ Superstar* in London (1972) he recorded the role of Che Guevara on that team's concept album recording of the rock musical *Evita* (1976). In this role he was able to exploit his exceptionally wide vocal range and high tessitura coupled to strong diction and and a wide range of tonal colorations to suit styles from soft melodic to heavy rock. In 1985 he created the leading role of Jean Valjean in the Royal Shakespeare Company's production of Bloubil and Schonberg's *Les misérables*. Through his hauntingly emotional rendition of 'Bring him home', drawing upon floated high notes coloured with intense vibrato, he influenced the sound of subsequent leading male singers in the West End.

□

Wilkinson [Wylkynson], **Robert** (*b* *c*1475–80; *d* 1515 or later). English composer. He was appointed parish clerk at Eton College in 1496, and may possibly have been a scholar there (one of probably two Wylkynsons who were Eton scholars in the early 1490s); he was a singing clerk in 1499 and *informator choristarum* *c*1500–15, serving as Constable of Eton in 1502 and witnessing the will of the College's Purser, William Tawnton, in 1506. He may have died *c*1515; alternatively, he may have left the College to seek ordination. A Dominus Robert Wilkinson (*d* 1538) was instituted rector of Haddenham in June 1519 by the Prior and Chapter of Rochester. Nine pieces by Wilkinson were included in the Eton Choirbook (*GB-WRec* 178; ed. in MB, x–xii, 1956–61), of which one is incomplete, three survive only as fragments and two are lost. Seven of these appear in the main layer of the manuscript; two were added later, possibly by Wilkinson himself.

Wilkinson's five-voice *Salve regina* and incomplete four-voice *Gaude virgo* may be among his earlier surviving works. His massive nine-voice *Salve regina*, based on the plainsong cantus firmus *Assumpta est Maria in celum*, is an important example of the large-scale sonorous style cultivated by English composers during the early 16th century. Also in this tradition is the 13-voice canon *Jesu autem transiens/Credo in Deum*, a setting of the Apostles' Creed prefaced by a fragment of plainsong. Both works incorporate verbal canons: these may offer some insight into the composer's learning or perhaps reveal a predilection for intricate devices and puzzles, as may the elaborate depiction of the nine orders of angels in the initial letters of the nine-voice *Salve* in the Eton manuscript. Wilkinson's *Credo* was copied, *c*1580–1606, by John Baldwin into his commonplace book (*GB-Lbl* R.M.24.d.2) as a curiosity. In *O virgo prudentissima* Wilkinson set a poem written by Angelo Poliziano in 1493, taken perhaps from the latter's *Opera omnia* (Venice, 1498). His *Salve decus castitatis* was included in a choirbook recorded in an

inventory of books at King's College, Cambridge, in 1529.

ANDREW WATHEY

Wiłkomirska, Wanda (*b* Warsaw, 11 Jan 1929). Polish violinist. The daughter of the violinist and conductor Alfred Wiłkomirski and his second wife, she read music from the age of three and became a violin pupil of Irena Dubiska at Łódź Academy until 1947. Her début was at Kraków in 1945, and after winning competition prizes at Geneva (1947) and Budapest (1949), she studied for three years with Ede Zathurecki at the Liszt Academy, Budapest. Further prizes were won at Leipzig in 1950 and in the 1952 Wieniawski Competition at Poznań. She first played in London (Wigmore Hall) in 1950 and in Moscow in 1951, and her subsequent tours through 35 countries included her American début at Carnegie Hall, New York, in 1960. She is widely acclaimed as a violinist of rare sensitivity as well as virtuosity, as much in expressive character as in musical understanding. Her playing of Britten's Concerto, on a London visit in 1967, brought about a new appraisal of this long-neglected work; she also gave first performances of Baird's *Espressioni varianti* (1958), Penderecki's *Capriccio* (1967, which she has recorded) and Hans Vogt's Sonata (1986). She plays a violin by Nicola Gagliano (i) (Naples, 1747).

NOËL GOODWIN

Willaert [Vuigliart etc.], **Adrian** [Adriano] (*b* Bruges or Roulaers, *c*1490; *d* Venice, 7 Dec 1562). South Netherlandish composer, active mainly in Italy. He was one of the most important and influential composers and teachers of his time.

1. EARLY CAREER AND FERRARESE SERVICE. A contemporary of Willaert's, Jacques de Meyere, claimed that he was born in Roulaers, while a later writer, Sweertius, gave his birthplace as Bruges. As Willaert's motet *Laus tibi sacra rubens* was written for a liturgical ceremony celebrated in Bruges and may have been composed during his visit to Flanders in 1542, Lenaerts has suggested that Bruges seems the more likely.

The little that is known about his musical training and early maturity has come from his pupil Zarlino, in whose writings on music theory Willaert played a major role. According to the *Dimostrationi harmoniche*, Willaert went to Paris to study law at the university but, turning his attention to music, studied with Jean Mouton, then a member of the royal chapel under Louis XII and François I. Zarlino recounted an anecdote indicative of the young composer's ability: on visiting the papal chapel during the pontificate of Leo X, Willaert found the singers performing his six-voice motet *Verbum bonum et suave*, which they thought to be by Josquin des Prez; when they learnt that it was by Willaert, they no longer wished to sing it (the work is probably the motet published by Petrucci in *Motetti de la corona, libro secondo*, RISM 1519[1]). The story was formerly considered apocryphal, but it gains credibility from new evidence of Willaert's presence in Rome in 1514 or 1515 and from the circulation of his works in contemporary Roman sources (including *I-Fl* acq. e doni 666 and *Rvat* C.S.16 and C.S.46).

Willaert's first post in Italy was as a singer in the service of Cardinal Ippolito I d'Este, the brother of Alfonso and uncle of the second Cardinal Ippolito. 'Adriano Cantore' (as he is always called in Ferrarese documents) may have been hired as early as October 1514 in Rome by the cardinal's agent. Ferrara had established links with the French royal chapel, and it is possible that these ties played a role in securing this post for the young composer. The first documentary evidence of his service is a payment record bearing the date of 8 July 1515. On 6 April 1516 he was formally inducted as a singer of the cardinal's at a stipend of nine lire a month. In October 1517 Ippolito left Ferrara for Hungary, where he was Archbishop of Esztergom, taking Willaert with him. During his stay in Hungary, Willaert may have visited other regions: possibly he was present at the 1518 wedding of Zygmunt Jagiełło to Bona Sforza in Kraków. Willaert's visit to Hungary explains why de Meyere referred to him, perhaps with a touch of exaggeration, as 'Cantor regis Hungariae'. Although it is unlikely, as previously suggested, that Willaert was a musician at Ladislas II Jagiełło's court, his Hungarian contacts may have lasted until much later: one of Willaert's motets may have been written for the coronation of the Emperor Ferdinand I as King of Hungary in 1527 (perhaps this patronage is what de Meyere had in mind).

Willaert was back in Ferrara by 1 August 1519, preceding his employer, who did not return until the following March. The death of Ippolito in September 1520 allowed Willaert to transfer to the service of Duke Alfonso; surprisingly, he seems to have received a rather low salary throughout his tenure with Alfonso's musicians. The association with the d'Este and with Ferrarese patronage seems to have played a very important role in Willaert's career in Italy, and was maintained to some extent even after his appointment at S Marco in Venice. According to Zarlino, Duke Alfonso d'Este visited the bedridden *maestro* in April 1562, while on a state visit to Venice, a sign of great honour, and indicative of the respect and affection of the duke for Willaert. In addition, the patronage of the well-travelled Ippolito I allowed Willaert to establish a wide range of European contacts: besides those already mentioned he may have had connections with the Sforza family and with Roman and papal circles.

Willaert's early career in Italy explains the inclusion of a number of his works in Italian manuscripts (including *I-Bc* Q19 compiled *c*1518, *Fl* acq. e doni 666 dating from 1518, and *Pc* A17 dating from 1522) and anthologies of the period published by Petrucci and Antico. A substantial

group of Willaert's motets, at least one mass (the *Missa 'Mente tota'*, based on Josquin's motet) and some chansons can thus be assigned to the period 1522 or earlier.

The most widely discussed of his early works, though the least characteristic, is the puzzle duo (or quartet) *Quid non ebrietas*, a setting of Horace's epistle on the miracles of the wine cup and one of the first compositions to make use of so far-ranging a hexachordal modulation that the piece passes through the whole of the circle of 5ths. From a particular point onwards each note in the lower voice is to be sung a degree lower than notated, with the result that the apparent final 7th is really an octave. Lowinsky interpreted it as a witty demonstration of the efficacy of the Aristoxenian division of the octave into 12 equal semitones. Probably written in 1519, it was not published until about 1530, but in a letter of 1524 the Bolognese theorist Spataro mentioned that during the time of Leo X (1513–21), the singers of the papal chapel had been unable to perform the duo; viols had managed to perform it 'but not too well'. Spataro's statement must be taken with some caution: he may have wished to stress the superior training of musicians in his hometown by criticizing the papal singers. He claimed in fact that after obtaining a copy of the composition from Willaert, Bolognese musicians had successfully played and sung the duo and had praised it as 'a most subtle and learned work'. At any rate the duo exemplifies not only Willaert's brilliance and virtuosity as a composer at an early stage of his career, but also his interest in the theoretical issues of the time.

2. Willaert in Venice. On 12 December 1527 the procurators of S Marco in Venice appointed Willaert *maestro di cappella*, succeeding the little-known Petrus de Fossis, who had held this post since 1491, and the still less-known Pietro Lupato, who had held an interim position since 1525. It is evident that the doge, Andrea Gritti, intervened personally in choosing Willaert for the post, perhaps as part of his conscious effort to build Venice into a 'new Rome'. Gritti had spent a period of captivity at the court of France, and had been present at the 1515 meeting in Bologna between Leo X and François I, where, as Lockwood has suggested, Willaert may have been reunited with his teacher Mouton. Thus it is possible that previous acquaintance with the composer and with his teacher may have influenced the doge's decision. Willaert's initial salary was 70 ducats a year, identical to that of his predecessor de Fossis, but on orders from the doge it was raised to 100 ducats in 1529; a series of further raises between 1535 and 1556 increased his salary to 200 ducats, an annual compensation similar to that offered by the best musical posts in Europe. Some of the increases were sought by Willaert through petitions: in the 1535 petition, for instance, he claimed that the 100 ducats he was then receiving were scarcely sufficient to buy food for his family, surely an exaggeration. The last salary increase, given on the eve of Willaert's last trip to Flanders, seems to have been granted spontaneously by the procurators of the church.

The chapel that Willaert found upon his hiring at S Marco was a rather large establishment, with at least 16 adult singers – comparable to the best choirs anywhere in Europe – and its quality must have been satisfactory to the new *maestro*, since very few singers were added to the choir in the first several years of his tenure. Willaert's duties at S Marco included teaching choirboys and adult singers. One singer was reprimanded in 1538 for failing to attend counterpoint lessons with the *maestro*, but no documents survive that would indicate that such instruction was given to all, or most, members of the chapel. Although Willaert's salary, at least until 1541, included a sum for his teaching duties, it is possible that this was simply an accounting ruse and that much of the teaching, at least for choirboys and younger singers, was done by others: as early as 1541, for instance, the procurators decided to pay another singer to teach the clerics of S Marco 'musicam et cantum'. Nevertheless it is indisputable that Willaert was valued as a teacher and that as such he had a profound influence on younger composers. Zarlino, his most famous pupil in the realm of theory and one of his most devoted disciples, reported that he had moved from Chioggia to Venice on 5 December 1541 specifically in order to study with Willaert.

Willaert's teaching activities, not necessarily confined to S Marco, and his ability to surround himself with a circle of talented and devoted students are in fact defining features of his career. His pupils included some of the most important composers active in Italy in the second and third quarters of the 16th century: Cipriano de Rore (who succeeded him at Venice in 1563, after a stay of ten years at Ferrara), Perissone Cambio, Baldassare Donato, Nicola Vicentino, Girolamo Parabosco, Costanzo Porta, Jacques Buus, Francesco dalla Viola, Antonio Barges and others. The exact relationship between the master and these musicians is often hard to establish: several expressly claim to have been his students, but in some cases the connection must have been much more informal. Nevertheless it is obvious that in Venice there was a 'Willaert circle' of musicians who had frequent contact with and were influenced by the Netherlandish master. His opinion was often sought on musical matters by musicians outside of Venice. In 1555, refusing a request from two Genoese musicians to settle a contest by judging newly composed parts for pre-existing compositions, he claimed that he 'never felt like undertaking such requests, even though many had begged him'. An earlier request in 1531 to review a set of madrigals by the Bolognese musician Julio Muradori seems to have upset Willaert, although it was tactfully presented to him through the theorist Aaron.

Willaert's music was carefully copied for the use of the chapel of S Marco: one decree from 1548 orders Baldassare Donato, then a senior choirboy, to copy in a book all the works to be composed by Willaert, 'both masses and Vespers', for the use of the chapel. The document also orders Donato to keep encouraging Willaert to work on his compositions, and to alert the procurators of the church upon the completion of each work (perhaps a confirmation of a famous anecdote related by Zarlino about the slow, meticulous approach to composition taken by the *maestro*). In 1552 Willaert requested and received the services of a choirboy whose primary task was to take care of 'his books', almost certainly the chapel's collection of music.

Although the chapel of S Marco at the time of Willaert's hiring was divided into two choirs, this division, soon abandoned and reintroduced only briefly a few days before his death, was not – as has been often assumed – related to the practice of *cori spezzati*. The lesser choir (*cappella piccola*) included singers with less seniority and

was a training ground for the full choir (*cappella grande*); the two groups often appeared together on Sundays and at important celebrations. *Cori spezzati* settings were in use at S Marco, but were not an invention of Willaert, having been previously used by other northern-Italian composers. The passage in Zarlino that has often been interpreted to claim that Willaert 'invented' this type of setting merely states that his *cori spezzati* music was, in Zarlino's opinion, to be used as a compositional model by others. Nevertheless it is true that Willaert's settings were the most important influence, albeit not the only one, on the establishment of the polychoral idiom of the Venetian school. His influence on musical matters at S Marco extended well beyond his lifetime: as late as the 17th century musicians still justified some musical choices by referring to the way things had been done by Adriano and Cipriano (de Rore). His influence, though, extended well beyond Venice. In 1607 Giulio Cesare Monteverdi, in his historic defence of the innovations of his brother Claudio, singled out Willaert's music as the pinnacle of *prima pratica* composition and Zarlino's writings as the codification of its rules.

Willaert's only recorded absences from Venice occurred in 1542 and 1556, when he was given permission to travel to Flanders on personal business. In 1556 Willaert was expected to be absent from May to November, but he overstayed his leave by several months, and on his return petitioned the procurators for the salary that had been witheld, claiming his delay was due to serious illness. He was granted half the arrears he sought. In general Willaert seems to have been respected and favoured by the procurators. Although it was not unusual for them to make important decisions about the chapel without consulting Willaert, it is clear that whenever possible they listened to the *maestro*, increasingly so as his reputation grew; in some cases the opinion of the *maestro* was sufficient to convince the procurators to hire a particular singer without an audition, in disregard of their own rules. The fact that Willaert's nephew Alvise was also hired by the church – his salary was lumped together with Adriano's – also points to a desire on the part of the procurators to please their *maestro*.

In the later part of his life Willaert was often plagued by physical problems (fig.1), in particular by the gout, that at times rendered him unable to leave his apartment. In his first surviving will (1549), Willaert describes himself as 'rather ill with gout'. This was the first of a series of wills (1550, 1552, 1558, 1559) and codicils in which he often referred to his affliction. From his wills we know he was married but had no surviving children. Evidence recently discovered by Martin Morell suggests that his wife Susanna came from the town of Feltre, where she returned after Adriano's death. In the last codicil, witnessed by the musicians Antonio Barges and Daniele Grisonio, Willaert left his wife the substantial sum of 1,600 ducats, invested with the Fuggers, with the condition that after her death the money would go to his nephew Alvise. Two of the testamentary executors were Marco Antonio Cavazzoni and Gioseffo Zarlino. A notary's annotation on his last will states that it was published 'viso cadavere' on 8 December 1562, implying Willaert had died the day before.

There is no doubt that 'Messer Adriano' was viewed with affection by the Venetian musical world. The feelings of his contemporaries towards him are best summed up

1. Adrian Willaert: woodcut from 'Musica nova' (1559)

by Andrea Calmo in his humorous but deeply affectionate letter to the master. After much praise of his virtues and some good-natured allusion to Willaert's short stature, Calmo concluded: 'your music, my dearest friend, has been distilled in seven alembics, purified in nine waters and refined in four flames, as is proper to the *aurum potabile*'.

3. INTRODUCTION TO WORKS. Willaert was the leading musician in Italy between the death of Josquin in 1521 and the full maturity of Lassus and Palestrina in the 1560s. Among the most versatile composers of the century, he worked in almost every sacred and secular genre and played a seminal role in the development of the motet, the polychoral psalm setting, the Italian madrigal, the *canzona villanesca* and the instrumental ricercare. He was highly revered during his own lifetime for his seriousness of purpose, his erudition, his exceptional contrapuntal skill and his sensitive treatment of the Italian language, qualities that engender awe and respect among musicians today.

4. MASSES. Compared with contemporary composers like Jachet of Mantua, Morales or Clemens non Papa, Willaert left relatively few polyphonic mass settings. Five have been found in manuscript sources, including what is believed to be his earliest mass (*c*1512–17), the six-voice *Missa 'Mente tota'* on a section of Josquin's motet cycle *Vultum tuum*. Five masses were issued in Willaert's first collection of music, *Liber quinque missarum*, which was printed in 1536 by the Venetian publisher Francesco Marcolini da Forlí and dedicated to the young Florentine Duke Alessandro de' Medici. All these masses, which may have been composed as much as a decade earlier, are built on motets by composers (Mouton, Richafort, Gascongne)

associated with the French royal court of Louis XII, where Willaert had studied as a young man. As in other masses of this period, distinctive motifs and rhythmic figures, melodic phrases and even entire contrapuntal complexes from the models are quoted, modified or otherwise transformed in order to create an extended and unified polyphonic composition.

Three further masses are thought to be roughly contemporaneous with the 1536 print: a second parody of Mouton's *Queramus cum pastoribus*; a five-voice *Missa [mi ut mi sol]* on an as yet unidentified cantus firmus or *soggetto cavato*; and the *Missa 'Benedicta es'*, which is modelled on three different motets by Josquin, Mouton and Prioris. Only one mass survives from the end of Willaert's life: the *Missa 'Mittit ad virginem'*, based on a six-voice motet from his own *Musica nova* (1559). The mass is preserved in a Ferrarese manuscript compiled for Duke Alfonso II d'Este, who assumed his title in the same year. It is now believed, on the basis of inventories of lost manuscripts formerly in the libraries of Mary of Hungary and S Marco in Venice (see Kidger), that Willaert may have written other masses towards the end of his career.

5. Hymns and psalms. To date, 34 polyphonic hymn settings by Willaert have been identified. Most (24) were published in his *Hymnorum musica* of 1542; five more appeared in *I sacri e santi salmi* (1555), which was the first collection of complete polyphonic office settings published by a single composer; and an additional five have recently been located in manuscripts from north Italy.

The settings in *Hymnorum musica* are largely in liturgical order. Thought to have been composed as a set for publication, this was among the earliest hymn cycles to accommodate a full liturgical year. Earlier precedents include cycles by Du Fay (15th century), Carpentras (*c*1532–5), Festa (1539) and Corteccia (1542). Willaert set the hymns either in *alternatim* style (with the chant sung monophonically in odd numbered verses but set polyphonically in the even numbered ones), or in through-composed polyphony that is slightly less florid than motet style and features contrasting duos and trios. Most of his hymns are canonic, continuing a compositional tradition that dates from the 1520s, and in nearly every case he used a liturgically appropriate chant melody as a cantus firmus or paraphrased it imitatively. Most of his melodies are not found in the central Roman liturgy of this era, nor do they appear in the polyphonic hymns of other Italian composers; rather the chants seem most appropriate for the liturgy of S Marco.

The five hymns in *I sacri e santi salmi* (a collection also containing other kinds of music for Vespers and Compline) resemble the earlier settings in style. Here, however, only the first two verses of each hymn are set (remaining verses could be sung to the same music) and the polyphonic idiom is simpler in style with much homorhythm, no canonic writing, and the chant stated as a cantus firmus in the tenor or superius voice.

Recently, five unpublished hymn settings have been found in manuscripts from Treviso, Piacenza and Bologna. Giovanni Spataro, *maestro di cappella* of S Petronio, Bologna, owned and performed many of Willaert's hymns and wrote in 1533 to Pietro Aaron requesting that he ask Willaert to set a new hymn text in honour of St Petronius. It has been conjectured that one of the hymns newly attributed to Willaert in an extant Bolognese manuscript may be the very composition Spataro requested.

With the publication in 1550 of *I salmi ... a uno et a duoi chori* Willaert almost single-handedly established the polychoral Vespers psalm as a major sacred genre in the second half of the 16th century. Although it is now recognized that this genre was already in use by other composers in the Veneto (especially Fra Ruffino in Padua and his student Francesco Santacroce in Treviso), there is little doubt that the claim of Zarlino, Nicola Vicentino and Girolamo Parabosco is essentially true: it was Willaert's eight *salmi spezzati* that put this versatile new genre on the map. (Recently, two more polychoral psalms in a manuscript from Treviso have been attributed to Willaert; see Carver, 1988.)

The eight polychoral settings in *I salmi*, each of which is proper to a feast at which the remarkable *Pala d'oro* at S Marco would be opened, are scored for two separate choirs, the first of which delimits the overall range of the work while the second fills in the middle of the texture. The psalm text is distributed equally among the two choirs, which present alternate verses or half-verses. Compared to the more exuberant settings of earlier as well as later composers, Willaert's settings are reserved and austere in style, adopting the expressive character, mode, melodic material and cadential articulations of the plainsong psalm tones. The two choruses sing together only rarely, primarily near the cadences that mark the verse endings or in the final doxology, where Willaert often recalled musical ideas from earlier sections and exploited the sort of choral tuttis and concertato effects that would come to typify the more dramatic psalm settings of later Venetian composers such as the Gabrielis and Giovanni Bassano.

I salmi also contains several antiphonal psalms whose successive verses are presented alternately by two separate choirs that never sing together. Six of these settings were jointly composed by Willaert (who set the even-numbered verses) and Jacquet of Mantua (who set the odd-numbered verses; Jacquet set two further psalms together with Dominique Phinot and three by himself, while one setting is anonymous). Following long-standing traditions governing *alternatim* liturgical polyphony, each setting opens with a monophonic intonation and continues in declamatory homorhythm to its conclusion. The psalms vary greatly in length, feature contrasting internal verses scored for three voices, and usually end with a canonic doxology sung by the full choir.

6. Motets. Willaert's greatest and most enduring compositions are his motets. Out of a provisional total of 175, 79 are for four voices, 51 for five, 38 for six and five for seven or eight voices. The motets enjoyed wide circulation during his lifetime in manuscripts, printed anthologies and a series of influential publications issued by Scotto and Gardano from 1539 on. These publications, which include two books of motets for four voices (1539, repr. 1545), one book for five voices (1539, repr. 1550) and one for six voices (1542), were among the first printed books to focus on the music of a single composer, attesting to the high regard in which Willaert was held at the time.

Like most of his contemporaries, Willaert used a wider variety of motet texts than most composers of the previous generation. Beside psalm, responsory and antiphon texts, he set sequences, hymns, gospels, psalms, lessons and

2. *Title-page of Willaert's 'Musica nova' (Venice: Antonio Gardano, 1559), with the opening of the cantus part of the madrigal 'I piansi, hor canto'*

sections of the Proper of the Mass as well as non-psalmodic passages from the Bible. In addition, there are five motets with secular Latin texts, which honour the Sforza family (*Inclite Sfortiadum* and *Victor io, salve*) and Cardinal Ippolito de' Medici (*Adriacos numero*) among others.

Willaert's earliest motets, which number around a dozen and are mostly for four voices, appear in Italian manuscripts and printed anthologies from the second and third decades of the century. Representative works include the ingenious canonic motet *Christi Virgo* and the through-composed, pervasively imitative *Saluto te sancta virgo*, both in the Medici Codex (*I-Fl* 666, 1518) among other sources. Although many of these early works are thought to have been written for his Ferrarese patron Cardinal Ippolito I d'Este, they display the clear influence of Willaert's teacher Mouton, a Frenchman, in their use of continuously imitative counterpoint organized into high and low voice-pairs, their melismatic, at times haphazard text declamation, and their additive formal plans consisting of interconnected polyphonic sections each presenting a single phrase of text.

Willaert's mature motet style is evident in the new works published from 1539 onwards, which were among his most popular compositions and enjoyed wide circulation in European prints and manuscripts. The four-voice *Magnum haereditatis mysterium* typifies their style, with its textural integration of all voices, flexible shifts between imitative and free counterpoint, and careful, prevailingly syllabic text declamation. Motets of this period also deploy a wide variety of interesting constructive devices including chant paraphrase, large sectional repetitions, intricate canonic structures, cantus-firmus tenors, recurring ostinatos and *soggetti cavati*. Popular among instrumentalists on lute and keyboard, these motets were frequently arranged for performance and publication.

During the 1540s and 50s individual motets continued to appear in printed anthologies throughout Europe; however, it is those in the monumental *Musica nova* (1559) that best epitomize Willaert's late style. Among the most celebrated publications of the 16th century, this large collection of motets and madrigals was discussed in well over a hundred extant documents from the period, including letters, theoretical writings, legal papers, repertorial inventories and payment records. Of special interest is the dedication by Francesco dalla Viola, Willaert's Ferrarese editor, which asserts that the music had lain 'concealed and buried' for many years. Curiosity about this enigmatic dedication, the remarkable preservation of so many relevant documents, the significance of the title 'New Music', and the idiosyncratic style of the music itself have generated an unusual amount of research on the collection, primarily focussed on its fascinating publication history and on the Petrarchan madrigals that follow the motets in Gardano's print (fig.2).

Most of *Musica nova* is devoted to Willaert's 27 long and serious motets, some of which had been composed nearly two decades earlier. Featured in the collection is an unusual group of sacred texts, including nine which had been previously set by Josquin, a cycle of seven

antiphons from the feast of the Circumcision, and numerous Marian hymns, sequences and antiphons, as well as penitential texts from the Old Testament (Psalms, Jeremiah and Daniel), two of which (*Audite insulae* and *Avertatur obsecro*) were substantially rewritten so as to refer to contemporaneous political events. Equally unusual is the musical style of the motets themselves, which exhibit impeccable text declamation, low tessitura and thick voicings (the majority for six or seven voices), and extraordinarily continuous counterpoint built on declamatory rhythmic motifs that are distributed equally among all the voices. In evidence, too, are many of the same constructive devices that appear in earlier works: in particular, complex canons involving up to four voices and a preference for melodic ideas borrowed from plainchant.

7. Secular vocal works. Willaert began composing chansons during his studies with Mouton in Paris. His early chansons, which circulated in manuscript chansonbooks as well as in printed anthologies, tend to be constructed in one of two ways. The majority are in the style of the 'three-voice popular arrangement' that was cultivated at the French royal court of Louis XII. Here, a pre-existing secular tune borrowed from the theatre or folksong repertories of the previous century was stated one phrase at a time in the tenor voice while being simultaneously imitated and ornamented by the outer voices (e.g. *Qui la dira*). A second compositional approach, characteristic of the printed anthology *Motetti novi e chanzoni franciose a quatro sopra doi* (RISM 1520[3]), involved paraphrasing a pre-existing monophonic tune in four canonic voices (e.g. *Mon mary m'a diffamee*).

Even after moving to Italy around 1515, Willaert continued writing chansons for his Italian patrons, especially the Ferrarese Cardinal Ippolito I d'Este, at whose lavish court French musical styles and genres were cultivated. Later, when he was *maestro di capella* in Venice, new chansons continued to be published in anthologies. The largest group, 20 three-voice chansons, appeared in the Venetian print *La courone et fleur des chansons a troys* (RISM 1536[1]). Thought to have been written over several decades, these chansons display a variety of styles. Some are three-voice popular arrangements of the sort Willaert had written as a young man in Paris. Others, especially those whose texts have been linked to events at the Ferrarese court of Duchess Renée de France, may date from the early 1530s and have many hallmarks of the composer's mature contrapuntal style, including a heightened sensitivity to the text, angular melodic ideas with much syncopation and other rhythmic displacement, more dramatic changes of texture, contrasting tonal regions that are articulated by cadences at the end of formal units, and frequent sectional repetitions (e.g. *J'ay veu le regnart et le loup et le lievre*).

Near the end of Willaert's life, the Parisian firm of Le Roy & Ballard published retrospective editions of most of his chansons. The *Cincquiesme livre de chansons* (1560, 2/1578) reissued the three-voice works from *La courone et fleur*, and *Livre de meslanges contenant six vingtz chansons* (1560, 2/1572) included 25 chansons for five and six voices, most of which had circulated in manuscripts or in printed anthologies of the 1540s. The majority of these many-voiced chansons, like those for fewer voices, use borrowed melodic material – either a pre-existing melody from the French monophonic repertory or polyphonic passages by other composers, particularly Josquin. In the freely composed chansons, on the other hand, two- or three-voice canons are common. Of special note are the multiple settings Willaert made of certain texts, which he frequently set for three voices and again for five or six.

Despite being amply represented in Italian anthologies of the mid-16th century, Willaert's chansons did not find favour with the leading Parisian publisher, Pierre Attaingnant. Nor were they especially popular among instrumental arrangers of the period; unlike his motets, which were arranged with considerable regularity, only a handful of chansons appeared in the keyboard and lute collections that proliferated after 1550.

It is unclear precisely when Willaert began composing madrigals. His earliest essays were published in anthologies from the mid-1530s and early 1540s and therefore postdate his move to Venice, a city not known as a centre of madrigal production at the time. In fact, they display the direct influence of Verdelot, who had worked in this genre while residing in Florence in the 1520s and some of whose madrigals Willaert intabulated for voice and lute (1536). Early works like *Madonna, il bel desire* (1534) display what has been called 'the classic Florentine madrigal style', a chanson-like idiom perfected by Verdelot and Arcadelt by the 1530s. Its identifying features include a prominent and tuneful upper voice and a formal plan following the versification of the text. This style is characterized by predominantly syllabic declamation, regular phrasing with a cadence marking the end of each verse, and prevailingly homorhythmic textures, which often incorporate dance-like passages in triple time. Willaert's preferred text-form was the poetic madrigal or a hybrid of the madrigal with the ballata or canzone, both of which have prominent formal reprises. Several texts honour famous personages of the day, including *Qual dolcezza giamai*, which pays tribute to the celebrated soprano Polissena Pecorina (who later owned the manuscript of *Musica nova*), and *Rompi de l'empio cor*, which was written by the Republican martyr Filippo Strozzi during his imprisonment in Florence on charges of sedition against the Medicean state.

Around 1540 a new style began to emerge in Willaert's madrigals, especially those included in publications of his pupil Cipriano de Rore. This style reached its apex with the 25 madrigals of *Musica nova*, most of which were composed around 1540. Scored for from four to seven voices, these weighty madrigals share many stylistic characteristics with the serious motets that precede them in the publication. Setting (with one exception) complete sonnets from Petrarch's *Canzoniere*, these madrigals enjoyed great fame and influence at mid-century, primarily because of the skill with which the meaning, syntax and sonorous beauty of the poetry were conveyed. Many scholars believe that Willaert's choice of these Tuscan poems and his innovative musical settings of them paralleled, and may have emerged from, a contemporaneous preoccupation on the part of prominent literati in north Italy, in particular the Venetian poet Pietro Bembo, with classic writings of the trecento and their exemplary role in the development of the Italian language. Willaert's sensitive and expressive treatment of Petrarch's sonnets is evident throughout *Musica nova*. On the one hand, he carefully created large-scale musical structures that would

match the form of each sonnet by presenting its first eight verses in the *prima parte* and the closing sestet in the *seconda parte*. Individual contrapuntal sections, on the other hand, were constructed so as to draw attention to striking poetic images, important phrases or self-sufficient syntactic units, which might not coincide with the poetic versification (e.g. *Giunto m'ha amor*). The impeccable declamation in earlier madrigals is made even more audible now by the coincident articulation in multiple voices of important or stressed syllables of text. Furthermore, by manipulating subtle but kaleidoscopic shifts of rhythm, texture and vocal colour, Willaert brought out the sonorous nuances of individual phrases, words and syllables.

From a modern perspective, however, the most notable feature of these late madrigals is their unusually dense and continuous contrapuntal idiom, which largely eschews imitative textures, clear cadential articulations, distinctive rhythmic patterns and tuneful melodic ideas (*soggetti*), which are no longer restricted to their conventional positions in the soprano and tenor parts but now roam freely and unpredictably among diverse vocal combinations. The result is an elusive contrapuntal idiom that has elicited a wide variety of critical responses from 20th-century performers and audiences alike, some of whom have found the madrigals unattractive and impenetrable even as others applaud their sensitive and expressive treatment of Petrarch's elusive poetry.

Willaert played a central role in the popularization at mid-century of the Neapolitan dialect song called the *canzona villanesca* (*see* VILLANELLA, §6). This new genre, thought to reflect an urban tradition of popular song in southern Italy, entered north-Italian musical circles in the early 1540s through Venetian publications of the three-voice *villanesche* of the Neapolitan composer Gian Domenico da Nola. Attracted by these colloquial songs of pastoral life, Willaert soon made his own madrigalesque arrangements, which were quickly published by the firm of Scotto, beginning in 1545. Carefully retaining the identifying features of his rustic models – the popular melodies, dialectical texts, irregular rhythms and homorhythmic textures – Willaert increased the number of voices from three to four, transferred the traditional melody from the highest to the tenor voice, enlivened the counterpoint and reworked the harmonies, and expanded the vocal range downward. His arrangements are thought to have been performed alongside more serious madrigals at sophisticated courts and academies in northern Italy and the Veneto, where they won unusual popularity and were reprinted no less than five times in the decades that followed. By 1560 *canzone* such as Willaert's *Zoia zentil*, on a text by the Paduan playwright and poet Ruzante, had become hit tunes across Italy and had spawned a wave of similar compositions by lesser-known composers as well as established figures like Baldassare Donato, Perissone Cambio and Orlande de Lassus. Willaert's *canzone* remained popular well into the 1570s, especially in the form of lute intabulations, which enjoyed wide circulation in manuscript and print.

8. INSTRUMENTAL WORKS. Although Willaert is best known as a composer of vocal music, he played a key role in the development of the imitative instrumental ricercare at mid-century. In 1540 he began publishing ricercares, mostly for three voices, in collections of music by other composers. Many of these publications also contain motet or motet-like vocal compositions, lending support to the hypothesis that the new imitative style of his ricercares has an affinity with vocal genres, and the motet in particular.

Willaert's ricercares are highly contrapuntal settings for three or four voices of a limited number of melodic ideas subjected to progressive variation. Probably intended for private performance by students or amateurs, these works are best suited to ensembles of strings or recorders, though they were advertised as equally suitable for voices. Indeed, manuscript scores and transcriptions of similar works suggest that the ensemble ricercare was often played on keyboard or plucked instruments and that it may also have served didactic purposes.

Willaert's earliest ricercares appeared in another Venetian print entitled *Musica nova* (RISM 1540[22]) along with works by Julio Segni and Girolamo Parabosco (both of whom were affiliated with S Marco), Girolamo Cavazzoni, Nicolaus Benoist and Guilielmo Golin. Unlike earlier examples of the genre for keyboard or plucked-string instruments, which tend to be sectional pieces dominated by improvisatory or idiomatic instrumental writing, Willaert's four-voice compositions feature a seamlessly imitative, contrapuntal style that was to become the norm for ensemble ricercares throughout the second half of the century. Four more, entitled 'Re', 'Mi', 'Fa' and 'Sol', appeared in Gardano's *Motetta trium vocum* (RISM 1543[6]), this time with companion motets by Morales, Costanzo Festa and Jacquet of Mantua. Significantly shorter than the pieces in *Musica nova*, these three-voice ricercares are notable for their thematic unity, highly continuous counterpoint and infrequent homorhythm.

A further eight ricercares were issued by Scotto in his *Fantesie, et recerchari a tre voci ... composte da M. Giuliano Tiburtino da Tievoli* (RISM 1549[34]). This publication was dominated by the aristocratic papal musician Tiburtino, with whom Willaert may have worked at the Este court in Ferrara. Willaert's contributions, which may have been written as much as two decades earlier for instrumentalists at the Este court, are notable for their thematic interrelationships, their wide textural variety and the sectional repetitions with which several conclude. All of Willaert's pieces were reprinted two years later, with two additional ricercares, in Gardano's *Fantasie, recercari contrapunti* (RISM 1551[16], repr. 1559[25]/*R*, 1593[8]), together with compositions by Cipriano de Rore and Antonino Barges (both pupils of Willaert) and Girolamo Cavazzoni, whose father Marco Antonio was executor of Willaert's will of 1552.

9. LEGACY. Willaert's historical importance was assured by the large and diverse body of music he left to posterity, by his powerful influence on younger Italian composers (especially those fortunate enough to work with him in Venice during his lengthy tenure at S Marco) and, perhaps most significantly, by his influence on music theory of the late 16th century. From 1533 until well into the 17th century, Willaert's name appeared on lists of the era's pre-eminent composers, compiled by such writers as Giovanni Maria Lanfranco (*Scintille di musica*, 1533), Adrianus Petit Coclico (*Compendium musices*, 1552), Hermann Finck (*Prattica di musica*, 1592), Cosimo Bartoli (*Ragionamenti accademici*, 1567), Gaspar Stoquerus (*De musica verbali*, c1570), Lodovico Zacconi

(*Prattica di musica*, 1592) and Giulio Caesare Monteverdi (*Dichiaratione*, 1607), among others.

It is Gioseffo Zarlino, however, who deserves the most credit for having passed on the teachings of Willaert to future generations of musicians. In *Le istitutioni harmoniche* (1558) Zarlino successfully integrated long-standing precepts of music theory with Willaert's refined compositional methods and in the process inaugurated a new theoretical tradition that survives well into the 17th century. Zarlino used Willaert's compositions to explain topics ranging from the deployment of specialized contrapuntal devices (e.g. canon, invertible part-writing, cantus-firmus paraphrase, fugue etc.) to his own idiosyncratic theories of polyphonic modality. More generally, he praised Willaert's music for its skilful text declamation, its expressive harmonic variety, its apt use of major and minor triads, its melodic inventiveness and beauty and its tasteful application of chromatic inflection.

Because so many of Zarlino's ideas made their way into the music treatises of later writers in Italy, France and northern Europe, Willaert's reputation as the leading composer of his generation was assured even as his music fell out of favour and nearly dropped out of sight. It is only in the 20th century that his compositions have been revived and reintroduced to the musical public, primarily because of their relevance to Zarlino's treatise, which remains one of the most insightful, comprehensive and well-illustrated explications of late Renaissance polyphonic style. During the 1950s and 60s renewed scholarly interest arose for theoretical issues that had been examined by 16th-century writers like Zarlino and that also bore on the compositional concerns of the early 20th century: for example, the revival of sophisticated contrapuntal devices, criteria by which the harmonic and melodic coherence of a polyphonic work might be evaluated, the expressive use of pan-chromaticism and new types of chords, and experimentation with unusual systems of tuning. Modern curiosity about these and other topics attracted attention to *Le istitutioni harmoniche* and through it to Willaert's music.

More recently, as scholars have focussed attention on archival and bibliographical studies, a great deal of new information has been gathered about Willaert's life and places of employment, the manuscripts and publications in which his music appears (especially *Musica nova*), and his multifaceted relationships with publishers and patrons. In addition, researchers have sought to establish a broader literary, liturgical and political context for both his sacred and secular compositions. Although this has led to widespread and continued historical interest in his music, individual pieces have had a difficult time entering the musical mainstream. With the exception of a handful of especially tuneful chansons, madrigals and motets, few compositions have gained favour with modern performers or listeners, raising perplexing questions about the aesthetic quality of his music that still await satisfactory answers.

LEWIS LOCKWOOD/GIULIO ONGARO (1–2), MICHELE FROMSON (3–9), JESSIE ANN OWENS/MICHELE FROMSON (work-list)

Willan, (James) Healey (*b* Balham, London, 12 Oct 1880; *d* Toronto, 16 Feb 1968). Canadian composer, teacher, organist and choirmaster. Particularly influential as a teacher, he wrote choral and organ works that have been frequently performed across North America.

1. Life. His early education was undertaken privately. At the age of eight he entered St Saviour's Choir School, Eastbourne, where he studied until 1895. Several positions as organist and choirmaster in and around London culminated in his appointment to St John the Baptist, Holland Road, in 1903. After further studies with W.S. Hoyte, he gained the FRCO in 1899. A close association

Healey Willan

with Francis Burgess led to membership in the London Gregorian Association in 1910.

In 1913 Willan was appointed head of theory at the Toronto Conservatory and organist of St Paul's. In the next year he became a lecturer in music at the University of Toronto. He later served as vice-principal of the conservatory (1920–36), professor at the university (1936–50) and university organist (1932–64). He was also music director of Hart House Theatre (1919–25) and precentor of St Mary Magdalene (from 1921), a position he retained until his death. He founded the Tudor Singers in 1934, conducting the group until it was disbanded in 1939, and held the offices of president of the Royal Canadian College of Organists (1922–3, 1933–5), and president of the Canadian Performing Rights Society (during the mid-1930s). Widely honoured both in Canada and abroad, he was awarded a Lambeth doctorate in 1956, held honorary doctorates from four universities and was a Fellow of the Royal School of Church Music (from 1963). He was invited to compose one of the homage anthems, *O Lord, our Governor*, for the coronation of Elizabeth II. His other honours include the Canada Council Medal for outstanding achievement in the arts (1961).

2. Music. Willan's early compositions attest to the thoroughness of his training and to his absorption of the musical language of the late 19th century. Several large orchestral and choral works, many of them unfinished, feature richly Romantic melodies, strongly chromatic harmonies and heavy scoring. A large number of songs, most of them unpublished, are in a similar idiom. His early pieces for choir and for organ belong unmistakably to the post-Stanford period. The *Magnificat* and *Nunc dimittis* in B♭ and the Prelude and Fugue in C minor are

to some extent typical of this stage of his development, although the organ work also recalls Reger. On his own admission, Willan fell heavily under the influence of Wagnerian opera, a love that was to bear particular fruit much later in his life. He also cherished ambitions of becoming a performer of Brahms's piano works, which he studied with Howard-Jones. The large scale Introduction, Passacaglia and Fugue for organ (1916) represents the high point of this period.

The high-church musical tradition that Willan established at St Mary Magdalene was based on the use of plainsong and Renaissance music, and led him into a quite different style for shorter liturgical compositions. His lifelong love of plainsong suggested a greater use of modality, while the sinuous melismas of chant found an echo in more subtle vocal lines. Equally, a preoccupation with Renaissance music drew from him a more contrapuntal style and a greater rhythmic freedom. Typical of this approach are the Six Motets (1924), the 11 Liturgical Motets (1928–37), 14 *Missa brevis* settings (1928–63) and a set of Evening Canticles (plainsong with fauxbourdons) dating from 1928. It is in these four groups of works that the economy, effectiveness and beauty of his church-music style is most evident. This style did not carry over into all of his choral writing, however – he maintained a fuller, more Romantic idiom for larger works with organ such as *Sing we Triumphant Songs* (1951) and *O Sing unto the Lord* (1956). In the 1960s he produced a large number of short anthems and motets for the use of the Lutheran Church in the USA. While not all have the quality of the earlier liturgical pieces, nevertheless they contain many beautiful moments.

Willan's larger choral works are less tightly constructed, particularly when they involve orchestral accompaniment. The *Te Deum* in B♭ (1935–7) and the *Coronation Suite* (1952) show a luxuriant breadth of melody and harmony, and their 'purple' strain is remarkably appropriate. On the other hand, the unaccompanied *An Apostrophe to the Heavenly Hosts* (1921) establishes an almost Russian breadth and dignity with some medieval overtones. *Gloria Deo per immensa saecula* (1950) is positively academic by comparison, cast, as it is, in the mould of a prelude and five-part fugue. There are signs of a similar trimming of style in the organ music, though there is a surprising gap, broken only by two small works, between 1916 and 1950, when two sets of six chorale preludes appeared. These show a much more restrained approach, and even the lengthy Passacaglia and Fugue no.2 in E minor (1959) is highly contrapuntal and condensed alongside its earlier companion. Later organ works, like the Five Preludes on Plainchant Melodies (1951) and three sets of ten hymn preludes (1956–8), show the same tautness of construction.

For Hart House Theatre, Willan composed music to 15 plays. A few years later he wrote or assembled the music for five ballad operas. Commissions by the CBC enabled him to continue this interest in dramatic music: *Transit through Fire* (1941–2) and *Brébeuf* (1943) were succeeded by his most important work in the genre, the opera *Deirdre* (1943–5). This was later adapted for the stage and, in this guise, received several performances. Not above criticism for a certain lack of dramatic fire and a general heaviness of scoring, it is nevertheless one of Willan's greatest achievements. Both in the orchestral parts of these works, and in his compositions for orchestra alone, there is no great change in style to match that noticeable in the church music. The Symphony no.1 (1936) shows strong affinities with earlier manuscripts – indeed one sketch of what later became the first movement dates from *c*1910. The Second Symphony has been more successful in gaining performances and has also been recorded. Both works have been faulted for a lack of personality in the scoring, but there is no doubt of Willan's inventiveness in melody and development. The Piano Concerto (1944) is unjustly neglected; couched in the late-Romantic style, it echoes earlier warhorses, yet it has its own tunefulness, display, colour and warmth. Several marches, among them a *Coronation March* (1936–7), *A Marching Tune* (1941–2) and *Elégie héroïque* (1960), show Willan to be a master of the Elgarian formulae of fanfares, development and noble tunes. His output of chamber and piano music is small. A Trio in B minor (1907) has been praised, but part of it is lost. He wrote two violin sonatas, one of which is derivative of late-Baroque forms and idioms. There are numerous sketches for various movements of at least three string quartets; only the slow movement of one was finished, and appeared later as the *Poem* for string orchestra.

Willan's influence as a teacher was far-reaching. He taught his many students more by instilling in them taste and discernment rather than rigid sets of rules, though he was quick to castigate those who attempted composition without having learnt the tools of the trade. The quality and sheer bulk of his output was an example for younger composers. Inseparable from his importance as a teacher was the effect of his achievement at St Mary Magdalene. An interest in the uses of plainsong in the vernacular was strengthened by the formation of the Gregorian Association of Canada in 1950 and by the publication of the *Canadian Psalter (plainsong edition)* in 1963. Willan's performances of Renaissance music both liturgically, in concert and with the Tudor Singers, introduced a large amount of this music to Canada, while the style of his choirs was much emulated. This influence has also been felt in the USA, where he appeared frequently as a performer and lecturer. While he is probably best known as a composer of church and organ music, Willan made an outstanding contribution to the state of both music and musicians in Canada. The 1990s saw a considerable growth in interest in his liturgical music.

WORKS

for complete list see Bryant, from which the numbering here is taken

DRAMATIC

Cleopatra (dramatic scene), op.1, 2 S, A, Bar, SATB, orch, 1907
The Christmas Mysteries (pageant), op.16, children's vv, SATB, org, *c*1924
The Beggar's Opera (J. Gay, arr.), op.19, 1927
L'ordre du bon temps (ballad op, L. de Montigny, trans. J. Murray Gibbon), op.20, 1928
Prince Charlie and Flora (ballad op, Murray Gibbon), op.21, 1929
The Ayrshire Ploughman (ballad op), op.22, n.d.
Maureen (ballad op), op.23, n.d., lost
Indian Christmas Play (ballad op), op.24, n.d., lost
Transit through Fire (radio op, prol., 4 scenes, J. Coulter), op.27, 1941–2, CBC Radio, 8 March, 1942
Brébeuf (pageant, after E.J. Pratt), op.29, 1943, rev. before 1947
Deirdre (op, 3, Coulter), op.30, 1943–5, Toronto, CBC Radio, 20 April 1946, rev. Toronto, 2 April 1965
21 sets of incidental music

MASSES

The Office of Holy Communion, op.235, SATB, org, 1906; The Office for the Holy Communion, op.236, C, E, SATB, org (1910); Mass of St Peter (Lat.), F, op.238, unison vv, org (1927); Missa de

S Maria Magdalena (Eng.), op.239, unison vv, org, (1928); 14 Missae breves, opp.216–29 (Eng.), 1928–63; An Easy Communion Service, E♭ op.240, SATB, org (1929); Mass of St Theresa (Lat.), op.241, unison vv, org (1930); Mass of St Hugh (Eng.), g, op.243, unison vv, org (1935); Communion Service, D, op.244, unison vv (1954); Missa brevis (Eng., Lutheran use), G-g, op.245, TTBB, 1954; Communion Service, D, op.246, unison vv, org, 1955; The Order of Holy Communion (Lutheran use), op.247, SATB, org (1955) [incl. motet Create in me a Clean Heart]; other mass sections; arrs. of masses by Byrd, Merbecke, Viadana

MOTETS

The Dead (H.W. Longfellow), op.302, SSAATTBB (1917); 6 Motets, opp.303–8, SATB (1924): Hail, Gladdening Light; O How Glorious; Very Bread, Good Shepherd, Tend Us; O Sacred Feast; O How Sweet, O Lord; Let us Worship and Fall Down; O Trinity, most Blessed Light, op.309 (1925); Liturgical Motets, opp.310–20, 1928–37: Preserve us, O Lord; O King all Glorious; I Beheld her Beautiful as a Dove; Fair in Face; Rise up, my Love, my Fair One; O King of Glory; Lo, in the Time Appointed; O King, to Whom all Things do Live; Behold, the Tabernacle of God; Hodie, Christus natus est (Today Christ is Born); Who is she that Ascendeth?; Motets, opp.321–2, SSA (1935): O Saving Victim; Look Down, O Lord; Ave verum corpus, op.328, SATB, 1943 [from Brébeuf]; I will Lay me Down in Peace, op.331, SATB, 1949; Christ, our Passover, op.332, SATB, 1950; Grant us They Light, op.333, SATB, 1951; Hosanna to the Son of David, op.335, SATB, 1951; I will Lift up mine Eyes, op.337, SATB, 1951; The Spirit of the Lord, op.336, SATB, 1951; Worthy art Thou, O Lord, op.334, SATB, 1951; Great is the Lord, op.338, SATB, 1952; 7 editions of motets by Batten, Croce, Handl, Hassler, John IV, Ruffo

ANTHEMS

I looked, and behold a white cloud, op.344, S, T, SATB, 1907; In the name of our God, we will set up our banners, op.348, SATB, 1917; In the heavenly kingdom, op.380, SATB, 1924; A Prayer of Rejoicing, op.357, SATB, 1953; O Lord, our governor, op.358, SATB, 1953; O sing unto the Lord a new song, op.363, B, SATB, 1956

OTHER VOCAL

The Reproaches, op.582, SATB (1912); Requiem, op.61, 1914–18 [completed by F.R.C. Clarke]; The Proper of the Year, op.583, 1920–? [plainsong adaptations]; An Apostrophe to the Heavenly Hosts (Easter liturgy), op.584, 1921; The Arts and Letters Club Constitution, op.625, 1v, TTBB, 1922; The Mystery of Bethlehem (cant., A. Riley, J.M. Neale), op.585, S, B, SATB, org, 10 wind, drums, hp/pf, glock ad lib (1923); Te Deum, B♭, op.53, SSAATTBB, orch, 1935–7; The Tpt Call (A. Noyes), op.53, SATB, orch, 1941; Responsaries for the Office of Tenebrae, op.596, SATB, before 1950; Gloria Deo per immensa saecula, op.593, SSATB, 1950; Introits, op.592, SATB (1950); Coronation Suite (J. Milton, J.E. Ward, lit.), op.57, SSATB, orch, 1952 [incl. motet Ring out ye Crystall Sphears (Milton)]; Canadian Psalter, plainsong edn., op.608, unsion vv (1963); The Introits and Graduals for the Church Year (Lutheran use), op.602, SATB, org (1967); 10 Songs, opp. 676–703, 1v, pf (1967): To Electra (R. Herrick); To Blossoms (Herrick); Dedication (O. Meredith); O Mistress Mine (W. Shakespeare); The Tourney (A. Tennyson); Summer Night (Meredith); 3 Songs (H. Heine); At Dawn (Wilcox); Canticles: Te Deum (3), Benedictus (3), Jubilate (2), Magnificat and Nunc dimittis (29), Benedicte (1), Benedictus es (2); 34 anthems, 30 hymn-anthems, 11 carols, 10 carol arrs., numerous hymns and hymn arrs., other music; 23 partsongs, 13 choral folksong arrs., many other song and solo folksong arrs.

INSTRUMENTAL

Orch: Coronation March (Marche solennelle), op.71, 1936–7; Sym. no.1, d, op.70, 1936; Sym. no.2, c, op.74, 1936–41, rev. 1948; Suite, op.72, 4 perc, pf (1938); A Marching Tune, op.73, 1941–2; Pf Conc., c, op.76, 1944, rev. 1949; Ov. to an Unwritten Comedy, op.79, 1951; Poem, op.82, str, 1959 [from Str Qt, 1930]; Elégie héroïque, op.83, band, 1960 [scored W. Atkins]; Centennial March, op.84, 1967; several other works, some unfinished

Chbr: Pf Trio, b, op.98, 1907 [pf part of 1st movt lost]; Sonata no.1, e, op.100, vn, pf, 1916; Sonata no.2, E, op.101, vn, pf, before 1921; Poem, op.102, str qt, 1930 [from Adagio of unfinished Str Qt]; 12 other chbr pieces

Kbd (for org, unless otherwise stated): Prelude and Fugue, c, op.146, 1908; Prelude and Fugue, b, op.147, 1909; Variations and Epilogue on an Original Theme, op.126, 2 pf, 1913–15; Introduction, Passacaglia and Fugue, op.149, 1916; 12 Chorale Preludes, opp.155–6, 1950–51; 5 Preludes on Plainchant Melodies, op.157 (1951); 10 Hymn Preludes, op.169 (1956); 10 Hymn Preludes, op.173 (1957); 5 Pieces, op.177, 1957–8; A Fugal Trilogy, op.176, 1958; 10 Hymn Preludes, op.174 (1958); Passacaglia and Fugue no.2, e, op.178, 1959; 36 Short Preludes and Postludes on Well-Known Hymn Tunes, opp.180–82 (1960); Andante, Fugue and Chorale, op.184 (1965); many other org works, sets and arrs.; numerous pf pieces, mostly educational

GILES BRYANT

Willcocks, Sir **David (Valentine)** (*b* Newquay, 30 Dec 1919). English conductor, organist and teacher. He was a chorister at Westminster Abbey (1929–33) and studied at the RCM before becoming organ scholar at King's College, Cambridge (1939). War service, during which he won the Military Cross, interrupted his studies, but he returned to complete them (1945–7), then became organist of Salisbury Cathedral (1947–50) and of Worcester Cathedral (1950–57), during which time he conducted the Three Choirs Festival. He introduced Duruflé's Requiem to Britain in 1952. Willcocks returned to Cambridge in 1957 to become organist of King's College Chapel and director of the chapel choir. He developed its already famous choral tradition with distinction, enlarged the choir's repertory, and brought it before a wider public through broadcasts, recordings and overseas tours. He toured with the choir in Europe, Canada and Africa. The annual Festival of Nine Lessons and Carols on Christmas Eve became a distinctive mixture of the new and the familiar, heard and seen in many parts of the world through television and radio broadcasts.

Willcocks was elected a fellow of King's College on his appointment, and conducted the Cambridge University Musical Society for 16 years from 1958. In 1960 he became conductor of the Bach Choir in London, giving frequent premières of works by contemporary British composers. He began to tour with the Bach Choir both at home and abroad. They gave the first performance of Britten's *War Requiem* in Italy (1963, La Scala), then in Japan, Portugal and the Netherlands. They made the first complete recording of Bach's *St Matthew Passion* in English in 1978 and an acclaimed recording of *Belshazzar's Feast* in 1990. Willcocks was president of the Royal College of Organists (1966–8) and director of the RCM (1974–84), conducting the college choir and orchestra at the Aldeburgh and Windsor festivals. He was made a CBE in 1971 and was knighted in 1977.

ARTHUR JACOBS/IAN CARSON

Willelmus (*fl* 14th century). Theorist. He was possibly the author of the anonymously preserved late 14th-century treatise *Breviarium regulare musice*. A medieval catalogue

gives this name for a treatise of that title formerly in the library of the Augustinian friars in York. Rather strikingly, this author cited many other contemporary theorists, or those of his immediate past, beginning with Franco of Cologne and ending with Johannes Torkesey, whom he quoted at length. Mensural music was his prime consideration, though he was scholastic enough to quote the Greek letters of Boethius's discussion of ancient notation. Willelmus's main interest was the smallest and largest note value, namely the *semiminima* and *largissima*. He tried to overcome the illogical use of the term *semiminima* for the smallest note, and called it *minima*, proposing the name *minuta* for what we normally call the minim. Kurt von Fischer has made the suggestion that Willelmus might be identical with the G[uilielmus] de Anglia who was involved with the copying and possibly the writing, in the fullest sense of the word, of certain treatises in *US-Cn* 54.1 (e.g. the *Ars perfecta* attributed to Philippe de Vitry). However, there are too many errors and omissions in this source for Willelmus to be the copyist.

GILBERT REANEY

Willelmus de Winchecumbe. *See* WYCOMBE, W. DE.

Willer, Luise (*b* Seeshaupt, Bavaria, 1888; *d* Munich, 27 April 1970). German mezzo-soprano. She studied in Munich, where she sang first in the opera chorus. In 1910, on the recommendation of Bruno Walter, she appeared as Annius in *La clemenza di Tito*, and she remained closely associated with the company until her retirement, as Erda in *Siegfried*, in 1955. At Munich she sang in the première of Korngold's *Violanta* (1916) as well as in two Pfitzner premières, *Palestrina* (1917) and *Das Herz* (1931). In 1930 she sang Clytemnestra in *Iphigénie en Aulide* at Salzburg, where she reappeared in 1943 as Adelaide in *Arabella*. She also sang widely throughout Germany, and in 1926 and 1931 was at Covent Garden, considered 'extremely fine vocally' as Fricka in *Die Walküre*, her other roles being Brangäne, Erda and Magdalene in *Die Meistersinger*. Her repertory also included Dorabella, Carmen, Azucena and Delilah, and recordings show a good voice skilfully used, with characterful treatment of words.

J.B. STEANE

Willi, Herbert (*b* Bludenz, Vorarlberg, 7 Jan 1956). Austrian composer. His initial studies were in theology and philosophy at the University of Innsbruck as well as in school music and bassoon at the conservatory in Innsbruck. It was not until 1983 that he began to study composition at the Salzburg Mozarteum, first with Helmut Eder and later also with Boguslav Schäffer. After finishing his studies, he was awarded the Förderpreis für Musik of the Republic of Austria for his orchestral work *Aura I*. Subsequently he received a bursary to go to Rome in 1987–8.

Willi made his international breakthrough in 1989, at the 'Wien modern' festival, when his *Der Froschmäusekrieg*, a work for solo voice (Sprechgesang), three orchestral groups and tape, based on the ancient Greek *Batrachomyomachie*, had its première under Abbado. Numerous commissions for works followed: from Bavarian Radio (*Räume* for orchestra, 1991), the Salzburg Festival (Concerto for Orchestra, 1991–2, also performed in Cleveland, New York and London under Christoph von Dohnányi), the Vienna Philharmonic (*Begegnung* for Orchestra, 1999), the Staatsoper in Munich (Flute Concerto, 1993) and the Zürich Opernhaus, where Willi's first opera *Schlafes Bruder* (1994–5), on themes from a novel by Robert Schneider, had its première in 1996.

Stylistically, Willi's music is difficult to categorize: it follows neither strict serial principles nor postmodernist tendencies, although it does not eschew tonal centres completely alien to it. The composer lives in seclusion in the village of St Anton in Montafon, and as with Olivier Messiaen, a feeling of closeness to nature shapes the way he composes, according to a process of 'inner hearing', whereby abstract impulses take on concrete musical shape as strict proportional relationships of rhythms and intervals. He was awarded the Austrian Ehrenkreuz in 1997.

REINHARD KAGER

William, monk of Stratford. *See* STRATFORD, WILLIAM.

William of Hirsau. *See* WILHELM OF HIRSAU.

Williams, Aaron (*b* 1731; *d* London, 1776). English psalmodist. He was probably the Aaron Williams, son of William Morgan, who was baptized at Caldicot, Monmouthshire, on 6 August 1731. He was a singing teacher, an engraver of music (at West Smithfield) and for some time clerk to the Scottish Church, London Wall. He published several collections of church music explicitly designed 'for country choirs', the most popular being *The Universal Psalmodist* (6 edns, 1763–76), *Royal Harmony* (1765) and *Psalmody in Miniature* (3 edns, 1770–83). The first comprised the usual didactic introduction,

psalm tunes plain and florid, and anthems. The second was more ambitious, intended for Anglican use, consisting of 30 anthems including many of the cathedral type, some by Purcell, Croft, Greene and other leading cathedral composers, others by Williams himself. This collection was several times reprinted in New England as part of Daniel Bayley's *American Harmony*. *Psalmody in Miniature* was in five pocket-sized books and was designed for the use of dissenters. Williams's psalm tunes and anthems were popular in America well into the 19th century; 'Bangor' is still widely used, and 'Psalm 34' was a principal model for the early development of the American fuging-tune. His technique of composition was somewhat superior to that of Knapp or Tans'ur, but his tunes were not memorable and are represented in modern English use only by the undistinguished 'St Thomas'.

The list of Williams's anthems given by M.B. Foster in *Anthems and Anthem Composers* (London, 1901) is erroneous: fewer than half of those listed are in fact by him. One of his anthems was reprinted (from an American source) by Daniel.

NICHOLAS TEMPERLEY

Williams, Alberto (*b* Buenos Aires, 23 Nov 1862; *d* Buenos Aires, 17 June 1952). Argentine composer, conductor, pianist and teacher. Born into a family of musicians, he began to compose very early. His first piano lessons were with Pedro Beck; he also attended the Colegio S Martin and, from its foundation, the Escuela de Música de la Provincia, where he studied with Luis Bernasconi (piano) and Nicolás Bassi (harmony). While still a pupil at the school he played works by Paer and Liszt at the Teatro Colón; one of his first public performances was in 1879 at a Sociedad del Cuarteto concert organized by Bernasconi. Two years later he published his first work, the mazurka *Ensueño de juventud*. A scholarship took him in 1882 to the Paris Conservatoire, and there he was a pupil of Georges Mathías (piano), Emile Durand (harmony) and Benjamin Godard (instrumental ensemble), also studying composition with Franck. In Paris the piano works *Souvenir d'enfance* op.2 and *Première mazurca* op.3 were published. He returned to Argentina in 1889 and gave recitals in several provinces, acquainting himself with the forms, tunes and rhythms of folk music until he was able to incorporate them in compositions, beginning with the piano piece *El rancho abandonado* (1890). Composing in and promoting a new nationalist style, he founded and conducted the Athenaeum Concerts (1894), the National Library Concerts (1902–5), the Popular Concerts and the Buenos Aires Conservatory Concerts. He had a decisive influence on music education, particularly in initiating progress towards the adoption of the teaching methods he had learnt in Europe; this led to the foundation in 1893 of a conservatory (eventually named the Conservatorio Williams) in Buenos Aires, which was directed by Williams until 1941. In 1900 he returned to Europe and conducted the Berlin PO in a concert of his works; in 1930 there were three concerts of his music in Paris, one of orchestral works, one of chamber pieces and a piano recital. His 75th birthday was celebrated in Buenos Aires with a programme of his Fifth, Sixth and Seventh Symphonies conducted by José Gil.

Williams is one of the precursors of Argentine nationalism. His large output, which includes 150 opus numbers in almost every genre, may be divided into three periods. The first, up to 1890, was markedly influenced by European composers, principally Schumann, Mendelssohn, Chopin and Franck. The second and most influential period, from 1890 until about 1910, was inspired by the themes and rhythms of Argentine folksongs and folkdances. These years also saw the best of his chamber music, such as the Flute Sonata, the three violin sonatas, the Cello Sonata and the Piano Trio. In the third period, although his music remained nationalistic, he also explored international trends. From about 1910 to 1933 he produced six of his nine symphonies, the nine cycles of *Poemas* for piano, and vocal and piano works; thereafter he wrote principally for orchestra.

Among the posts he held were the presidency and vice-presidency of the National Arts Commission, the musical directorship of the Athenaeum and the presidency of the Argentine Concert Association. He was an honorary member of the Argentine Association of Composers, the Chamber Music Association and the Folklore Association; and in 1939 he was made a member of the Légion d'Honneur. He founded the magazine *La kena* and the paper of the same name in 1919, both of which were aimed at the popularization and teaching of music; he also published textbooks, poetry and criticism. Williams was the first New World composer to write as many as nine symphonies.

SUSANA SALGADO

Williams, Charles [Isaac Cozerbreit] (*b* London, 8 May 1893; *d* Worthing, 7 Sept 1978). English arranger, composer and conductor. In an early career as a violinist he performed with Beecham and Elgar and, like many of his contemporaries, also played for silent films. Williams contributed many scores for films before World War II, often uncredited on-screen, working alongside Mathieson and Nicholas Brodszky, and assisting on the first British sound-film, Alfred Hitchock's *Blackmail*. He finally achieved fame in 1947 when he wrote *The Dream of*

Olwen for the film *While I Live*. While owing its success partly to its similarity to Addinsell's *Warsaw Concerto*, Williams's own mini-concerto became highly popular worldwide. A similar piece, *Jealous Lover*, reached the top of the US bestsellers when rediscovered in 1960 for the film *The Apartment*. He scored for over 20 feature films, and was the musical director for at least six more.

From 1941 Williams wrote and conducted numerous works for Chappell's Recorded Music Library, using the Queen's Hall Light Orchestra. This was the source of much of the music heard in wartime newsreels, and it also included *Devil's Galop*, which the BBC chose for the radio programme 'Dick Barton' in the late 1940s. Among many other themes by Williams were *Girls in Grey* (BBC 'Television Newsreel') and *High Adventure* ('Friday Night is Music Night'). From 1946 he recorded many important light music works for EMI's Columbia label.

WORKS

Orch: The Blue Devils, 1929; The Future, 1942; Sunset at Sea, 1942; Village Church, 1942; Girls in Grey, 1943; Rhythm on Rails, 1943; The Voice of London, 1943; Devil's Galop, 1944; The Old Clockmaker, 1945; Sleepy Marionette, 1946; Starlings, 1946; Commentator's March, 1949; A Quiet Stroll, 1951; High Adventure, 1951; The Young Ballerina, 1951; Heart O'London, 1952; Sidewalk, 1952; Hills of Brecon, 1953

Film scores: The Thirty-Nine Steps, 1935; Kipps, 1941; The Night has Eyes, 1942; The Way to the Stars, 1945; Noose, 1946; While I Live, 1947 [incl. The Dream of Olwen]; Flesh and Blood, 1951; The Apartment, 1960 [title theme: Jealous Lover]

DAVID ADES

Williams, Charles Francis Abdy (*b* Dawlish, 16 July 1855; *d* Milford, 27 Feb 1923). English organist, writer on music, composer and violinist. Having studied at Cambridge (1875–8), he went to New Zealand, where he played the organ at St Mary's, Auckland, and founded a glee club. Returning to England in 1879, he became organist and music master at Dover College in 1881. In 1882 he entered the Leipzig Conservatory, where he studied with Reinecke. As organist of St Mary's, West Brompton, London (1885–91), he did much to improve musical standards. Taking up the study of ancient Greek music and plainchant, he carried out research in Italy, Belgium and France. His writings and lectures led to his appointment at Bradfield College: for the annual Greek play he provided music based on authentic forms and taught the boys to play auloi and lyres constructed on ancient models. He trained the priests of Capri in the Solesmes system of chant in 1904. He also wrote some church music, chamber music and some incidental music for the Bradfield plays.

Williams, Charles Melvin. *See* WILLIAMS, COOTIE.

Williams, Clarence (*b* Plaquemine, LA, 8 Oct ?1893; *d* New York, 6 Nov 1965). American jazz and popular pianist and publisher. He moved to New Orleans in 1906 and travelled with a minstrel show as a singer and dancer in 1911. After returning to New Orleans he began a music publishing venture (*c*1915) with A.J. Piron. Later in the decade he moved briefly to Chicago and then permanently to New York, where he founded a music publishing firm and several music stores; he also organized many recording sessions, principally for Okeh (1923–30). The most important of Williams's groups was the Blue Five. Although noted more for its instrumental recordings made under Williams's name, including *Cakewalking Babies from Home* with Louis Armstrong and Sidney Bechet (1925, OK), this group was principally an accompanying band for blues and vaudeville singers. Williams also made nearly 100 recordings with his 'washboard' bands.

Although he recorded more frequently than any other black musician of the 1920s (apart from Fletcher Henderson), Williams was a dependable rather than an exceptional pianist; his importance to early jazz lay instead in his gift for organization. He published and promoted the work of such composers as Fats Waller, James P. Johnson, Willie 'the Lion' Smith and, most notably, Spencer Williams. His many publications (in which he may have been involved as co-composer) include *Royal Garden Blues*, *Baby, won't you please come home*, *I ain't gonna give nobody none of my jelly roll*, *'Tain't nobody's business if I do* and *Squeeze me*.

J.R. TAYLOR/MIKE HAZELDINE

Williams, Cootie [Charles Melvin] (*b* Mobile, AL, 10 July 1911; *d* New York, 15 Sept 1985). American jazz trumpeter and bandleader. He taught himself to play the trumpet and toured with the Young Family band (which included Lester Young) when he was only 14. In 1928 he went to New York, where he made his first recordings (with James P. Johnson) and played briefly in the bands of Chick Webb and Fletcher Henderson. By February 1929 he had joined the Duke Ellington orchestra as a replacement for Bubber Miley, beginning a long association which was to make him famous. In his first 11 years with Ellington his playing became an indispensable part of the band's sonority, and Ellington integrated solos for him into hundreds of compositions. Williams also took part in many excellent small-group recordings with Teddy Wilson, Billie Holiday, Lionel Hampton, Charlie Christian and other leading jazz musicians of the swing period.

After leaving Ellington in November 1940, Williams played for a year in Benny Goodman's band and small groups, then formed his own successful big band, which was booked several times at the Savoy Ballroom, New York, and included such important aspiring bop musicians as Charlie Parker and Bud Powell. Gradually, though still

at the height of his powers, Williams faded from public view. Forced to reduce his band to a smaller ensemble in 1948, and finally to discontinue it altogether, he became active as a rhythm-and-blues musician in the 1950s and later led his own small jazz group, with which he took part in several important recording sessions with Rex Stewart in 1957–8. In 1962 he rejoined Ellington's band, where he remained, with brief interruptions, until the late 1970s.

Williams was a master of swing-style jazz trumpet playing, and achieved a range of tone and shading on his instrument that was unsurpassed in his day. Having quickly mastered the growl and plunger effects of Bubber Miley, his predecessor in Ellington's band, Williams extended these techniques to encompass an unprecedented variety of moods and timbres, from gentle nostalgia to searing vehemence. Although he remained supreme in the use of the growl and plunger mutes, Williams was equally adept on the open instrument, particularly as an accompanist to jazz singers and as an interpreter of the blues. His playing inspired Ellington to one of his greatest masterpieces, *Concerto for Cootie* (1940, Vic.), where Williams may be heard using straight mute, plunger mute and open trumpet. In later years his style lost some of its subtlety but none of its urgency and swing, as attested by his performance in *New Concerto for Cootie* (on the album *Suite Thursday*, 1963, Atl.), written by Ellington to celebrate his return to the band.

Williams was also an effective if reluctant jazz singer, and collaborated with Ellington on several pieces, such as *Echoes of the Jungle* (1931, Vic.), as well as with Thelonious Monk on his well-known ballad *'Round Midnight* (1944).

J. BRADFORD ROBINSON

Williams, Edgar Warren (*b* Orlando, FL, 12 June 1949). American composer, theorist and conductor. He studied composition with Iain Hamilton and Paul Earls at Duke University (BA 1971), with Wuorinen, Davidovsky and Sollberger at Columbia University (MA 1973) and with Babbitt and J.K. Randall at Princeton University (MFA 1977, PhD 1982). He also studied conducting with Allan Bone and Monod. He has taught at Princeton (1977–8), the University of California, Davis (1978–9), and the College of William and Mary (from 1979), where he conducts the college symphony orchestra. He has also guest conducted a number of contemporary music ensembles. He has received many commissions from choral groups and instrumental ensembles and has won awards from the East/West Artists and the Ensemble Intercontemporaine for *Amoretti* (1980).

As a composer Williams uses both ordered and unordered pitch collections to determine thematic and harmonic materials; he strives to make audible the associations between pitch and interval by means of timbral, registral, rhythmic and dynamic relationships. He has a remarkable command of instrumental resources, imaginatively deploying sonorities within individual lines (as in *Amoretti*) or in combinations (*Across a Bridge of Dreams*, 1979–80) to clarify and intensify the progressions of polyphonic voices. Since 1985 his work has reflected a concern with both the private (*Piano Series*, 1985–92) and public (*Now Showing!*, 1993) functions of music. Williams's work as a theorist is exemplified in his book *Harmony and Voice Leading* (New York, 1992).

RICHARD SWIFT

Williams, Evan (*b* Mineral Ridge, OH, 7 Sept 1867; *d* Akron, OH, 24 May 1918). American tenor. He studied singing in Cleveland and New York, and became a professional church soloist in Brooklyn. In 1902 his voice failed during a performance of *Elijah* at Carnegie Hall, and for a while he renounced the singing profession. He visited Wales, however, and began afresh, singing in the first performance of David Jenkins's oratorio *Job* at Rhyl in 1904; his repertory grew rapidly and included Gerontius, for which he became famous. Williams returned to the USA in 1906 and became a leading concert and oratorio singer. He sang Aeneas in a concert performance of Berlioz's *Les Troyens à Carthage* in Cincinnati and Saint-Saëns's Samson to the Delilah of Schumann-Heink in concert in Chicago; he appears never to have sung on the operatic stage. A heavy schedule of concerts in Britain and the USA led to renewed vocal difficulties; but in his prime Williams was one of the most popular artists in the USA, and the sales of his recordings (many of them of simple ballads but some of oratorio and opera in English) were surpassed only by those of Caruso and McCormack.

J.B. STEANE

Williams, Gene. Pseudonym of LAWRENCE WRIGHT.

Williams, Grace (Mary) (*b* Barry, 19 Feb 1906; *d* Barry, 10 Feb 1977). Welsh composer. She was educated at Barry Grammar School and University College, Cardiff, where she took the degree of BMus in 1926 before continuing her studies with Vaughan Williams and Jacob at the RCM. Her fellow students there included Dorothy Gow, Imogen Holst and Maconchy, an unusually gifted group of women composers who maintained contact with each other in later years. In 1930 a travelling scholarship took Williams to Vienna, where she completed her studies with Egon Wellesz. On her return to London she taught for several years at Camden School for Girls and at Southlands College of Education. During the 1930s she enjoyed the friendship of Britten, but declined an invitation to act as his assistant (the position was later occupied by Imogen Holst).

In 1947 Williams returned to Wales, where she worked on educational programmes for the BBC and gradually made her name as a freelance composer. Most of her major works were written in response to commissions from the BBC, the Royal National Eisteddfod and festivals at Llandaff (Cardiff) and Swansea. Her output is mainly for orchestra and for voices with orchestra, and includes two symphonies (the first of which she withdrew), three concertos, a one-act opera and a mass. She also wrote several songs but showed little interest in instrumental chamber music, partly no doubt because of its relatively short tradition in Wales but also because her own musical temperament inclined more towards lyrical and declamatory forms than towards contrapuntal and dialectical ones (the direction 'liricamente' is one frequently encountered in her scores).

The music Williams wrote before about 1955 is to some extent influenced by that of her teacher Vaughan Williams. Elgar is another perceptible influence, and there are passages of chromatic writing reminiscent of Richard Strauss, for example in the last of the *Sea Sketches* and in the first two movements of the Violin Concerto. Folksong and traditional melodies are encountered in vocal settings and in the orchestral *Fantasia on Welsh Nursery Tunes*, a piece that loosely strings together Welsh tunes and one which won her a wide following, particularly in Wales. *Penillion for Orchestra*, written for the National Youth Orchestra of Wales in 1955, inaugurated a period of greater maturity and more pronounced individuality. Many of the later pieces are deeply national in feeling (e.g. *Ballads for Orchestra*, *Carillons*, the *Missa cambrensis* and *Castell Caernarfon*). Although they include no actual folk melodies they are shaped by the rhythms and cadences of old Welsh poetry and oratory. The so-called Scotch snap applied to a rising tone or semitone is a particularly distinctive fingerprint; another is the juxtaposing, or superimposing, of major and minor 3rds. While the harmony remains basically (though at times shiftingly) tonal, melodies are often cast in a mode that includes both the augmented (Lydian) 4th and the flattened 7th (and sometimes too the flattened 6th); much use is made also of octatonic scales. Structures involving quasi-improvisatory variation within a rigid stanzaic repetition are closely related to the oldest traditions of ballad and penillion singing in Wales. The Trumpet Concerto may be seen as the natural outcome of a lyrical, even expressive, approach to this instrument which characterizes most, if not all, of the later orchestral scores. Its slow movement is a passacaglia on a 12-note theme as rigorously constructed as any by Webern — a surprising excursion for a composer whose aversion to Schoenbergian serialism was well known.

A more cosmopolitan style is evident in Williams's only opera, *The Parlour*, to a libretto brilliantly adapted by the composer from a story by Guy de Maupassant. Comparison with Britten's Maupassant opera, *Albert Herring*, is inevitable, but Williams's music shows a genuine individuality and inventiveness, allied to a rare sense of stagecraft. Since its WNO première in 1966 *The Parlour* has been revived a number of times, and several other choral and orchestral pieces have been recorded. Another fine achievement of her later years, the *Missa cambrensis*, a large-scale setting of the mass ordinary with interpolations, has been unaccountably neglected since its first performance in 1971.

WORKS
(*selective list*)

Stage: The Parlour (op, 1, Williams, after G. de Maupassant: *En famille*), 1961, Cardiff, New Theatre, 5 May 1966

Orch: Fantasia on Welsh Nursery Tunes, 1940; Sinfonia concertante, pf, orch, 1941; Sym. no.1, 1943, withdrawn except Scherzo barbaro e segreto; Sea Sketches, str, 1944; The Merry Minstrel (Williams, after J.L. Grimm and W.C. Grimm), nar, orch, 1949; Vn Conc., 1950; Penillion for Orchestra, 1955; Sym. no.2, 1956; Processional, 1962; Tpt Conc., 1963; Carillons, ob, orch, 1965; Ballads, 1968; Castell Caernarfon, 1969

Choral: Hymn of Praise (Gogonedawg Arglwydd) (from the 12th-century Black Book of Carmarthen, trans. Williams), chorus, orch, 1939; The Dancers (H. Belloc, T. Chatterton, M. Sarton, K. Raine), S, female chorus, str, hp/pf, 1951–2; All seasons shall be sweet (S.T. Coleridge and others), S, female chorus, small orch/pf, 1959; Benedicite, SA/SATB youth chorus, orch, 1964; Missa cambrensis, S, A, T, B, boys' chorus, chorus, orch, 1971; Ye highlands and ye lowlands (anon., R. Burns, W. Scott), male chorus, pf, 1972; Ploratione cygni (9th century), 1972; Ave maris stella (8th century), SATB, 1973; 2 interlinked choruses: Harp Song of the Dane Women (R. Kipling), Mariners' Song (T.L. Beddoes), SATB, 2 hn, hp, 1975

Other vocal: The Song of Mary (Magnificat setting), S, chbr orch, 1939; 6 Poems of Gerard Manley Hopkins, A, str sextet, 1959; The Billows of the Sea (W. Scott, A. Tennyson, J. Gay, anon.), A, pf, 1969; Fairest of Stars (J. Milton), S, orch, 1973; My Last Duchess (R. Browning), Bar, pf, 1974; other songs, folksong arrs.

MALCOLM BOYD

Williams, (Hiram) Hank (*b* nr Georgiana, AL, 17 Sept 1923; *d* Oak Hill, WV, 1 Jan 1953). American country music singer, guitarist and songwriter. He performed in

the honky tonks of southern Alabama before appearing on the 'Louisiana Hayride' (1947–9, 1952–3) and 'Grand Ole Opry' (1949–52) radio programmes with his band, the Drifting Cowboys. In 1946 he auditioned for Fred Rose, who signed him to a songwriting contract with Acuff-Rose Publications and subsequently managed all aspects of his career. Rose produced all of Williams's recordings, edited his songs and collaborated with him on several of them (including *Mansion on the Hill*, 1948, and *Kaw-Liga*, 1953).

Williams's strained, mournful singing style, partly a result of addiction to liquor and drugs as well as a troubled marriage, was influenced by Roy Acuff and southern gospel music. He also drew heavily on black music. His recording of *Lovesick Blues* (1949) was on the country chart for 42 weeks, *Cold, Cold Heart* (1951) for 46. Such songs as *Your Cheatin' Heart* (written 1952), a message to his former wife, reflect his unsettled life. Although his style was thoroughly rural, Williams contributed significantly to bridging the gap between country and popular music; he also recorded 'recitations' under the pseudonym Luke the Drifter. His singing found little acceptance among urban listeners, but his compositions were often successfully recorded by such entertainers as Tony Bennett (*Cold, Cold Heart*) and Frankie Laine (*Kaw-Liga*). On the formation of the Country Music Hall of Fame (1961), Williams, Jimmie Rodgers and Fred Rose were the first to be honoured with membership. His son Hank Williams jr (*b* Shreveport, LA, 26 May 1949) also became a country-music performer, and one of the most commercially successful acts of the 1980s.

BILL C. MALONE/R

Williams, Harold (*b* Woollahra, Sydney, 3 Sept 1893; *d* Gordon, Sydney, 5 June 1976). Australian baritone. He came to professional singing after showing outstanding proficiency in sport. After war service in France and Belgium he took lessons with Charles Phillips in London and made that city his base for most of his career. Following his Wigmore Hall début in 1919, he established a reputation primarily as a concert singer in works such as *Elijah*, *The Dream of Gerontius*, *The Kingdom* and Coleridge-Taylor's *Scenes from 'The Song of Hiawatha'*, being admired particularly for his even and virile tone, incisive enunciation and exemplary phrasing. He sang the principal baritone roles in *Tannhäuser*, *Otello*, *Pagliacci* and other operas at Covent Garden, and sang two bass roles, Boris Godunov and Gounod's Méphistophélès, at Covent Garden and elsewhere. He was one of the 16 soloists for whom Vaughan Williams wrote his *Serenade to Music* in 1938; he appeared in most Prom seasons from 1921 to 1951, performed as a soloist at the coronations of George VI and Elizabeth II and was associated with the Edinburgh Festival from its beginning in 1947. Williams toured Australia as a soloist in 1929 and 1940–44, taught at the NSW State Conservatorium in Sydney from 1952 (at Goossens's invitation) and took part, notably as Escamillo, in the postwar Sydney seasons that led to the establishment of a permanent professional opera company.

ROGER COVELL

Williams, Henry F. (*b* Boston, 13 Aug 1813; *d* Boston, 3 July 1903). American composer. He studied music from the age of seven and was reportedly bound until the age of 21 to the musician von Hagen (possibly Peter Albrecht von Hagen jr). He conducted a music studio in Boston and frequently arranged music for Patrick S. Gilmore's band. When Frank Johnson died in Philadelphia in 1844 he was invited to arrange for the reconstituted Johnson band by its new leader, Joseph Anderson.

Williams composed numerous marches, overtures, dance music and songs. His best-known compositions include the ballads *Lauriett[e]* (1840, ed. in Trotter and Boyer), *Come love and list awhile* (1842), *It was by chance we met* (1866) and *I would I'd never met thee* (1876, ed. in Boyer), a set of five waltzes, *Parisian Waltzes* (1844, ed. in Trotter), and the anthem *O give thanks* (n.d., ed. in Boyer).

JOSEPHINE WRIGHT

Williams, Hugh. *See* GROSZ, WILHELM.

Williams, J. Mayo [Ink] (*b* Monmouth, IL, 25 July 1894; *d* Chicago, 2 Jan 1980). American jazz and blues record producer. After attending Brown University and working for a period as a professional football player, he became a producer and talent scout for Paramount's race series in Chicago around 1924; he also ran the associated publishing company Chicago Music. In March 1927 he left Paramount to establish his own Chicago Record Company, but its Black Patti label survived only until around September of that year. He worked for the Vocalion and Brunswick race series, and again managed a related publishing operation, which remained in existence after he became head of the race department of the newly formed Decca company (1934). As one of the very few African Americans employed in positions of responsibility in the recording business before World War II, he played an important role in recording many of the great jazz and blues musicians of the period. In the mid-1940s he worked as a freelance producer and ran a succession of small labels – Chicago, Southern, Harlem and South Center – whose material was also leased to other companies, such as King and Decca. From the late 1940s until his retirement in the early 1970s his principal label was Ebony, on which he issued both newly recorded material and electronically modified reissues of pre-war material.

HOWARD RYE

Williams, John (Christopher) (i) (*b* Melbourne, 24 April 1941). Australian guitarist. He began learning the guitar at the age of four with his father, Leonard Williams. He moved to England in 1952 and subsequently participated in Segovia's summer courses at the Accademia Musicale Chigiana, Siena: later he attended the RCM, where he studied piano and music theory. After his Wigmore Hall début in 1958, he gave highly successful concerts in Paris and Madrid. In 1962 he toured the Soviet Union, and in 1963 made débuts in Japan and the USA. He was professor at the RCM (1960–73), deputized for Segovia at the Santiago de Compostela summer courses (1961–2) and became visiting professor at the RNCM in 1973. He was one of the first classical musicians to play at Ronnie Scott's Club, London. He has given duo recitals with Julian Bream and enjoyed musical collaborations with musicians such as Cleo Laine, Paco Peña, Itzhak Perlman and André Previn. In the 1970s his concerts and recordings stimulated a revival in the compositions of the Paraguayan guitarist Agustín Barrios.

In 1978 Williams performed music for the film *The Deer Hunter*. In 1979 he formed the group Sky, dedicated to its own distinctive popular repertory. Leaving Sky in 1984, he formed the ensemble 'John Williams and Friends', which toured extensively (1983–7). He was artistic director of South Bank Summer Music from 1984 to 1986 and of the Melbourne Arts Festival in 1987. After touring the USA (1990–91), he formed a new group, Attaca, to play specially commissioned contemporary music. During the 1990s he increased his concert tours in Europe, East Asia, the USA and Australia and continued to expand his already prolific recording activities. He was made an OBE in 1980 and was awarded the Order of Australia in 1987; he is an honorary fellow of the RCM and RNCM.

From the start of his career, Williams has displayed remarkable technical mastery, which has influenced subsequent generations of players and raised the technical expectations of the instrument to new heights. Many composers have written works for him, including Leo Brouwer, Stephen Dodgson and André Previn.

GRAHAM WADE

Williams, John (Towner) (ii) (*b* New York, 8 Feb 1932). American composer, arranger, conductor and pianist. He learnt the piano from the age of eight and, after moving to Los Angeles with his family in 1948, studied with the pianist-arranger Bobby Van Eps. He served in the US Air Force (1951–4), orchestrating for and conducting service bands, then moved back to New York, where he studied for a year with Rosina Lhévinne at the Juilliard School, and played in jazz clubs and recording studios. Returning to the West Coast he enrolled at UCLA and took up private composition studies with Arthur Olaf Andersen and Castelnuovo-Tedesco, among others. From 1956 Williams was a studio pianist in Hollywood, and two years later began arranging and composing music for television, contributing the main title to *Checkmate* (1960; see Thomas and Burlingame). Through the mid-1960s he composed for several series, and worked for Columbia Records as a pianist, arranger and conductor; he also made a number of albums with André Previn. During this period Williams began scoring feature films, with many of his earliest scores for comedies, such as *John Goldfarb, Please Come Home* (1964) and *How to Steal a Million* (1966). He also worked on more serious projects with major directors, including Robert Altman (*Images*, 1972, and *The Long Goodbye*, 1973). Williams briefly became typecast as a disaster-film specialist, owing to his successful score for *The Poseidon Adventure* (1972); it contained one of his few popular song hits, 'The Morning After', with lyrics by Marilyn and Alan Bergman. Indicative of his talent at this time are the Americana of *The Reivers* (1969), the heartfelt English lyricism of *Jane Eyre* (1971) and the rousing Western style of *The Cowboys* (1972). Williams later arranged music from each of these three films into popular concert works.

The long and close association of Williams with the director Steven Spielberg began with *The Sugarland Express* (1974) and *Jaws* (1975). In 1977 he scored Spielberg's masterly *Close Encounters of the Third Kind*, released only a few months after *Star Wars*, the film that began his similarly close association with director George Lucas. These and following films marked Williams's ascent to a pre-eminent position in Hollywood, as well as the re-emergence and critical approbation of the symphonic film score, dormant for nearly a decade. Within the next six years came music of comparable power for *The Fury* (1978), *Superman* (1978), *Dracula* (1979), *The Empire Strikes Back* (1980), *Return of the Jedi* (1983), *Raiders of the Lost Ark* (1981) and *E.T.: the Extra Terrestrial* (1982). Since then, Williams has remained a uniquely famous and popular film composer; he has generally scored two films each year, including every Spielberg film except *The Color Purple* (scored by Quincy Jones). No less notable are his recent scores for the director Oliver Stone (*Born on the Fourth of July*, 1989, *JFK*, 1991, and *Nixon*, 1995), as well as lighter, more lyrical and witty projects such as *The Accidental Tourist* (1988), *Stanley and Iris* (1990), *Home Alone* (1990) and *Sabrina* (1995). He has also composed several signature tunes for NBC and a series of popular Olympic fanfares; by 2000 he had received five Academy Awards from 36 nominations and over 30 Grammy nominations and awards.

Williams freely acknowledges his stylistic debt to various 20th-century concert composers – among them Elgar, whom he greatly admires – and perpetuates the traditions of film-scoring developed by such composers as Korngold, Newman, Rózsa, as well as arrangers such as Salinger. His own skill as an arranger, for example in *Goodbye, Mr. Chips* (1969), *Fiddler on the Roof* (1971) and *Tom Sawyer* (1973), owes much to Salinger, as does the poetic feeling for the beauty of sound manifest in all his orchestral work. In the 1980s, in films such as *Indiana Jones and the Temple of Doom* (1984) and *Empire of the Sun* (1987), Williams steadily expanded his stylistic range, partly by incorporating choral textures (sometimes with

text). His unerring dramatic instinct and musical inventiveness are well shown in Spielberg's contrasting projects, *Jurassic Park* and *Schindler's List* (both 1993). Moreover, his score for the latter, along with those for *Born on the Fourth of July*, *JFK* (1991) and *Saving Private Ryan* (1998), display his acute response to tragedy and sense of the epic.

Williams is fundamentally a romantic traditionalist, but often blends traditional musical syntax and expression with avant-garde techniques and elements of popular music. More than any of his contemporaries he has developed the ability to express the dramatic essence of a film in memorable musical ideas; likewise, he is able to shape each score to build climaxes that mirror a particular narrative structure. The score to *Close Encounters*, for example, is built upon a small range of related motivic fragments: a 5-note 'aliens' theme', the first four notes of the Dies Irae, an ascending tritone and a related, disguised kernel from the Disney standard, *When You Wish Upon a Star*. These fragments, relevant to the narrative, are interwoven to shape a score with dramatic, emotional and musical logic, and which moves from a harmonically clouded beginning to a lush and expansive diatonic climax.

Williams has always maintained a steady flow of concert works, mostly written in an advanced but still tonal and intelligibly expressive idiom. Among the early works, his *Essay* for strings (1966) has been widely played and his Symphony (1966) received an important London performance in 1972 under Previn. He has composed several concertos, beginning with dissonant ones for flute (1969) and violin (begun in 1974, following the death of his first wife, and completed in 1976). More recent concertos are written in simpler idioms, and the bassoon concerto (*The Five Sacred Trees*, 1995), inspired by the writings of the British poet and mythologist Robert Graves, is personal and reflective. In 1980 Williams succeeded Arthur Fiedler as conductor of the Boston Pops Orchestra, a position which enabled him to compose many occasional pieces, as well as to conduct numerous best-selling recordings of works in the classical and film repertories. Though he retired from this position in 1993, he has continued to make frequent guest appearances in Boston and at Tanglewood, as well as with numerous other major orchestras, ranking high among America's most eloquent and representative composers.

WORKS
(*selective list*)

FILM SCORES
directors in parentheses

Diamond Head (G. Green), 1963; John Goldfarb, Please Come Home (J. Lee Thompson), 1964; How to Steal a Million (W. Wyler), 1966; Fitzwilly (D. Mann), 1967; Valley of the Dolls (M. Robson), 1967; Heidi, 1968 [television]; The Reivers (M. Rydell), 1969; Goodbye, Mr. Chips (H. Ross), 1969 [adaption of score by L. Bricusse]; Fiddler on the Roof (N. Jewison), 1971 [adaption of score by J. Bock]; Jane Eyre, 1971 [television film]; The Cowboys (Rydell), 1972; Images (R. Altman), 1972; The Poseidon Adventure (R. Neame), 1972; The Long Goodbye (Altman), 1973; The Paper Chase (J. Bridges), 1973; Tom Sawyer (D. Taylor), 1973; Cinderella Liberty (Rydell), 1974; Conrack (M. Ritt), 1974; Earthquake (Robson), 1974; The Towering Inferno (J. Guillermin and I. Allen), 1974

The Sugarland Express (S. Spielberg), 1974; Jaws (Spielberg), 1975; Family Plot (A. Hitchcock), 1976; The Missouri Breaks (A. Penn), 1976; Close Encounters of the Third Kind (Spielberg), 1977; Star Wars (G. Lucas), 1977; The Fury (B. de Palma), 1978; Superman (R. Donner), 1978; Dracula (J. Badham), 1979; 1941 (Spielberg), 1979; The Empire Strikes Back (I. Kershner), 1980; Raiders of the Lost Ark (Spielberg), 1981; E.T.: the Extra Terrestrial (Spielberg), 1982; Monsignor (F. Perry), 1982; Return of the Jedi (R. Marquand), 1983; Indiana Jones and the Temple of Doom (Spielberg), 1984; The River (Rydell), 1984; Empire of the Sun (Spielberg), 1987; The Witches of Eastwick (G. Miller), 1987

The Accidental Tourist (L. Kasdan), 1988; Always (Spielberg), 1989; Born on the Fourth of July (O. Stone), 1989; Indiana Jones and the Last Crusade (Spielberg), 1989; Home Alone (C. Columbus), 1990; Presumed Innocent (A.J. Pakula), 1990; Stanley and Iris (Ritt), 1990; Hook (Spielberg), 1991; JFK (Stone), 1991; Far and Away (R. Howard), 1992; Jurassic Park (Spielberg), 1993; Schindler's List (Spielberg), 1993; Nixon (Stone), 1995; Sabrina (S. Pollack), 1995; Sleepers (B. Levinson), 1996; Amistad (Spielberg), 1997; The Lost World (Spielberg), 1997; Rosewood (J. Singleton), 1997; Seven Years in Tibet (J.-J. Annaud), 1997; Saving Private Ryan (Spielberg), 1998; Stepmom (C. Columbus), 1998; Star Wars, the Phantom Menace (Lucas), 1999

TELEVISION SERIES AND THEMES

1958–60: Episodes of Bachelor Father; Checkmate [also title theme]; General Electric Theater; Gilligan's Island; Tales of Wells Fargo; Wagon Train; Wide Country
1961–3: Alcoa Premiere
1963–5: Kraft Suspense Theater
1965–8: Lost in Space, The Time Tunnel, Land of the Giants
1985: The Mission Theme and others, NBC News
1988: The Olympic Spirit, NBC Sports

OTHER WORKS

Orch and choral: Essay, str, 1966; Sym., 1966, rev. 1972; Jubilee 350 Fanfare, 1980; America . . . the Dream Goes On (A. and Marilyn Bergman), male v, chorus, orch, 1981; Fanfare for a Festive Occasion, 1981; Pops on the March, 1981; Esplanade Ov., 1982; Olympic Fanfare and Theme, 1984; Celebration Fanfare, 1986; Liberty Fanfare, 1986; A Hymn to New England, 1987; We're Lookin' Good (A. & M. Bergman), 1987; Fanfare for Michael Dukakis, 1988; To Lenny! To Lenny!, 1988; Fanfare for Ten-Year-Olds, 1989; Winter Games Fanfare, 1989; Celebrate Discovery!, 1990; Fanfare for Prince Philip, 1992; Sound the Bells!, 1993; Satellite Celebration, 1995; Variations on 'Happy Birthday', 1995; Summon the Heroes, 1996; Seven for Luck (R. Dove), song cycle, S, orch, 1998

Concs.: Fl Conc., 1969; Vn Conc., 1976; Tuba Conc., 1985; Clt Conc., 1991; Cel Conc., 1994; Bsn Conc., 'The Five Sacred Trees', 1995; Tpt Conc., 1996; Hn Conc., [forthcoming]

Other Inst: Pf Sonata, 1951; Prelude and Fugue, wind ens, perc, 1968; A Nostalgic Jazz Odyssey, 1971; many suites adapted from film music

Principal publishers: Colgems, Fox Fanfares, H. Leonard, MCA Music, Warner Bros.

CHRISTOPHER PALMER/MARTIN MARKS

Williams, Joseph. English music printers and publishers. The firm was established in London in 1808 by Lucy Williams, a music and copperplate printer who printed

some works for Clementi & Co. She was presumably a relative of John Williams, a music printer active in the 1780s at Fountain Court, Cheapside, since this was also her first address. In 1843 she took her son Joseph William Williams (1819–83) into the firm, which was known as Lucy Williams & Son until the following year, after which Joseph continued in his own name. He was succeeded in 1883 by his son, Joseph Benjamin Williams (1847–1923), who, under the pseudonym of Florian Pascal, also composed some 200 songs, piano pieces, cantatas, comic operas and operettas. He in turn was succeeded by his eldest son, Florian Williams (1879–1973), for some time helped by his brother Ralph Williams (1881–1948). A family company, Joseph Williams Ltd, was formed in 1900; from 1930 they were joined by Montagu Normington Williams (1911–42). In July 1961 AUGENER took over the business but continued to operate the firm separately until May 1962, when Galliard Ltd was formed; this in turn was taken over by STAINER & BELL, in whose catalogue Joseph Williams's works now appear.

The firm published almost every kind of work, with particular emphasis on light opera and ballads. The acquisition of the British rights of Robert Planquette's highly successful operetta *Les cloches de Corneville* in 1877 laid the foundations of the firm's fortunes. The serious side of the firm's catalogue included works by Elgar, Vaughan Williams, Bax, Bantock, Ireland and others, and they were concerned in the publication of G.E.P. Arkwright's Old English Edition (1889–1902) of Elizabethan and Jacobean music. They also had a strong interest in educational music, and published books of music for various examining bodies.

PETER WARD JONES

Williams, Martin (Tudor Hansford) (*b* Richmond, VA, 9 Aug 1924; *d* Alexandria, VA, 11 or 12 April 1992). American music critic and writer on jazz. He studied English literature at the University of Virginia (BA 1948), the University of Pennsylvania (MA 1950) and Columbia University. He was director of the jazz and American culture programmes in the division of performing arts of the Smithsonian Institution from 1970 until early 1983, when he became editor of special projects in books and recordings at the Smithsonian Press. He selected and annotated recordings for the Smithsonian collections of Classic Jazz and (with Gunther Schuller) Big Band Jazz. In addition to jazz criticism for the *Saturday Review*, *Evergreen Review*, *Jazz Journal*, the *New York Times*, *Down Beat* and various other journals, Williams wrote several books.

WRITINGS

ed.: *The Art of Jazz: Essays on the Nature and Development of Jazz* (New York, 1959/*R*)

PAULA MORGAN

Williams, Mary Lou [née Scruggs, Mary Elfrieda] (*b* Atlanta, GA, 8 May 1910; *d* Durham, NC, 28 May 1981). American jazz pianist and composer. She grew up in Pittsburgh, where she played professionally from a very early age; taking her stepfather's name, she performed as Mary Lou Burley. In 1925 she joined a group led by John Williams, whom she married. When in 1929 Andy Kirk took over Terrence Holder's band, of which John was a member, Mary Lou served the group as deputy pianist and arranger until 1931, at which time she became a regular member. The fame of Kirk's band in the 1930s was due largely to Williams's distinctive arrangements, compositions and solo performances on the piano; she also provided noteworthy swing-band scores for Benny Goodman, Earl Hines, Tommy Dorsey and others. After leaving Kirk in 1942 Williams formed her own small group in New York, with her second husband, Shorty Baker, as trumpeter. She briefly served as staff arranger for Duke Ellington, writing for him the well-known *Trumpets No End* in 1946. In the same year three movements from the *Zodiac Suite* were performed at Carnegie Hall by the New York PO, a very early instance of the recognition of jazz by a leading symphony orchestra.

By now Williams had become an important figure in New York bop, contributing scores to Dizzy Gillespie's big band and advancing the careers of many younger musicians. She was based in Europe from 1952 to 1954, when she retired from music to pursue religious and charitable interests. However, she resumed her career in 1957 and remained active throughout the 1960s and 70s, leading her own groups in New York clubs, composing sacred works for jazz orchestra and voices and devoting much of her time to teaching. In 1970, as a solo pianist, and providing her own commentary, she recorded *The History of Jazz* (FW). Towards the end of her life she received a number of honorary doctorates from American universities, and from 1977 taught on the staff of Duke University.

Williams was long regarded as the only significant female musician in jazz, both as an instrumentalist and as a composer, but her achievement is remarkable by any standards. She was an important swing pianist, with a lightly rocking, legato manner based on subtly varied stride and boogie-woogie bass patterns. Yet by constantly exploring and extending her style she retained the status of a modernist for most of her career. She adapted easily in the 1940s to the new bop idiom, and in the 1960s her playing attained a level of complexity and dissonance that rivalled avant-garde jazz pianism of the time, but without losing an underlying blues feeling. A similar breadth may be seen in her work as a composer and arranger, from her expert swing-band scores for Kirk (*Walkin' and Swingin'*, 1936, Decca; *Mary's Idea*, 1938, Decca) to the large-scale sacred works of the 1960s and 1970s. Her *Waltz Boogie* (1946, Vic.) was one of the earliest attempts to adapt jazz to non-duple metres. Among her sacred works are a cantata, *Black Christ of the Andes* (1963, Saba), and three masses, of which the third, *Mary Lou's Mass* (1970, Mary), was commissioned by the Vatican and became well known in a version choreographed by Alvin Ailey.

WORKS
(*selective list*)

Sacred: St Martin de Porres (Black Christ of the Andes) (A. Woods), SSATTBB, pf, 1962 [arr. vv, jazz trio, 1965]; Mass, chorus, pf, 1963; The Devil, chorus, pf, *c*1963; Mary Lou's Mass (Music for Peace), 1969 [rev. 1971; arr. children's chorus, 1975; various other arrs.]

Big band scores: Cloudy, 1929; Froggy Bottom, 1929; Messa Stomp, 1929; Walkin' and Swingin', 1936; Little Joe from Chicago, 1936–8 [collab. H. Wells]; Mary's Idea, 1936–8; Roll 'em, 1937; Trumpets No End, 1946 [from Berlin: Blue Skies]

Jazz charts: Zodiac Suite, 1945; In the Land of Ooo-bla-dee, *c*1945 [collab. M. Orient]; Waltz Boogie, 1946; Perdido, *c*1957; I love him, 1957; A Fungus Amungus, 1963; Blues for Peter, 1965; Medi I, *c*1974; Medi II, *c*1974; Play it momma, *c*1974; Praise the Lord, *c*1974

Pf: 5 Pf Solos, 1941; 6 Original Boogie Woogie Pf Solos, 1944

Principal publishers: Leeds and Robins, Cecelia Publishing Co.

J. BRADFORD ROBINSON

Williams, Peter (Frederic) (*b* Wolverhampton, 14 May 1937). English musicologist and organist. He was a scholar at St John's College, Cambridge (1955–62; BA 1958, MusB 1959), where he studied with Thurston Dart and Raymond Leppard, and where he took the doctorate in 1963 with a dissertation on English organ music and organs 1714–1830; from 1964 he studied the harpsichord with Gustav Leonhardt. In 1962 he went to Edinburgh University as lecturer in music and subsequently became reader (1972), professor (1982) and dean (1984). In 1969 he was appointed director of the Russell Collection of harpsichords and clavichords at the university. He became professor at Duke University, North Carolina, in 1985, and director of its Center for Performance Practice studies in 1988. He was appointed John Bird professor at the University of Wales, Cardiff, in 1996. He became editor of the *Organ Yearbook* at its inception in 1970.

Williams is a clear and vigorous writer on music, with firm views on organ structure and history acquired during extensive research on European visits; he has also written on interpretation, notably concerning continuo accompaniment. In a manner characteristic of Dart's pupils, his work shows a clearcut relationship between study of source material, instruments and practical performance, and his own thoughtful and often original harpsichord interpretations of, for example, Bach and Couperin have been praised. He has edited numerous volumes of keyboard music by Bach, Handel and others, and is general editor of Bach's organ music for the New Oxford J.S. Bach Edition.

DAVID SCOTT/R

Williams, Thomas (*fl* 1682–1729). English organist and composer. He followed James Hawkins's brief tenure as organist of St John's College, Cambridge, in 1682, and was himself succeeded by Bernard Turner (*fl* 1729–77) in 1729. According to Thomas Tudway he was also 'one of the choirs of King's and Trinity', whether successfully or simultaneously is not clear. An organbook at St John's College (MS K52) is largely in his hand and contains

services and anthems by him as well as pieces by William Child, Tudway, Batten and Henry Aldrich. Much of his Service in A minor is in triple time, but it is competent enough.

WORKS

[Verse] Service, a (Mag, Nunc), *GB-Lbl* (score)
Service, E (TeD, Jub, Ky, Cr), *Cjc** (inc.)
Service, G (TeD, Jub), *Cjc** (inc.)
Chant, D, *Ckc*
3 anthems: Arise, shine, O Zion, *Ckc*, *Cu* (inc.), *Lbl*, *Y*; Come holy ghost, *Cjc** (inc.); O clap your hands, *Cjc** (inc.), *Ckc** (score)
Doubtful: O sing unto the Lord, anthem, *Cjc** (inc.)

IAN SPINK

Williams, Tony [Anthony] (*b* Chicago, 12 Dec 1945; *d* Daly City, CA, 23 Feb 1997). American jazz drummer. He studied privately with Alan Dawson and, while still a child, played with Art Blakey and Max Roach; other influences were Philly Joe Jones, Jimmy Cobb and Louis Hayes. In 1959 Williams began an important association with Sam Rivers, who became his informal mentor. In late 1962 he accompanied Jackie McLean, who invited him to join his group in New York. Here he was noticed by Miles Davis and in May 1963 began to play in Davis's quintet; Williams's performance is most notable on the album *Miles Smiles* (1966, Col.). Williams stayed with Davis until mid-1969, earning an international reputation for the brilliance of his playing and for his interaction with other musicians. He frequently performed and recorded with others, including Eric Dolphy, Herbie Hancock (notably the album *Maiden Voyage*, 1965, BN) and Rivers. As Davis's quintet moved towards a fusion of jazz with rock, soul and other elements, Williams became interested in forming a similar group of his own; the trio Lifetime, with the organist Larry Young and John McLaughlin, issued its first recordings in 1969, but the group was not commercially successful, and its personnel changed over the next three years. In 1972 he joined Stan Getz, before a period of inactivity as a performer (1973–5). At various times in the late 1970s and early 80s Williams toured and recorded with Herbie Hancock, Wayne Shorter and other former associates under the name V.S.O.P., and from 1986 to 1993 he led a quintet. He also premiered his composition *Rituals* (for string quartet, piano, drums and cymbals) in a performance with Hancock and the Kronos Quartet at the San Francisco Jazz Festival in 1991 and the following year participated in the Miles Davis Tribute Tour.

Williams was a highly innovative drummer and a prime influence on jazz styles of the 1970s. From the 1960s he displayed astounding intuition in his accompaniment of soloists, often playing rhythmic figures together with the improviser. His own solos were dramatic essays composed of percussive effects without metre. Even at the fastest of tempos Williams's playing was characteristically delicate and light, and punctuated by surprising dynamic contrasts; he negotiated ritardandos and accelerandos with ease. He avoided the conventional accenting of alternate beats with the hi-hat, instead involving it in accents and drum patterns, and by 1966 he had introduced his trademark of closing the cymbal on every beat. His general approach to the drum kit, in which he focussed on the independence of the limbs, and his specific techniques with the hi-hat and other instruments were widely emulated by younger drummers. All recordings by Williams's own groups from 1969 contain heavily amplified guitar and driving rock rhythms, as well as experiments with dissonant sound effects. Williams played in a different style with these groups, using larger drums and thicker sticks. After his return to a jazz context in 1976, however, he played in a somewhat heavier manner than in his performances of the 1960s, but with equal brilliance and ingenuity.

LEWIS PORTER

Williams, William (bap. ?London, ?1 Aug 1675; bur. London, 20 Jan 1701). English instrumentalist and composer. He was presumably the William Williams who was a Westminster Abbey choirboy in 1685, and may have been the one baptized at St Margaret's, Westminster on 1 August 1675, the son of Henry and Mary. He was made an extraordinary member of the royal band by a warrant dated 30 March 1695, and was given a salaried place by a warrant dated 6 November 1697. His early death did not pass unmarked. William Congreve mentioned it in a letter dated 28 January 1701, and there is a piece entitled 'M^r^. Williames Farwell' in John Eccles's suite for Mary Pix's play *The Double Distress* (March or April 1701). On 28 April 1701 a concert was given at York Buildings 'by the best Masters for the Benefit of Mr William Williams (late Master of Musick) his widow, and three small Children', consisting of 'all new Musick, part of it being his own'. There was another benefit concert for Mrs Williams on 11 December 1706.

Williams's six trio sonatas are inventive and accomplished works in the Anglo-Italian idiom established by Purcell. Nos.1, 3 and 5 are for violins and nos.2, 4 and 6 for recorders, but the composer pointed out when he invited subscriptions on 24 December 1696 that 'those for the Flutes being writ three notes lower, will go on the Violins, and those for the Violins being rais'd will go on the Flutes, which will make six for each instrument'; the collection finally appeared in an engraved edition in January 1700. The last of the set lives up to its title, 'Sonata in immitation of Birds'. The sonatas for recorder and continuo and two recorders are rather feeble, and are probably student works. The songs have some imaginative harmonies and expressive vocal writing.

WORKS

Air, F, vn, b, in J. Lenton, *The Gentleman's Diversion* (London, 1693)
6 pieces, 2 rec, 1695[6]
Haste, haste ye Britains, song, for the Peace of Ryswick (London, 1697) [taken from his lost musical entertainment for the occasion]
Must I a girl forever be, song, 2vv, b, in *The Island Princess* (play, P.A. Motteux), 1699, *Lbl* (facs. in MLE, C2, 1985), 1699[5]

6 Sonatas in 3 Parts, d, C, A, a, c, F, 2 vn/2 rec, b vn/viol, bc (org/hpd/archlute) (London, 1700, 2/1703); ed. G. Beechey (London, 1993); I. Payne (Hereford, 1998)
A Sonata for a Single Flute, d, rec, bc (London, 1700); ed. in HM, ccviii (1971)
Sonata, F, 2 rec, 40 airs anglois, ii (Amsterdam, 1702/*R*); ed. H. Ruf, *Zwei Duos alter englischer Meister* (Mainz, 1971)
Untitled theatre suite, 2 vn, va, b, (inc.), *GB-Och* 351–2
4 songs, 1696[9], Wit and Mirth, iv (London, 1706)
Catch, The Pleasant Musical Companion, ii (London, 1707)

PETER HOLMAN

Williams, William Carlos (*b* Rutherford, NJ, 17 Sept 1883; *d* Rutherford, 4 March 1963). American poet. He studied medicine at the Universities of Pennsylvania (1902–6) and Leipzig (1908–9), and worked as a physician until his retirement in the mid-1950s. He wrote novels, plays, short stories and essays, but is principally remembered as a poet. He published an autobiography in 1951 and was awarded the Pulitzer Prize posthumously, in 1963, for *Pictures from Brueghel and other Poems* (1962).

Williams's poetry used an adaptive metre and line based on authentic American speech patterns. He consciously dissociated himself from the allusive verse of such contemporaries as Pound (a lifelong friend) and Eliot; the motto 'no ideas but in things', which appears in his five-book epic *Paterson* (1946–58), became an enduring tenet of his poetic imagination. Williams loved music and saw its rhythmic organization as analogous to poetic metre and line. His metrical experiments culminated in the creation of a new form, the variable foot and triadic line, best exemplified in *Paterson*. His collection *The Desert Music* (1955), later the basis of an extended orchestral setting by Steve Reich (1982–4), celebrates the 'music of events'; here as elsewhere music is conceived as the image of the imagination, creating through its rhythmic cohesion a unity of subject and object.

The early imagistic poems Williams's first major collections, *Al Que Quiere!* (1917), *Kora in Hell* (1920), and *Spring and All* (1923) have been more frequently set than his later ones, though in recent years the many rhythmic and musical references in his later works have attracted the interest of composers. Leibowitz set text by Williams in his dramatic symphony *Perpetuum mobile 'The City'* (1951), as well as in his op.6 and op.25 song collections. Other settings include *This is Just to Say* (1977) by Robin Holloway, two of *The Nantucket Songs* (1979) by Rorem and, among many others by American composers, works by Babbitt, Binkerd, Paulus and Harbison (*Words from Paterson*, 1989; *The Rewaking*, 1991).

KATHLEEN HAEFLIGER

Williamson, John Lee. *See* WILLIAMSON, SONNY BOY.

Williamson, Malcolm (Benjamin Graham Christopher) (*b* Sydney, 21 Nov 1931). Australian composer, pianist and organist. He studied the piano privately with Sverjensky (1944–50) before enrolling at the NSW State Conservatorium of Music (1949–50) where his teachers included Eugene Goossens; he pursued further composition study in London with Elisabeth Lutyens and Erwin Stein (1953). After settling in London permanently, he worked in a publishing house, as an organist and choirmaster, and as a nightclub pianist before devoting himself to composition full-time. His breadth of interests has been reflected in his awards, which include a creative arts fellowship to the Australian National University to teach Scandinavian literature (1973) and a medical research fellowship to the University of NSW (1981). Other honours include appointments as Master of the Music to Her Majesty the Queen (1975), CBE (1976), Member of the Order of Australia (1987) and the Bernard Heinz Award (1989).

Soon after his conversion to Catholicism in 1952, Williamson made an intensive study of the religious and organ music of Messiaen. With *Fons amoris* for organ

Malcolm Williamson

(1955–6), he embarked upon a whole repertory of music on religious themes. His view of worship as a participatory experience is embodied in his *Carols of King David* (1970), which requires congregational response. His two books of *Peace Pieces* for organ (1971) meld religious and human themes. Personal expressions of the liturgy are included in the Mass of the Feast of Christ the King (1977), the Mass of St Margaret of Scotland (1977–80) and the Mass of the People of God (1981). Understanding Catholicism as a branch of the 'universal Jewish commitment', he has expressed a connection with the Jewish experience in works such as *Au tombeau du martyre juif inconnu* (1976), for victims of the Holocaust, and *Next Year in Jerusalem* (1985) the latter quotes the Passover service in expressing a desire for home and peace for the human spirit. Built from an aggregate of germinal fragments, quoted material in the work includes a synagogue chant and the first phrase of the Israeli national anthem.

A love of literature is also fundamental to Williamson's music. The poems of James McAuley gave rise to the *Symphony for Voices* (1962), *Celebration of Divine Love* (1963) and *An Australian Carol* (1968). After basing his chamber opera *The Growing Castle* (1968) on Strindberg's *A Dream Play*, the Swedish government commissioned Williamson to compose *Hallo Everybody* (1969), a collection of 24 songs to use in teaching English. A celebrated meeting between Williamson and the Australian Aboriginal poet Oodgeroo Noonuccal (previously known as Kath Walker) resulted in the choral symphony *The Dawn is at Hand* (1989). *Requiem for a Tribe Brother* (1992) was written in honour of Noonuccal's playwright son, Vivian.

In 1988, as part of the 15th anniversary celebrations of the Sydney Opera House, Williamson composed *The True Endeavour*, a large-scale popular work intended to be performed outside, which draws on texts by Australian historian Manning Clark. Earlier works in this genre include *The Brilliant and the Dark* (1966), an 'operatic sequence for women's voices' to a text by Ursula Vaughan Williams. Created for the National Federation of Women's Institutes, each of the work's eight sections deals with an aspect of the lives of ordinary women. While women sing of the country, the sea, love and death, dancing and lamentation, continuity is provided by a chorus of embroiderers.

Williamson's instrumental music typically features the piano, an instrument on which he has played with great skill. Indeed, his ability to perform his own virtuoso works was important to his growing reputation during the 1950s. The early works, such as the two sonatas (1955–6, 1957), were inspired by serial music, particularly that of Boulez and Messiaen. In these and later works, such as the *Pas de quatre* for flute, oboe, clarinet, bassoon and piano (1967), serial procedures are clearly evident in the opening stages, but tend to dissipate in later sections as distinct tonal areas emerge. Larger instrumental forms sometimes have a theatrical underpinning; the elegiac Violin Concerto (1965), for example, is a portrait of Edith Sitwell. Other works, such as the Piano Concerto no.2 (1960) and the Concerto grosso (1965) show the influence of Stravinsky.

Williamson's humanitarian convictions are also present in a number of works, among them tributes to United Nations secretary Dag Hammarskjöld (*Hammarskjöld Portrait*, 1974) and Josip Broz Tito (*Tribute to a Hero*, 1981). His anti-armament stance provoked the commencement of an ambitious but abandoned project that included settings of Edmund Blunden's poem *August the Sixth* (the date the bomb was dropped on Hiroshima) with Edith Sitwell's *Three Poems of the Atomic Age* and *The Cradle of Hope and Peace*, settings of a collection of English, French, Russian, Hebrew, Latin, Swedish, Japanese and Serbo-Croat texts, including part of Tito's speech on disarmament to the United Nations.

Among Williamson's pieces for children are compositions he has called 'cassations'. Originally intended as miniature concert operas for audience participation, these works were later used at a summer school for the disabled. Additional 'performances' in hospitals in Tanzania and Zambia convinced Williamson of their therapeutic effects. Generally under ten minutes in duration, early examples, such as *Genesis* (1971) and *The Stone Wall* (1971) developed into more ambitious and lengthy works, including *The Winter Star* (1973), *The Terrain of the Kings* (1974) and *The Valley and the Hill* (1977).

WORKS
(selective list)

STAGE

Our Man in Havana (op, 3, S. Gilliat, after G. Greene), 1963, London, Sadler's Wells, 2 July 1963
The Display (ballet, 1, R. Helpmann), 1964, Adelaide, 14 March 1964
English Eccentrics (chbr op, 2, G. Dunn, after E. Sitwell), 1964, Aldeburgh, Jubilee Hall, 11 June 1964
The Happy Prince (children's op, 1, Williamson, after O. Wilde), 1965, Farnham Parish Church, 22 May 1965
Julius Caesar Jones (children's op, 2, Dunn), 1965–6, London, Jeannetta Cochrane, 4 Jan 1966
Sun into Darkness (ballet, 3, D. Rudkin, choreog. P. Darrell), 1966, London, Sadler's Wells, 13 April 1966
The Violins of Saint-Jacques (op, 3, W. Chappell, after P. Leigh Fermor), 1966, London, Sadler's Wells, 29 Nov 1966
Dunstan and the Devil (op, 1, Dunn), 1967, Cookham, 19 May 1967
The Growing Castle (chbr op, 2, Williamson, after A. Strindberg: *A Dream Play*), 1968, Dynevor Castle, 13 Aug 1968
Lucky-Peter's Journey (op, 3, E. Tracey, after Strindberg), 1969, London, Coliseum, 18 Dec 1969
The Red Sea (op, 1, Williamson, after Bible, 1972), Dartington College, 14 April 1972
Perisynthyon (ballet, 1, Williamson), 1974, Adelaide, 1974
Heritage (ballet), 1985
Have Steps Will Travel (ballet), 1988
Cassations (audience, ens/pf): The Moonrakers, 1967; Knights in Shining Armour, 1968; The Snow Wolf, 1968; Genesis, 1971; The Stone Wall, 1971; The Winter Star, 1973; The Glitter Gang, 1974; The Terrain of the Kings, 1974; The Valley and the Hill, 1977; The Devil's Bridge, 1982

ORCHESTRAL

Santiago de Espada, ov., 1956; Pf Conc. no.1, 1957–8; Sym. no.1, 'Elevamini', 1957; Pf Conc. no.2, 1960; Sinfonia concertante, 3 tpt, pf, str, 1960–62; Org Conc., 1961; Pf Conc. no.3, 1962; Concerto grosso, 1965; Sinfonietta, 1965; Sym. Variations, 1965; Vn Conc., 1965; Sym. no.2, 1968–9; Conc., 2 pf, str, 1973; Au tombeau du martyre juif inconnu, conc., hp, str, 1976; Sym. no.4, 1977; Lament, vn, str, 1980; Ode for Queen Elizabeth, str, 1980; Sym. no.5 'Aquerò', 1980; In Thanksgiving Sir Bernard Heinz, 1982; Sym. no.6, 1982; Cortège for a Warrior, 1984; Sym. no.7, str, 1984; Lento, str, 1985; Concertino for Charles, sax, band, 1987; Bicentennial Anthem, 1988; Fanfare of Homage, military band, 1988; Pf Conc., no.4, 1994

MICHAEL BARKL

Williamson, Sonny Boy [John Lee] (*b* Jackson, TN, 30 March 1914; *d* Chicago, 1 June 1948). American blues singer and harmonica player. He moved to Chicago in 1932 and five years later made his first recording, *Good Morning School Girl* (1937, Bb), which introduced his individual, widely influential harmonica style of 'squeezed' notes and 'crossed-harp' playing (e.g., playing in the key of E on an A harmonica). A slight speech impediment, evident on *Big Apple Blues* (1941, Bb), gave his singing a distinctive tongue-tied quality which was much imitated. His lyrics included biographical themes, for example *Bad Luck Blues* (1939, Bb), on the murder of his cousin; narrative pieces, such as *Joe Louis and John Henry Blues* (1939, Bb); and the patriotic *War Time Blues* (1940, Bb). Many of his recordings were taken at a brisk 'jump' tempo, such as *Sloppy Drunk Blues* (1941, Bb) and *Mellow Chick Swing* (1947, Vic.). These recordings benefited from the presence of the pianists Blind John Davis or Big Maceo Merriwether and either Big Bill Broonzy or Willie Lacey on guitar. Williamson's brand of small-group blues prepared the way for the postwar Chicago blues bands; his harmonica playing is equalled in importance only by that of Little Walter, on whom he had a strong influence. With blues singers Big Bill Broonzy and Memphis Slim, Williamson was recorded pseudonymously as 'Sib' by Alan Lomax in 1947. Williamson was murdered in his early 30s; shortly before his death the blues singer and harmonica player Rice Miller performed, and later toured and recorded, with widespread success under the name Sonny Boy Williamson, which he claimed to have invented.

PAUL OLIVER

Williamson 'II', Sonny Boy [Miller, Rice; Miller, Alex; Miller, Alec] (*b* Glendora, MS, 5 Dec 1899; *d* Helena, AR, 25 May 1965). American blues singer and harmonica player. He was called Rice by childhood friends and assumed his stepfather's name of Miller as a young man. He borrowed the name of the younger, but more famous, blues singer Sonny Boy Williamson when he began to broadcast for the Interstate Grocer Company, the makers of Sonny Boy White Corn Meal, in 1941. The firm promoted his appearances on radio and in travelling road shows in the 1940s. His first record, *Eyesight to the Blind* (1951, Trumpet), made in Jackson, Mississippi, with a forceful local band, reveals a mature blues artist behind his trembling vocal line and amplified harmonica. *Mighty Long Time* (1952, Trumpet), with only a vocal bass for accompaniment, showed that he could be a subtle performer, playing and singing with feeling. In 1955 Williamson moved to Milwaukee, where he made the hit recording *Don't start me to talkin'* (1955, Checker), backed by Muddy Waters and his band. Generally, he preferred to record with the guitarist Robert jr Lockwood (the stepson of Robert Johnson), with whom he remade an earlier success, *Nine Below Zero* (1961, Checker). In 1963–4 he reached a new audience when he toured extensively in Europe. His popularity there brought him the satisfaction that was denied him in his youth, as he indicated on *On my way back home* (1963, Sto.), one of the many late recordings that showed his command of his instrument and a gentler side to his musical personality. In the last year of his life he returned to broadcasting for the Interstate Grocer Company.

PAUL OLIVER

Williamson, T(homas) G(eorge) (*b* London, 1758–9; *d* Paris, Oct 1817). English army officer, composer, author and music publisher. He joined the Bengal Army at 19 and sailed for India in 1778. After 20 years on active service there his career as an officer came to a sudden end. He was a captain in the 17th N. India Regiment when he was suspended for having written a letter, signed 'Mentor', published in the Calcutta *Telegraph* on 17 March 1798, in which he criticized the Government's military policy. He was ordered home, his conduct being found by the Board 'highly criminal and of a dangerous tendency', and was later retired on half pay.

On his return to London, Williamson opened a warehouse in the Strand, 'where a great variety of Music, Instruments, as also Prints and Drawings, may be had'. As a self-proclaimed authority on all matters Indian, his main value as a musical commentator lies in his remarks on the lucrative export trade in instruments between London and India. In his *East India Vade-mecum* (London, 1810), for example, he offered detailed advice on how instruments could best be transported by sea, and information on tuning costs in India. The instruments 'most appropriate for hot climates' included those made by Clementi, Kirkman and Tomkison.

Also reflecting Williamson's Indian background are some of the title-pages of his own published compositions. His op.1 piano sonatinas are dedicated to a former colleague, Captain Charles Crawford, and two sets of piano pieces are inscribed to Sir George Shee, a writer who had been a civilian in the Bombay and the Bengal Establishments. Williamson's two sets of 'Hindostannee Airs' are part of a well established tradition of making arrangements of Indian tunes that can be traced back to the mid-1780s. Early examples of the genre make some attempt to be 'authentic', through the use of devices such as drones and modal accidentals, but by the time that Williamson published his sets, the fashion was to arrange 'Hindostannee' tunes in a manner that made them indistinguishable (except in their titles) from other so-called 'national' airs, almost all of which were characterized by a light, facile and tuneful style. One point of interest in his first collection are pieces entitled *A Song of Kannum's* and *A Dancing Tune of Kannum's*; in the late 1780s, a Cashmerian nautch dancer and singer, known to the English as 'Khanum', enjoyed an exceptionally high reputation among army officers.

OWAIN EDWARDS/IAN WOODFIELD

Willich [Wilcke, Wild], **Jodocus** [Jobst] (*b* Resel, Värmland, *c*1486; *d* Frankfurt an der Oder, 12 Nov 1552). German humanist, physician, writer and musician. The generally accepted birthdate for him is about 1486, but according to Pietzsch it is 1501. In 1516 he entered the University of Frankfurt an der Oder, where he probably studied music under Johann Volckmar. After graduating he taught music from 1522 to 1539. In 1524 Willich became professor of Greek and in 1540 professor of medicine. Although he retained his connection with the university until his death, he was frequently called to other countries (such as Poland and Hungary) because of his renown as a physician. He corresponded with Erasmus and was personally acquainted with Luther, Melanchthon and Glarean. More than 60 writings on philology, antiquity, philosophy, theology, law, medicine, mathematics and music, some of which remained current into the 18th century, gave Willich a position as one of the outstanding German humanists of his time. An ardent lutenist, he founded about 1530 a *convivium musicum*, the first of its kind in Germany, and sustained it until his death. It had between nine and twelve members who held lengthy meetings involving vocal and instrumental music as well as food, drink and discussions of philosophical matters. In his *Prosodia latina* (Leipzig, 1539) he dealt with the close connection of music and text, and the dependence of the former on the latter.

Willig, George (*b* Germany, 1764; *d* Philadelphia, 30 Dec 1851). American publisher. He took over John Christopher Moller's business in Philadelphia in 1794 and established one of the most active and enduring music publishing firms of the early 19th century. He built up a large and varied catalogue of instrumental and vocal music and popular songs, including Stephen Foster's first published song, *Open thy lattice, love* (1844). In 1856 the firm was taken over by Lee & Walker, which was in turn acquired by Oliver Ditson in 1875. In 1822 Willig

acquired the business of Thomas Carr in Baltimore, and his son George Willig jr took control of that firm (which was renamed after him) in 1829. The Baltimore firm also published popular songs, especially minstrel music such as *Clare de Kitchen*, *Jim Crow* and *Zip Coon*. At the death of George Willig jr in 1874, his sons Joseph E. Willig and Henry Willig, who had joined him in 1868, inherited the business, which they continued until 1910 under the name Geo. Willig & Co.

R. ALLEN LOTT

Willis, Henry (*b* London, 27 April 1821; *d* London, 11 Feb 1901). English organ builder. He was articled to John Gray in about 1835 but left before his apprenticeship was completed to work with Wardle Evans of Cheltenham, an organ builder and maker of harmoniums (reed organs). Willis later claimed to have developed a two-manual free-reed instrument with Evans (1841) and to have met Dr Samuel Sebastian Wesley when it was exhibited in London. This meeting was the prelude to an association which was to be of considerable significance in Willis's career.

Meanwhile, Willis returned to London and set up in business as a pipe-maker and organ builder (*c*1845). By 1848 he was at 2½ Foundling Terrace, Gray's Inn Road, moving subsequently to 18 Manchester Street (1851–9), 119 Albany Street (1859–65) and finally acquiring a remarkable circular building in Camden Town ('The Rotunda Organ Works') previously used as a studio by Robert Burford, a painter of cycloramas. His first major contract was the rebuilding of the organ in Gloucester Cathedral which he completed in 1847 for £400; he provided a 12-stop, full-compass Swell Organ, and described this job as his 'stepping stone to fame'. This was premature, though he rebuilt the organ in Tewkesbury Abbey the following year (1848) and about the same time journeyed to France to meet the leading Parisian organ builder Aristide Cavaillé-Coll, and C.S. Barker, inventor of the pneumatic lever.

Much of Willis's eventual success can be attributed to his technical skills. He was one of the great artist-engineers of the 19th century. Not only was his workmanship of the highest order, he was able to satisfy the demands of the rising generation of concert organists for a more musically flexible instrument able to render orchestral scores convincingly. In the church sphere, he was able to meet the requirements of architects who wanted to remove central screens and expose vistas. In each case, the exploitation of the pneumatic principle first developed by Barker and Cavaillé-Coll offered a way forward. The long series of Willis patents includes pneumatic thumb pistons for effecting instantaneous changes of registration (1851), improvements in the design of pneumatic levers (1851, 1853), and a crescendo pedal (1857) and blow-tube for operating swell shutters (1861) both activated pneumatically. Other patents describe improvements in pallet design to lighten the touch (1851, 1861, 1862). Later, Willis won favour with the architects when he used the new tubular-pneumatic action (which dispensed with the need for a mechanical connection between key and pallet) to achieve the physical division of large organs; the most famous example was St Paul's Cathedral (1872), with others at Durham (1876) and Salisbury (1877). Willis's development of tubular-pneumatic action began in the 1850s, and was confirmed by patents issued in 1868 (drawstop action) and 1889 (Vincent Willis's invention of an all-pneumatic mechanism).

Tonally, Willis's early work appears relatively conservative. Although it impressed by its sheer size (70 stops) and the novelty of thumb pistons, Willis's organ for the Great Exhibition (1851), with its duplication of chorus registers and conventional selection of 'fancy' stops, seemed to be pursuing a line of development that Hill had discarded as obsolete 15 years earlier. Yet it impressed Dr Wesley sufficiently for him to acquire part of the Exhibition organ for Winchester Cathedral (1854), and to support the award of the contract for the monster organ for St George's Hall Concert Room, Liverpool (100 stops), to Willis.

Completed in 1855, the Liverpool organ retained anachronistic features such as *G′*-compasses, duplication, and unequal temperament (all at Wesley's insistence), but the skilful application of the pneumatic lever turned what might have been a disaster into a qualified triumph, and Willis was later able to repair the organ's shortcomings (1867, 1896). There were other, more economic schemes from this period which hinted at future trends: at Carlisle Cathedral (1856) 11 of the 35 stops were reeds, and the Swell flue chorus with its Flageolet 2′ and Echo Cornet already presented the appearance of an enclosed accompanimental division rather than a secondary chorus *à la* Hill. In his instruments of the 1860s further characteristics of Willis's mature style can be detected. Powerful yet brilliant reeds, using closed shallots, weighted tongues and harmonic resonators in the treble, spoke on wind pressures appreciably higher than the fluework and dominated the choruses; the flue choruses were made up of pipes of relatively small scale, narrow-mouthed, and blown hard. The result was an intense ensemble which blended well and lent itself to a gradual crescendo from *piano* to full organ (see Bicknell). Tierce mixtures added to the intensity, and slotting (creating a rectangular slot near the top of a flue pipe as part of the voicing process) encouraged clarity in the bass. The *Pedale* (Willis's favoured terminology) might have a complete flue chorus up to a mixture as well as a weighty 16′ reed (often called Ophicleide). In all Willis's instruments from the 1860s onwards there would be a variety of refined orchestral and accompanimental voices – Gedacts, Violas, Harmonic Flutes; the Claribel Flute, Gemshorn, Corno di bassetto and perhaps an enclosed undulating register in the modern French manner. This 'middle' period saw some of Willis's finest achievements: two organs for the Alexandra Palace (1868, 1875), the Royal Albert Hall (1871), St Paul's Cathedral (1872) and Salisbury Cathedral (1877).

The later instruments by Willis lose none of the refinement and superb finish, but some of the vigour and brilliance of the earlier organs is absent. Wind pressures were increased (at Truro Cathedral, 1887, the lowest was 10 cm); the Pedal reed became a climax stop and the Pedal upperwork disappeared; mixtures and mutations became fewer in number and less assertive in character. Willis's last cathedral organ, for Lincoln (1898), had 58 stops, but only one mutation and six ranks of mixture. The engineering of Willis's organs is always impressive.

The Liverpool organ may have been old-fashioned in its tonal design, but the spaciousness of its layout and the finish of its component parts represented a novel standard in English organ building. Willis frequently adopted a horizontal layout for the manual soundboards – Great, Choir and Swell, one behind the other – and although he made increasing use of tubular-pneumatic action, and even electro-pneumatic action in large organs for difficult sites (Canterbury Cathedral, 1885), his preference for most of his career was for tracker, pneumatically-assisted in the case of the larger instruments. Beginning with the big concert organs of the 1860s and 70s his consoles set a new standard in elegance and accessibility, with their solid ivory stop-heads, overhanging keys and angled jambs. Willis frequently installed the concave and radiating 'Wesley–Willis' pedal-board (said to have been suggested to him by Wesley at the 1851 Exhibition) though it did not find much favour with other builders until after his death in 1901.

Such was Willis's reputation in the closing years of his career that the musical journalist F.G. Edwards proposed that he should be given the title 'Father' like his distinguished forebears, John Howe and Bernard Smith. For half a century following his death his pre-eminence among Victorian builders was hardly questioned. Today, a more measured judgment acknowledges him as a tonal and mechanical engineer of genius, while reasserting the pivotal role of William Hill in the development of the Victorian organ pre-Willis, and paying due regard to Willis's contemporaries (and rivals) Thomas Hill and T.C. Lewis. Willis's success owed everything to his ability to satisfy the desire of many influential organists for an organ which mirrored the power and colour of the orchestra and had the mechanical equipment to exploit these characteristics to the full. Yet his instruments provoked strong reactions. For every organist who applauded the direction which Willis had taken, there was another who deplored it.

In 1878 Willis had taken his two sons, Vincent (*c*1841–1928) and Henry (ii) (*b* *c*1851) into partnership. Vincent withdrew in 1894. The financial difficulties in which 'Father' Willis left the firm overshadowed Henry (ii)'s tenure, and he took his own son, Henry (iii) (1889–1966), into partnership in 1910. Henry (iii) rapidly assumed control of the firm, and under his direction it was responsible for two of the most important organs of the first half of the 20th century – Liverpool Cathedral (1912–26) and Westminster Cathedral (1922–32).

Most of 'Father' Willis's larger organs have been destroyed or extensively rebuilt, but among whole or partial survivals may be mentioned: Lambourn Parish Church, Berkshire (1858), Reading Town Hall (1864, 1882), St George's, Preston (1865), St George's, Tiverton, Devon (1870), Union Chapel, Islington (1873), St Paul's Cathedral (1872), Salisbury Cathedral (1877), Truro Cathedral (1887), Blenheim Palace, Library (1891), Hereford Cathedral (1893), Oxford Town Hall (1897) and St Bees Priory, Cumbria (1899). Smaller instruments are more numerous, but even they are becoming rarer, and should be jealously guarded.

NICHOLAS THISTLETHWAITE

Willman, Thomas Lindsay (*b* ?London, 1784; *d* London, 28 Nov 1840). English clarinettist and basset-horn player of German descent. His father, John Willman, was a German bandsman who came to Britain, probably in the second half of the 18th century, and obtained employment with various regiments in both England and Ireland. Thomas had a brother, Henry, who was a trumpet player. One of his sisters, a harpist, married the flautist Charles Nicholson, and another sister married the pianist Johann Bernhard Logier. Thomas received his early musical training under Christopher Eley in the East India Company's volunteer band. From 1805 he played the clarinet in the orchestra of the Crow Street Theatre, Dublin, appearing as a soloist in other parts of Ireland as well, until he came to England in 1816. He then took over Eley's post as bandmaster to the Coldstream Guards, with whom he remained until 1826. During that time the band became famous as 'a veritable school of clarinet playing', thanks to the exceedingly skilful training he gave it.

Willman's long association with the Philharmonic Society began with his appointment as first clarinet in 1817 and lasted until the year before his death. He appeared as soloist with it no fewer than 56 times and became a director of the society. In 1838 he gave the first English performance of Mozart's Clarinet Concerto. A very popular artist, he was in constant demand for festivals all over the country. He enjoyed the frequent travelling in company with his brother-in-law Nicholson and friend Dragonetti. His programmes would include the sublime and the ridiculous, from Mozart's Clarinet Quintet to Bochsa's *Cease your Funning* on the basset-horn.

Willman's tone had a 'mellifluous, liquid, glassy quality' which blended superbly with the human voice. His favourite obbligato part was in Guglielmi's *Gratias agimus tibi*. Camporese, Catalani, Dorus-Gras, Grisi, Malibran, Novello and Sontag all sang with him. Many times critics upbraided these singers for appropriating all the applause, much of which was due to Willman's fine playing. Goulding D'Almaine & Co. published Willman's *A Complete Instruction Book for the Clarinet* in 1826. It was written for the 13-keyed Müller clarinet, the English variety of which he used.

PAMELA WESTON

Willmann. German family of musicians and singers. They were significant in the life of Beethoven.

(1) (Johann) Ignaz Willmann (*b* Wolfach, 2 Nov 1739; *d* Breslau [now Wrocław], 28 May 1815). Instrumentalist. At the age of 26 he played the flute, violin and cello at Montjoie (now Monschau). On 10 April 1767 he became a musician of the electoral court at Bonn, where he met Beethoven's family. He made various journeys after 1774, including one to Vienna, where he became a member of the Tonkünstler-Sozietät on 21 August 1777. On 16 March 1784 he arranged the concert début of his

children (2) Max, (3) Walburga and (4) Magdalena. That year he was appointed music director for Count J. Pálffy at Erdöd, but was soon pensioned. He returned via Brünn (now Brno) to Vienna (29 April 1786), where he probably initiated Beethoven's trip to study with Mozart. By 15 May 1787 Willmann was in Mainz (where Goethe's mother described him as 'ein sehr böser Mann'), in 1788 in Frankfurt and Berlin, accompanied by his daughters; in 1794 they all returned to Bonn. After another stay in Vienna during which he tried unsuccessfully to arrange Beethoven's appointment as court conductor to King Jérôme Bonaparte, Willmann was conductor and director of the court theatre in Kassel (1 June 1805 to Easter 1808). He married his second wife (Anna Maria Antonetta) Marianne de Tribolet (*b* Paderborn, 17 Feb 1768; *d* Klosterneuburg, 21 April 1813), on 15 May 1793. She was a singer at the Bonn court theatre, and after making her début in Vienna on 21 March 1795 she gave performances for nearly a decade at Schikaneder's Freihaus-Theater auf der Wieden and Theater an der Wien. Via Munich, she accompanied Willmann to Kassel (1805–12), where she was appointed a royal Westphalian *Kammersängerin*. After her death Willmann travelled to Pest, Vienna and Breslau with his daughter (5) Caroline.

(2) Max(imilian Friedrich Ludwig) Willmann (*b* Bonn, 21 Sept 1767; *d* Vienna, 7 March 1813). Cellist, son of (1) Ignaz Willmann and godson of Beethoven's grandfather. At an early age he was a virtuoso on the cello, and later played in the chamber orchestra of the Elector of Cologne, the orchestra of the court of Thurn und Taxis, Regensburg (until 1798), and at Schikaneder's theatre in Vienna (where his stepmother was a singer). His compositions include a set of variations for cello solo with two violins and a viola (n.p., n.d.; now in *A-Wgm*). His brother Karl (Johann) Willmann (*b* Bonn, 10 Oct 1773; *d* Vienna, 9 May 1811) was a violinist at the electoral court in Bonn and from 1800 at the imperial court in Vienna. Another brother, Franz Willmann (1765–89), was not a musician.

(3) (Maximiliana Valentina) Walburga Willmann (*b* Bonn, 18 May 1769; *d* Mainz, 27 June 1835). Pianist, daughter of (1) Ignaz Willmann. She was reported to be a piano pupil of Mozart. She gave concerts at an early age and in 1788 was a piano teacher in Frankfurt. Later she joined the theatre at Bonn as a chamber virtuoso. In the presence of F.X. Süssmayr on 28 September 1797 in Vienna, she married F.X. Huber (1755–1814) who was later the librettist for Beethoven's *Christus am Ölberge*. In 1800 she resumed her concert tours, but in 1804 followed her husband (who sympathized with Napoleon) into exile in Mainz. Her works include a piano concerto (now lost), written at Leipzig in 1801.

(4) (Johanna) Magdalena Willmann (*b* Bonn, 13 Sept 1771; *d* Vienna, 23 Dec 1801). Soprano, daughter of (1) Ignaz Willmann, and the supposed fiancée of Beethoven. She studied singing with Righini and performed in the opera houses of Vienna, Brno, Frankfurt (from 1788), Berlin and Bonn. In 1794 she sang in Venice and from 1 April 1795 at the Viennese court theatre. On 13 July 1796 she married the merchant A. Galvani in a ceremony witnessed by F.X. Süssmayr and F.X. Huber. From 1800 to her death she made concert tours to Leipzig, Dresden and Hamburg. She wrote and translated the lyrics for Süssmayr's two-act opera *Soliman II, oder Die drey Sultaninnen*, first performed in Vienna at the Kärntnertor theater on 1 October 1799 (Vienna, 1807).

(5) (Maria Anna Magdalena) Caroline Willmann (*b* Vienna, 25 Feb 1796; *d* Vienna, *c*1860). Soprano, the only child of (1) Ignaz Willmann and Marianne de Tribolet. She was a pupil of Felice Blangini at Kassel and made her début as a soprano and pianist at theatres in Pest, Vienna (Theater an der Wien), Breslau (where she was prima donna from 1814 to 1816), again in Vienna, Munich and Stuttgart until 1820, when Weber took her to Dresden. She returned to Kassel in 1822, then went to Berlin, remaining until April 1825. By 1830 she was in Bayreuth as 'Madame Willmann-Debberton', giving singing lessons and appearing in 1831 as a guest at the margrave's opera house. She was a noted bravura singer.

KARL MARIA PISAROWITZ

Willoughbye, John. *See* WILBYE, JOHN.

Willson, (Robert Reiniger) Meredith (*b* Mason City, IA, 18 May 1902; *d* Santa Monica, CA, 15 June 1984). American composer, conductor, flautist and lyricist. Between 1921 and 1923, while still a student at the Institute of Musical Art (later the Juilliard School), he was engaged as principal flautist by Sousa. He then became a member of the New York PO (1924–9), while continuing to study privately with Hadley and Barrère. He worked in radio and television (1929–56), first as the musical director of the Northwest Territory for ABC, and eventually as the musical director, conductor and composer for the western division of NBC. Two of his songs achieved wide radio popularity: *You and I* (1941), the signature tune for the Maxwell House Coffee programme, and *May the Good Lord bless and keep you* (1950), the theme song for Tallulah Bankhead's 'The Big Show'. Willson composed the scores for such films as *The Great Dictator* (1940) and *The Little Foxes* (1941), as well as numerous works for orchestra, including two symphonies. His orchestral compositions tend to be programmatic and to espouse much of the musical rhetoric of late 19th-century Romanticism (despite such modernist felicities of orchestration as a saxophone quartet in the First Symphony).

Broadway musicals became the focus of Willson's later work and he is best remembered for the music and lyrics to one of the longest running hits of the 1950s. *The Music Man* (1957), which ran for 1375 performances, abounds in appealing novelty and period-style songs, including 'Seventy-Six Trombones' and 'Goodnight, My Someone' (which purposely share the same melodic contour). They contribute to an affectionate portrayal of rural America in 1912, for which Willson drew directly on his own Iowa childhood. His subsequent shows were less successful in their combination of similar ingredients. Willson also wrote a novel and three books of memoirs, *And There I Stood with my Piccolo* (1948), *Eggs I Have Laid* (1955) and *But He Doesn't Know the Territory* (1959), the last

of which recounts the making of *The Music Man*. The Meredith Willson Archive of Popular American Sheet Music is at UCLA (*see* LIBRARIES, §II, 2).

WORKS
(*selective list*)

STAGE

All musicals; dates are of first New York performance, unless otherwise indicated

The Music Man (Willson), orchd D. Walker, 19 Dec 1957 [incl. Trouble, Goodnight, My Someone, Seventy-Six Trombones, Till There Was You; film, 1962]

The Unsinkable Molly Brown (R. Morris), orchd Walker, 3 Nov 1960 [incl. I Ain't Down Yet, Belly Up to the Bar, Boys, Dolce far niente, My Own Brass Bed; film, 1964]

Here's Love (Willson), orchd Walker, 3 Oct 1963 [incl. The Big Clown Balloons, Arm in Arm, You Don't Know, Pine Cones and Holly Berries, That Man Over There]

1491 (Willson, Morris, I. Barmak), orchd I. Kostal, Los Angeles, 2 Sept 1969 [incl. Birthday, Get a Map, Where There's a River, Glory Land, I'll Never Say I Love You]

OTHER WORKS

Popular songs: Banners and Bonnets; Chicken Fat; I See the Moon; It's Beginning to Look a Lot Like Christmas; May the Good Lord Bless and Keep You; You and I

Other vocal: Song of Steel, 1934; Anthem for the Atomic Age, 1950; Ask Not, 1964; Mass of the Bells, 1970

Orch: Parade Fantastique, 1924; Sym. no.1, f ('San Francisco'), 1936; O.O. McIntyre Suite, 1956; Sym. no.2, e ('The Missions of California'), 1940; The Jervis Bay, 1942; Symphonic Variations on American Themes

Film scores, incl. The Great Dictator, 1940, The Little Foxes, 1941

LARRY STEMPEL

Wilm, (Peter) Nicolay von (*b* Riga, 4 March 1834; *d* Wiesbaden, 20 Feb 1911). German composer, pianist and conductor. After attending the Leipzig Conservatory (1851–6), where he studied harmony and counterpoint under Ernst Richter, theory under Moritz Hauptmann, the piano with Plaidy, the organ with Carl Becker and the violin with Felix Dreyschock, he returned to Riga and was appointed second conductor at the municipal theatre. On the advice of Wilhelm von Lenz, and recommended by Adolf Henselt, he went to St Petersburg the following year and became professor of theory and piano at the Imperial Nikolayevsky Institute. In 1875 he retired to Dresden, and in 1878 settled in Wiesbaden, where he devoted himself to composition and also to lyric poetry. Wilm was a prolific composer who was already well-known before he left the Leipzig Conservatory. He wrote over 250 works, many of them published in Germany, including the lyric poem *Ein Gruss aus der Ferne* (1881), chamber music often featuring the harp, and character-pieces for piano.

ALICE LAWSON ABER-COUNT

Wilms, Johann Wilhelm (bap. Witzhelden, nr Solingen, 30 March 1772; *d* Amsterdam, 19 July 1847). Dutch composer of German birth. He received some lessons in piano and theory from his father and his eldest brother; he later studied the flute. In 1791 he went to Amsterdam, where he became a piano teacher. He was second flautist in the orchestras Felix Meritis and Eruditio Musica, where as a pianist he also introduced concertos by Mozart and Beethoven. He became one of the most important musicians in the Netherlands, being on several committees, including the music faculty of the Koninklijk Nederlandsch Instituut voor Wetenschappen, Letteren en Schoone Kunsten in Amsterdam (1808–47), and the Maatschappij tot Bevordering der Toonkunst (1829–41). He served on the juries of composition competitions, examined organists for church appointments and was Amsterdam correspondent of *AMZ* (1814–15). From 1823 to 1846 he was the organist at the United Baptist Church in Amsterdam.

Wilms is known as the composer of *Wien Neêrlandsch bloed*, the semi-official Dutch hymn of the 19th century, and the arrangement for wind ensemble of the piano fantasy *De Schlacht von Waterloo*. Most of his compositions are in an 18th-century style, although some early Romantic traits appear, notably in development sections. His overture in F minor and symphony in D minor op.58 (1823) are both in *Nederlandse Orkestmuziek*, ed. D. van Heuvel (Arnhem, 1995).

Wilno (Pol.). *See* VILNIUS.

Wilson, Charles (Mills) (*b* Toronto, 8 May 1931). Canadian composer and choral conductor. He studied composition with Godfrey Ridout at the University of Toronto where he earned both the BMus (1952) and the doctorate (1956). Additional study at Tanglewood included lessons with Foss, Copland and Chavez. In 1954 he became actively involved with choral music. He served as the organist and choirmaster at Chalmer United Church, Guelph, Ontario (1954–64), founded and conducted the Guelph Light Opera and Oratorio Company (1955–1974), conducted the Bach-Elgar Choir of Hamilton (1962–74) and was the chorus master of the Canadian Opera Company (1973–81). In 1979 he was appointed to the faculty of music at the University of Guelph where he later became composer-in-residence and the director of the electronic music studio. He retired in 1994. Although his early compositions were primarily instrumental, he produced much vocal music later in his career, including an oratorio, *The Angels of the Earth* (1966) and a number of operas. *Héloise and Abelard* (1972) was commissioned by the Canadian Opera Company and *Psycho Red* (1977) by the Guelph Spring Festival. His style maintains a strong emotional lyricism while incorporating an eclectic range of musical idioms. *(EMC2)*

WORKS
(*selective list*)

Dramatic: Héloise and Abelard (op, 3, E. Benson), 1972; The Selfish Giant (children's op, after O. Wilde), 1972; The Summoning of Everyman (church op, Benson), 1972; Kamouraska (op, Wilson after A. Hébert), 1975; Psycho Red (op, Benson), 1977; Tim (radio op, M. Cook), T, Bar, tape, 1990

ELAINE KEILLOR

Wilson, Christopher (Allin) (*b* Redhill, Surrey, 23 May 1951). English lutenist. He studied with Diana Poulton at the RCM from 1970 to 1972, and made his début at the Wigmore Hall in 1977. He specializes in the solo lute music and lute-songs of the 16th and 17th centuries, and has embarked on an ambitious series of solo recordings intended to cover the entire repertory. His playing is noted for its refinement, sensitivity and mellifluous tone. In addition to his worldwide appearances as a soloist, Wilson regularly accompanies the tenors Paul Agnew and Rufus Müller and the countertenor Michael Chance, and works with the singer and lutenist Shirley Rumsey. He formed the duo Kithara (with Shirley Rumsey) and the trio and quartet The Lute Group (1979–88), and has played with the Consort of Musicke, Gothic Voices and many other leading ensembles. He is the dedicatee, with Tom Finucane, of Stephen Dodgson's *Sketchbook for Two Lutes*. He teaches the lute at Trinity College of Music, London.

STEPHEN HAYNES

Wilson, Florence. *See* AUSTRAL, FLORENCE.

Wilson, Ian (*b* Belfast, 26 Dec 1964). Northern Ireland composer. He studied at the University of Ulster (BMus 1986), where his composition tutor was David Morris; he received the university's first DPhil in composition in 1990. A series of awards, commissions and recordings rapidly established his reputation in both the UK and Europe. He is a member of Aosdána, Ireland's state-sponsored academy of creative artists.

An early interest in 12-note writing, reflected in *Prime* (1987), quickly gave way to freer methods of pitch organization. Wilson's music employs diatonic and symmetrical scales (including the octotonic), although a strong sense of tonal centricity is not generally present. Material is often derived from an opening motif, somewhat in the manner of Schoenbergian 'developing variation', while formal structures tend to be multi-sectional with clear contrasts of texture and timbre. Repetition of single durations and larger figures is common, as in the opening movement of *The Capsizing Man and other stories* (1994), which repeats its first idea with almost minimal insistence. Especially characteristic of his work is the use of well-wrought modally inflected melodic lines moving in simple rhythms over slow-moving chords, echoing Messiaen.

Wilson's music often carries an air of poignant melancholy, while his Christian faith, together with an interest in the visual arts and the early history of Ireland, has been reflected in the work of the 1990s. *Rich Harbour* (1994–5) takes its title from Klee, but is a meditation on death and the afterlife, inspired by a cemetery in County Fermanagh. *The Seven Last Words* is the second of a series of three piano trios which form, together with three string quartets, the core output of the early–mid-1990s. In these works a detailed variety of bowing and fingering techniques is employed to distort the sound subtly.

MICHAEL RUSS

Wilson, Jackie [Jack Leroy] (*b* Detroit, 9 March 1934; *d* Mount Holly, NJ, 21 Jan 1984). American popular singer. He showed promise as a boxer but chose a singing career, joining the Dominoes vocal group (1951) and later acting as their lead singer (1954–7). His first solo success was the dynamic *Reet Petite (The Finest Girl you ever Want to Meet)*, co-written by Berry Gordy, and Wilson developed a spectacular stage show in which his histrionics frequently brought audiences to a frenzy. His career was cut short in 1975 when he collapsed on stage with a heart attack and went into a coma from which he never fully recovered.

A spectacular singer with a wide vocal range that included a powerful falsetto, Wilson brought the intensity of gospel music to an eclectic collection of recorded material including popular standards (*Danny Boy*), adaptations of classical works (*Night*, from Saint-Saëns's *Samson et Dalila*, and *Alone at Last*, from Tchaikovsky's Piano Concerto No.1, both 1960), blues (*Doggin Around*, 1960) and rock songs (*I'll be satisfied*, 1959) as well as soul material such as *Lonely Teardrops* (1959) and the million-selling *Higher and Higher* (1967). He recorded

with Count Basie and his orchestra (1968), and Van Morrison composed the tribute *Jackie Wilson Said* (1972). In 1986 *Reet Petite* became a posthumous hit for Wilson when it was re-issued in the UK.

DAVE LAING

Wilson, James (*b* London, 27 Sept 1922). Irish composer of English birth. Following wartime service in the Royal Navy, he studied composition, the piano and the harpsichord at Trinity College of Music, London. He moved to Ireland in 1948, settling in Dublin. In the early 1950s he travelled extensively in southern Europe, an experience which greatly influenced his later compositions. He was professor of composition at the Royal Irish Academy of Music from 1969–80, and served as consulting director for the Irish Performing Right Society and the Irish Music Rights Organization. He was also a founding director of the Dublin Festival of 20th-Century Music, director of the Ennis/IMRO Composition Summer School, and active in the Music Association of Ireland and the Association of Irish Composers. He was elected to membership in Aosdána, Ireland's state-sponsored academy of creative artists, in 1982.

Wilson's style cannot be ascribed to any particular school of composition. Central to his compositional approach is a desire to match his music as closely as possible to the individual characteristics of his performers and their instruments. Early works show a preoccupation with rhythmic development deriving from flamenco and Balkan music. Works from the 1960s and 70s are more concerned with serial techniques. In the 1980s and 90s his style became more relaxed, projecting an eclectic range of influences. At the core of his extensive instrumental and vocal output are his six operas, all of which incorporate a strong element of fantasy. *Twelfth Night* (1969), based on Shakespeare's play, employs polytonality, while *Grinning at the Devil* (1986), on the life of Karen Blixen, is constructed around a number of tightly controlled melodic and harmonic motifs. *A Passionate Man* (1995), which takes Jonathan Swift as its subject, presents a synthesis of compositional techniques from earlier dramatic works.

WORKS
(*selective list*)

STAGE

Ops: The Hunting of the Snark, op.8 (children's op, 1, after L. Carroll), 1963, Dublin, 1965; Twelfth Night, op.30 (3, H. Moulton, after W. Shakespeare), 1969, Wexford Festival, 1969; Letters to Theo, op.92 (1, Wilson, after V. van Gogh), 1982, Dublin, 1984; Grinning at the Devil (Aria to Ariel), op.101 (2, E. Grass), 1986, Copenhagen, 1989; The King of the Golden River, op.111 (2, Wilson, after J. Ruskin), 1987–92; A Passionate Man, op.139, 1995, Dublin, 1995

Other dramatic and incid music: The Pied Piper of Hamelin (R. Browning), op.25 (radio), 1967; The Táin, op.48 (monodrama, 1, Wilson), 1v, perc, pf, 1971; Fand, op.62 (monodrama), 1974; Ditto Daughter, op.66, 1976; The Revenge of Truth, op.91, 1982; The Little Mermaid, op.107, 1985; The Temptations of St Anthony, 1985

Solo: Pf Sonata, op.7, 1962; Thermagistris, op.29, pf, 1968; Capricci, op.33, pf, 1969; Donizetti Variations, op.29a, accdn, 1969; 5 Preludes, op.87, pf, 1982; The Cat that Walked by Himself, op.100, pf, 1983; Exploration, op.103, pf, 1984; Breeze and Calm, op.109, vn, 1985; Boreas, op.119, amp fl, 1989; For Cliodhna, op.132, vc, 1992

VOCAL

Choral: A Canticle for Christmas (anon., A.C. Swinburne), op.26, children's chorus, 1967; Missa Brevis, op.55, S, A, unison vv/T, org/hmn, 1973; Nativity Ode (J. Milton), op.71, Tr vv, SATB, tpt, hp, perc, org, dancers, 1978; Animalphabet (Wilson), op.131, S, SATB, pf, 1992; Keats on Keats, op.133, SSATB, 1993

Solo: Carrion Comfort (G.M. Hopkins), Bar, pf, 1966; Bucolics (J. Clare), op.28, T, pf, 1968; Ode to Autumn (J. Keats), S, fl, pf, 1968; Irish Songs (G. Moore, G. Darley, J. Swift, C.J. Lever, J. Stephens, A.T. de Vere), op.40, S, pf/orch, 1970; Upon Silence (W.B. Yeats), op.54, S, 1972; Les fiançailles (G. Appollinaire), op.74, S, pf, 1978; The Windhover (Hopkins), op.78, S, cl, 1979; Plurabelle (J. Joyce), op.89, S, chbr ens, 1982; Emily Singing (E. Brontë), op.108, S, orch, 1985; Journey (J. Donne), op.105, S, pf, 1985; Undesirables (L. Bardwell), op.125, S, vc, 1990; Wildwood (R. Nichols), op.124, S, va, 1990; 9 Very Small Songs (A. Douglas), op.130, S, chbr ens, 1991; Vigil (Douglas), op.135, 1v, chbr ens, 1993; Calico Pie (E. Lear), S, hn, vn, pf

EVE O'KELLY

Wilson, John (*b* Faversham, Kent, 5 April 1595; *d* Westminster, London, 22 Feb 1674). English composer, lutenist and singer. He was probably involved in the musical life of the court and the London theatre from an early age, apparently from 1614. There are songs by him for *The Maske of Flowers* and *Valentinian*, both of which date from that year, and he was connected with the King's Men: songs by him survive for plays put on by them between 1614 and 1629. In view of this association it seems likely that he is indeed the 'Jacke Wilson' alluded to in the 1623 folio edition of *Much Ado about Nothing*, despite the lukewarm reception the suggestion has had since it was made in 1846 (the allusion need not be to the first performance of the play in 1604 but to some performance before 1623).

Wilson was recommended to the Lord Mayor of London by Viscount Mandeville on 21 October 1622 as one of the 'Servants of the City for Music and voice' and was duly appointed a city wait, a position he still held in 1641. In 1635 he entered the King's Musick among the lutes and voices at £20 a year with the usual annual livery of £16 2s. 6d. The court moved to Oxford during the Civil War in 1642, and on 10 March 1644 Wilson graduated the DMus at the university. Two years later the garrison surrendered, and he left the city to shelter nearby in the household of Sir William Walter of Sarsden, Churchill; he stayed there until 1656, when he was made professor of music in the university. His remarkable personality made its mark on the Oxford scene, especially at music meetings and the like. In his autobiography Anthony Wood made frequent mention of him, describing him as 'the best at the lute in all England'. A number of amusing anecdotes refer to him: his portrait in the Faculty of Music at Oxford depicts him as a robust, florid man and quite credibly 'a great pretender to buffoonery'.

Wilson's *Cheerful Ayres or Ballads* proclaims itself 'the first Essay (for ought we understand) of printing Musick that ever was in *Oxford*'. In 1661 he resigned the professorship in favour of his friend Edward Lowe (who

made manuscript copies of many of Wilson's songs), and was reappointed to the King's Musick. He succeeded Henry Lawes as a Gentleman of the Chapel Royal on the latter's death in 1662. Increasingly both positions must have become sinecures owing to his advancing age, although it did not prevent his making a second marriage, to 'Anne Penniall on January 31, 1670/71, at Westminster Abbey. Aged 66 [*sic*]' (the mention of a daughter in his will indicates an earlier marriage). He was buried in the cloisters of Westminster Abbey; the inscription (now recut) on the gravestone reads: 'John Wilson/ D in Musick Here/ Interrd Dyed/ February y 22/1673 [= 1674]/ Aged 78 Years/ 10 months and/ 17 Dayes'.

Wilson's most important works are his songs; 226 survive in a manuscript (*GB-Ob* Mus.B.1 dated 1656), which is mainly in the hand of Edward Lowe and includes 30 settings of Latin verse by Horace and others. Songs for the following plays have been identified, although some of the dates are doubtful: Francis Beaumont and John Fletcher: *Valentinian* (*c*1614); Thomas Middleton: *The Witch* (*c*1616); Fletcher: *The Mad Lover* (1616), *The Queen of Corinth* (*c*1617), *The Bloody Brother* (?1617), *The Loyal Subject* (1618), *Women Pleas'd* (*c*1620), *The False One* (*c*1620), *The Pilgrim* (1621), *The Wild-Goose Chase* (1621), *The Spanish Curate* (1622) and *Love's Cure* (?1625); John Ford: *The Lovers' Melancholy* (1628); and Richard Brome: *The Beggar's Bush* (?1622) and *The Northern Lasse* (1629). He also set to music four songs from William Cavendish's *The Varietie*, acted by the King's Men at the Blackfriars Theatre, 1639–42, and works in Thomas Jordan's anthology of Cavalier poems (*GB-NO*). Many of the songs printed in *Cheerful Ayres or Ballads* have a bluff tunefulness that gives them a popular character: *In a maiden time professed* (to words from Middleton's *The Witch*; MB, xxxiii, 1971) is a good example. More refined in style and reminiscent of the lighter type of lute-song are songs like *In a season all oppressed* (MB, xxxiii, 1971). His handling of the declamatory style is often clumsy and shows little of Henry Lawes's sensitivity. Even so there are successes, especially among songs lying between the extremes of tuneful balladry and doctrinaire declamation, for example *Take, O take those lips away* (MB, xxxiii, 1971). The psalms in *Psalterium Carolinum* (published in 1657 and reissued immediately after the Restoration, in 1660) are comparable in style with Henry and William Lawes's *Choice Psalmes* (1648) and Walter Porter's *Mottets* (1657), essentially devotional music. More interesting are his pieces for 12-course lute (or theorbo; *Ob* Mus.B.1), which are in the nature of preludes written in all the major and minor keys.

WORKS

Psalterium Carolinum: the Devotions of His Sacred Majestie, 3vv, bc (org/theorbo) (London, 1657)

Cheerful Ayres or Ballads ..., 3vv, bc (Oxford, 1660[4]; probably pubd in 1659), 7 ed. in MB, xxxiii (1971)

Elegy, 1648[4]

4 songs in W. Cavendish, *The Varietie* (comedy), London, Blackfriars, 1639–42 (London, 1649)

Songs in 1652[8], 1652[10], 1653[7], 1658[5], 1659[5], 1666[4], 1667[6], 1669[5], 1673[4], 1680[5], 1682[5], 1686[4], *Brief Introduction to the Skill of Music*, ed. J. Playford, bks 1 and 2 (London, 3/1660); reprints in 18th-century anthologies

Principal song MSS in *F-Pn*; *GB-Cfm, Es, Eu, Lbl, Ob* (11 ed. in MB, xxxiii, 1971), *Och*; *US-NH, NYp*

30 lute (?theorbo) pieces, *GB-Ob*

Songs in T. Jordan's anthology of Cavalier poems, *NO*

IAN SPINK

Wilson, Olly (*b* St Louis, 7 Sept 1937). American composer. He studied the piano as a child and later gained degrees in music from Washington University, St Louis (BMus 1959), the University of Illinois (MMus 1960) and the University of Iowa (PhD 1964). He also studied electronic music at the Illinois studio for experimental music (1967). In 1968 his electronic composition *Cetus* won a prize in the world's first International Electronic Music Competition. Later honours included Guggenheim fellowships (West Africa, 1971, American Academy in Rome, 1977), and a residency at the Rockefeller Foundation Center in Bellagio, Italy (1991). He taught at several colleges before becoming professor at the University of California, Berkeley in 1970. His commissions include works for the Boston and Chicago SOs, the New York PO, Boston Musica Viva and the Black Music Repertory Ensemble.

Wilson draws freely upon avant-garde styles and techniques in his music, showing a predilection for unorthodox formal procedures and instrumental combinations. His articles appear in *Black Perspectives in Music*, *Black Music Research Journal* and *Perspectives of New Music*.

EILEEN SOUTHERN/MARION D. SCHROCK

Wilson, Richard (Edward) (*b* Cleveland, 15 May 1941). American composer and pianist. After studying the cello and the piano at the Cleveland Music School Settlement, he was awarded the BA from Harvard (1963), then studied the piano with Wührer in Munich and composition with Moevs (his main Harvard professor) in Rome on a Frank Huntington Beebe Fellowship. He pursued postgraduate study at Rutgers, New Jersey (MA 1966), subsequently joining the music faculty of Vassar College, Poughkeepsie, New York, where he was appointed professor in 1976; he was appointed to the Mary Conover Mellon Professorship there in 1988. His works have been performed worldwide; among his many awards are a joint prize in the League of Composers/ISCM Piano Music Competition (1976) as well as the Burge/Eastman Prize (1978) for his virtuoso piano work *Eclogue*, and a Guggenheim Fellowship (1992–3). He has been commissioned by the San Francisco SO for *Articulations*, and by the Koussevitsky Foundation for the Triple Concerto, written for the American SO, whose composer-in-residence he became in 1992.

Wilson has composed for a wide variety of vocal and instrumental combinations and is concerned as much with exploring the sonic idiom of the particular force at hand as with the communication of an abstract musical concept. His musical style incorporates some aspects of traditional tonality within a highly chromatic, though sensuous, language. Avoiding serialism, he favours evolving motivic interplay, often set against a quasi-Impressionistic background. *Eclogue*, String Quartet no.3 and Symphony no.1 provide the best illustration of his mature style, which is rich yet subtle, often witty, varied yet cohesive, and structured yet always expressive.

JAMES WIERZBICKI/MARY L. FRANTZ

Wilson, Robert (*b* Waco, TX, 4 Oct 1941). American designer, playwright and director. He was educated at the University of Texas (1959–62), studied painting and graduated in architecture from the Pratt Institute, Brooklyn (1965). He began writing plays and directing in New York in the 1960s, winning critical acclaim especially in Europe. His own *Deafman Glance* (1971), together with his set designs for *A Letter for Queen Victoria* (1975), won several awards, as did his designs for Philip Glass's *Einstein on the Beach* (1974, Avignon; 1976, Metropolitan Opera). His stage designs include Charpentier's *Médée* (1984, Lyons); sections of the multilingual epic *the CIVIL warS*, which Wilson wrote with Glass and Bryars (1984, 1985 and 1987, Rome and New York); Gluck's *Alceste* (1986, Stuttgart); *Salome* (1987, La Scala); and *Le martyre de St Sébastien* (1988, Paris). His productions as a director have included *Die Zauberflöte* (1991, Paris, Bastille), *Madama Butterfly* (1993, Bastille), Virgil Thomson's *Four Saints in Three Acts* (1996, Houston) and *Pelléas et Mélisande* (1997, Paris, Palais Garnier).

Wilson has been called a stage genius and one of 'the most daring and creative figures in contemporary theatre' (Harris); critical reaction to his work is mixed. His conceptions, in which design is the dominant element and in which every aspect of the production is controlled by the central artistic vision, are epic in scale, marathons of endurance for the audience and heroic challenges for actors, singers and collaborators. *the CIVIL warS*, for instance, would run for 12 hours if ever performed in its entirety, and requires a singer to perform while suspended 15 feet above the stage, harnessed and chained in a rig of steel tubing. Columbia University holds a collection of 10,000 of Wilson's scripts, drawings, photographs and papers.

DAVID J. HOUGH/R

Wilson, Sandy [Wilson, Alexander Galbraith] (*b* Sale, 19 May 1924). English composer, lyricist and librettist. After Harrow and Oxford he studied stage production and design at the Old Vic School in the late 1940s. He contributed to student revue while at Oxford, leading to his first London success, *Slings and Arrows* (1948). In an expanded form *The Boy Friend*, written for the Players' Theatre in 1953, became his most successful show, continuously in the West End at Wyndham's Theatre from 1954 to 1959, on Broadway (1954–5), and a perennial of the repertory ever since. With archetypal material drawn from musical comedies of the 1920s, this affectionate and well-observed tribute displayed Wilson's skill, which went beyond pastiche to a genuine absorption of earlier styles, a constant feature of his later writing. Seldom drawing on influences beyond the popular music of his youth (*The Bucaneer*, 1953, saw Wilson's only use of a contemporary setting and musical style), his marriage of sophisticated lyrics and elegant music has been combined with unusual source material, such as the risqué stories of Firbank for *Valmouth* (1955) and Collier's satirical novel *His Monkey Wife*, whose central character is a mute ape.

His ability to imbue strict rhyme and conventional song forms with originality is notable: typical of his style are

the wit of 'Only a Passing Phase' (*Valmouth*), the period charm of 'No Harm Done' (*Divorce Me, Darling!*, 1964), the integration of scene and song in 'Home and Beauty and You' (*His Monkey Wife*, 1971), and the touching sincerity of 'Behind the Times' (*The Bucaneer*, 1953). His musicals have increasingly suffered from their delicacy and intimate scale in a period of indulgent staging and performance, and from unsympathetic revivals. His writings include the Novello photo-biography *Ivor* (London, 1975), an edition of work by the caricaturist Nerman, *Caught in the Act* (London, 1976) and the autobiography *I Could be Happy* (London, 1975).

JOHN SNELSON

Wilson, Sir **(James) Steuart** (*b* Clifton, 22 July 1889; *d* Petersfield, 18 Dec 1966). English tenor and administrator. He had music lessons from C.B. Rootham at Cambridge University, 1908–11, and in 1911 he sang Vaughan Williams's *On Wenlock Edge* for the Oxford University Music Club, so pleasing the composer that he wrote his *Four Hymns* for him. War injuries during his army service affected one lung and permanently damaged his health, but he resumed his singing career in 1918, playing a leading part in the formation of the English Singers. He took further lessons in 1921 from Jean de Reszke, and rapidly went to the forefront of British singers, with special success in *The Dream of Gerontius* and as the Evangelist in the *St Matthew Passion*. He made concert tours in the USA, Canada and Australia, appeared with the British National Opera Company, in Mozart operas at the Old Vic Theatre, and in the Glastonbury Festival operas by his friend Rutland Boughton. In 1937 he used damages awarded him in a libel action to sponsor the first London production of Boughton's *The Lily Maid*, which he also conducted.

Wilson became well known as a perceptive judge at competitive festivals and, on retiring from active singing, began a new career as an administrator. He taught at the Curtis Institute, Philadelphia (1939–42), and returned to England to become music director for BBC Overseas Services (to 1945), music director of the newly formed Arts Council of Great Britain (from 1945), and in 1948, when he was knighted, director of music for the BBC. He moved to Covent Garden as deputy general administrator of the Royal Opera House, 1949–55, and was principal of the Birmingham School of Music, 1957–60, but this was an unhappy episode. With A.H. Fox Strangways, Wilson published numerous translations of lieder; he also made English translations of *The Creation* and Brahms's *German Requiem*, and contributed many articles to music magazines. On a recording made in 1927 during a performance at the Royal Albert Hall, London, he sings in extracts from *The Dream of Gerontius* conducted by the composer. He also recorded Vaughan Williams's *On Wenlock Edge* and songs by Denis Browne.

MICHAEL KENNEDY

Wilson, Teddy [Theodore Shaw] (*b* Austin, 24 Nov 1912; *d* New Britain, CT, 31 July 1986). American jazz pianist. He grew up in Tuskegee, Alabama, and briefly studied music at Talladega College. After working in Chicago with Louis Armstrong, Jimmie Noone and others he moved to New York in 1933 to join Benny Carter's band. He played informally and recorded in a trio for Victor with Benny Goodman in 1935 (notably *Body and Soul*) and officially joined Goodman's trio the following year, thereby becoming one of the first black musicians to appear prominently with white artists. Wilson remained with Goodman until 1939, playing on many of the latter's small-group recordings and also on recordings under his own name with other important swing musicians, above all Billie Holiday and Lester Young (including *Mean to me*, 1937, Bruns.). After leaving Goodman he briefly led his own big band (1939–40), and thereafter worked primarily as a leader of small ensembles and as a soloist. Around 1950 he was an instructor at the Juilliard School in New York, an early instance of the recognition of jazz by an important conservatory. He frequently rejoined Goodman for reunions, most notably for a tour of the USSR (1962), an appearance at the Newport Festival (1973) and a concert at Carnegie Hall (1982).

Wilson was the most important pianist of the swing period. His early recordings reveal a percussive style, with single-note lines and bold staccatos, that was indebted to Earl Hines; but by the time of his first performances with Goodman he had fashioned a distinctive legato idiom that served him for the rest of his career. Wilson's style was based on the use of conjunct 10ths in the left hand; by emphasizing the tenor voice and frequently omitting the root of the chord until the end of the phrase he created great harmonic refinement and contrapuntal interest. For the right hand he adapted Hines's 'trumpet' style, playing short melodic fragments in octaves, frequently separated by rests and varied with fleet, broken-chord passage-work. He used the full range of the piano, often changing register or texture to underscore formal divisions. His poised, restrained manner and transparent textures are

especially evident on his solo recordings from the late 1930s (for example, *Between the Devil and the Deep Blue Sea*, 1937, Bruns.), which served as models for countless pianists in the late swing period. From 1940 Wilson's playing became somewhat florid, with frequent pentatonic passage-work, but he retained his basic approach and prowess into the 1980s.

J. BRADFORD ROBINSON

Wilson, Thomas (i) (?bap. Durham, 15 Feb 1618; *d* after 1647). English organist and composer. He became a chorister at Durham Cathedral sometime between August 1627 and September 1630, receiving payment for this post up to 29 September 1634. When on 12 November 1635 John Cosin, Prebendary of Durham, established the post of college organist at Peterhouse, Cambridge, he made Wilson its first incumbent. Wilson received payment in this post from December 1635 to January 1643 and is identified by name in one of the chapel part-books and in chapel accounts for 25 October 1642. The organ was dismantled on 29 April 1643 and it is likely that this, together with the abolition of services and Cosin's ejection from the mastership, prompted Wilson to return to Durham where, described as 'Musices professor', he married Margaret Colpots on 25 May 1648. Wilson was at the centre of Cosin's musical innovations at Peterhouse; in the late 1630s he contributed to funds for both the chapel building and the organ, but most of his contribution would have been musical, as the accounts show great activity in the acquisition and copying of music for the newly-formed chapel choir. Despite its variety his music is rather dull and four-square.

IAN PAYNE

Wilson, Thomas (Brendan) (ii) (*b* Trinidad, CO, 10 Oct 1927). Scottish composer. Born to British parents in the USA, he moved with his family to Scotland while still young. He studied at the University of Glasgow (1948–53) with Ernest Bullock and Frederick Rimmer, and then at the RCM (1954) with Herbert Howells. In 1957 he became a lecturer in the extra-mural department at the University of Glasgow, where he was appointed reader in music in 1971, titular professor in 1977 and Emeritus professor in 1982. He was awarded the CBE in 1990 and an honorary DMus from the University of Glasgow in 1991.

The change of focus Wilson's music underwent in the 1960s and 70s may be appreciated through a comparison of the Third and Fourth String Quartets, written respectively in 1958 and 1978. The Third Quartet, contrapuntally sophisticated and Expressionistic in tone, is in three movements with the entire quartet growing out of the opening theme. The later work, less pervasively contrapuntal, is cast in a single movement with greater flexibility between its five distinct sections. Wilson has since adopted a variety of approaches to writing single movement forms with such works as the orchestral piece *Introit* (1982) and the Violin Concerto (1993). Since his first completely serial piece, the Violin Sonata (1961), his works have espoused a flexible approach to 12-note composition. His music is marked by its attention to instrumental colour and clarity of expression.

FRANCIS J. MORRIS

Wilson-Johnson, David (*b* Northampton, 16 Nov 1950). English baritone. He studied at Cambridge and the RAM, where he sang the King in Orff's *Die Kluge*. In 1976 he made his début at Covent Garden in Henze's *We Come to the River*, returning for roles in *Boris Godunov*, *The Nightingale*, *L'enfant et les sortilèges*, *Die Zauberflöte*, *Madama Butterfly*, *Turandot*, *Werther*, *Roméo et Juliette*

and *Billy Budd*; in 1995 he sang the Counsellor and a Fisherman in the première of Alexander Goehr's *Arianna*. He quickly revealed a particular talent for contemporary music, singing Choregos in Birtwistle's *Punch and Judy* (which he has also recorded), Maxwell Davies's *Eight Songs for a Mad King* in Paris and London (1979) and Blazes in the première of *The Lighthouse* at Edinburgh (1980). Subsequently he has sung Antony in Barber's *Antony and Cleopatra* (1982, Edinburgh), the title role in the British première of Messiaen's *St François d'Assise* (1988, Royal Festival Hall), King Fisher in *The Midsummer Marriage* for television, Lev in *The Ice Break* (a role he has recorded) and The Man in Schoenberg's *Die glückliche Hand*. Wilson-Johnson's other operatic roles include the title role in *Owen Wingrave*, Swallow (*Peter Grimes*), Allazim (*Zaide*) and Berlioz's Méphistophélès. He is also a fine oratorio singer, and has recorded Bach cantatas, Handel's *Belshazzar*, Brahms's *German Requiem* and Elgar's *Caractacus*. A stylish, intelligent and intensely musical artist with a robust voice and incisive diction, he brings a vivid sense of character to all his performances.

ELIZABETH FORBES

Wilton, Charles Henry (*b* Gloucester, bap. 15 June 1761; *d* after 1811). English violinist, viola player and composer. He studied the violin with Giardini, leader at the Three Choirs festivals, and between 1777 and 1780 he appeared frequently at London concerts playing chamber music alongside his teacher. Later he spent two years in Italy studying with Nardini and 'others of the most eminent musicians in Italy'. For much of his time he was in Naples and Florence. He returned to England in August 1784 and was appointed leader at the Music Meeting in Gloucester that year. In October 1786 he was admitted a freeman of the City of Gloucester, being then described as 'of the City of York, musician', and he led again at the Gloucester Music Meeting in 1790. By 1794 he was resident in Liverpool. Lysons confirmed that he was 'for several years leader at the Liverpool and York concerts' but implied that by 1812 he had given up the violin and confined himself to giving lessons on the piano.

BRIAN FRITH/SIMON McVEIGH

Wimberger, Gerhard (*b* Salzburg, 30 Aug 1923). Austrian composer and conductor. His studies at the Salzburg Mozarteum (1940–47), where his teachers included Cesar Bresgen and Johann Nepomuk David (composition), and Clemens Krauss and Bernhard Paumgartner (conducting), were interrupted by a period of military service under the Third Reich (1941–5). He went on to hold the posts of répétiteur at the Vienna Volksoper (1947–8) and musical director at the Salzburg Landestheater (1948–51). In 1969 he was appointed to a professorship in composition at the Mozarteum. He has served as a member of the board of directors of the Salzburg Festival (1971–9) and as a corresponding member of the Bayerische Akademie der Künste (from 1977). He has conducted internationally as well.

Wimberger does not differentiate between light and serious music. His vocal works set humorous texts, as well as great literature. He has aimed to write in a comprehensible style and to compose music that fulfils a social function. His credo:

> ... to balance the forces that influence me, those of the past, the present and the future, to keep my works free of fashionable postures, to represent my musical ideas clearly so that they are understood by others, to cultivate in the wide field of artistic content a broad space between the serious and the cheerful – thus to blend into a personal synthesis the technical and stylistic possibilities of our time.

Winant, Fredericus. *See* WYNANTS, FRÉDÉRIC.

Winbergh, Gösta (*b* Stockholm, 30 Dec 1943). Swedish tenor. He studied in Stockholm with Erik Saedén. After making his début in 1972 at Göteborg as Rodolfo (*La*

bohème), he was engaged at the Swedish Royal Opera and gradually developed an international career. He sang Belmonte at Glyndebourne (1980), made his Covent Garden début (1982) as Titus, his Metropolitan début (1983) as Don Ottavio, and his Scala début (1985) as Tamino, returning as Idomeneus (1990) and Gluck's Pylades (1992). His other Mozart roles have included Ferrando, and Mithridates, which he sang at Covent Garden (1991). He has also sung such parts as Almaviva, Nemorino, the Duke of Mantua, Alfredo, Lensky, Gluck's Admetus, David, Faust, Des Grieux (*Manon*) and Sali (*A Village Romeo and Juliet*). As his light, lyrical voice has become more powerful, he has taken on heavier Wagner and Strauss roles, including Lohengrin, Walther, which he sang in Berlin and at Covent Garden (1993), the Emperor (*Die Frau ohne Schatten*), Parsifal and Erik, which he sang in Vienna in 1995. Among Winbergh's recordings are several Mozart roles, including a noble, ringing Titus, and an alluring Ernesto in *Don Pasquale*.

ELIZABETH FORBES

Winchecumbe, W. de. *See* WYCOMBE, W. DE.

Winchester. City in England. A Saxon church, built before the Norman cathedral, had before 951 one of the most remarkable organs of its period. It was described in a dedicatory epistle to Bishop Alphege of Winchester of *c*990 by the monk Wulfstan (*see* ORGAN, §IV, 4). The Winchester Troper (*GB-Ccc* 473), dating from some 30 years later, contains the earliest known collection of two-part organa. The Chapter Acts of the cathedral are incomplete, but among the earliest recorded organists Christopher Gibbons is the best known. Adrian Batten, while a chorister, was a pupil there of John Holmes, a lay vicar who contributed to Morley's *The Triumphes of Oriana*.

Winchester College is closely connected with the cathedral. There, 16 'Quiristers' were included in William of Wykeham's foundation of 1394, and subsequent organists have often been associated with both establishments. Weelkes was at the college from 1598 until 1601 or 1602, and John Reading (i), organist from 1681 to 1692, was the composer of *Dulce domum* and the 'Election Graces'. From the time of the departure of Jeremiah Clarke in 1695, one organist held both posts until S.S. Wesley left in 1865 after persuading the cathedral authorities to buy the Willis organ built for the Great Exhibition of 1851. From 1924 to 1937 George Dyson was master of music at the college.

On St Cecilia's Day 1703 a performance of 'Vocal and Instrumental Musick, compos'd by Mr. Vaughan Richardson, Organist of Winchester Cathedral' was advertised to take place at the Bishop's Palace at Wolvesey. In 1756 a performance of Handel's *Acis and Galatea* was given in St John's House in the city, and in 1760 there began an annual festival, normally taking place in August or September. Until 1766 the festival occupied two evenings, on each of which an oratorio was performed; the following year this was extended to three days. In 1775 *Messiah* was sung in the cathedral on the second morning and in 1779 another oratorio was sung in addition on the third morning. This pattern continued more or less until 1800 when *Messiah* was dropped in favour of Haydn's *Creation*, until that time 'performed but twice in the kingdom'. Between 1807 and 1814 there was no festival and the last took place in 1817. Occasionally the sacred music was performed in St Maurice's Church. These celebrations, known from 1780 as the Hampshire Music Meeting and from 1808 as the Hampshire Musical Festival, were not based on a local musical society as at Salisbury; nearly all the artists came from London or from other cathedral cities. These included the Linleys (1772), Venanzio Rauzzini (1776 and 1777), Nancy Storace (1776), Tenducci (1781 and 1782), Mara (1785, 1797 and 1798), and Mrs Billington, who came annually from 1786 to 1791. Peter Fussell and George Chard conducted during their periods of office as cathedral organist, while, on occasions from 1781, Salomon was one of the leaders of the orchestra. Since 1904 Winchester Cathedral Choir has taken part with Salisbury and Chichester in the annual Southern Cathedrals Festival. The choir has retained its position as one of Britain's finest cathedral choirs. Organists at Winchester Cathedral in the 20th century included William Prendergast (1902–33), Martin Neary (1972–88) and David Hill (from 1988).

The Winchester imprint is found on psalm books published by W. Colson (1710) and John Edmund (*c*1745). James Robbins published *Harmonia Wykehamica* in 1811.

Winckel, Fritz (*b* Bregenz, Austria, 20 June 1907). German acoustician and musicologist. He studied acoustics and natural sciences at the Berlin Technische Hochschule from 1927 and then (1932–4) worked as a qualified engineer in a studio for experimental music that he had set up at the Berlin Musikhochschule. The direction of his subsequent researches was determined to a large extent by his further study at Berlin University with Walter Nernst (working on the Neo-Bechstein) and Carl Stumpf (on the structures of music and language). In 1950 he took the doctorate in engineering, and in 1951 he completed his *Habilitation* at Berlin Technical University with a dissertation on acoustics. In 1950 he joined the Technical University's faculty of humanities, teaching communications science in music and language, and became supernumerary professor in 1957. In collaboration with Boris

Blacher he set up a studio for experimental music and composition there (1953) which by 1973 had produced about 50 works by various composers. In 1968 Winckel started an experimental music course at Berlin. He was a member of the International Association for Research in Singing and an honorary member of the Association Française pour l'Etude de la Phonation et du Langage (Paris, Sorbonne).

Besides investigating the correlation of musical and linguistic structures using information theory and cybernetics, Winckel published on the composition of electronic music, the spatial aspect of musical acoustics and the analysis of vocal production.

HANS HEINRICH EGGEBRECHT

Winckelmann, Hermann. *See* WINKELMANN, HERMANN.

Wind band. *See* HARMONIEMUSIK and BAND (i).

Wind-cap [reed-cap] **instruments.** Wind instruments on which the reed, usually a double reed, is enclosed within a rigid cap (Ger. *Windkapsel*, *Mundkapsel*; Fr. *capsule à vent*) normally of wood. The player blows through a hole at one end of the wind cap, causing the reed to vibrate freely; because there is no contact between the lips and the reed the tone cannot be affected by direct lip pressure as it is with an open reed. Overblowing is not usually possible, so the range of most wind-cap instruments is restricted to those notes that can be fingered directly, normally a 9th; in some cases this range is increased by the use of keys, and there is evidence that the range of crumhorns was extended downwards by underblowing (blowing with less than usual wind pressure). The wind cap also protects the reed from damage.

Wind-cap instruments are related to the BAGPIPE and the BLADDER PIPE, in which a reed vibrates freely within a bag or bladder; they differ from them significantly, however, in that the rigid wind cap allows articulation by the interruption of the flow of air through the reed by tonguing, whereas the flexible bag or bladder maintains a reservoir of air under pressure so that the reed vibrates continuously and cannot be affected by tonguing. True wind-cap instruments are first recorded in the late 15th century – the crumhorn in 1488 in Italy, and the wind-cap shawm in 1493 in Germany.

The origins of the wind cap are uncertain: it may have evolved from bagpipes and bladder pipes, probably not by the simple replacement of the flexible bag with a rigid cap, as Kinsky suggested, but by the development of the wooden stock of the bagpipe chanter or the protective collar round the reed of a bladder pipe. Sachs (2/1930) drew attention to certain hornpipes of the later Middle Ages, known as 'mouth pipes', on which a piece of horn at the upper end surrounded the reed (usually a single reed); when pressed against the mouth for playing, this horn structure functions, in effect, as a primitive wind cap. Instruments of this type survived into the 18th century in Wales and Scotland, where they were known respectively as PIBGORN and STOCK-AND-HORN. However, these mouth horns were found primarily in Atlantic Europe, particularly in Britain and Spain, areas not associated with the early occurrence of true wind-cap instruments. Meyer has speculated that the wind cap evolved from the pirouette that supported the player's lips on many early reed instruments.

During the Renaissance a wide variety of wind-cap instruments was developed, of which the crumhorns and wind-cap shawms such as the *Schreyerpfeife* were the main representatives. These instruments fell out of use in art music during the 17th century, by which time changes in musical taste and the requirements of composers had made their small compass and lack of expressive range seem unacceptably restricted. Some wind-cap shawms survived as folk instruments into the 19th century, and the PRACTICE CHANTER of the Highland bagpipes represents a modern survival of the wind-cap principle. Wind-cap instruments may be grouped in four categories:

1. Crumhorns and related instruments with cylindrical bore. 2. Wind-cap shawms with conical bore. 3. Bagpipe chanters used as wind-cap instruments. 4. Miscellaneous wind-cap instruments.

1. CRUMHORNS AND RELATED INSTRUMENTS WITH CYLINDRICAL BORE. The CRUMHORN was the principal wind-cap instrument from the late 15th century to the early 17th; it is associated mainly with Germany, northern Italy and the Low Countries. Although predominantly cylindrical, the bore flares slightly in the lower, curved section of the body. The cornamusa (*see* CORNAMUSA (i)), a rare form of straight, soft 'crumhorn' with muted bell, was little known outside Italy, though Praetorius (2/1619) described it. There are isolated references in Germany and

Bohemia to 'straight crumhorns', which may have resembled the cornamusa. The 'basset: Nicolo' illustrated by Praetorius, a bass instrument like a straight crumhorn, can also be included in this group (*see* CRUMHORN).

2. WIND-CAP SHAWMS WITH CONICAL BORE. The SHAWM with wind cap rather than open reed appears in iconographical sources, especially from Germany in the 16th century and France in the 17th. It is often depicted in the context of popular rather than art music. Praetorius illustrated a small detachable wind cap that fitted over the reed of the normal *discant Schalmey* (treble shawm). The extent to which detachable wind caps were used is not known.

The most extensively documented wind-cap shawm is the SCHREYERPFEIFE, an instrument with expanding conical bore, of which examples survive in Berlin and Prague. It is recorded in German sources associated with town and court musicians from the 1520s and continued in use until the late 17th century. Considerable confusion has been caused by Praetorius's use of the plural form of the name and its synonym 'Schryari' for a different type of instrument (*see* SCHRYARI), the shape of whose bore is not clear. His description and illustrations of three instruments, the smallest of which is quite different from the other two, may deal with a rare group of instruments which he happened to have seen; they are certainly not known from any other source.

The HAUTBOIS DE POITOU, described by Mersenne, was used in the *grande écurie* of the French court in the 17th century. Another French wind-cap shawm, the Cléron pastoral, described only by Trichet (see Lesure), appears to have resembled the *Schreyerpfeife* closely.

The German word RAUSCHPFEIFE was used in the 16th century to refer to wind instruments in general and to shawms (both with and without wind cap) in particular (Boydell).

3. BAGPIPE CHANTERS USED AS WIND-CAP INSTRUMENTS. Mersenne commented that 'all the bagpipe chanters must be sounded with covered reeds [but] they make a much more graceful and vigorous sound when played in the mouth rather than connected to the bag, because the notes can be articulated with the tongue'. He illustrated three such chanters used separately with wind caps: one has two parallel cylindrical bores and two reeds, one a conical bore, and the third a cylindrical or possibly slightly conical bore. The use of the name 'cornamusa' in Italian and other Romance languages both for bagpipes and for a wind-cap instrument suggests that the latter may have been derived directly from a bagpipe chanter, and that the practice of using chanters independently may have been widespread.

4. MISCELLANEOUS WIND-CAP INSTRUMENTS. The late Renaissance was a period of great advances in instrument building, and there are records of a number of wind-cap instruments that were rare or unique and which may have been no more than isolated experiments. The name KORTHOLT, a generic term for wind instruments with the bore doubled back to reduce their length (as in the bassoon), was also used by Praetorius for a wind-cap instrument of this type, in effect a wind-cap SORDUN. This is the only evidence of such an instrument except for Trichet's description of the *courtaut*, and even this was differently characterized by Mersenne – as a straightforward open-reed sordun.

There is some confusion about the DOPPIONI, described by Zacconi. Two instruments that are probably examples of *doppioni* survive in Verona; they are 'double' in that each has two cylindrical bores of different pitch. They probably originally had wind caps but were subsequently adapted for use with open reeds on crooks.

The CROMORNE (i) of the 17th century is no longer regarded as a wind-cap instrument. The term DOLZAINA (or 'douçaine') remains problematic: it may have been used for the crumhorn, but it was also clearly used to refer to instruments without wind caps.

Wind-chest [soundboard] (Fr. *sommier*; Ger. *Windlade*; It. *somiere*; Sp. *secreto*). In an organ, the long, broad, but rather shallow wooden structure that collects wind under pressure from the BELLOWS or RESERVOIR and distributes it to the pipes as required. In the classical organ the heart of the wind-chest is a wooden grid, which is partitioned into as many grooves or note-channels as there are notes in the keyboard compass; above this are the table, stop mechanism and upperboard. Below the grid is an enclosed substructure, the pallet-box, which receives the wind from the wind-trunk and contains a row of pallets, one for each of the notes on the keyboard. Each PALLET is held by a spring to cover the underside of a groove in the grid above, and is connected directly or indirectly to a key. When a key is depressed the pallet opens, and wind is admitted to the corresponding groove and then directed via holes in the table, slider and upperboard to the foot or feet of the appropriate pipe(s), depending on the operation of the stop mechanism.

Many forms of wind-chest have been devised: before about 1420 all organs had only one sound per chest (i.e. no stop mechanism; *see* BLOCKWERK), but in the course of the next century three important inventions allowed builders to give separate sounds: the multiple chest (where a key would connect to two chests), the spring-chest (where a 'stop' had its own row of secondary pallets admitting wind individually to its pipes), and the slider-chest (*see* SLIDER). The latter became the most commonly used mechanical action wind-chest. Many other forms and variations (e.g. ventil- or membrane-chests), were devised during the 19th century in order to cope with the commercial expansion of organ-building and with the increase in organ size and the new types of key action. The application of electricity to the organ encouraged the invention of even more types (e.g. unit-chest, pitman chest), but the principle of the slider-chest has proved capable of very flexible application.

View of a slider soundboard partly cut away to show the construction

James Talbot (MS, *c*1695, *GB-Och* Music 1189) used the term 'soundboard' to mean the whole wind-distributing apparatus, and he used the term 'wind-box' for the pallet-box. The term 'soundboard' has been more common in England, while 'wind-chest' is more frequently employed in the USA.

For further discussion and illustrations *see* ORGAN.

MARTIN RENSHAW

Wind chime [aeoliphone]. Term applied to a set of concussion plaques suspended so that they can be activated by the wind (the instrument is classified as an idiophone). The plaques may be made of metal, glass, bamboo, stone, porcelain or shell. In the orchestra, the player activates the chimes by hand stroker; bamboo chimes create a loud 'thwack' when pushed together sharply between the two hands. Although not a precision

instrument, wind chimes were being used increasingly in all types of music at the end of the 20th century. Glass wind chimes appear in Birtwistle's *The Mask of Orpheus* (1973–84), Boulez's *Notations I–IV* (1977–80) and Henze's *Voices* (1973); shell wind chimes in Henze's *Compases para preguntas ensimismadas* (1969–70) and *Das Floss der 'Medusa'* (1968, rev. 1990); and glass, shell and bamboo chimes in Messiaen's *Des canyons aux étoiles* (1970–74).

A similar instrument is the mark tree, a set of 30–40 thin brass tubes, graduated in length from 10 to 30 cm and suspended from a stick (set of concussion-percussion tubes). When lightly stroked it produces a shimmering glissando. The mark tree (named after its inventor, Mark Stevens) was, at the end of the 20th century, widely used in all types of music from pop to orchestral.

JAMES HOLLAND

Windet, John (*fl* London, 1584–1611). English music printer. He owned one of the most successful general printing businesses in London. He held several important offices in the Company of Stationers and ultimately became Printer to the City of London. From 1592 he printed several editions of the Sternhold and Hopkins psalter for John Day and for his son Richard Day. His publications began with John Dowland's *Lachrimae* (dated 2 April 1604 in the Stationers' register); it was financed by Thomas Adams and was one of the most important musical publications of the time. Windet's music output is not large, numbering only a dozen volumes, including Coprario's *Funeral Teares* (1606), Robert Jones's *The First Set of Madrigals* (1607) and *Ultimum vale* (1605) and Thomas Ford's *Musicke of Sundrie Kindes* (1607). Windet worked with type, and his printing was always of a high standard, distinguished by spacious layout and a clean, sharp impression. His skill must have been stretched to its limits by the eccentric demands of Tobias Hume's *The First Part of Ayres* (1605) and *Poeticall Musicke* (1607), both of which he printed. His secular music bears the imprint of 'the Crosse Keys at Powles Wharfe' where he carried on his business from about 1594 until 1611. After his death, most of his copyrights passed to William Stansby, his former apprentice and partner.

MIRIAM MILLER

Windgassen, Wolfgang (*b* Annemasse, Switzerland, 26 June 1914; *d* Stuttgart, 5 or 8 Sept 1974). German tenor and director. He studied in Stuttgart with his father, the tenor Fritz Windgassen, and Alfons Fischer. In 1941 he made his début at Pforzheim as Don Alvaro (*La forza del destino*). He was a member of the Stuttgart Staatsoper (1945–72), singing first in the Italian repertory and in such parts as Tamino, Max, Hoffmann and Florestan; he then began to prepare Wagnerian roles and in 1950 sang his first Siegmund. In 1951 he sang Parsifal at Bayreuth to acclaim; he appeared there each year until 1970, as Froh, Siegmund, Siegfried, Lohengrin, Tannhäuser, Walther, Erik, Loge and Tristan, establishing himself as the leading postwar Heldentenor. In 1972 he was appointed director of the Stuttgart Staatsoper, where his productions included *Boris Godunov* (1972). He appeared regularly in the Wagnerian repertory at Covent Garden (1955–66). His roles included Adolar (*Euryanthe*), Rienzi, the Emperor (*Die Frau ohne Schatten*) and Otello. He made his American début at the Metropolitan as Siegmund in 1957 and sang Tristan at San Francisco in 1970. Windgassen's musicality and vocal intensity can be heard in his Siegfried on several Bayreuth *Ring* recordings and under Solti, and in his searing Tristan under Böhm.

Wind gauge. A device for measuring wind pressure, usually that of organs, at the pipe chest, in the trunks, etc. According to German authors (Werckmeister, Adlung, Töpfer) a gauge was first invented by Christian Förner in 1667, but he may only have been publicizing a perfected example. The device had a single column of water which was raised a measurable extent when placed above any air vent (e.g. a pipe-hole in the chest). Töpfer (*Die Orgelbaukunst*, 1833) improved its reliability by giving it a double column. The water-manometer (E.J. Hopkins's 'anemometer') has an S-shaped transparent tube placed on its side; in a bend of this the water rests until moved by the pressurized air admitted at one end of the tube. The pressure of air is measured as the difference between the lower and upper surfaces of water in the bent tube. Thus '2½″ wind' (i.e. about 6 cm) indicates that the surface pushed by the air fell 1¼″, the other surface beyond the bend raised 1¼″ (3 cm).

PETER WILLIAMS

Windha, I Nyoman (*b* Kutri, nr Singapadu, Bali, 1954). Balinese composer and performer. With Ketut Gdé Asnawa he was the chief innovator and exponent of new Balinese gamelan composition in the 1980s and 90s. Windha studied at the government music high school then at the Indonesian Academy for the Performing Arts in Surakarta, joining its faculty in 1985. At first known as a charismatic and skilled performer on the *ugal*, he began composing in 1983. His early music extended and enriched the instrumental *tabuh kreasi* form, which had been codified a generation earlier by his mentor Beratha. With a distinctive melodic gift and the ability to compose complex music extremely fluidly, he enjoyed what for Bali was unprecedented fame as a composer. The performance of many of his works at the annual Festival Gong gamelan competitions gave him a level of exposure that ensured his music was in demand throughout Indonesia and in international gamelan organizations. Windha also composed for dance in the experimental *kontemporer* genre, for Javanese gamelan, and for many unconventional instrumental combinations. He also worked as a teacher and composer for gamelan groups in Germany and the USA.

WORKS
(*selective list*)

For *gong kebyar* gamelan: Sinom Lawe, with v, 1983; Gita Winangun, with voice, 1986; Wahyu Giri Suara, 1987; Cendra Wasih, with dance, 1987; Kembang Pencak, with dance, 1987;

Gerehing Kawulu, 1988; Prawireng Stri, with dance, 1988; Kembang Adnyani, 1989; Puspanjali, with dance, 1989; Jagat Anyar, 1990; Jagra Parwata, 1991; Gora Merdawa, 1991; Gadung Kasturi, 1993; Gita Giri Jaya, with voice, 1994; Gerincing Wesi, 1995; Sri Kembang, 1996; Candra Baskara, 1998; Kali Sengara, with voice, 1999

For other ens: Sangkep, 1983; Kindama, 1985; Palapa I, 1986; Palapa II, 1988; Bali Age 1988; Balingkang, 1989; Kekembangan, sax qt, Balinese gamelan, 1990, collab. E. Ziporyn; Derap Tersada Nusantara, 1991

Windharfe (Ger.). *See* AEOLIAN HARP.

Wind hole [bore]. *See* TOE-HOLE.

Windkanal (Ger.). *See* WIND-TRUNK.

Windlade (Ger.). *See* WIND-CHEST.

Wind machine [aeoliphone]. A friction idiophone. It is used on the stage and elsewhere to produce the sound of the wind. It consists of either a barrel framework covered with silk or coarse canvas which rubs against the slats as the barrel is rotated, or an electric fan in which the blades are replaced by lengths of cane. In each case a rise and fall in volume and pitch is gained by a rise and fall in the speed of rotation, and in the case of the barrel by a tightening and loosening of the fabric. The same subtleties of sound are not available with an electric wind machine, which has the further disadvantage of producing a low-pitched but discernible hum when the machine is turned on but not in use: the hum may be audible when the orchestra is playing *pianissimo*.

Wind machine by the L.W. Hunt Drum Co., London

A wind machine is occasionally requested in orchestral scores, for example Strauss's *Don Quixote* (1896–7), Ravel's *Daphnis et Chloé* (1909–12; as 'eoliphone'), Milhaud's *Les choëphores* (1915), Schoenberg's *Die Jakobsleiter* (1917–22), and Vaughan Williams's *Sinfonia antartica* (1949–52), in which there is an instruction that the instrument be 'out of sight'.

JAMES BLADES/JAMES HOLLAND

Wind quintet. A composition for five wind instruments. Although there are many exceptions the usual combination, which became established around 1800, is flute, oboe, clarinet, bassoon and horn. This grouping evolved from the imperial HARMONIEMUSIK as used at the Vienna court of Joseph II from 1782 (two oboes, two clarinets, two horns and two bassoons). The new quintet combination with its solo voices took advantage of the technical improvements being made to wind instruments during this period, and allowed some of the principles of Haydn's writing for string quartet to be transferred to chamber music for wind instruments. Antonio Rosetti (*c*1750–1792), Nikolaus Schmitt and G.M. Cambini (1764–1825) were among the first to compose for the new combination, but the wind quintet became a firmly established musical genre only with Antoine Reicha's 24 quintets written from 1811 (six each in opp.88, 91, 99, 100) and Franz Danzi's nine quintets written in 1820–24 (three each in opp.56, 67, 68). For the rest of the 19th century, with the exception of Georges Onslow's three quintets op.81 (1852), there was less interest in the wind quintet. However, with Paul Hindemith (*Kleine Kammermusik* for five wind instruments op.24 no.2, 1922), Carl Nielsen (op.43, 1922) and Arnold Schoenberg (op.26, 1923–4), the tonal and contrapuntal possibilities of writing for wind were rediscovered. Other leading composers of the 20th century who wrote for wind quintet were Jacques Ibert, Florent Schmitt, Jean Françaix, Darius Milhaud, Eugène Bozza, Samuel Barber, Henk Badings, Malcolm Arnold, Karlheinz Stockhausen and György Ligeti. Since the 1950s the increase in wind playing in schools and by amateurs has led to the composition of pedagogic wind chamber music for all kinds of wind ensembles including quintets.

Windsperger, Lothar (*b* Ampfing, Upper Bavaria, 22 Oct 1885; *d* Frankfurt, 30 May 1935). German composer and editor. The son of a school teacher and organist, he attended the Munich Academy of Music where he studied with Rudolf Louis, Joseph Rheinberger and others. From 1913 he was an editor and adviser with Schott of Mainz, for whom he compiled *Das Buch der Motive* (Maine,

1921), which became a standard source for identifying Wagner's leitmotifs. After military service, he taught theory and piano in Wiesbaden; two years before his death he was appointed director of the Mainz Music School. His music is in the late-Romantic tradition. In addition to orchestral works in conventional genres, he wrote two grandiloquent sacred works: the *Missa symphonica* (1926) and the Requiem (1929). His small piano pieces (op.37) adopt certain modern trends, inviting comparison with Bartók's *Mikrokosmos*.

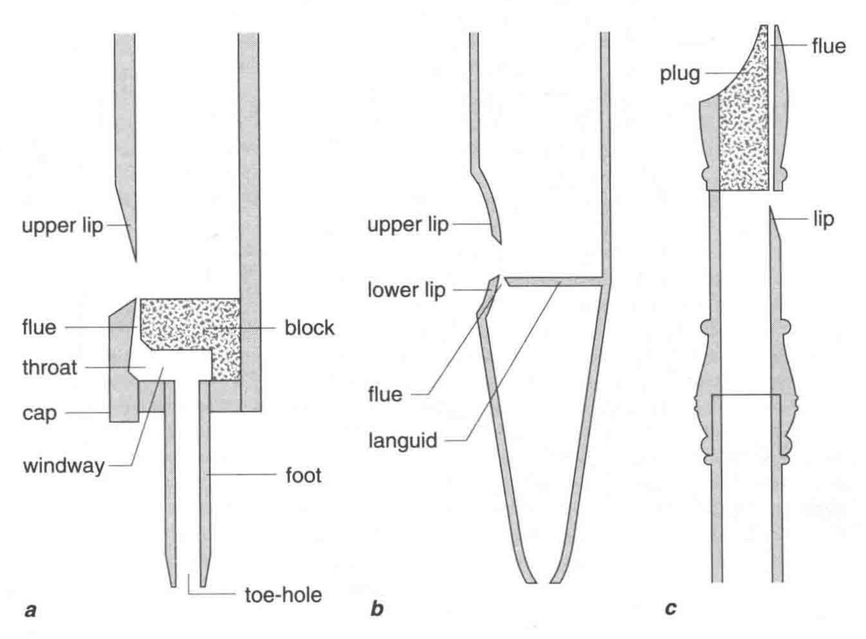
WILLIAM D. GUDGER/ANDREW D. McCREDIE

Wind-trunk (Fr. *porte vent*; Ger. *Windkanal*). A large wooden or metal tube for conveying the wind of an organ from the bellows to the WIND-CHEST. In medieval organs the one central wind-trunk was called *fistula maxima*.

Windway. An ambiguous term which, taken literally, may refer to any passage conveying air in a musical instrument. There are, however, two recognized special connotations.



(1) In a wooden flue-pipe of an organ the windway is the passage between the opening of the pipe foot and the flue, which is the slot between the face of the block and the inner side of the cap or lower lip (fig.1*a*). The form of the windway determines the size and shape of the air jet impinging on the upper lip, and through the formation of edge-tones energizes the air column. The throat is that part of the windway hollowed out of the block; its conformation influences the timbre of the pipe. In metal pipes the flue is formed between the edge of the languid and the lower lip derived from the wall of the pipe foot (fig.1*b*).

(2) The windway of a recorder is itself the flue and is a simple passage formed by working a flat on the plug of the instrument and a corresponding groove in the head (fig.1*c*). In certain sophisticated flageolets the windway is sometimes enlarged above the flue proper forming a receptacle for a piece of sponge to absorb the moisture of the breath.

PHILIP BATE

Wineberger [Winneberger], **Paul Anton** (*b* Mergentheim, 7 Oct 1758; *d* Hamburg, 8 Feb 1822). German cellist and composer. He began his musical career at the age of nine as an alto in the Mergentheim Hofkapelle, and five years later he was appointed organist at the Dominican church. After studying theology at the universities in Würzburg and Heidelberg, 1775–8, he moved to Mannheim, where he taught at the Jesuit seminary and served as church organist; he studied composition with G.J. Vogler and Ignaz Holzbauer and violin with Georg Zarth and Ignaz Fränzl, who encouraged him to switch from the violin to the cello.

In 1780 Wineberger joined the Hofkapelle of Prince (Fürst) Kraft Ernst von Oettingen-Wallerstein, and five years later he was appointed principal cellist and first Konzertmeister. During the 1780s and 90s he produced a steady stream of music for court ensembles at Wallerstein: his earliest dated composition is a symphonie concertante for two horns and orchestra in E♭ major, composed in January 1782 for Franz Zwierzina and Joseph Nagel, who were two Bohemian virtuosos who had just joined the Kapelle, and he wrote 20 wind partitas for the Wallerstein Harmonie, which was also under his direction

1. *Diagrams to show the windway in (a) a wooden organ pipe, (b) a metal organ pipe, (c) a recorder*

(*Musikalische Realzeitung*, 13 Aug 1788). Wineberger served as cello teacher to the prince's younger brother, Franz Ludwig, and it is likely that the second cello part that replaces the viola in several of his string quartets (lost) was intended for his aristocratic pupil. In 1798 Wineberger moved to Hamburg, where he found employment with several orchestras but devoted his energies increasingly to teaching. He suffered from poor health in his final years. Although Wineberger's compositions are uneven in quality, the best of them are distinguished by thematic economy, melodic chromaticism, formal experimentation, skilful orchestration and a competent control of counterpoint.

WORKS

VOCAL

MSS in D-HR (see Haberkamp) unless otherwise stated

Der Sieg des Licth (orat, D.E. Beyschlag), 1794
An das biedere Hamburg (New Year cant.), 1802

STERLING E. MURRAY

Winkel, Diederich Nikolaus [Nicolaus] (*b* Lippstadt, 24 Aug 1777; *d* Amsterdam, 28 Sept 1826). German builder of mechanical organs, clock-maker and inventor. He was the son of a master watch- and clock-maker but was orphaned before he was three years old. He became a clock-maker, gaining the freedom of Lippstadt in 1816. In November 1814 he completed a musical time-indicator or metronome (*see* METRONOME (i)) using a balanced, double-ended pendulum. The following year he showed this to J.N. Maelzel, who modified and patented it under his own name. Over the ensuing years the ownership of the concept was hotly disputed by the two men. Winkel's original metronome survives in the Gemeentemuseum, The Hague. Having moved to Amsterdam in 1816, Winkel set about creating an ORCHESTRION organ to rival Maelzel's Panharmonicon. Besides playing music in the ordinary manner, however, his would compose its own music. The outcome was the Componium which, it was claimed, could create an almost endless series of variations once presented with a theme. Winkel completed it on 14 December 1821 and exhibited it all over Europe for some years. In addition to its variations, it played music by Spohr, Mozart and Moscheles. Winkel also built a number of other mechanical organs of extremely high quality. At least four survive and each has a unique mechanism. One organ, for example, is weight-driven by a clockwork mechanism which has only one wheel; another has a system of 'expression' using direct wind pressure without reservoir (as used with the expression stop in a reed organ) in order to over- or under-blow the pipes. He also used a one-key stop changing system which latched and unlatched from a special pin in the surface of the organ barrel.

ARTHUR W.J.G. ORD-HUME

Winkelmann [Winckelmann], **Hermann** (*b* Brunswick, 8 March 1849; *d* Vienna, 18 Jan 1912). German tenor. The son of a piano maker, he studied singing in Paris and with Koch in Hanover before making his début in *Il trovatore* at Sondershausen in 1875. After appearances at Altenburg, Darmstadt and Leipzig, in 1878 he settled in Hamburg where he took part in the local premières of *Das Rheingold* (as Loge, 1878), *Götterdämmerung* (1879), Rubinstein's *Nero* (1879) and *Tristan und Isolde* (1882). He sang in London in 1882 with the Hamburg company under Hans Richter at Drury Lane, his roles including Wagner's Lohengrin, Tannhäuser and Tristan. Following Richter's recommendation, Wagner chose Winkelmann to create the role of Parsifal at Bayreuth (26 July 1882). The next year he was engaged by the Vienna Hofoper, where he became the city's first Tristan (on 4 October) and remained a favourite until his retirement in 1906. During this period he continued to sing at Bayreuth, and in 1884 appeared at the Wagner festivals given by Theodore Thomas in New York, Boston, Philadelphia, Cincinnati and Chicago. Apart from Wagner's operas his repertory included Gluck's *Alceste* and *Armide*, *Fidelio*, Auber's *La muette de Portici*, Verdi's *Otello*, Marschner's *Der Vampyr* and, in 1897, Smetana's *Dalibor* under Mahler's direction.

Winkelmann was a leading figure in the first generation of Wagner singers, and was coached by the composer. Although he possessed the ample, sonorous voice of a true heroic tenor, his fluid lyrical delivery stood in marked contrast to the declamatory style of many Bayreuth performers during the era of Cosima Wagner's hegemony. (*ES*; L. Riemans)

□

Winkler, Carl Gottfried Theodor [Hell, Theodor] (*b* Waldenburg, 9 Feb 1775; *d* Dresden, 24 Sept 1856). German poet, impresario and journalist. The son of Gottfried Winkler (archdeacon at Waldenburg and from 1779 deacon at the Dresden Kreuzkirche), he displayed a versatility and diligence in Dresden as lawyer, author and critic, translator and editor, and musical and theatrical organizer. He was the mentor of Friedrich Kind's Liederkreis, assistant director of the court theatre and founder-editor of the *Dresdner Abendzeitung*. He was a friend of Weber and a trustee of his orphaned children. Although his translation of the libretto of *Oberon* is not of high quality, he wrote an excellent text for *Die drei Pintos* and was responsible for the first collection of

Weber's writings (*Hinterlassene Schriften von C.M. von Weber*, Dresden, 1828). Winkler was also among the first Germans to recognize and appreciate the operas of Meyerbeer. He wrote under the pen name Theodor Hell.

WORKS SET TO MUSIC

Die drei Pintos, comic op, partly composed by Weber, 1820, completed by Mahler, Leipzig, 1888; Das Haus Anglade (play), partly incorporated in Weber's Preciosa, Berlin, 1821; Die beiden Galeerensklaven (play), music by F.A. Schubert

Trans. of J.R. Planché's Oberon, romantic op by Weber

WALTER HÜTTEL

Winkler, Gerhard E. (*b* Salzburg, 14 Oct 1959). Austrian composer. He studied at the Salzburg Mozarteum (1974–80) with Helmut Eder, among others, and at the Vienna Musikhochschule, where his teachers included Erich Urbanner; he also studied musicology, philosophy and psychology at the universities of Vienna and Salzburg (doctorate 1986). He has worked as a freelance recording director and programme planner for Austrian Radio (ÖRF) and taught at the universities of Salzburg and Innsbruck. In 1987 he began an intensive involvement with live electronic and computer music. He has lectured at the Darmstadt summer courses (1992–4) and at IRCAM in Paris (1995–6). His honours include a prize in the Vienna Konzerthausgesellschaft composition competition (1987) and commissions from IRCAM, the Donaueschingen Festival, the Salzburg Festival, Wien modern, and other institutions, festivals and ensembles.

Winkler's compositional technique is based on theories of complex dynamic systems and the spatial projection of sound. His 'growth projects' take the form of complexes of compositions, crossing boundaries between individual works and employing multimedia (video, choreography, lighting, etc). Beginning in 1994, he began to create interactive works for computer and live performers. By tracing contradiction on all levels of musical reality he has aimed to create art neither isolated from, nor entirely absorbed by, the problems of contemporary society.

SIGRID WIESMANN

Winkler, Michael-Christfried (*b* Gerstewitz, nr Weissenfels, 18 March 1946). German organist and composer. He studied at the Halle college of church music, the Leipzig Musikhochschule, the Prague Academy of Arts and privately in Berlin with Paul-Heinz Dittrich (from 1970). He also participated in organ masterclasses with Gerd Zacher, Guy Bovet and Jean Guillou. From 1970 to 1982 he served as organist of St Jakob, Köthen, where he was appointed director of sacred music in 1980. In 1983 he became organist of the Kreuzkirche, Dresden. His recital programmes have often featured his own works and compositions especially written for him. Among his honours are the Boswil prize (1977) and the Dresden art prize (1994).

Winkler does not separate his role as an organist from his role as a composer. His chorale settings and particularly his organ improvisations express his enthusiasm for new realms of sound. Finely differentiated tone colours and powerful contrasts are characteristic of his style. In the sphere of church music, his modernity has been controversial. Many of his works are influenced by serial and aleatory models that were severely criticized in the DDR. His output also includes electronic compositions.

BEATE SCHRÖDER-NAUENBURG

Winkler, Peter K(enton) (*b* Los Angeles, 26 Jan 1943). American composer. After studying with Seymour Shifrin at the University of California, Berkeley (BA 1964), he attended Princeton University (MFA 1968), where his teachers were Babbitt and Kim. From 1968 to 1971 he was a Junior Fellow at Harvard; he then joined the faculty of SUNY, Stony Brook. In 1976 Winkler won a League of Composers-ISCM prize for *Humoresque* and in 1978 received a MacDowell Colony Fellowship. He has also been active as a musical director for theatrical productions.

Winkler's compositions are either formal and cultivated or popular and vernacular, with each style influencing the other one. A strong sense of rhythm pervades his work (one important exception being the experimental String

Quartet, 1967). Conspicuous also are a controlled sense of humour, as in *Piano Rags* (1971) and *No Condition is Permanent* (1980–89), and dramatic gestures, as in the final movement of the Symphony (1976–8) and *Recitativo e terzetto* (1980). Dramatic considerations become more prominent in Winkler's later works such as *Clarinet Bouquet*, used by the Joan Lomardi dance company for *Mnemosyne*, 1981–2, and *Out!* (1996–7), commissioned by the Connecticut Gay Men's Chorus, as well as in his incidental music. As a writer and theorist, Winkler has concentrated on the analysis of popular music.

MICHAEL MECKNA

Winneberger, Paul Anton. *See* WINEBERGER, PAUL ANTON.

Winner, Septimus (*b* Philadelphia, 11 May 1827; *d* Philadelphia, 22 Nov 1902). American composer, teacher and publisher. His parents were Joseph Eastburn Winner, a violin maker, and Mary Ann Winner (née Hawthorne), a relative of Nathaniel Hawthorne. Largely self-educated in music, he played and taught several instruments. Around 1845 Winner became a music publisher and opened a music store with his brother Joseph. He was active in Philadelphia's music circle and was a member of the Musical Fund Society, in whose orchestra he played for five years, the Cecillian Musical Society, and the Philadelphia Brass Band.

Winner wrote many simple and highly popular pieces, arrangements and instruction methods for different instruments. He is best known for his songs issued under the pseudonym Alice Hawthorne, which spawned the genre known as 'Hawthorne Ballads'. Other pseudonyms were Percy Guyer, Mark Mason and Paul Stenton. Recognition came with *How sweet are the roses* (1850), followed by *What is home without a mother?* (1854). *Listen to the mocking bird* (1855) was an enormous success: within 50 years Americans and Europeans bought around 20 million copies. The tune came from Dick Milburn, a black youth who ran errands at Winner's store.

In 1862, after General George B. McClellan was discharged as commander of the Army of the Potomac, Winner composed *Give us back our old commander: Little Mac, the people's pride*. Winning wide approval, it so provoked Edwin M. Stanton, Secretary of War, that Union soldiers were forbidden to sing it. Stanton made Winner destroy all unsold copies. When McClellan became the Democratic candidate for president in 1864, the piece was his campaign song. Other favourite songs by Winner include *Der Deitcher's Dog* ('Oh where, oh where ish mine little dog gone', 1864), *Whispering Hope* (1868) and *Ten Little Injuns* (1868). (A number of Winner's songs appear in R. Jackson, ed.: *Popular Songs of Nineteenth-Century America*, 1976.)

NICHOLAS E. TAWA

Winnipeg. City in Canada, capital of Manitoba. Its geographical isolation has been a disadvantage in that more expensive and complicated types of music-making, such as opera, have not become established. However, the Royal Winnipeg Ballet grew from its foundation in the 1930s to a position as one of the leading international travelling companies. The first 40 years of the city's musical life (1874–1914) consisted mostly of sporadic concerts by amateur or visiting artists and private musical enterprise. A long series of British organists and choirmasters, along with the rapidly expanding activities of the Men's Musical Club (founded 1915), established a tradition of respect for English music that was not challenged by other music until the mid-20th century. The Winnipeg Male Voice Choir (1916) made several American tours in the 1920s, and the mixed Philharmonic Society (1922), taken over by the Men's Musical Club in 1929 to form the Philharmonic Choir, helped to make the interwar period particularly notable in terms of public musical participation. This growing involvement of the public was enormously increased by the club's sponsorship of the Manitoba Musical Competition Festival (from 1919), which subsequently became the largest of its kind in the world. In 1983 it was renamed the Winnipeg Music Competition Festival. Many of its leading competitors have achieved international fame.

An important postwar development was the foundation (1948) of the Winnipeg SO, which developed on a regular subscription basis and cooperated with the Philharmonic Choir in large-scale choral works. The orchestra's conductors have included Walter Kaufmann (1949–56), Victor Feldbrill (1958–68), Piero Gamba (1970–80) and Bramwell Tovey (from 1989). In 1969 the Manitoba Opera Association was founded and has become Winnipeg's permanent opera-producing organization, mounting productions of the standard repertory. The Manitoba Chamber Orchestra was founded in 1972 and several chamber groups, the most notable of which is the Festival String Quartet (1968), have become established. Other contributors to musical life are the Women's Musical Club, active as a concert agency, the University of Manitoba School of Music (1964), the Winnipeg Chamber Music Society, the Winnipeg Singers, MusikBarock (1989) and the CBC's annual Spring Radio Festival. The annual summer Winnipeg Folk Festival, founded in 1974, features Canadian and international folksingers and folk groups.

Winslade [Winslate], **Richard.** *See* WYNSLATE, RICHARD.

Winter, Georg Ludwig (*d* Berlin, before 1772). German music printer and publisher. He founded his firm in Berlin

in 1750 and introduced Breitkopf's improved typeface there. He published primarily works by Berlin composers (Quantz, Agricola, C.P.E. Bach) and collections such as *Musicalisches Mancherley* (1762–3) and *Lieder der Deutschen mit Melodien* (1767). From June 1772 his widow continued the business; in 1787 J.C.F. Rellstab took over the printed music and Winter's firm ceased business.

RUDOLF ELVERS

Winter [von Winter], **Peter** (*b* Mannheim, bap. 28 Aug 1754; *d* Munich, 17 Oct 1825). German composer.

1. LIFE. He was a pupil of several of the Mannheim court musicians, including the elder Thomas Hampel, and as a boy showed outstanding gifts as a violinist; at the age of ten he was playing in the court orchestra, and subsequently his services were employed on the double bass as well as the violin. In 1776 he had a permanent post as a violinist. Although he had no lessons in composition, he seems at this early stage of his career to have been active as a composer of instrumental music. He was briefly a pupil of the vice-Kapellmeister at Mannheim, G.J. Vogler (who later founded the Mannheim Tonschule), but later dissociated himself from him. Winter's work in the orchestra also brought him into contact with contemporary opera, particularly *opere serie* by J.C. Bach and also Anton Schweitzer's *Alceste* and Ignaz Holzbauer's *Günther von Schwarzburg*, and with the melodramas of Georg Benda, which were exciting much attention. In 1778 the electoral court, with all its musical personnel, moved to Munich, where Winter became director of the orchestra. In this capacity he was responsible, in particular, for conducting the *opéras comiques* that the Marchand troupe performed in German translation at the 'deutsche Schaubühne'. The lively cultural atmosphere of Munich was a stimulus to his general outlook as well as to his musical development; and at this time he first met Mozart, whose *Idomeneo* was given in Munich in 1781. He began to compose for the stage, writing ballets, and melodramas modelled on Benda. A concert tour with the clarinettist Franz Tausch took him to Vienna (1780–81), where he learned from Salieri the Italian bel canto manner, a style whose flowing cantabile he mastered to perfection. In Vienna he also made contact again with Mozart – though evidently in somewhat strained circumstances (see Mozart's letter to his father, 22 December 1781).

Soon after his return to Munich, in 1782, he made his début as an opera composer with *Helena und Paris*, but this work was unsuccessful, as was *Bellerophon* (1785). He was appointed vice-Kapellmeister in 1787, and in 1798 became court Kapellmeister, a post he held until his death. Despite his initial lack of success he continued to compose operas, and several times took extended leave from Munich in an attempt to make a name for himself in various centres as an opera composer. He visited Naples and Venice between 1791 and 1794 and Prague and Vienna from 1795 to 1798, and it was in Vienna that he achieved his first decisive success with *Das unterbrochene Opferfest* (1796). From then on he enjoyed a high reputation well beyond Munich, though the next operas he wrote for Munich were received with little enthusiasm. He was particularly pained by the failure of the heroic opera *Colmal* (1809), which he regarded as his most successful work. In 1804 and 1805 three new operas (all settings of texts by Da Ponte) were well received in London, but *Tamerlan* (1802) and *Castor et Pollux* (1806; a translation of *Il trionfo dell'amor fraterno*) met with cool receptions in Paris. In his later years Winter devoted himself increasingly to composing church music and to teaching singing, and in 1825 he recorded his teaching method in the *Vollständige Singschule*. To mark his completion of 50 years in court service in 1814 he was decorated and granted a personal title of nobility. In 1816 he embarked on a concert tour of northern Germany and Italy with his pupil Clara Metzger-Vespermann, later a celebrated singer, during the course of which he directed three of his operas in Milan in 1817 and 1818. His last opera for Munich was the Singspiel *Der Sänger und der Schneider* (1820), but he remained active until his last years as a composer of church music.

2. WORKS. As Kapellmeister of a court with the high musical reputation that Munich enjoyed at the time, Winter was a well-known figure and, particularly after the success of *Das unterbrochene Opferfest*, a highly esteemed one. Among his collaborators were Schikaneder in Vienna and Da Ponte in London. The unfavourable opinions of such contemporaries as Mozart, Spohr, Meyerbeer and Weber, however, point to a personal character that was unstable and difficult. In his youth he had a good name as a violinist, but his international reputation rests on his operas. His instrumental works (symphonies, concertos for various instruments, several different genres of chamber music) date for the most part from his early years, and are of no particular significance. The instrumental compositions of his maturity are characterized, like all his music, by a smooth cantabile melodic style and generally simple texture. His Battle Symphony of 1814, a typical patriotic work of its time, reveals his liking for colourful orchestration, a taste that perhaps owed something to Abbé Vogler.

Winter's church music is notable for its calm gravity and noble simplicity. Never having undergone systematic instruction in counterpoint, he was only too ready to avoid extended fugues even in his sacred works, though there are exceptions such as the Kyrie of the C minor Requiem. The emphasis, both in the predominantly homophonic choruses and in the solo movements, is rather on the finely balanced expressive simplicity of the melodic writing, which always reflects the words in a subdued manner. In accordance with the effect of dignity that Winter aimed at in his church music, the orchestration is more restrained than it is in the operas and secular cantatas. Of the latter, a particular favourite with his contemporaries was *Timoteo, o Gli effetti della musica*, an extended piece with loose-textured choruses and ensembles and demanding bravura arias.

Winter's operatic output provides an accurate reflection of the situation around the turn of the 19th century, when German opera constituted a meeting-point of all the current operatic genres, either in their original forms or intermingled. Winter was a composer of great facility; tunes flowed easily from his pen. But he did not have the ability of genius to select what he needed from the various

operatic types, and then to impress on his chosen material the stamp of his own personality. He wrote examples of Italian *opera seria* and *opera buffa*, French *tragédie lyrique*, German Singspiel, and works in the post-Gluckian and post-Mozartian traditions, but in every case was content to adhere to the conventional pattern. At the beginning of his career as a composer for the stage he also composed dramatic ballets of the Noverre type, and in his melodramas he relied heavily on the model of Georg Benda's *Ariadne auf Naxos* and *Medea*. This eclectic disposition was the fate of Winter's generation: German composers, having no native tradition to build on like the Italians and the French, were inevitably cosmopolitan in outlook and their individuality was stifled by the weight of foreign influences. Winter thus worked as it were on foreign territory, and he did so with great expertise. In *La grotta di Calipso*, for instance, he spoke the language of *opera seria* with complete conviction, as he did that of *buffa* in *Ogus, ossia Il trionfo del bel sesso*; his gifts as a melodist were put to full use in the extended arias of the former, and his meticulous word-setting stood him in good stead in the rapid chatter of the *buffo* ensemble. Michael Kelly claimed that Winter wrote *Il ratto di Proserpina* in only three weeks. His adoption of the style of *tragédie lyrique* was evidently less successful, to judge from the failure of *Tamerlan* and *Castor et Pollux* in Paris. A typical example of his contribution to the German Singspiel is *Der Bettelstudent, oder Das Donnerwetter*, with its spoken dialogue and mixture of musical styles, including German strophic songs in a popular vein, italianate arias, and a French vaudeville. But his first opera, *Helena und Paris*, as Winter himself wrote in his preface, sought to take up the threads of the serious German opera of Holzbauer; this work, which seems to be based on a German adaptation of Calzabigi's libretto for Gluck, shows Italian and French influence, including ballets, extensive choruses and arias with concertante writing. *Das Labyrinth*, on the other hand, was written as a sequel to *Die Zauberflöte*, but for all the instances of correspondence between the two operas in libretto and music, Winter's has not a trace of the genius of Mozart's work.

Nevertheless, Winter could scarcely have acquired such a reputation merely by imitating the work of others. His importance lies in the skill with which he fused his various stylistic ingredients, especially in *Das unterbrochene Opferfest* and in some of the subsequent German operas such as *Der Sturm*, *Marie von Montalban* and *Colmal*. There are constant reminders of Mozart, and in the choruses Gluck's idiom is found alongside features of the German, Italian and French operatic traditions. But everything is held together by the consistently attractive melodic style that Winter's long experience had taught him, whether he was writing in a pathetic, aria-like vein or in a songlike popular manner. Increasingly he wrote large-scale, through-composed complexes of scenes in a bold, chromatic harmonic style, and with a fine sense of sonority that depends for its effect on varied instrumentation and dynamic contrast. In these respects Winter, the follower of Mozart, heralds the beginnings of German Romantic opera.

WORKS

STAGE

Cora und Alonzo (melodrama, 4, J.M. von Babo), Munich, 1778, *D-MHrm* (lost; copy in *US-Wc*)

Lenardo und Blandine (melodrama, 2, J.F. von Göz, after G.A. Bürger), Munich, National, 25 June 1779, *D-Mbs* (facs. in GOB, x, 1986), *US-Wc*

Reinhold und Armida (melodrama, 3, Babo, after T. Tasso: *Gerusalemme liberata*), Munich, Salvator, 30 March 1780, *D-DS* (lost)

Helena und Paris (ernsthaftes Spl, 3, K.J. Förg, ?after R. de' Calzabigi), Munich, National, 5 Feb 1782, *Mbs*

Das Hirtenmädchen (Spl, 1, H. Braun), Munich, National, 26 March 1784

Der Bettelstudent, oder Das Donnerwetter (Spl, 2, P. Weidmann, after M. de Cervantes: *La cueva de Salamanca*), Munich, National, 2 Feb 1785, *Bsb*, *DS* (lost), *Mbs*, *US-Cn*, vs (1789)

Bellerophon (ernsthaftes Spl, 3, J.F. Binder von Krieglstein), Munich, Hof, 29 July 1785, *D-DS* (lost), *D-DO* (vocal score only)

Circe (os, 2, D. Perelli), composed for Munich, Hof, carn. 1788, but not perf.

Medea und Jason (melodrama, A.C. von Törring-Seefeld), ?Munich, Schloss Seefeld, 1789

Psyche (heroisches Spl, 2, K.F. Müchler), Munich, Hof, Oct 1790, *A-Wn*

Jery und Bäteli (Spl, 1, J.W. von Goethe), ? Munich, Schloss Seefeld, 1790

Das Lindenfest, oder Das Fest der Freundschaft, 1790 (operetta, 2), ?unperf.

Scherz, List und Rache (Scapin und Scapine) (Spl, 4, Goethe), Munich, Schloss Seefeld, 1790, *Wgm*

Catone in Utica (dramma per musica, 3, P. Metastasio), Venice, S Benedetto, May 1791, scena and aria with coro in *US-Bp*

Antigona (os, 2, M. Coltellini), Naples, S Carlo, 4 Nov 1791, ? *I-Nc*

Il sacrifizio di Creta, ossia Arianna e Teseo (dramma per musica, 2, P. Pariati), Venice, S Benedetto, 13 Feb 1792

I fratelli rivali (dg, 2, M. Botturini), Venice, S Benedetto, Nov 1793, *A-Wn*, *B-Bc*, *D-DS* (lost), *Mbs*, *US-Wc*, vs (Bonn, n.d.), Ger. trans. as Die Brüder als Nebenbühler

Belisa, ossia La fedeltà riconosciuta (dramma tragicomico, 2, A. Pepoli), Venice, S Benedetto, 5 Feb 1794, *A-Wgm*; as Elise, Gräfin von Hilburg (trans. and arr. K.L. Gieseke), Vienna, Wieden, 30 Jan 1798, *B-Bc*, *D-DS* (lost)

Die Thomasnacht (komische Oper, 2), Bayreuth, 1 July 1795

Ogus, ossia Il trionfo del bel sesso (Il tartaro convinto in amore) (dg, 2, G. Bertati), Prague, National, 1795, *Bsb*, *Mbs*, vs (Leipzig, n.d.)

I due vedovi (2, G. De Gamerra), Vienna, Burg, 13 Jan 1796, *A-Wgm*, *Wn*

Das unterbrochene Opferfest [Il sacrifizio interrotto; Le sacrifice interromptu; The Oracle, or The Interrupted Sacrifice] (heroisch-komische Oper, 2, F.X. Huber), Vienna, Kärntnertor, 14 June 1796, *Wgm*, *D-Bsb*, *Mbs*, *Us-Bp*, *NYps*, vs (Bonn and Leipzig, 1798)

Babylons Pyramiden (heroisch-komische Oper, 2, E. Schikaneder), Vienna, Wieden, 25 Oct 1797, *A-Wgm*, *Wn*, *D-Bsb*, *Mbs*, *US-Wc*, vs (Vienna, 1797), collab. J. Mederitsch

Pigmalione (dramma semiserio, 1), ? Munich, 1797, lib in *D-Mbs*

Das Labyrinth, oder Der Kampf mit den Elementen (Die Zauberflöte, zweiter Theil) (heroisch-komische Oper, 2, Schikaneder), Vienna, Wieden, 12 June 1798, *D-Bsb*, *DT*, *F*, *Hs*, *Sl*, *I-Fc*, vs (Offenbach and Bonn, n.d.)

Der Sturm (grosse Oper, 2, F.X. Kaspar, after W. Shakespeare: *The Tempest*), Munich, Hof, Oct 1798, *D-DS* (lost), *Mbs*

Marie von Montalban (ernsthaftes Spl, 4, K. Reger, after J.N. Komarek), Munich, Hof, 28 Jan 1800, *A-Wgm*, *Wn*, *D-Bsb*, *F*, *Mbs*, *Sl*, *US-Wc*, *Bp*, vs (Mainz, 1798)

Tamerlan (4, E. Morel de Chédeville, after Voltaire: *L'orphelin de la Chine*), Paris, Opéra, 14 Sept 1802, *F-Pc*, *Po*, *A-Wn* (Ger.), *US-Su* (It.); (Paris, 1802)

La grotta di Calipso (os, 2, L. da Ponte), London, Haymarket, 31 May 1803, *A-Wgm*, *Wn*, *D-Bsb*, vs (Leipzig, n.d.); in Ger., as Calypso, Munich, Hof, 17 Jan 1807, *Mbs*

Il trionfo dell'amor fraterno (os, 3, Da Ponte), London, Haymarket, 22 March 1804; as Castor et Pollux (5, P.-J. Bernard and Morel de Chédeville), Paris, Opéra, 19 Aug 1806, *A-Wgm*, *Wn*, *F-Po*

Il ratto di Proserpina (os, 3, Da Ponte), London, Haymarket, 3 May 1804, *A-Wgm*, *Wn*, *B-Bc*, *D-Bsb*, *Us-Wc*, vs (London, ?1815)

Zaire (2, Da Ponte, after Voltaire), London, Haymarket, 29 Jan 1805, *A-Wgm*, *Wn*, *B-Bc*, *D-Mbs*

Der Frauenbund (komische Oper, 3, Babo), Munich, Hof, 17 March 1805

Die beiden Blinden, 1807–10 (Spl, 3, F. von Holbein), ? Munich, Hof, spr. 1810 [cited in Manferrari]

Salomons Urtheil (3), ? Munich, Hof, 1808, *Mbs*
Colmal (heroische Oper, 2, M. von Collin, after Ossian), Munich, Hof, 15 Sept 1809, *DS* (lost), *Mbs*
Die Pantoffeln (Spl, J.F. Schink), Hamburg, April 1811
Maometto II [Mahomed] (tragedy, 2, F. Romani, after Voltaire), Milan, Scala, 28 Jan 1817, *B-Bc, D-Bsb, Mbs, US-Wc* (Ger.)
I due Valdomiri (os, 2, Romani), Milan, Scala, 26 Dec 1817
Etelinda (opera semiseria, 2, G. Rossi), Milan, Scala, 23 March 1818
Der Sänger und der Schneider (Spl, 1, F. von Drieberg), Munich, Hof- und National, 20 Jan 1820, *D-Mbs*
Ballets, perf. Munich: Pyramus und Tisbe (C. Legrand), 1779; La mort d'Hector (Legrand), 1779, *Mbs*; Die Liebe Heinrichs IV. und der Gabriele oder Die Belagerung von Paris (P. Crux), 1779, *Mbs*; Der französische Lustgarten (E. Lauchery), 1779; Baierische Lustbarkeiten oder Die Heirat durch Gelegenheit (Lauchery), 1779; Ines de Castro (Legrand), 30 July 1780, *Mbs*; Vologesus [Il trionfo della verità] (pantomime ballet, S.V. Gellet), excerpts arr. (Vienna, 1786); La mort d'Orphée et d'Euridice (pantomime, 4, Crux), 1792; 5 others, doubtful

ANNA AMALIE ABERT/PAUL CORNEILSON

Winterfeld, Carl Georg Vivigens von (*b* Berlin, 28 Jan 1784; *d* Berlin, 19 Feb 1852). German musicologist. He studied law at the University of Halle and was appointed a judge in Breslau in 1816. He returned to Berlin in 1832, and was made an honorary member of the Prussian Academy of the Arts in 1839. He was a corresponding member of the Maatschappij tot Bevordering der Toonkunst and one of the founders of the Bach-Gesellschaft.

During a journey he made to Italy in 1812, of which he kept a diary, Winterfeld transcribed compositions of the 16th, 17th and 18th centuries; the collection he left is now in the Staatsbibliothekzu Berlin. His work *Johannes Gabrieli und sein Zeitalter* (1834) is not only a biography of the composer but also a history of music of the city of Venice. In his study of Lutheran church music he regarded the song settings of Johannes Eccard as the most valuable works in that field, as they conform to the chorale; the works of Schütz and Bach, in his view, maintain their position as sacred music, though not as music for the church.

BERNHARD STOCKMANN

Winterhalter, Hugo (*b* Wilkes-Barre, PA, 15 Aug 1910; *d* Greenwich, CT, 17 Sept 1973). American arranger, conductor and composer. He started playing the violin at the age of six, later studied reed instruments, and was playing professionally by the time he was in high school. He taught music and led the school orchestra while a student at St Mary's College in Emmitsburg, Maryland,

and graduated from the New England Conservatory. After teaching music in high school he began to play the saxophone in club bands in New York; during the 1930s and 40s he played with various dance orchestras, including those of Larry Clinton, Raymond Scott, the Dorsey brothers, Count Basie, Vaughn Monroe and Benny Goodman. Winterhalter turned to arranging in 1944, and eventually arranged music for many of these bands, and also for such singers as Billy Eckstine, Kate Smith, Dinah Shore, Eddie Fisher, Kay Starr, Perry Como, Doris Day, Frank Sinatra, the Ames Brothers and Mario Lanza. In 1948 he joined MGM as music director, and held similar positions at Columbia (1949–50), RCA Victor (1950–63) and Kapp. While with RCA he was a key studio arranger and conductor; his large, lush string orchestra backed many popular singers, and 11 of the recordings he made became gold records. Winterhalter was also a composer, and wrote such hits as *How do I love thee?* (1951), *Hesitation* (1952), and *Melody of Spain* (1962); his biggest hit was his arrangement of Eddie Heywood's instrumental piece *Canadian Sunset* (1956), which sold 1,500,000 copies during the 1950s. He appeared as a conductor with the Hollywood Bowl Orchestra, the Milwaukee SO and the National SO in Washington, DC.

KATHERINE K. PRESTON

Winter-Hjelm, Otto (*b* Christiania [now Oslo], 8 Oct 1837; *d* Christiania, 3 May 1931). Norwegian composer and writer on music. He studied at the Leipzig Conservatory (1857–8) and was later a pupil of Kullak and Wüerst in Berlin. From 1863 to 1871 he was director of the Philharmonic Society and in 1864, with Grieg, he founded the first Norwegian music academy, which opened in 1867. He was also organist at the Trefoldighetskirke, Christiania (1874–1921), and music critic for *Aftenposten* (1887–1913). He wrote two symphonies (1861, 1862) and much vocal music, especially male-voice choruses, as well as chamber music and piano and organ pieces. (H.-M. Weydahl: 'Otto Winter-Hjelm', *Norsk musikktidskrift*, xi (1974), 155–60)

□

Winternitz, Emanuel (*b* Vienna, 4 Aug 1898; *d* New York, 22 Aug 1983). American musicologist of Austrian birth. He gained an LlD at the University of Vienna in 1922 and taught philosophy of law at the University of Hamburg. After studies in music and musical instruments with various teachers he emigrated in 1939 to the USA, where he was first a lecturer at the Fogg Museum of Harvard University (1938–41) and then lecturer and keeper of the collection of musical instruments at the Metropolitan Museum of Art, New York (1941–9). In 1949 he became curator of musical instruments as the Metropolitan Museum made the collection an official department of the museum. He held this post until his retirement in 1973. He was also a lecturer at Columbia University (1947–8) and was a visiting professor at Yale, Rutgers, CUNY and the State University of New York at Binghamton.

As a specialist in musical instruments, Winternitz explored several areas of his field including the history of instruments, instruments as works of art, musical iconography and musical archaeology of the Renaissance. His *Musical Instruments of the Western World* (1966) is a splendid collection of photographs with descriptive comments and an introductory essay placing the instruments in their social and artistic context. His monograph on Gaudenzio Ferrari shows what contributions iconography can make to historical musicology, in this case to the question of the origins of the violin. At the Metropolitan Museum Winternitz aimed to bring the instruments in the collection to playing condition, believing that they would not survive if they were not played. He was responsible for the reorganization of the Crosby Brown Collection of Musical Instruments of All Nations.

PAULA MORGAN/R

Winterthur. Town in Switzerland. Its active musical life is promoted chiefly by the Musikkollegium Winterthur (founded in 1629 and maintained by private and public patronage), whose traditions have not prevented it from giving the town a reputation as a bastion of modern music, thanks particularly to the patronage of the merchant Werner Reinhart (1884–1951), whose manuscript collection is preserved in *CH-W*. The Musikkollegium

administers the Orchester Musikkollegium Winterthur (formerly the Winterthur Stadtorchester, founded 1875) and the school of music (founded 1873), since 1999 called Musikschule und Konservatorium. In 1999 the former conservatory merged with its Zürich counterpart to become the Musikhochschule Winterthur Zürich. The Musikkollegium arranges many of the concerts which are the basis of local musical life including conventional symphony concerts and also free popular concerts and chamber concerts. Conductors have included Georg Rauchenecker, Hermann Scherchen, Joseph Keilberth, Victor Desarzens, Franz Welser-Möst, Heinz Holliger and Heinrich Schiff.

The Winterthur String Quartet was founded in 1920. There is a strong tradition of vocal music, with several choirs. An organ in the Stadtkirche was first mentioned in 1482 but was removed by 1529; it was not replaced until 1809, when the Riepp organ built in 1768 for the abbey of Salem in south Germany was purchased. Notable organists of the Stadtkirche have included Theodor Kirchner, Hermann Goetz, Karl Matthaei and (since 1976) Rudolf Meyer. The music publisher J.M. Rieter-Biedermann (1811–76) founded his firm in 1848, and was host to Clara Schumann, Liszt and Brahms, who wrote part of the *German Requiem* in Rieter's home. In 1973 the Amadeus Verlag was established by Bernhard Päuler. The Swiss Viola da Gamba-Gesellschaft was founded in Winterthur in 1992. Since 1978 a popular music festival has been held annually in late summer.

HANS EHINGER/JÜRG STENZL/HARRY JOELSON-STROHBACH

Winther, H.T. Norwegian firm of music publishers. It was opened in Christiania in 1822 by the Dane Hans Thøger Winther (1786–1851). He traded in books, sheet music and instruments and also published books on music. In 1823 he set up the first music lending library in Norway. His firm was the most important music shop and publishing house in the country for the first half of the 19th century; it issued almost 200 light musical titles, some through the periodical *Amphion*. After Winther's death in 1851 the business was sold by auction.

Winther's son Edvard ran his own publishing and printing business from 1841. He published three music periodicals, *Lyra*, *Musikalsk Løverdagsmagazin* and *Musikalsk Album*, in which many Norwegian compositions appeared for the first time. Other Norwegian music publishers made much use of his printing firm. The business was taken over by Carl Warmuth in 1878.

KARI MICHELSEN

Wintonia, W. de (*fl* 1270–1316). English cleric. His name signifies that he was from Winchester. In the 1270s and 1280s he was a member and, by 1281, sub-prior of Leominster Priory in Herefordshire. In the 1280s he carried out at least two assignments at its parent house in Reading, where he had probably begun his monastic career, and to which he may well have returned for an unknown period. He owned a music book probably written about 1290, which contained 164 polyphonic compositions, providing a generous cross-section of English polyphony of the later 13th century. Unfortunately the manuscript itself is lost, but there exists a detailed list of its contents, written by a late 13th-century hand and headed 'Ordo li[bri] W. de Wint', on ff.160*v*–161 of the manuscript that contains the rota SUMER IS ICUMEN IN (*GB-Lbl* Harl.978). In 1316 he was in service as apparitor at the deanery in Pontesbury, Shropshire. (*See also* WYCOMBE, W. DE and BURGATE, R. DE.)

ERNEST H. SANDERS

Wintz, Georg. *See* VINTZ, GEORG.

Winwood, Steve (*b* Birmingham, 12 May 1948). English rock singer, guitarist and keyboard player. Emerging from the mid-1960s British electric blues revival as a member of the Spencer Davis Group, he first made his mark in the UK with singles such as *Keep on runnin'* (1965) and *Somebody help me* (1966). The group had hits in the USA with *Gimme some lovin'* (1967) and *I'm a man* (1967); Winwood's husky vocals and Hammond organ playing provided the most authentic-sounding rhythm and blues of the British scene in the 1960s. In 1967 he formed Traffic, whose lyrical, psychedelic pop style can best be heard on the song *Paper Sun* (1967). After one album with Eric Clapton (*Blind Faith*, Polydor, 1969), Winwood reformed Traffic. This second version of the band blended rock, pop and rhythm and blues with modal jazz improvisation to produce a series of albums that became staples of 1970s FM radio in the USA, especially *John Barleycorn Must Die* (Isl., 1970), *The Low Spark of High Heeled Boys* (Isl., 1971) and *Shoot Out at the Fantasy Factory* (Isl., 1973). With the breakup of Traffic in 1975, Winwood began a solo career. His 1980 album *Arc of a Diver* (Isl.) featured him singing and playing all parts, and its single 'While You See a Chance' was a US top ten hit. His album, *Back in the High Life* (Isl., 1986) generated the hit singles 'Higher Love', 'Back in the High Life Again' and 'The Finer Things', while *Roll with It* (Virgin, 1988) marked the peak of Winwood's popularity.

JOHN COVACH

Wiora, Walter (*b* Kattowitz [now Katowice, Poland], 30 Dec 1906; *d* Tutzing, 9 Feb 1997). German musicologist. He studied at the Hochschule für Musik, Berlin (1925–7), and read musicology at Berlin under Abert, Blume, Hornbostel, Sachs, Schering and Schünemann and at Freiburg under Gurlitt (1926–36). There he took the doctorate in 1937 with a dissertation on the development

of folksong and became an assistant at the Deutsches Volksliedarchiv, Freiburg (1936–41). In 1941 he completed the *Habilitation* in musicology with a work on Kretschmer's and Zuccalmaglio's collection. Subsequently he was appointed reader in musicology at Posen (Poznań; 1942), archivist at the Deutsches Volksliedarchiv, Freiburg (1946–58) and professor of musicology in succession to Blume at Kiel (1958). There he founded and directed the Herder-Institut für Musikgeschichte and was also a member of the German UNESCO Commission. From 1964 until his retirement in 1972 he was professor of musicology at Saarbrücken. He was a member of the governing body of the Deutscher Musikrat (1956–65), on whose behalf he edited the *Musikalische Zeitfragen*, and of the International Folk Music Council Committee (from 1955).

Wiora worked in many areas of research: folksong and folk music; music aesthetics and the history of the concept of music; individual periods and countries; genres (especially the lied); species of music (e.g. absolute music, programme music); and composers (Josquin, Brahms). His work was characterized by thoughtful consideration of the aims and methods of musicology and of every aspect of the material under debate. As a basic method he developed a system of 'essential research' which takes into account the traditional processes as well as the constant factors and principles of development in the historical evolution of music. This attempts to bring systematic and historical musicology together and to give a universal perspective to music history, relating folk music and art music and abolishing European centrality: Western art music is merely one 'age of music'. In his *Die vier Weltalter der Musik* (1961) Wiora described this age in connection with prehistory and early times as well as with the music of the highly developed cultures of antiquity and of the orient and with the 'age of technology and global industrial culture'.

HANS HEINRICH EGGEBRECHT

Wipo [Wigbert] (*b* ?Solothurn, *c*995; *d c*1050). Priest, poet and chronicler. He studied at Solothurn, became chaplain to the Emperor Conrad II (*d* 1039) some time before 1020, and then teacher and confessor to Emperor Henry II (*d* 1056). In 1045 he went into seclusion as a hermit, when he wrote his biography of Conrad.

His musical importance lies in the attribution to him of *Victimae paschali laudes* by Schubiger on the basis of an Einsiedeln manuscript of the late 11th century (facsimile in Schubiger), which places the name 'Wipo' at the head of the sequence. Julian cited as evidence against this the appearance of the sequence in two manuscripts possibly dated too early in the 11th century for Wipo to have written the work (*CH-SGs* 340, to which the sequence is apparently added, and *F-Pn* lat.10510, from Echternacht). The Einsiedeln manuscript, however, may be one of those medieval sources that ascribes items, sometimes on less than good authority, to eminent persons; at least, the other items from this manuscript reproduced by Schubiger are also ascribed, including a Gloria ascribed to 'Leonis pape'. In all, the attribution remains uncertain.

The sequence is generally taken to be representative of the transition from the early prose type to the later rhyming, scanning type. Beyond that, it is short, clearly focussed, and sets the dialogue with Mary to an 'over-couplet' phrase structure ($AB^1B^2C^1D^1C^2D^2E^1E^2$). Phrase E^1, referring to the Jews, is omitted in modern performing editions. (Derivation of the incipit of the melody from the Alleluia *Christus resurgens* is speculative.) The work became incorporated into Easter dramas, and was popular; it was one of the five sequences to survive into the 20th-century Roman gradual.

RICHARD L. CROCKER

Wiquardus. Another name for the composer Biquardus. *See* PICARD, (2).

Wirbel (i) (Ger.). The peg of a string instrument. A *Wirbelkasten* is a PEGBOX.

Wirbel (ii) (Ger.). A drumroll. *See* DRUM, §II.

Wircker [Würker, Testorius, Hymaturgus, ?Weber], **Johann** [Johannes] (*b* Oschatz, Saxony; *fl* 1548–72). German composer, singer, copyist and teacher. In 1548 he was in the choir of the electoral Hofkapelle at Dresden. He attended the St Afra Fürstenschule at Meissen from 1551 to 1554, when on 16 April he entered the University of Wittenberg. In 1557 he is described as Rektor of the school at Borna, Saxony, in 1561 as a Kantor and musician at the Saxon electoral court and in 1563–5 as a copyist in the service of King Maximilian of Bohemia at Breslau. In 1565 he is referred to by the name Testorius, in 1571 as a musician at Oschatz with the name Hymaturgus and in 1572, as Johann Würker, as a singer. He may be the Johann Weber referred to in 1562 as 'composer from Oschatz'. As a composer he is known by the *Missa super 'Castigans castigavit'* and the wedding motet *Viri diligite*, both for four voices (and both in autograph copies in *D-Mbs*), and a six-part *Te Deum* (in *D-Dl* and *LEu* [inc.]). In a letter of 1 November 1563 to Duke Albrecht of Prussia he stated that he was the composer of two six-part motets, *Domine, dirige* and *Puer natus est nobis*, both now lost (formerly in *RUS-KA*). Motets that he apparently composed for Dukes Christoph and Ludwig of Württemberg are also no longer extant. Of other works stated in Eitner to be by him, the *Missa super 'Ave praeclara'* is now known to be by Finck, the *Missa super 'Aspice'* by Monte and the motet *Cantemus nunc unanimes* by Ruffo; the 'Patrem omnipotentem' and 'Pleni sunt coeli' mentioned by Kade are from the *Missa super 'Ave praeclara'*, and *Lauda anima* is simply a motto copied into various choirbooks.

LIESBETH WEINHOLD

Wirén, Dag (Ivar) (*b* Striberg, Närke, 15 Oct 1905; *d* Stockholm, 19 April 1986). Swedish composer. He studied composition with Ellberg at the Swedish Royal Academy of Music (1926–31), and in 1929 he passed the organist's examination. In 1931 he went to Paris, where he studied composition and orchestration with Sabaneyev (1932–4), came into contact with the music of Stravinsky and Prokofiev and became a neo-classicist himself. He was librarian of the Swedish Composers' Association (1935–8). Later appointments included the post of music critic of the *Svenska morgonbladet* (1938–46), membership of the executive committee of the Swedish Composers' International Music Agency (STIM, 1939–68) and the vice-chairmanship of the Swedish Composers' Association (1947–63).

Wirén's early neo-classical pieces, such as the Piano Trio (1933) and the Sinfonietta (1933–4), are apt and entertaining, with an individual marked rhythmic and melodic outline. Another example is his most popular work, the Serenade for strings (1937), whose well-known last movement parodies military music in imitating drums. Even during the war he continued to write diverting pieces (e.g. the Little Suite op.17 and the two radio operettas) as a sort of desperate protest; but with peace his music began to change, and problems of form became increasingly important to him. The metamorphosis technique of his later work appeared initially in the Third Quartet, the first three movements of which were composed in 1941. In 1945 Wirén added a fourth movement in response to the view of friends and colleagues that the work was too short; this last movement uses only variants of earlier

themes. The technique was developed in subsequent works into a principle of gradual thematic development, with a minimal use of repetition.

The attempt to create 'a special form for each work' can be noted from the Symphony no.3 (1943–4) onwards; here, as in the Fourth and Fifth Quartets, Wirén's style is clear and well-honed. The Fourth Symphony is an outstanding example of an ability to create intensely expressive music without sacrifice of taut control. In the Symphony no.5 and the Fifth Quartet expression is more restrained, and strengthened by the laconic style. Wirén sometimes in later years composed light pieces, among them *Annorstädes vals* ('Waltz from Somewhere Else'), the Swedish entry for the 1965 Eurovision Song Contest, to which its delicate nuances were scarcely suited.

WORKS

STAGE AND VOCAL

Ballets: Oscarsbalen [The Oscar Ball], op.24, 1949; Plats på scenen [Take your Places on the Stage], 1957; Den elaka drottningen [The Evil Queen], op.34, 1960

Incid music: Amorina (C.J.L. Almqvist), 1951; Romeo och Julia (W. Shakespeare), 1953; En midsommarnattsdröm (Shakespeare), 1957, 3 dances pubd as op.30; Drottningens juvelsmycke (Almqvist), 1957; Hamlet, 1960; Kung John (Shakespeare), 1961; also film music

Choral: Yttersta domen [Doomsday] (E.A. Karlfeldt), solo vv, chorus, orch, 1930; Titania (G. Fröding), female vv, 1942; 3 dikter om havet (K. Boye), op.37, 1963

Songs for 1v, pf: Ormvisa [Snake Song] (Karlfeldt), 1926; Jungfru Maria (Karlfeldt), 1929; Om till din bädd (Karlfeldt), op.13a, 1938; En höstens kväll [An Autumn Night] (Karlfeldt), op.13b, 1938; 7 Dolls Songs for Children (trad.)

ORCHESTRAL

Syms.: op.3, 1932, op.14, 1939, op.20, 1943–4, op.27, 1951–2, op.38, 1963–4

Other orch: Conc. Ov., op.2, 1931; Sinfonietta, C, op.7a, 1933–4; 2 Pieces, op.7b: Gavotte, Scherzo, 1934; Vc Conc., op.10, 1936; Serenade, op.11, str, 1937; Conc. Ov., op.16, 1940; Little Suite, op.17, 1941; Lustspelsuvertyr, op.21; Romantisk svit 'Köpmannen i Venedig' [The Merchant of Venice], op.22, 1943; Vn Conc., op.23, 1945–6; Ballet-suite, op.24a; Pf Conc., op.26, 1947–50; Divertimento, op.29, 1954–7; Triptyk, op.33, small orch, 1958; Music for str orch, op.40, 1966–7; Concertino, op.44, fl, small orch, 1972

CHAMBER AND INSTRUMENTAL

5 str qts: n.d., op.9, 1935, op.18, 1941–5, op.28, 1952–3, op.41, 1968–70

ROLF HAGLUND

Wirth, Helmut (Richard Adolf Friedrich Karl) (*b* Kiel, 10 Oct 1912; *d* Hamburg, 2 Feb 1989). German musicologist. After private composition study under R. Oppel, he studied musicology under Fritz Stein and Friedrich Blume at Kiel University (1932–7), where he took the doctorate in 1937 with a dissertation on Haydn as a dramatist. He began work for Hamburg radio in 1936, and became chief chamber music editor, and was in charge of the *Lektorat*. He was a visiting lecturer at Hamburg (1949–52) and lecturer in music history at the Schleswig-Holstein Musikakademie, Lübeck (1952–72). A founder-member of the Haydn Institute, Cologne, he edited works for the Haydn-Gesamtausgabe. His research interests concerned the study of individual composers from the 18th century to the 20th, notably Reger. He composed piano music, chamber music and songs.

HANS HEINRICH EGGEBRECHT

Wirzbięta [Wierzbięta], **Maciej** (*b* Kraków, 1523; *d* Kraków, 15–17 June 1605). Polish printer and bookseller active in Kraków. He was probably a pupil of FLORIAN UNGLER. For the high standards of his publications (which equal those of Januszowski), Wirzbięta received the title 'Sacrae Maiestatis Regiae chalcographus'. A Calvinist, he became the principal printer for the Reformation in Poland. He published much music, almost entirely consisting of songbooks in which Protestant solo songs are well represented. In Walenty z Brzozowa's *Cantional*

(1569), for example, Wirzbięta reproduced the music partly by type and partly by woodblock.

TERESA CHYLIŃSKA

Wisconsin, University of, School of Music. The state university at Madison, which was founded in 1849, began to offer formal music instruction in 1894; in 1916 a course leading to the BM degree was established. Charles H. Mills was the first chairman. The school was one of the first to broadcast radio performances (1919) and the first to establish its own resident string quartet (the Pro Arte, 1940), which is still active. In the 1990s it had over 400 students, including almost 150 postgraduates, and about 50 instructors. The BA, BM, MA and MM are offered, as well as the MS in composition and the PhD in theory, composition, musicology and ethnomusicology. The University of Wisconsin also has a campus in MILWAUKEE, where undergraduate and postgraduate music degrees are offered through the School of Fine Arts.

The Mills Music Library houses 42,000 scores, books and periodicals, 1000 microfilms and 120,000 recordings, with special collections of 19th- and 20th-century American music, including the Tams-Witmark collection, and field recordings of Wisconsin folk music.

BRUCE CARR

Wisconsin Conservatory of Music. Conservatory founded in 1878 in MILWAUKEE.

Wîse. A term in German metrics, synonymous with *Ton*. *See* TON (i).

Wise, Michael (*b* ?Salisbury, *c*1647; *d* Salisbury, 24 Aug 1687). English composer. He was one of the earliest group of choristers of the Chapel Royal following the Restoration of Charles II in 1660. He left the choir on the changing of his voice in September 1663, and from 1665 to 1668 he was a lay clerk of both St George's Chapel, Windsor, and Eton College. On 29 April 1668 he was admitted as organist, lay vicar and instructor of the choristers of Salisbury Cathedral. He rejoined the Chapel Royal as a Gentleman in January 1676, while retaining his Salisbury appointments. When, following the interruption caused by the Fire of London, the musical establishment of St Paul's Cathedral began to be set up once more, Wise, on the direct recommendation of James II, was appointed almoner and Master of the Choristers there in January 1687. This would no doubt have eventually involved his resignation from Salisbury, but it seems he lingered on there, since Anthony Wood recorded how a few months later 'he was knock'd on the head and kill'd downright by the Night watch at Salisbury for giving stubborne and refractory language to them' on St Bartholomew's night 1687. His successor at Salisbury, Peter Isaacke, was appointed on 13 September 1687, and his successor at St Paul's, John Blow, on 19 September. He was buried at St Thomas's Church, Salisbury.

The violence of Wise's death is in keeping with an evidently awkward personality. In the first months of his time at Salisbury there was trouble between him and one of the lay vicars, and in 1674 he made a sweeping accusation, which he was unable to sustain, that the dean and chapter had wrongly deflected cathedral monies. From the time of his appointment as a Gentleman of the Chapel Royal accusations of his neglect of duty at Salisbury are fairly common, though the cathedral paid for a deputy organist and a substitute instructor of the choristers, while Wise, specifically on account of his skill and compositions, was allowed to retain all his stipend. At the episcopal visitation of 1683 not only negligence was alleged against him but also profanity, drunkenness 'and other excesses in his life and conversation'. There was some trouble at the Chapel Royal too, for at the coronation of James II in 1685 he was under a suspension and did not take part.

There is only a small amount of secular music by Wise and no instrumental music at all. His significance rests exclusively on his church music. It is known that by 1676 a service and 11 anthems by him were in the Chapel Royal repertory, but despite statements to the contrary there is no example by him of the characteristic Chapel Royal anthem of the period with string symphonies and ritornellos. This is no doubt because his professional life was largely based on the provinces and he held no court appointment as a composer. Nor, unlike Blow, did he cultivate a *stile antico* as well as a contemporary manner. His verse anthems with organ have a distinct individuality. To a much greater degree than his Chapel Royal contemporaries he wrote for the treble voice, either alone or in ensembles of solo voices, not infrequently in duets with a bass voice. His verse passages, though expressive of the words and displaying a true sense of accent, are truly melodic in their phrasing and are rarely restricted simply to declamatory methods. His pathetic and expressive qualities are considerable, and he is also capable of great charm. Yet sometimes the simplicity of his style makes his music lack character, and he is not alone among English church composers in being relatively unsuccessful with jubilant texts. The anthem *Open me the gates of righteousness* and the Evening Service in D minor may be regarded as his finest works.

WORKS

principal sources: IRL-Dcc, Dpc, GB-Cfm, DRc, GL, H, Lbl, Lcm, LF, LI, Lsp, Ob, Och, WB, WO, WRch

Services, all with org: Morning, Communion and Evening Service, d, 2–4vv; Evening Service, E♭, 2–3vv; Communion Service, E, 3vv; Communion Service, f, 3vv

Anthems, all with org, for 3vv unless otherwise stated: Arise, O Lord, inc.; Awake, put on thy strength; Awake up, my glory; Behold, how good and joyful; Behold, I bring you glad tidings, inc.; Blessed is he that considereth the poor; Blessed is the man; By the waters of Babylon, 4vv; Christ rising again, ed. M.J. Smith (Borough Green, 1973); Glory be to God; Have pity upon me, 4vv; Hearken, O daughter, inc.; How are the mighty fallen (adapted by H. Aldrich as Thy beauty, O Israel); How long wilt thou forget me, inc.; I charge you, O daughters, 2vv.; I will arise (The Prodigal); I will sing a new song; My song shall be alway, inc.; O be joyful in the Lord, inc.; O give thanks unto the Lord, inc.; O God, when thou wentest, inc.; Open me the gates of righteousness; O praise God in his holiness; Prepare ye the way, 4vv, ed. WATKINS SHAW/MICHAEL SMITH

Wise, Patricia (*b* Wichita, KS, 31 July 1943). American soprano. She studied in Kansas and New York, making her début in 1966 at Kansas City as Susanna, then joined the New York City Opera and sang the Dying Soul in the US première of Schoenberg's *Jakobsleiter* at Santa Fe (1968). She made her Covent Garden début as Rosina (1971) and sang her first Zerbinetta at Glyndebourne (1972). She sang regularly in Vienna in such roles as Pamina, Konstanze, Gilda, Zdenka, Sophie, Lucia, Musetta and Juliet; she also appeared at San Francisco, Berlin, La Scala, where she sang Nannetta (1980), and Salzburg, where she sang the Protagonist in the première of Berio's *Un re in ascolto* (1984). The great flexibility of voice and security of technique that Wise revealed in such roles as Lucia and Zerbinetta were displayed to even more dazzling effect as Berg's Lulu, which she first sang in Geneva (1985) and has also recorded. In 1995 she took up a teaching post at Indiana University, Bloomington.

ELIZABETH FORBES

Wiseman, Debbie [Debra] (*b* London, 10 May 1963). English composer. She graduated from the GSM, London, where she studied composition with Buxton Orr and the piano with James Gibb. Though she also composes concert and electro-acoustic music, she is best known for her television and film scores. She has been nominated for numerous awards and in 1993 won the TRIC TV Theme Music of the Year award for *The Good Guys*. Her work has been featured in radio and television programmes on music for the media, and she has contributed to educational programmes on this subject. In 1995 she was appointed visiting professor of film composition at the RCM.

Wiseman is drawn to writing descriptive music and adept at matching dramatic situations with appropriate sound worlds. Several scores provide an emotional subtext, for instance in the feature films *Tom and Viv* and *Haunted*. Her many memorable themes and signature tunes are the product of a strong sense of melodic line.

WORKS
(*selective list*)

Film scores: Tom and Viv (dir. B. Gilbert), 1994; Haunted (dir. L. Gilbert), 1995; Female Perversions (dir. S. Streitfeld), 1996; Wilde (dir. B. Gilbert), 1997

TV scores: Shrinks, 1991; The Good Guys, 1993; The Dying of the Light, 1994; The Death of Yugoslavia, 1995; The Missing Postman, 1996

Other works (for a combination of cl, sax, pf, vc, perc unless otherwise stated): Inside Looking Out, 1989; Squares and Roundabouts, 1989; Echoes of Istria, 1989; Working, 1989; Fugue; The Golden Hour, SATB, chbr orch

Principal publishers: Music Collection International, BBC

DAVID BURNAND

Wishart, Peter (Charles Arthur) (*b* Crowborough, 25 June 1921; *d* Bath, 14 August 1984). English composer and teacher of Scottish descent. He studied with Hely-Hutchinson at Birmingham University (1938–41) and with Boulanger in Paris (1947–8). Returning to Birmingham, he taught at the Midland Institute and, from 1950, at the University, where he produced his valuable Toveyan monograph *Harmony*. In 1959 he moved to London, teaching at the GSMD from 1961 and becoming a lecturer at King's College in 1972. In 1977 he was appointed professor of music at Reading University. He is buried in Great Elm, near Frome, where he lived for many years.

He first became known as a Midlands composer of choral pieces, especially carols, and elegant chamber music. His Concerto for Orchestra (1957) was a Feeney Trust commission for the CBSO, and the vocal-instrumental suite *Elegies* (1958) was composed for the Barber Institute Concerts in Birmingham; in 1959 and 1960 the Institute also gave the first performances of his one-act operas, the comic *Two in the Bush* and its tragic companion-piece *The Captive*. Wishart's critical reputation has rested mainly on these and his later operas (all to librettos by Don Roberts), but he was equally accomplished in all genres. Various factors impeded the early dissemination and publication of his music. His resolute adherence to tonality and his liking for middle-period Stravinsky brought him into opposition with prevailing critical orthodoxy and hindered his access to patronage; but his self-reliance and discriminating musicianship earned him the respect of the more independent-minded critics and of many distinguished performers. Singers, in particular, have learned to admire his songs, many written for his third wife, the mezzo-soprano Maureen Lehane. His style evinces a mastery of diatonic dissonance and a witty economy of means, blending elements of Stravinskian neo-classicism in rhythm and spacing with a truly classical approach to the control of key, modulation and contrast. His expressive lyrical line, often employing in vocal music a piquant displacement of prosodic and metrical accents, is supported by lucid, terse but unfailingly imaginative textures.

WORKS

BRIAN TROWELL

Wishart, Trevor (*b* Leeds, 11 Oct 1946). English composer and writer on music. He studied at Oxford University (BA 1968), the University of Nottingham (MA 1969) and the University of York (PhD, composition, 1973). Subsequently he remained in York working as a freelance composer, and has lectured at many institutions worldwide, with extended stays in Australia, Canada, USA, Sweden and the Netherlands as well as at British universities. His reputation among contemporaries is that of a radical innovator.

Wishant's early works involve improvisation with found objects, environmental events, performance and installation art and participatory games and workshops designed to involve audiences in the creative process. In later works he has sought to extend the vocal repertory through the exploration of new vocal sounds (*Anticredos* and the *Vox* series) and pioneered the art of composing directly with sound, or 'sonic art' (*see* ELECTRO-ACOUSTIC MUSIC, §2). This music moves between the pure manipulation of sonority and what he calls 'cinematographic use of soundscapes', employing sophisticated signal processing instruments of his own design to control the internal quality and the evolution of sounds themselves. His writings, particularly *On Sonic Art* and *Audible Design*, have helped to define the scope and craft of this new field.

STEPHEN MONTAGUE

Wisłocki, Stanisław (*b* Rzeszów, 7 July 1921; *d* Warsaw, 31 May 1998). Polish conductor and composer. He studied in Lwów and Timişoara, and in Romania made his débuts as pianist and conductor (1940). In 1947 he founded the Poznań State Philharmonia, which he conducted for 11 years, and from 1977 he was chief conductor of the Polish Radio National SO in Katowice. He also conducted the Warsaw PO and appeared as a guest

conductor throughout Europe and the Americas. His compositions are unpretentious and melodious, often taking their thematic material from traditional Polish folksong.

Wisme, Nicholas de (*fl* 1554–64). Netherlandish composer. He wrote five motets and four French chansons, most of which were printed by Phalèse. The six-voice *Vivere vis recte Dominum* has a six-note ostinato which pervades both parts of the work. This motet displays other common characteristics of the mid-16th century Netherlandish style in its use of a continuous imitative texture, long, asymmetrical melodic lines, and a general avoidance of literal repetition and clearcut phrases. (*EitnerQ*; *Vander StraetenMPB*, i, ii)

WORKS

Motets: Benedic Domine Dominum, 6vv, 1554[5]; Descendit angelus Domini, 5vv, 1555[4]; Que est ista que processit, 6vv, 1553[11]; Surge propera amica mea, 5vv, 1555[5]; Vivere vis recte Dominum, 6vv, 1564[3]

Chansons: Je n'ay quelque cause de ioye, 6vv, 1553[25]; Mon coeur chante joyeusement, 4vv, 1554[23]; Soyons joyeulx joyeusement, 4vv, 1555[21]; Vivre ne puis, 6vv, *GB-Lbl* Roy.App.49–54, 57

JANE A. BERNSTEIN

Wissmer, Pierre (*b* Geneva, 30 Oct 1915; *d* Valcros, Var, 3 Nov 1992). French composer of Swiss origin. After early training in Geneva, he moved in 1935 to Paris, where he studied composition with Roger Ducasse at the Paris Conservatoire, fugue and counterpoint (Daniel-Lesur) and the piano (Jules Gentil) at the Schola Cantorum, and conducting with Münch at the Ecole Normale. Following performances of his First Piano Concerto in both Paris and Brussels in 1937, Wissmer came to early prominence. Soon after, Ansermet became a champion of his music. At the outbreak of World War II Wissmer returned to Switzerland, where he taught at the Geneva Conservatoire and became director of chamber music at Radio Geneva in 1944. In 1957 he returned to Paris as professor of composition and orchestration at the Schola Cantorum, becoming its director in 1962. From 1969 to 1980 he was director of the Ecole Nationale de Musique in Le Mans. Wissmer took French nationality in 1958, but returned frequently to Switzerland. He was appointed professor of composition and orchestration at the Geneva Conservatoire in 1973.

Wissmer remained essentially a neo-classicist. His Second Piano Concerto (1947) bears a close resemblance to Ravel's G major Piano Concerto in its virtuoso writing, as well as in its instrumental colour, melodic lyricism and rhythmic energy. The rapid chains of chords in the cadenzas recall the harmonic palette of Messiaen. In the more austere Second Violin Concerto (1954) Wissmer experimented with serialism: following an atonal first movement in sonata form, the second and third movements are based on two 12-note rows.

CAROLINE RAE

Wiszniewski, Zbigniew (*b* Lwów [now L'viv], 30 July 1922). Polish composer. He studied composition with Sikorski at the Łódź Academy (1948–52) and later taught at the Warsaw Conservatory. An editor at Polish Radio for almost 30 years, he worked additionally for Schott and was chief editor of the journal *Poradnik muzyczny* (1982–4). In 1954 he co-founded the Association of Polish Violin Makers. He is principally known for his early tape pieces composed at the Experimental Studio at Polish Radio, for his chamber-instrumental output, and for his operas and choral works written for radio and television. He is a contributor to *Das Musikinstrument*, *Przegląd Techniczny* and *Ruch muzyczny*.

Wit, Paul de (*b* Maastricht, 4 Jan 1852; *d* Leipzig, 10 Dec 1925). Dutch viol player. Educated as a cellist in Maastricht, he went to Leipzig in 1879. The next year he started the *Zeitschrift für Instrumentenbau*, in which early instruments were discussed in great detail; it continued publication until World War II. In 1886 he opened to the public, in the Thomaskirchhof, his superb collection of early instruments, among them three *viole pompose* (including one 'from Bach's orchestra') and a magnificent gamba by 'Vincenzo Ruger', dated 1702 and with a modelled back. Successive collections were sold: twice (1888 and 1890) to the Berlin Hochschule and once (1905) to Wilhelm Heyer of Cologne. Trying to revive the popularity of the gamba, de Wit gave many recitals (with varying success) and wrote a *Geigenzettel alter Meister vom 16. bis zur Mitte des 19. Jahrhunderts* (1902–10/*R*). *Weltadressbuch der gesamten Musik-Instrumenten Industrie*, edited by him, appeared from 1883 periodically for almost 50 years.

HERBERT ANTCLIFFE/LYNDA MACGREGOR

Withers. English family of violin makers, repairers and dealers. Edward Withers (i) (1808–75) founded his firm in London by purchasing that of R. and W. Davis in 1846. Davis had been associated with the well-known violin maker John Frederick Lott, with whom Withers had clearly studied. Withers's output was considerable and of fine quality; for a time he employed Charles Adolphe Maucotel and Charles Boullangier, émigrés from France. The premises were at 31 Coventry Street.

Edward Withers (ii) (1844–1915) was apprenticed to his father at an early age, also working with Lott. Like his father, he copied the work of Stradivari and Guarneri (mainly the latter) and it is said that he made about 200 instruments in addition to his repair work. In 1878 the business moved to 22 Wardour Street, where it has remained; on the death of Edward Withers (ii) it was continued by his three sons, Edward Sidney Munns Withers (1870–1955), Bernard Sidney Withers (1873–1942) and Douglas Sidney Withers (1879–1962), with the emphasis shifting from the making of new instruments to the repair and handling of old ones. In October 1969 Bernard's son Edward Stanley Withers (1904–1987) retired and was succeeded by DIETRICH M. KESSLER; on the latter's retirement in 1987, the firm passed into the hands of Adam Whone (*b* 1956), who moved the offices to 2 Windmill Street. The firm formally closed in 1998.

George Withers (1847–1931), another son of Edward Withers (i), established his own business in St Martin's Lane about 1876 before moving to 22 Leicester Square. There he built up a highly regarded dealing and restoring business, in which he was joined by his sons Guarnerius and Walter George, both good craftsmen trained in Mirecourt. The firm closed down in April 1932.

CHARLES BEARE/PHILIP J. KASS

Witherspoon, Herbert (*b* Buffalo, NY, 21 July 1873; *d* New York, 10 May 1935). American bass, teacher and music administrator. At Yale University he studied both art and music; his teachers included Horatio Parker in composition and Gustav Stoeckel in singing. He continued his studies with MacDowell, among others, and later studied in Paris, London and Berlin. In 1898 he made his début with Savage's Castle Square Opera Company in New York as Ramfis in *Aida*, and was one of the first American singers engaged by the Metropolitan Opera's new general manager, Gatti-Casazza. Having made his début as Titurel in *Parsifal* (1908), he sang, among other roles, Gurnemanz, King Mark, the Landgrave (*Tannhäuser*), Pogner and Sarastro, and took part in the first two American operas given by the Metropolitan, F.S. Converse's *The Pipe of Desire* (1910) and Parker's *Mona* (1912). Witherspoon retired from the Metropolitan in 1916. He was a distinguished teacher and founded the American Academy of Teachers of Singing (1922), later becoming its first president; he was also president of the Chicago Musical College (1925–31), director of the Chicago Civic Opera in its final season (1931–2) and president of the Cincinnati Conservatory of Music (from 1931). He was chosen to succeed Gatti-Casazza as general manager of the Metropolitan, but died of a heart attack one month after taking office. His writings include *Singing: a Treatise for Teachers and Singers* (1925) and *36 Lessons in Singing for Teacher and Student* (1930).

PHILIP L. MILLER

Withy [Withie, Wythey]. English family of musicians.

(1) Humphrey Withy (bap. Claines, nr Worcester, 4 Sept 1596; *d* Worcester, before 10 Dec 1661). Cathedral singer and administrator. He served as a choirboy and lay clerk at Worcester Cathedral, where he also held office as verger, sub-treasurer and surveyor of the works. In 1660 he played an important part in beginning the cathedral's renovation. The Worcester consort partbooks (*GB-Ob* Mus.Sch.E.415–8) and the first section of the manuscript containing John Withy's airs and fantasias in three parts (*US-R*) are possibly in his hand.

(2) John Withy (*b* c1600; *d* Worcester, 3 Jan 1685). Cathedral singer, composer and viol player, brother of (1) Humphrey Withy. He was described by Anthony Wood as 'a Roman Catholic and sometime a teacher of music in the citie of Worcester'. He was a lay clerk at Worcester, 1621–4. His name appears in Worcester hearth-tax returns of the early 1660s, and thereafter in

several churchwardens' and constables' presentments, in which he is described as a 'popish recusant'. James Atkinson, a Jesuit, was probably his grandson.

According to Wood, Withy was 'excellent for the lyra viol and improved the way of playing thereon much', and John Playford listed him as a 'famous master' of the instrument in his *Musick's Recreation on the Viol, Lyra-Way* (RISM 1669[6]). Some of his airs and dances for lyra viol were published by Playford or included in important manuscript anthologies; other works, such as the In Nomine and some of the bass viol duos, display considerable contrapuntal skill. When Wood stated that Withy 'composed several things for 2 violins' he was perhaps referring to the airs for two trebles and a bass (*GB-Lbl*).

WORKS

for further details see DoddI

32 airs, lyra viol, 1652[7], 1661[4], 1669[6], *GB-Cu, Lbl, Mp*
Prelude, 3 divisions, b viol, *Ob*
22 fantasias and airs, 2 b viols, bc, *Ob, Och*
Aire and Maske, a 2, *Ckc* 321 (b), *US-LAuc* fC6968 M4 (tr); Maske ed. in A.J. Sabol, *Four Hundred Songs and Dances from the Stuart Masque* (Providence, MA, 1978/*R*) [Maske only in reprint of 1982]
Almain, a 2, *GB-Och* (inc.)
Country Dance, a 2, *Ob* Mus.Sch.D.220 (inc.)
2 divisions, tr, b, *Och* (1 set ? by Francis Withy)
6 airs and 6 fantasias, a 3, *US-R* Vault M350.F216 (fantasias inc.)
17 airs, 2 tr, b, *GB-Lbl*
8 airs, a 4, *Lbl* (inc.)
Fantasia, a 4, In Nomine, a 5, *Och*
Love, where is now thy deity, 1v, bc, sung in *The English Moore* (R. Brome), 1637/8 (1658/9), *US-NYp* (facs. in English Song 1600–1675, x, New York and London, 1987)

(3) Francis Withy (*b c*1645; bur. Oxford, 14 Dec 1727). Cathedral singer, string player, music copyist and composer, son of (2) John Withy. From 1670 until his death he was a singing-man at Christ Church, Oxford. He played the violin in Edward Lowe's act song *Nunc est canendum*, and is named as a bass viol player in a later Oxford score (*GB-Lcm* 1059). Manuscripts in his hand at the Bodleian Library and Christ Church, Oxford, suggest that he was a useful assistant to Lowe and his successors at both the cathedral and the music school. Five attributed sets of division for solo bass viol exist, together with one, unfinished, for treble and bass (all *Ob*). Two sets of divisions by 'E. Withy' (*Cfm, Ob, US-U* q763 P699c] were also probably composed by Francis on themes supplied by an otherwise unidentified relative.

ROBERT THOMPSON

Witkowska-Zaremba, Elżbieta (*b* Warsaw, 23 Feb 1946). Polish musicologist. She studied musicology under Zofia Lissa at Warsaw University (MA 1969) and later studied classical philology there (MA 1972). She took the doctorate at the Polish Academy of Sciences in 1979 with a dissertation on Kraków plainsong treatises in the first half of the 16th century, and completed the *Habilitation* there in 1992 with a dissertation on the *Musica speculativa* of Jehan des Murs. She joined the staff of the Institute of Arts at the Polish Academy of Sciences in 1970, becoming assistant professor in 1980 and reader in 1993. Her field of research is European music theory and notation from ancient times up to the 16th century, and she has published critical editions and translations of medieval Latin music treatises. She is also interested in issues on 19th-century music. Her most important book is her study on extant copies of Johannes de Muris's *Musica speculativa*, which places special emphasis on sources preserved in Central Europe.

ZYGMUNT M. SZWEYKOWSKI

Witt [Witte], **Christian Friedrich** (*b* Altenburg, *c*1660; *d* Gotha, 3 April 1717). German composer, music editor and teacher. He was first taught music by his father, Johann Ernst Witt, who was Altenburg court organist in succession to Gottfried Scheidt and had come from Denmark when a Danish princess married into the ruling house of Saxe-Altenburg about 1650. The Altenburg male heirs having all died out, the succession passed in 1672 to the Duke of Saxe-Gotha, Friedrich I, who, probably in 1676, gave Witt a scholarship to study in Vienna and Salzburg. He also paid for him to study composition and counterpoint with G.C. Wecker in Nuremberg in 1685–6. On 1 June 1686 Witt was appointed chamber organist at the Gotha court. In 1688 he was again sent to study with Wecker. In 1694 he was appointed substitute for the

Kapellmeister, W.M. Mylius, and he succeeded him after his death, in 1713. He was well thought of as a teacher, not only within the Dukedom of Gotha; the future Duke Friedrich II was among his pupils. He was also admired as an able keyboard player (in J.P. Treiber's *Der accurate Organist im General-Bass*, 1704) and Kapellmeister (in Telemann's *Beschreibung der Augen-Orgel*, 1739). He enjoyed good relations with neighbouring courts, including those of Ansbach-Bayreuth, Schwarzburg-Rudolstadt and Saxe-Weissenfels, and several works by him are listed in inventories from there.

Witt was a versatile composer of both vocal and instrumental music. His vocal music consists largely of church cantatas, prominent among which are those forming the so-called Rentweinsdorf cycle, for every Sunday and festival of the church's year, which survive in partbooks emanating from the church at Rentweinsdorf, Lower Franconia. The cantatas are in a rather old-fashioned style without recitatives. There is often an instrumental introduction, and the vocal sections include fully scored concerto movements, solos and duets, and homophonic chorale choruses crowned by an instrumental part. His *Psalmodia sacra* is one of the most important hymnals of the early 18th century; Marpurg praised it as the best hymnal he knew. Of its 762 hymns, 351 are furnished with melodies and figured basses, and an appendix includes 12 hymns and five melodies. Apart from tunes by 16th- and 17th-century composers from Thuringia and elsewhere, there are over 100 new ones, most of which are doubtless by Witt himself. His Whitsuntide hymn *Schmückt das Fest mit Maien* is still found in Protestant hymnbooks. His instrumental music includes both 'ouvertures' (or suites) in the French style and italianate, concerto-like sonatas, mainly in four to seven parts, whose textures include the three-part concertino typical of the concerto grosso. His varied output of keyboard works, many of them now lost, includes several harpsichord suites and a passacaglia in D minor once wrongly attributed to Bach.

WORKS

VOCAL

printed works published in Gotha

65 cants., Rentweinsdorf cycle, 4vv, 2 vn, 2 viols, bc, 1 with 2 clarinos, some with bn/vle, *D-Nla*, 2 in *F-Ssp*, full titles in Krummacher

12 cants., 3 in *D-Bsb*, 2 in *F*, 1 in *LUC*, 6 in *F-Ssp*

Funeral ode (Wer kan des Höchsten Rath), 5vv, 1697

Psalmodia sacra, oder Andächtige und schöne Gesänge, containing 356 melodies, *c*100 by Witt, 1v, bc (1715, 2/n.d. as Neues Cantional mit dem Generalbass); 104 ed. in *ZahnM*

Lost: Das neuerbaute ... Lust-Schloss Friederichswerth ... in nachgesetzten Gespräch-Spiel ... vorgestellt (1689); Friedensteinische Freuden-Bezeugung (1691); Unterthänigster Glückwunsch ... in einer Tafel-Music (1692); Salomonisches Regentengebet und dessen Erhörung (1693); Das gute Vernehmen zwischen Haupt und Gliedern (1694); Das glückliche Pentalpha, oder Fünffeckigter Grund-Stein wohlgerathener Heyrath (1696); Erbauliche Übereinstimmung der Sonn- und Festtags-Evangelien, cant. cycle for a year (1696); Unterthänigstes Denck- und Danck-Mahl (1696); Ich will den Herren loben (Ps xxxiv), double choir, formerly *D-WRtl*; cants., mentioned in inventories of Ansbach Hofkapelle, 1686, Rudolstadt Hofkapelle, St Peter's Church, Strasbourg

INSTRUMENTAL

3 ouvertures, a 4, 6, *D-Kl*

3 suites, a 4–6, 2 in *WRtl*, 1 in *Kl*; 1 ed. in HM, xcix (1952)

7 sonatas, a 4–7, 10, 5 in *WRtl*, 2 in *Kl*

BERND BASELT, KARL-ERNST BERGUNDER

Witt, Franz Xaver (*b* Walderbach, Bavaria, 9 Feb 1834; *d* Landshut, 2 Dec 1888). German church musician and composer, a leader in the CECILIAN MOVEMENT. The eldest son of a teacher, he studied science and theology at Regensburg, where he became a singer in the cathedral choir and became acquainted with Renaissance sacred polyphony under the cathedral choirmaster. He was ordained priest in 1856, spent three years in the pastoral ministry and then taught Gregorian chant at the theological seminary in Regensburg. At this time he took lessons in counterpoint and published a number of compositions in strict polyphonic style. In 1867 he took up the post of inspector at the preliminary of St Emmeram, which also involved acting as choirmaster at the parish church. For health reasons he left this post two years later. In 1870 and 1871 he acted as cathedral choirmaster at Eichstätt; in 1873 he took the small country parish of Schatzhofen near Landshut, but resigned two years later and thereafter lived, in poor health, at Landshut. In 1873 he was awarded the degree of DPhil by Pope Pius IX; in 1880 he became an honorary canon of the cathedral at Palestrina.

Witt's compositions are workmanlike and cast in the mould of Renaissance polyphony, but some have a stereotyped conventionality and they often lack imagination. Witt's main historical contribution lies in his championship of the movement for the reform of German Roman Catholic church music. He announced a programme of objectives in *Der Zustand der katholischen Kirchenmusik zunächst in Altbayern* (1865), founded and edited one journal in 1866 (*Fliegende Blätter für katholische Kirchenmusik*) and another in 1868 (*Musica sacra*). In them he published many articles to spread the idea of church music reform. He also arranged for church music

to be included in numerous teaching courses and performances, and proved himself a competent conductor.

At a general meeting of the Katholischer Verein Deutschlands at Innsbruck in 1867, Witt proposed the foundation of an organization for the improvement of Roman Catholic church music; this received no support, but he managed to assemble a large membership for which the Allgemeine Deutsche Cäcilienverein was founded at Bamberg in 1868. Witt was its general chairman for almost 20 years. Finally he founded the Scuola Gregoriana at Rome in 1880.

Witt's position can only be understood within the framework and Zeitgeist of the 1870s. His main concern was the pastoral influence of church music, which was to have an improving and ennobling effect. The poor state of church music at that time made Witt into a harsh critic; he was, however, more a theologian than a musician, and as a lone campaigner was aware of his polarizing effect.

AUGUST SCHARNAGL/CHRISTOPH LICKLEDER

Witt, Friedrich (*b* Niederstetten, Württemberg, 8 Nov 1770; *d* Würzburg, 3 Jan 1836). German cellist and composer. From 1789 to about 1796 he was a member of the orchestra of the Prince of Oettingen-Wallerstein. During this period and afterwards he travelled widely. In 1802 he wrote for Würzburg his oratorio *Der leidende Heiland*, which was so successful that the Prince-Bishop of Würzburg appointed him his Kapellmeister. From 1814 (when he resigned that post) to his death he was Kapellmeister at the Würzburg theatre.

Witt is now remembered for the 'Jena' Symphony. In 1909 Fritz Stein found at Jena a copy of a symphony in C, with Beethoven's name on two of the parts, and published it as a probable early work by Beethoven. This attribution remained doubtful, however, until Robbins Landon discovered a better copy of the symphony at Göttweig under Witt's name (a second copy has since been found at Rudolstadt). The work is in fact a piece of plagiarism, put together almost with scissors and paste from reminiscences of Haydn. Two other symphonies by Witt reprinted *c*1963 are much in the style of Rosetti, and resemble the 'Jena' Symphony without being so grossly plagiaristic.

WORKS
(*selective list*)

3 theatrical works, 1801–14
2 oratorios, 2 cantatas, 3 masses
9 symphonies (Offenbach, 1804–15)
Symphony, C ['Jena'], *D-Ju* ['par Louis van Beethoven'], *A-GÖ* ['Witt'], *D-RUl* ['di Witt']
Other symphonies, *B-Bc*, *D-SWl*, mentioned in *EitnerQ*
Quintetto, pf, str/wind insts, op.6 (Leipzig, n.d.)
Concerto, fl, orch, op.8 (Leipzig, *c*1806)
Pieces d'harmonie, wind insts (Mainz, n.d.)
Septet, str qt, wind insts (Mainz, 1817)
7 concertos and sinfonie concertanti; other chbr works

Wittaschek, Johann Matthias. *See* VITÁSEK, JAN AUGUST.

Witte, Christiaan Gottlieb Friedrich (*b* Rothenburg, nr Hanover, 12 Jan 1802; *d* Utrecht, 1873). German organ builder and successor to the Dutch BÄTZ firm.

Witte, Christian Friedrich. *See* WITT, CHRISTIAN FRIEDRICH.

Witten. Town in Germany, on the southern edge of the Ruhr industrial conurbation. A village of Witten, the seat of an aristocratic family, is first mentioned in 1214; part of the principality of Mark, it came under Brandenburg rule in 1614 and was later part of Prussia. No evidence remains of musical activity before the 19th century. A male-voice choir was founded in 1844, and was followed by similar institutions as well as by mixed choirs. Orchestral societies were established and before World War I the town had its own municipal orchestra.

The most prominent musician of the town was Robert Ruthenfranz (1905–70). After studying in Dortmund and Berlin, where he was influenced by Hindemith, he founded and directed a private conservatory and composed orchestral, chamber and stage music. In 1936 he inaugurated the Wittener Musiktage, which continued with only occasional interruptions during and after World War II, and which he largely financed himself until it was taken over by the town of Witten in 1964. During those years more than 150 contemporary composers came to be known in the town as a result of Ruthenfranz's work.

The festival has had an international reputation since 1969, and from that date has been organized in close collaboration with WDR in Cologne, under the new title of Wittener Tage für Neue Kammermusik. Wilfried Brennecke was responsible for drawing up its programmes between 1969 and 1989, and was succeeded in 1990 by Harry Vogt. The festival generally takes place on the last weekend in April and presents some 15 new compositions in six or seven concerts. Most of the new works have been commissioned by WDR, the town of Witten and the state of North Rhine-Westphalia, which has provided increased financial support since 1990. Contemporary chamber music is the central focus of the festival, which also includes theatre, literature and film as well as other musical genres. Through the close cooperation of WDR, live recordings of festival concerts have been broadcast internationally. Since 1990 the festival has produced books containing articles on contemporary chamber music and CDs of its concerts.

WILFRIED BRENNECKE/HARRY VOGT

Wittgenstein, Paul (*b* Vienna, 5 Nov 1887; *d* Manhasset, NY, 3 March 1961). American pianist of Austrian birth. He studied the piano with Malvine Brée and Leschetizky and theory with Joseph Labor. Wounded in World War I, he lost his right arm, but despite this pursued a concert career, devoting himself to playing with the left hand. He acquired an amazing virtuosity which enabled him to overcome difficulties formidable even for a two-handed pianist and had great success throughout Europe, becoming widely known playing pieces that he adapted for one hand. Many composers wrote works for him including Strauss (*Parergon zur Symphonia domestica* and *Panathenäenzug*), Ravel (Concerto for the Left Hand), Britten (Diversions), and Prokofiev (Concerto no.4). His North American début, playing Ravel's Concerto, was in Montreal in 1934; shortly thereafter he performed the same work in Boston and New York, both with the Boston SO. In 1938 Wittgenstein settled in New York, where he taught privately (1938–60), at the Ralph Wolfe Conservatory in New Rochelle (1938–43) and at Manhattanville College of the Sacred Heart (1940–45). In 1946 he became an American citizen, and in 1958 he was awarded an honorary DMus by the Philadelphia Musical Academy. He published *School for the Left Hand* (London, 1957). John Barchilon's historical novel *The Crown Prince* (1984) is based on Wittgenstein's life.

RONALD KINLOCH ANDERSON/KATHERINE K. PRESTON

Witthauer, Johann Georg (*b* Neustadt, nr Coburg, 21 Aug 1751; *d* Lübeck, 7 March 1802). German composer and keyboard player. He received his first training in music from Jakob Adlung in Erfurt and continued his studies with G.S. Löhlein in Leipzig. For a short time he was tutor in the ducal house in Mitau (now Jelgava), then spent some time in Hamburg under the tutelage of C.P.E. Bach. In the early 1790s he was in Berlin before settling permanently in Lübeck (1797) as organist of the Jakobikirche. He published only simple keyboard and vocal pieces, which enjoyed considerable popularity and the praise of knowledgeable critics. In 1791 he edited a revised and enlarged fifth edition of Löhlein's *Clavier-Schule* that Gerber said was 'much improved in terms of practicality'.

WORKS

Vocal: 28 lieder in Sammlung vermischter Clavier- und Singstücke (Hamburg, 1785); several settings in Gedichte Von Karoline C.L. Rudolphi, ed. J.H. Campe, ii (Brunswick, 1787); a few in contemporary anthologies and periodicals; Andenken an meine Lieben, *GB-Lbl*; song, *D-LÜh*

Kbd: 6 sonatas (Hamburg, 1783); Sammlung vermischter Clavier- und Singstücke (Hamburg, 1785); 6 Claviersonaten für Liebhaber (Hamburg, 1786), ?lost; [12] Claviersonaten für Liebhaber und angehende Clavierspieler (Berlin, 1792–3); a few sonatas in contemporary anthologies

ELLWOOD DERR

Wittich, Marie (*b* Giessen, 27 May 1868; *d* Dresden, 4 Aug 1931). German soprano. She studied in Würzburg with Otto-Ubridz and reputedly made her début in 1882, at the age of 14, at Magdeburg as Azucena. After engagements at Basle (1883), Düsseldorf and Schwerin (1886), she joined the Dresden Hofoper, where she sang regularly from 1889 to 1914. Her roles included Leonore (*Fidelio*) and Senta; she took part in the première of Paderewski's *Manru* (1901) and created Strauss's Salome (1905). She appeared at Bayreuth (1901–9) as Sieglinde, Isolde and Kundry. At Covent Garden (1905–6), where she appeared as Elsa, Elisabeth, Isolde, Sieglinde and Brünnhilde, she failed to justify her considerable German reputation because of ill-health. The power of her voice, vibrant in tone and extremely dramatic in character, allowed her to triumph in roles for which she was physically unsuited, such as Salome.

HAROLD ROSENTHAL/R

Wittinger, Róbert (*b* Knittelfeld, 10 April 1945). Hungarian composer of Austrian birth. He grew up in Budapest where he took composition lessons with Zsolt Durkó and Rudolf Naros. In 1964 he studied in Warsaw and in 1965 emigrated to the Federal German Republic, completing an electronic music course in Munich in the same year. From 1965 to 1968 he received scholarships to the Darmstadt summer courses. Other honours include two composition prizes from the city of Stuttgart (1968, 1970), a diploma in the Bartók Competition (1971), a scholarship to the Villa Massimo, Rome (1972–3) and the State Prize of Rheinland-Pfalz (1989).

Wittinger's style has turned increasingly towards tradition, as the large number of symphonies, in particular, testifies. He has remarked: 'I would never want to break with the past. I think of myself as the heir of a tradition that began with Gustav Mahler, Alban Berg, Bela Bartók and Arnold Schoenberg – composers whose revolutionary potential in the region of large-scale symphonic music has yet to be taken seriously.'

CLYTUS GOTTWALD

Wittrisch, Marcel (*b* Antwerp, 1 Oct 1903; *d* Stuttgart, 3 June 1955). German tenor. Born of German parents, he was brought up in Belgium and studied in Munich, Leipzig and Milan. He made his début in 1925 at Halle in Marschner's *Hans Heiling* and joined the company at Brunswick the following year. The Berlin Staatsoper engaged him in 1929 and he remained there as principal lyric tenor until 1944, singing a wide range of roles; he gained a special reputation in Mozart. At Covent Garden in 1931 his Eisenstein (*Die Fledermaus*) was admired but he was considered somewhat hard and throaty in *Die Zauberflöte*. In the 1930s his repertory widened to include Lohengrin, which he sang at Bayreuth in 1937. After World War II he was heard as Narraboth (*Salome*) in Paris and as Siegmund and Parsifal at Stuttgart, where he continued to appear until his death. He made many concert tours, sang in operetta and films and, above all, made recordings, in which he was often compared to Richard Tauber. Though less individual in style, he was certainly comparable in timbre and less restricted in the upper register.

J.B. STEANE

Witvogel, Gerhard Fredrik (*b* Varel, *c*1669; *d* Aachen, July 1746). Dutch music publisher and organist of German origin. It is possible that he was given instruction in music by his father, himself an organist. In December 1719, at which time he was musician to the Prince of Nassau, he applied, unsuccessfully, for the post of organist at the Nieuwe Lutherse Kerk in Amsterdam; in 1724 he became organist of the Oude Lutherse Kerk there. The Nieuwe Lutherse Kerk post became vacant again in 1725; Witvogel's request to be transferred there was granted in 1726, and he held that post until his death. On 21 May 1731 he received a government privilege for printing two collections of psalms and spiritual songs which he had compiled for use in the Protestant church. In this way he began his activity as publisher, eventually bringing out at least 93 publications. At his death his firm was taken over by Jan Covens, who later also bought the publications of Roger & Le Cène.

As a composer Witvogel is of little significance, though as an organist he was evidently skilled enough to have held his own among eminent colleagues in Amsterdam at that time. His greatest importance, however, certainly lies in music publishing; during a decade or so he brought out an impressive series of works. His editions are now comparatively rare: only about 75 of his publications survive, in public and private collections. He was even more unscrupulous in acquiring originals for printing than was common at the time: one contemporary document states that he made use of a 'compositeur bien plus habile que luy', who revised pirated editions for printing. Authenticity and reliability of the musical text and authorship of his publications must be considered with the greatest caution. Nevertheless, Witvogel was important for having contributed to the rapid dissemination throughout Europe of the works of the late Italian Baroque. He published catalogues in 1733, 1742 and 1742–3.

ALBERT DUNNING

Witzel [Wizel, Wicel, Wicelius], **Georg** (*b* Vacha, 1501; *d* Mainz, 16 Feb 1573). German theologian. He studied theology in Erfurt from 1516 to 1517, and in 1520 he continued his studies in Wittenberg with Luther. He was ordained in Merseburg and received a curacy in his home community of Vacha. When in 1524 he became a Lutheran and married, he forfeited his ecclesiastical office and worked as town clerk in Vacha. For some years he was a Lutheran pastor in Wenigen-Lupitz and in Niemegk. However, intensive study of the writings of the Church Fathers caused him to turn away from Lutheranism, and by 1533 he was a Catholic preacher in Eisleben. Many apologetic writings followed in which he supported the Old Church and its service. He was summoned to the court in Dresden by the Catholic Duke Georg the Bearded of Saxony, but lost this appointment with the death of the duke and the ensuing Reformation in Dresden in 1539. A move to Brandenburg, where he had been summoned by Joachim II, was short-lived because of the rapid progress made by Lutheranism in the Brandenburg lands. At the end of 1540 he had to leave Berlin. Johann von Henneberg, abbot of Fulda, appointed Witzel councillor, in which capacity he took part in many imperial diets. After 1553 he was a theologian at the newly founded Mainz University. Emperor Ferdinand I appointed him Imperial Councillor and he took his doctorate of theology in Mainz. Emperor Maximilian II granted him an annual pension and he was buried in St Ignaz, Mainz. His many

theological writings (some 150 titles) are concerned mainly with pastoral theology, and include sermons and writings on the Catechism, and with studies on the Church Fathers. His dearest wish was to reunite the German church by reforming the Catholic service. In his contributions to Michael Vehe's hymnbook (1537) and his hymnological writings he advocated the revival of the hymns of the common people in the vernacular. He sought to incorporate into the Catholic liturgy not only German hymns, but also the German language for psalms and the Mass.

WALTHER LIPPHARDT

Witzendorf, Adolph Othmar. Proprietor of Austrian music publishing company, 1844–68. *See* CAPPI.

Witzthumb, Ignaz. *See* VITZTHUMB, IGNAZ.

Wixell, Ingvar (*b* Luleå, 7 May 1931). Swedish baritone. He studied in Stockholm, and made his début there in 1955 as Papageno, remaining a member of the Swedish Royal Opera until 1967. During the company's visit to Covent Garden in 1960 he sang Silvano (*Ballo in maschera*) and Ruggiero (*Alcina*). In 1962 he sang Guglielmo at Glyndebourne and at the Deutsche Oper, Berlin, where he was subsequently engaged. In 1967 he made his US début as Belcore (*L'elisir d'amore*) at San Francisco. In 1971 he first appeared at Bayreuth, as the Herald (*Lohengrin*). His Covent Garden début, as Boccanegra, followed in 1972, and his Metropolitan début, as Rigoletto, in 1973. He was an admired interpreter of most of the major Verdi baritone roles – Amonasro, Don Carlo (*La forza del destino*), Germont, Posa, Renato, Luna and Falstaff – as well as of such parts as Pizarro, Yevgeny Onegin, Mandryka (*Arabella*) and Scarpia. Wixell's firm, dark-toned voice and powerful stage presence combined to make him a highly dramatic performer. Among his recordings are Count Almaviva, Don Giovanni, Renato and Scarpia, all with Colin Davis.

ELIZABETH FORBES

Wizel, Georg. *See* WITZEL, GEORG.

Wizlâv [Wizlaw von Rügen] (*fl c*1300). German Minnesinger. 13 Minnelieder and 14 *Sprüche* are attributed to him in the Jena manuscript; 17 of them have melodies in this source. The Minnelieder are composed of traditional formulae and motifs, while religious and moralizing topics predominate in his *Spruch* poetry. He stated that he had learnt the art of poetry from 'der Ungelârte', none of whose poetry survives. A member of a later generation of poets, he seems to have emulated the forms and themes of other masters, notably Gottfried von Neifen, Steinmar, Ulrich von Winterstetten and Reinmar von Zweter. In rhythm and metre and in melodic style his poems exhibit an independently artistic and highly developed formal sense. His melodies, some of which are characterized by rich melismas, justify substantial study.

Since the beginning of the 19th century he has been identified with Wizlâv III, Prince of Pomerania and Rügen (*d* 1325). However, more recently objections to the identification have been raised; Seibicke has suggested that the author of these works is more likely to have been a professional singer than a high-ranking nobleman.

BURKHARD KIPPENBERG/R

Wlach, Leopold (*b* Vienna, 9 Sept 1902; *d* Vienna, 7 May 1956). Austrian clarinettist. He studied under Bartholomy and Pollatschek at the Vienna Music Academy, and in 1926 toured the world with an instrumental group. In 1928 he joined the Vienna Philharmonic and Staatsoper orchestras. He taught at the Academy from 1932 to 1956 and trained many outstanding pupils, including Alfred Boskovsky. Viennese wind playing between 1930 and 1950 is inseparably connected with Wlach, whose interpretative influence was profound. His performances were notable for beautiful tone and superb control of *pianissimo*. He excelled in Mozart's Clarinet Quintet, and in 1954 the Vienna Mozart Society conferred on him its medal.

PAMELA WESTON

Wobisch, Helmut (*b* Vienna, 25 Oct 1912; *d* Vienna, 28 Feb 1980). Austrian trumpeter. He studied in Vienna, where his teachers included Engelbert Lax and Franz Dengler. He joined the orchestra of the Vienna Staatsoper as first trumpet in 1936 and the Vienna PO in 1939; in 1954 he was appointed to teach at the Vienna Music Academy. He was manager of the Vienna PO from 1952 to 1969, and in 1970 founded the Carinthian Summer Music Festival. Wobisch's recordings, which include Haydn's Concerto, several of Bach's cantatas and Brandenburg Concerto no.2, made him a very influential soloist in the 1950s, during the revival of interest in Baroque music. Numerous works were written for him, and for brass ensembles under his direction, notably by Theodor Berger, Karl Pilss, Alfred Uhl, Friedrich Wildgans and Richard Strauss (*Festmusik der Stadt Wien*, 1943). He was a passionate proponent of the distinctive Viennese sound.

EDWARD H. TARR

Wockenfuss, Petrus Laurentius (*b* Gross-Brüskow, nr Stolp, Pomerania [now Słupsk, Poland], 17 March 1675; *d* Husum, Aug 1721). German composer and poet. He probably studied at Regensburg where he is mentioned in documents as 'Petr. Laurentius Wockenfuss S.S. Theol. Stud. Philharmonic'. By 1700 he had moved to north Germany where he came into contact with the theologian and poet Heinrich E. Elmenhorst in Hamburg; Elmenhorst included four of his songs in the influential collection of *Geistreiche Lieder* (Lüneburg, 1700). On 7 July 1708 he was appointed Kantor at the Nikolaikirche, Kiel, and held this post until his death.

Wockenfuss's cantatas, composed during his years at Kiel, include conservative works rooted in the tradition of Buxtehude as well as modern ones with simple recitatives and da capo arias (for a formal analysis see Voss). They abound in short and plain chorale settings without any trace of the sophisticated contrapuntal procedures of the 17th-century north German school. Wockenfuss also wrote the texts of many of his cantatas, combining biblical passages, chorales and madrigalian verse in a way resembling the 'mixed cantatas' of Erdmann Neumeister, but greater poetic achievements are found in his songs.

Woczitka, Franz Xaver. *See* WOSCHITKA, FRANZ XAVER.

Wodde [Wodds], **John.** *See* WOOD, JOHN.

Wode, Thomas. *See* WOOD, THOMAS (i).

Wodeson, Leonard. *See* WOODSON, LEONARD.

Wodiczka, Wenceslaus [Wenzl] [Vodička, Václav] (*b* Bohemia, 1715–20; *d* Munich, bur. 1 July 1774). Violinist and composer, of Bohemian descent. He was a bondsman in Bohemia of Count Franz Xaver Wieznik, to whom he is said to have presented a fine team of horses in return for his freedom. In 1732 he entered the service of Elector Karl Albrecht of Bavaria, later Emperor Karl VII (1742–5), as a violinist at a salary of 380 gulden; his salary had risen to 500 gulden in 1738. In 1739 a privilege was granted in Paris for the publication of his *Sei sonate*, op.1. Wodiczka enjoyed great favour at the electoral court. In 1745 he was given the title of groom of the chamber to Karl Albrecht's sister Princess Maria Anna Carolina, and in 1747, under Elector Maximilian III Joseph, he was appointed Konzertmeister and electoral councillor. He taught the violinists of the Munich Seminarium Gregorianum and was one of the founders of the Cecilian Fraternity of court musicians in 1749. Wodiczka is the only composer to be listed with his first name, as 'Sig: Wenzl', in the 1753 catalogue of musical works in the

possession of the electoral Hofkapelle. His family was on friendly terms with the Mozart family.

Wodiczka left only instrumental works. As a violin composer he stands between the Baroque and the early Classical styles. His published sonatas show a characteristic fondness for the minuet and siciliano, and have an unmistakable individuality and gaiety. Of the 48 symphonies that he wrote for use in the Munich court church, 24 survive; nine are in one movement, two in two movements and 13 in three movements. A violin method was published in Amsterdam as *Korte instructie voor de vioole* in 1757. In 1746 Wodiczka married Maria Johann Brentani (*c*1715–1781), a soprano who was trained in Italy and who served at Munich as *Hof- und Kammervirtuosin* from 1735 to 1778. Their daughter Walburga (*b* 1749), also a soprano, sang in opera productions at court between 1764 and 1771 and from 1764 until 1775 was *Titulär-Kammerdienerin* to Electress Maria Anna, wife of Maximilian III Joseph; in 1771 she was described as *virtuosa da camera*. Joseph Wodiczka (*c*1726–1794), a violinist in the Munich court orchestra from 1752, may have been a brother of Wenceslaus Wodiczka.

Woffington. A number of Irish organists and instrument makers bore this name; they may have belonged to the same family.

(1) **Robert Woffington (i)** (*d* Dublin, 24 June 1750). Having served as organist of Kilkenny Cathedral (1704–09) he was appointed organist of st Catherine's, Dublin, on 14 November 1709 and admitted as a half vicar-choral of St Patrick's Cathedral, Dublin, on 17 March 1710. On 23 December of that year he was appointed organist at St Mary's where he remained until his death. In 1720 he was one of the committee of four experts who testified to the unsatisfactory nature of Thomas Hollister's new organ in St Werburgh's, Dublin. He was buried in the old churchyard of St Patrick's Cathedral, where his wife had been interred in November 1723. His son John is described in his will as being his 'only next of kin'.

(2) **John Woffington** (*fl* 1720–?1758). Organist, ?son of (1) Robert Woffington (i). He was organist at St Werburgh's (1721–24) and also at St John's, Fishamble Street about this period. In 1724 he spent 'near twelve months' studying under Dr Crofts in London. On his return to Dublin he was appointed to St Michan's on 23 July 1725, where he was also responsible for tuning and repairing the organ. He retired from this post in 1757. In spite of the discrepancy in dates, he may have been the John Woffington who was appointed organist of Armagh Cathedral on 14 May 1752, and who died in 1758. A John Woffington, described as an organist, married Elizabeth Jones on 10 September 1734 thereby inheriting property in Dublin. There appear to have been at least six John Woffingtons in Dublin in the 18th century, and it has not been possible to distinguish their careers with certainty.

(3) **Robert Woffington (ii)** (*d* Dublin, *c*1820). Organist, organ builder and piano maker. He set up a business at 9 William Street, and this is listed in the Dublin directories from 1787 until 1835. The firm usually retained his name after his death, though occasionally it was listed under the names of his sons Thomas and Abraham. Robert Woffington is said to have been a pupil of Ferdinand Weber, the leading Dublin organ builder of the 18th century, and was a partner of William Gibson at 6 Grafton Street, Dublin (1775–8). In 1785 he built a claviorganum (now in the private collection of Michael Thomas, Maidenhead); a boudoir organ by him in the National Museum of Ireland dating from *c*1800–10 displays a very high standard of workmanship. In 1807 he built a large organ for St Andrew's; this was destroyed by fire in 1860. He is mentioned as assistant organist at St Mary's in 1766 and was organist there from 1773 until 1785. He was survived by his wife Anne (*d* 1835) and three children, Abraham, Thomas and Caroline. Abraham (*d c*1856) worked at the Valuation Office, though he appears to have retained an interest in his father's business, which was carried on by Thomas until 1835.

BRIAN BOYDELL

Woffington, Margaret [Peggy] (*b* Dublin, ?1714; *d* London, 1760). Irish actress. In 1730 she was engaged by Madame Violante to take part in her 'Lilliputian Actors' theatre, where she is said to have made her first appearance in a children's performance of *The Beggar's Opera*. In 1740 she went to London, became the mistress of Garrick, and achieved fame as an actress. She is unlikely to be directly related to the family of organists of the same name (*see* WOFFINGTON).

BRIAN BOYDELL

Wohlgemuth, Conrad. *See* LUSTIG, JACOB WILHELM.

Wohlgemuth, Gerhard (*b* Frankfurt, 16 March 1920). German composer. He studied medicine in Greifswald and Halle (1940–48) and was essentially self-taught musically. After winning a prize in composition in 1948 he turned away from medicine to music. In Halle he studied composition with Fritz Reuter and took piano lessons with Bronislaw von Pozniak. After a time as a reader for music publishers in Halle and Leipzig (1949–56), he settled in Halle as a composer and lecturer in theory at the university's musicology institute. A versatile

composer, he directed his attention at first to chamber music and pieces for amateurs. Characteristic of his later work are the romantic 12-note String Quartet no.1 and the Violin Concerto, a work that finely blends a lively joy in music-making with a studied expressiveness incorporating new techniques; there are some parallels with Prokofiev. Wohlgemuth has received the Halle Arts Prize (1955), the Handel Prize (1962) and the Arts Prize of the DDR (1964).

Wojciech. Baptismal name of ADALBERT OF PRAGUE.

Wójcik-Keuprulian [née Wójcikówna], **Bronisława** (*b* Lemberg [now L'viv], 6 Aug 1890; *d* Warsaw, 11 April 1938). Polish musicologist. She studied philosophy and mathematics, and musicology with Chybiński at Lwów University, taking the doctorate in 1917 with a dissertation on Johann Fischer. She was an assistant in the musicology department of Lwów University (1919–25) and professor of music at the Lwów Conservatory (1919–20). She completed the *Habilitation* in musicology at the University of Kraków in 1934. Most of her research was devoted to the music of Chopin. Her most valuable work is her book *Melodyka Chopina* (1930), the first extended study on the subject.

ZYGMUNT M. SZWEYKOWSKI

Wolanek, Anton. *See* VOLÁNEK, ANTONÍN.

Woldemar, Michel (bap. Orléans, 21 Sept 1750; *d* Clermont-Ferrand, 19 Dec 1815). French violinist and composer. He was born into a wealthy family and took his name from his godfather Woldemar, Count of Lowendal, Marshal of France. According to Lottin, in his youth he was held prisoner at the Sabot d'Angers, where he developed his talent for the violin. In Paris he took lessons with Lolli and became a well-known violinist. He said that he performed his 'Fandango, air favori des Espagnols' (published in *6 rêves d'un violon seul*) in Madrid about 1770, and he took part in the concerts of the Baron de Bagge in Paris. A change of fortune obliged him to earn his living by playing, and he left Orléans and followed a troupe of travelling actors. By June 1801, however, he was the owner of a vineyard in Orléans, and in January 1806 he was giving lessons and accompanying voice, piano and harp. In April 1804, he had moved to Paris, and in about 1807 he settled in Clermont-Ferrand where he was attached to the cathedral choir school and taught music.

Woldemar's works include studies, caprices, varied themes and melodies, sonatas, duos, violin concertos, and a concerto for a five-stringed 'violon-alto'(*c–g–d′–a′–e″*). He described himself as 'élève de Lolli'. His *Sonates fantomagiques* conjure up a dialogue with the ghosts of Lolli, Mestrino, Pugnani and Tartini. His *Grande méthode, ou Etude élémentaire pour le violon* contains a variety of exercises (for scales, runs, trills, bowing, pauses, double-stopping etc.) and gives examples by famous masters, in particular Mestrino, Lolli, Cramer and Giornovichi. Inventive by nature, he devised a curious system of musical stenography, the *Tableau mélo-tachygraphique*. He also wrote a parody of the Ten Commandments (the *Commandemens du violon*), and published letters and articles, often ironic and polemical, in the *Correspondance des amateurs musiciens* and above all in *Le Courrier des spectacles*; his criticism of *Les mystères d'Isis* (a French adaptation of Mozart's *Die Zauberflöte*) in 1801 drew a sharp reply from Le Sueur.

WORKS
printed works published in Paris unless otherwise stated

Inst.: Conc. for violon-alto, C (1787); 6 airs variés, 2 vn (*c*1800); Romances du Prisonnier [Della Maria] variées, vn, b (*c*1800); 6 thèmes fugués dans le mode mineur, vn (*c*1800); 3 thèmes d'Haydn variés, vn (*c*1800); 3 vn duos, op.6 (*c*1800); 3 duos dialogués, vn, va (*c*1802); 3 duos à la première position, 2 vn (*c*1802); 4 sonates fantomagiques (les ombres de Lolli, de Mestrino, de Pugnani, de Tartini), vn, b (*c*1802); 6 rêves, vn (1803); 3 vn concs., a, E, d (1803–4), no.3 arr. cl, fl (1804), lost; Recueil d'airs de Fanchon la vielleuse, arr. 2 vn (*c*1804); Gavotte de Vestris variée, vn (1805); 12 nouvelles variations sur Les folies d'Espagne, vn (1805); Quatuor dialogué, str qt (1805); Romance de Gaviniès variée, vn (1805), ?lost

MICHELLE GARNIER-BUTEL

Wöldike, Mogens (*b* Copenhagen, 5 July 1897; *d* Copenhagen, 20 Oct 1988). Danish conductor and organist. He studied at Copenhagen University and with Nielsen. In addition to other church appointments he became organist of Christiansborg Palace chapel in 1931, and of Copenhagen Cathedral in 1959. He founded the Copenhagen Boys' Choir in 1924 and the municipal singing school there, creating the basis of a Danish choral tradition, and in 1937 was appointed conductor of the Danish RSO. From 1943 to 1945 he was conductor for Swedish radio, and subsequently toured widely as a guest conductor. His reputation for clear, energetic performances, particularly in music of the 17th and 18th centuries, was enhanced by numerous recordings, including a series, 'Masterpieces of Music before 1750', the complete cantatas of Buxtehude, Handel's *Saul* and symphonies and masses by Haydn; he also recorded several works by Nielsen, of whose music he became a fervent advocate. Wöldike edited (with Jens Peter Larsen, his son-in-law) the hymnbook of the Danish Church, and published two collections of chorales and other organ works (Copenhagen, 1943 and 1960). He was a Knight of the Danish Order of Dannebrog and of the Swedish Order of Vasa.

NOËL GOODWIN

Wolf. The name given to two undesirable and unpleasant sound effects which may occur in musical performance, one having to do with temperament and tuning, the other with a structural peculiarity in an instrument that sometimes gives rise to intonation difficulties.

On keyboard instruments with tuning systems that do not provide a note intended for use as A♭, playing G♯ instead, with E♭ in the same chord, produces an unpleasant effect, supposed to resemble the howling of a wolf. In Pythagorean intonation the wolf 5th is smaller than pure by 23½ cents, a quantity known as the Pythagorean comma. But the wolf 5th in any regular mean-tone temperament (where the 'good' 5ths are tempered two or three times as much as in equal temperament) is considerably larger than pure (*see* MEAN-TONE, Table 1). The tuner who follows a scheme containing a wolf 5th might choose some other location for it than G♯–E♭. C♯–A♭ was occasionally used in the 15th century and D♯–B♭ in the 17th for mean-tone temperament; B–F♯ was favoured, or rather disfavoured, by many 15th-century practitioners of PYTHAGOREAN INTONATION. On normal keyboard instruments, JUST INTONATION is virtually bound to involve more than one wolf 5th, including one among the diatonic notes, for instance D–A or G–D.

Apart from the context of tuning systems, the term 'wolf' is used to refer to certain individual notes which, owing to the structure of an instrument, are too loud or too soft or difficult to play quite in tune, compared with other notes. This kind of wolf is due to an irregularity in the resonance of the instrument which either enhances or absorbs (damps) one particular note, or to a strong and sharply defined resonance frequency that happens to be slightly sharper or flatter than some note of the scale. The latter situation is often found at the major 6th or perhaps 7th above the open G-string of the cello, and is sometimes rectified by squeezing the body of the instrument with the knees or by attaching a 'wolf mute' to the G-string behind the bridge (see W. Güth: 'The Wolf Note in the Cello', *The Strad*, xc, 1979, pp.355–7, 434–5); in violins of poor craftsmanship a wolf is often found an octave above the open G-string. On the old French (and also English) bassoon, the *a* was characteristically weak and unstable because its hole was particularly small and high up on the butt joint. Another classic example occurred on the old valved french horn in F, where frequently either the *b*♭′ or *b*′ (notated *f*″ or *f*♯″) would be weaker than adjacent semitones, and a strong lip was needed to avoid 'cracking' the note. When a pipe organ is placed in a resonant building, some notes are liable to be emphasized by this resonance, and these are softened during regulation by slightly closing the foot-holes.

GUY OLDHAM, MARK LINDLEY

Wolf, Alois [Louis] **Joseph Anton Balthasar** (*b* Vienna, 7 Jan 1775; *d* Iaşi, Romania, *c*1819). Austrian guitarist. The first native Viennese to achieve prominence as a guitarist, he was essentially an amateur, since his profession was that of an imperial court accountant. Wolf married the pianist Anna Mrasek in 1802, and gave concerts with her until her death in 1809. His last public guitar concert in Vienna was on 15 March 1810 (reviewed in *AMZ*, xii, 476), when he played the 'double' (two-necked) guitar. Shortly afterwards the more skilful Italian guitarist Mauro Giuliani seems to have eclipsed Wolf (Hanslick, i, 257), hastening the latter's departure from Vienna in 1812. Wolf gave concerts in the eastern reaches of the Austrian Empire until his death. About two dozen pieces by him were published in Vienna (*c*1800–12), comprising variations, dances, potpourris etc. for solo guitar, and duets for guitar and piano, some composed jointly with Anna Mrasek.

THOMAS F. HECK

Wolf, Ernst Wilhelm (*b* Grossen Behringen, bap. 25 Feb 1735; *d* Weimar, 29 or 30 Nov 1792). German composer. By the age of seven he was skilled in the practice of thoroughbass. He attended the Gymnasien at Eisenach and Gotha and became a choir prefect. In Gotha he was

fascinated by works of Graun and C.P.E. Bach and participated in concerts at the court; when one of his works was performed in 1752, Bach praised it. Encouraged by his elder brother, Ernst Friedrich Wolf (a composer, organist and pupil of G.H. Stölzel), he went to the University of Jena in 1755 and there became the director of the collegium musicum, for which he composed a number of works including the cantata *Streit zwischen Phöbus und Pan* (1758) for the 200th anniversary of the university. When he went to Leipzig in 1758 his reputation increased further in the circle of J.F. Doles and J.A. Hiller. After a period in Naumburg as music teacher to the von Ponickau family, Wolf set off for Italy but ended his journey in Weimar as music tutor to Duchess Anna Amalia's sons; at Weimar he became the court Konzertmeister (1761), organist (1763) and Kapellmeister (1772). In 1770 he married the chamber music singer and harpsichordist Maria Carolina Benda (*see* BENDA family (7)), with whom he made a concert tour to Berlin; Wolf was also related to J.F. Reichardt. It is uncertain whether, at the instigation of the duchess, Wolf refused an offer from Frederick the Great of Prussia to succeed C.P.E. Bach. He remained in Weimar until his death.

Wolf was a leading figure at the Weimar court and was in close contact with members of the *Musenhof* (including Wieland, Goethe, Herder, von Einsiedel, von Seckendorff, Kotzebue, Bertuch and Musäus) and with the duchess herself. He devoted himself above all to creating new modes of expression, and despite some conventional elements his works were known far beyond Weimar during his lifetime. He wrote about 20 Singspiele and numerous pieces for the church and court. The Singspiele are typical of the period in Weimar: *Das Rosenfest*, *Die Dorfdeputierten* and *Le monde de la lune* show the influence of Rousseau and Hiller; *Die treuen Köhler*, *Der Abend im Walde* and *Ehrlichkeit und Liebe* are encumbered with modish and ephemeral features in their idyllic conception of nature. Occasionally, apart from *galant* phrases, his sensitivity leads to shallowness (e.g. the song *Röschen, Gretchen, Lieschen, Hännchen*); this corresponds to his imitation of popular elements. However, Friedlaender's assertion that Wolf's melodies are 'insignificant [and] unattractive' is only partly correct. In *Die Dorfdeputierten* folksong elements (as in the trio 'Ein Hund, ein Kätzchen', with its 'Wau, wau' and 'Miau, miau' imitations, and the laughing chorus) are mingled with Singspiel formulae reminiscent of Mozart (e.g. 'Süsse Hoffnung, Tochter des Himmels'). A simplicity achieved through doubling, monotonous superficial repetitions and the use of a continuo characterizes the other dramatic works and some of the secular cantatas (e.g. *Polyxena* and *Serafina*).

Wolf's church music, including over 30 motets, Passions, cantatas and choruses, shows the early influence of Graun and C.P.E. Bach. The *Osterkantate* is notable for its expansive conception, with a double choir, and a mixture of *Empfindsamkeit* and traditional thoroughbass techniques. Wolf's instrumental works are more important and show his proximity to the Mannheim school. He was an excellent keyboard player and, again reflecting the influence of C.P.E. Bach, used differentiated *Affekte* and *Manieren* in his keyboard and chamber pieces. In contrast to Bach, however, he preferred simpler and more symmetrical structures in accordance with contemporary Classical style.

Wolf's writings on music were directed primarily at amateurs, although they were acclaimed even in specialist circles. His aesthetic ideas, while embracing elements of *Empfindsamkeit* and Classical style, reflect the ideals of old-fashioned counterpoint; he recommends the preludes and fugues of J.S. Bach and vocal scores of Handel to students. In the climate of Classicism, however, his style of composition was considered old-fashioned. At the height of his career Wolf's rate of composition slowed and he became increasingly depressed.

WORKS

STAGE

Das Gärtnermädchen (comische Oper, 3, K.A. Musäus), Weimar, Schloss, 1769, vs (Weimar, 1774)
Das Rosenfest (operetta, 3, G.E. Heermann, after C.-S. Favart), Weimar, Schloss, 4 Sept 1770, vs (Berlin, 1771, rev. 2/1775)
Die Dorfdeputierten (komische Oper, 3, Heermann, after C. Goldoni), Weimar, Schloss, 10 Feb 1772, vs (Weimar, 1773)
Die treuen Köhler (comische Oper, 2, Heermann), Weimar, Schloss, 14 July 1772, vs (Weimar, 1774)
Der Abend im Walde (comische Oper, 2, Heermann), Weimar, Schloss, 10 Dec 1773, vs (Riga, 1775)
Das grosse Loos (op, 2, F.J. Bertuch, after Favart), Gotha, Schlosstheater im Rathause, 2 Sept 1774, vs (Berlin, 1776)
Superba (K.A. von Seckendorff), Weimar, 30 Jan 1785
Die Zauberirrungen, oder Die Irrtümer der Zauberei (Schauspiel mit Gesang, 2, F.H. von Einsiedel), Weimar, 24 Oct 1785
Erwin und Elmire (Schauspiel mit Gesang, 2, J.W. von Goethe), Weimar, 1785
Der Eremit auf Formentara (Schauspiel mit Gesang, 2, A. von Kotzebue), Weimar, Hof, 26 Nov 1786
Alceste (op, 5, C.M. Wieland), Weimar, Herzogliches Comödienhaus, 1786
Der Schleier (Spl, 3, C.A. Vulpius), Weimar, 1786
Angelica (Spl, Wieland), Berlin, 1788
Der Papagei (?Kotzebue), *c*1790
Le monde de la lune (komische Oper, 3, after Goldoni), ?unperf., *D-Dl*

OTHER VOCAL

Sacred (most in *SWl*): Osterkantate (J.G. Herder), 1781 (Dessau, 1782); 8 other cants., 5 orats, most on Passion texts; 1 sacred conc.; several songs, choruses; Motetten und Arien, i (Halle, 1787), lost
Secular: Serafina (cant., Wieland), S, orch, 1775 (Leipzig, 1777); Polyxena (cant., F.J. Bertuch), 1776 (Leipzig and Weimar, 1776); other cants., incl. Streit zwischen Phöbus und Pan, 1758, lost; Wiegenliederchen für deutsche Ammen mit Melodien (Bertuch) (Riga, 1775); 51 Lieder der besten deutschen Dichter mit Melodien (Weimar, 1784)

INSTRUMENTAL

Wolf, Georg Friedrich (Theodor) (*b* Hainrode, nr Sondershausen, 12 Sept 1761; *d* Wernigerode, 23 Jan 1814). German writer on music and composer. He received his first music instruction from his father, an organist and schoolmaster, and when the family moved to Nordhausen (*c*1767) he continued his training with the organist C.G. Schröter. While studying theology in Göttingen and Halle in the 1780s he also continued his musical studies, and on accepting a position as Kapellmeister to Count Ludwig von Stollberg he devoted all his time to music although he was a candidate for pastorship. In 1801 he became Kapellmeister in Wernigerode, where he was also organist at the Pfarrkirche and a school music teacher.

The many editions and reprints of Wolf's music dictionary and pedagogical works for singers and keyboard players show both his concern for improving them and their usefulness. Gerber said: 'He took great trouble to be of use to beginners in that he prepared easily understood excerpts from numerous larger works', while his *Kurzer aber deutlicher Unterricht* was described by a reviewer for Cramer's *Magazin der Musik* as an inexpensive and welcome manual for keyboard teachers lacking theory skills. He also published several collections of lieder and keyboard pieces and edited a choral anthology, *Trauermotetten und Arien* (Halle, 1788).

WORKS

Vocal: Lieder mit Melodien (Nordhausen, 1781); Lieder mit Melodien aus Millers Leiden und Freuden (Halle, 1786); Lieder mit Melodien für Kinder (Leipzig, 1795); several songs in contemporary anthologies

Kbd: 2 sonatas (Halle, 1787); 2 sonatas, 4 hands (Leipzig, 1794–6); Kurze und leichte Orgelstücke, i (Halle, 1800)

Collections: Vermischte Clavier- und Singstücke verschiedener Art (Halle, 1788)

WRITINGS

Kurzer aber deutlicher Unterricht im Klavierspielen (Göttingen, 1783, enlarged 3/1789 [incl. ii, *Grundregeln des Generalbasses*]; 5/1807)

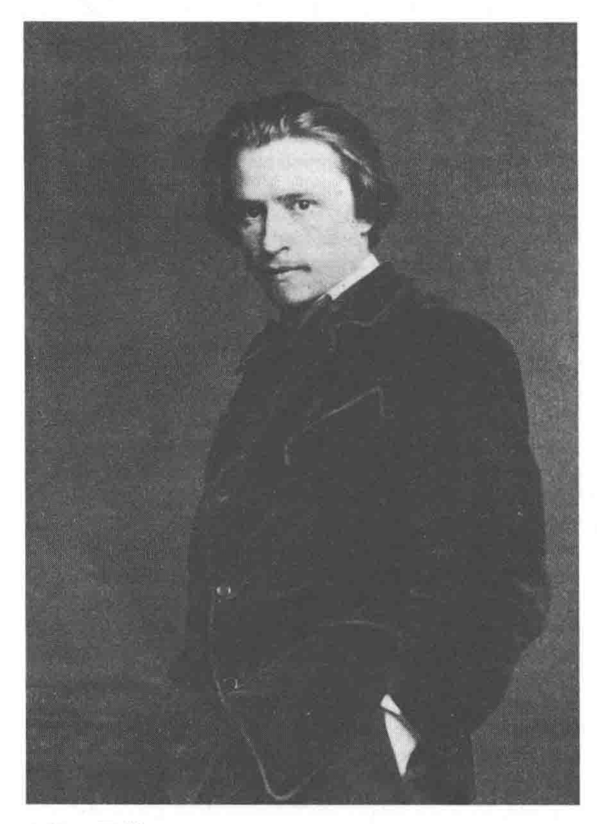
ELLWOOD DERR



Wolf, Hugo (Filipp Jakob) (*b* Windischgraz, Styria [now Slovenjgradec, Slovenia], 13 March 1860; *d* Vienna, 22 Feb 1903). Austrian composer. He intensified the expressive vocabulary of the lied by means of extended tonality and post-Wagnerian declamation while retaining the defining elements of the song tradition he had inherited from Schubert and Schumann. Profoundly responsive to poetry, he incorporated detailed readings of his chosen poems in the compositional decisions he made about every aspect of song: harmonic nuances, tonal form, melodic design, vocal declamation, pianistic texture, the relationship of voice to piano, etc. Seeking an art 'written with blood', he went below the surface of poetry – even where his musical purposes were inevitably distinct from the poet's – in order to recreate it in music of remarkable intensity, written, as he once proclaimed, for epicures, not amateurs.

1. FORMATIVE YEARS (1860–83). Wolf was born in the small town of Windischgraz, then part of the Austrian Empire but incorporated into Yugoslavia after World War I. The town was an outpost of Germanic culture within a Slovene region; Wolf's mother Katharina (1824–1903) was of Slovene yeoman stock (her paternal grandfather's name was Orehovnik, which he changed to its German equivalent Nussbaumer, while her maternal grandfather's name was Stank or Stanko) with, according to family tradition, a smattering of Italian ancestry as well. She was a shrewd, practical and energetic woman, four years older than her husband Philipp Wolf (1828–87), whom she married in 1852. Of German origin, he had inherited a leather manufacturing business in Windischgraz established by his grandfather Maximilian. A thwarted artist, he was self-taught on the piano, violin, flute, harp and guitar; both his musical gifts and moody temperament were passed to his fourth child Hugo (of eight children, two died in infancy). Hugo was given piano and violin lessons by his father at the age of four or five, while at primary school from 1865 to 1869 he was taught the piano and music theory by Sebastian Weixler, who played the viola in the Wolf family orchestra (Philipp first violin, Hugo second, brother Max cello, and a horn-playing uncle) and composed dances dedicated to the children, including the *Hugerl Polka*.

Despite a fire which devastated the family financially for many years thereafter, Philipp sought to provide his three sons with the educational opportunities his parents could not afford to give him. In November 1868 Wolf saw his first opera at the Stadttheater in Klagenfurt (Donizetti's *Belisario*) and was so moved by the experience that afterwards he could play long passages of the work from memory. In September 1870 he went to the regional secondary school in Graz, where he was remembered for his Slovene drawl, but left after a single term (homesickness was probably one reason) with the official classification

'wholly inadequate'. In September 1871 he began two years as a boarder at the Benedictine abbey of St Paul in Lavanttal in Carinthia, 30 kilometres from his home, where he played the organ for weekday student masses, performed in a piano trio and immersed himself in potpourris arranged for the piano of operas by Bellini, Rossini, Donizetti and Gounod. Compulsory Latin proved a major stumbling-block, the result of his impatience with subjects other than music, and in the autumn of 1873 he was transferred to the secondary school at Marburg (now Maribor). Here he came to know the works of Haydn, Mozart, Beethoven and others, including Haydn symphonies in piano duet arrangements (his rapturous praise of Beethoven led to brawls with other students who mocked him for his passionate devotion to music), but again left after only two years, the crisis which precipitated his departure impelled by his inflammatory reaction to a professor's comment about his 'damned music'. Hugo's failures in subjects other than music were perhaps intended to blackmail his father into sending him to the Vienna Conservatory, since his music-loving father nevertheless considered music an avocation, not the means to make a living. To placate his father and demonstrate his intention to devote his life to music, Hugo dedicated his Piano Sonata op.1, begun in April 1875, and his Piano Variations op.2 to Philipp. An aunt, Katharina Vinzenzberg, offered to take Hugo into her Vienna home so that he could study at the conservatory and Philipp finally agreed. In September 1875 Hugo began his musical studies in Vienna.

At the conservatory Wolf studied the piano with Wilhelm Schenner and both harmony and composition with Robert Fuchs. Matters went well at first: Wolf was sufficiently advanced to begin with the second-year students, and Fuchs took an interest in him and his compositions. In a revealing anecdote, we are told that the young Wolf used to sit at the Vinzenzbergs' piano for hours at a time, improvising chord progressions and exulting when he discovered a novel resolution; there are passages in his early songs which sound like transcriptions of those parlour experiments in harmony. He also made friends at the conservatory, including the young Gustav Mahler, and composed an unfinished 'violin concerto' (in piano score), piano sonatas, songs and choruses. He became a devoted opera-goer who recorded his impressions of *Fidelio*, *Der Freischütz*, *Don Giovanni* (for example, he was annoyed when a singer improvised too many non-Mozartian ornaments), *Robert le diable*, *Les Huguenots* and others, although his deepest devotion went to Wagner, who visited Vienna in November 1875 for performances of *Tannhäuser* and *Lohengrin*. Wolf attended both and declared himself a dedicated Wagnerian – a term then synonymous with avant-garde turmoil and guaranteed to alarm his parents. After several days of hanging about the Imperial Hotel in the hope of an interview, Wolf spoke to Wagner in December and showed the older composer his piano works modelled on Mozart. Wagner was indulgent and affable, if unwilling to spend any time examining the compositions in detail, and counselled patience and practice. When he was next in Vienna, he told Wolf, he would look forward to being shown larger-scale works.

1. Hugo Wolf

This encounter was of immense importance to Wolf, always a passionate hero-worshipper and famished for encouragement (although he records in February 1876 that he saw Wagner in a dream and that Wagner 'wouldn't hear' of looking at his compositions – Wolf had noticed and evidently resented the paucity of attention paid to his scores). He duly attempted larger compositions, in particular a setting for accompanied male-voice chorus of a poem by Nikolaus Lenau, *Die Stimme des Kindes*. The flaws in his part-writing were pointed out to him by Hans Richter, then principal of the Vienna Hofoper, whom the teenage composer had also buttonholed and importuned for opera tickets, compositional advice and access to Wagner. Technical shortcomings are also evident in further choruses written in 1876, although the setting of Goethe's *Mailied*, also for male-voice chorus, foreshadows future mastery in certain harmonic details and in its rhythmic verve. Also from this period date various orchestral essays (including an arrangement of Beethoven's Sonata op.27 no.2, with new counterpoints added, and a symphony in B♭), the beginnings of a string quintet, and a *Rondo capriccioso* for piano, later turned into a symphonic finale. It is noteworthy that Wolf, although he scrawled exclamations of 'Rubbish!', 'Bad!' and 'Worse' on these early manuscripts, preserved them for posterity, which can trace the signs of increasing stylistic independence amidst the echoes of Mozart, Schubert, Schumann, Weber and others. But Wolf was soon once again in conflict with authority, his dismissal from the conservatory a near-farcical conflation of adolescent rebellion and the need to find 'Wölferl's own howl' without pedagogical constraints. Although he later explained that he resigned in protest against the school's conservatism, he was also officially dismissed for 'breach of discipline', the brouhaha further aggravated by a fellow student who sent the director Josef Hellmesberger a death-threat signed 'Hugo

Wolf'. In March 1877 the disgraced Hugo was on a train back to Styria and home.

Wolf remained with his family for almost eight months, working on a symphony (he subsequently lost the score in a Graz railway station when he was on his way back to Vienna), a Humoreske for piano and lied settings of Lenau, Matthisson, Körner and anonymous poems; he would later judge one of those songs, *Morgentau*, worthy of publication. Unable to decide what to do with his errant son, Philipp finally allowed him to return to Vienna in November to earn his own living as a music teacher. Never a patient creature, Hugo was no teacher by temperament, but his talent and charm secured him the patronage of generous households, such as those of the great actor Ludwig Gabillon and Freud's early collaborator Josef Breuer. Maintaining the talented musician's income was more important in these sympathetic families than the musical progress of their sons and daughters, whose lack of talent impelled fits of exasperation from the impatient Wolf; that the children were often fond of their elfin music master – Wolf's full height was 154 cm – is notable. (One of Breuer's daughters, whom Wolf taught, was probably the source of a fascinating dream about Wolf, whom she saw wearing Hans Richter's countenance and raging away at the top of a tower. The dream was relayed to Freud and included in *The Interpretation of Dreams*.) It was upon his return to Vienna that Wolf began what would become a habit of changing his lodgings frequently in search of greater quiet, cheaper rent, or both.

Wolf had earlier befriended other cultured and wealthy patrons, including the minor composer Adalbert von Goldschmidt, whose oratorio *Die sieben Todsünden* enjoyed a certain currency for a time, the critics Gustav Schönaich (a Falstaffian eccentric) and Hans Paumgartner, the sculptor Viktor Tilgner and the conductor Felix Mottl. They lent Wolf books, scores and money, and took him to concerts and operas, giving their provincial friend a gloss of much-needed culture as well as contacts with other musicians. But their friendship was ultimately fatal. According to Alma Mahler it was the rich dilettante Goldschmidt who took Wolf to a brothel (sexual initiation by a prostitute was a long-established custom in Vienna), probably in 1878, where the young man most likely contracted the syphilis that would lead to his insanity in 1897 and his death in 1903. It was around that time, so the Gabillon and Breuer families later recalled, that he began to avoid their company and dinner tables, refusing to use their silverware or travel in the same railway carriage. His offended friends at first ascribed his behaviour to boorishness, but Dr Breuer eventually came to believe that Wolf was concerned about the possibility of infecting others and was acting on the best medical advice available at the time. Sadly and ironically, Wolf first fell in love early that year with the society beauty Vally Franck (the artist Hans Makart once expressed a wish to paint her portrait), a relative of the Lang family, who were among his most generous benefactors. Despite their differences of temperament and upbringing, despite frequent separation and eventual parting, the affair was a vital impulse for Wolf's life during its three-year duration.

It was at this time of sexual initiation and first love that Wolf turned to the composition of more songs, including an unfinished setting of Chamisso's *Was soll ich sagen?*, and settings of Rückert, Hebbel, Julius Sturm, Lenau, Hoffmann von Fallersleben and Goethe's *Faust*. The pointed delicacy of *Die Spinnerin* (Rückert) and *Das Vöglein* (Hebbel) anticipates a distinctive strain of Wolf's mature songwriting art, and the songs were later published in the *Sechs Lieder für eine Frauenstimme* of 1888, his first publication. One also finds, inevitably, Schubert's lieder as an occasional model for the young Wolf; the cries 'Frau Amme, Frau Amme, das Kind ist erwacht!' in the Hebbel song *Das Kind am Brunnen* rise a semitone higher on each invocation, after the manner of the child's cries 'Mein Vater, mein Vater!' in Schubert's *Erlkönig*. But in the wake of his dismissal from the conservatory, Wolf was teaching himself how to compose lieder largely by imitating the songs of Schumann, his self-tutelage evident in the three Heine songs of 1876 and the nine Heine settings (one of them unfinished) of 1878. One can trace Wolf's apprenticeship from slavish echoes of Schumann songs – the earlier composer is an unbanished ghost behind every note of Wolf's *Du bist wie eine Blume* – to uncannily exact assimilation and, finally, mastery and a compositional voice of his own. He later said that in 1878 he had written 'at least one good song every day', an exaggeration (unless he atypically destroyed many of them), but there was undeniably a lyrical outpouring that year. A new and agonized note is sounded in the *Faust* song *Gretchen vor dem Andachtsbild der Mater Dolorosa*, begun on 22 August, and the first movement of the D minor String Quartet, with its prefix 'Entbehren sollst du, sollst entbehren' (You must renounce, must renounce), spoken by Faust when he affixes his pact with the Devil and relinquishes human love. That the experience of syphilitic infection influenced the choice of these texts of sin, sexual anguish and renunciation seems a likely possibility, if not accessible to definitive proof.

Early in 1879 Wolf had a momentous interview with Brahms. Before this encounter, Wolf's passion for Wagner (he was immersed in *Götterdämmerung* at this time) had not prevented him from having considerable respect for Brahms, whose chamber music and *Magelone* songs he admired. Brahms gave him essentially the same advice Wagner had given him, namely to continue learning more about music, especially counterpoint; the older composer recommended the pedantic Gustav Nottebohm as an instructor, but Wolf would not have been able either to afford his fees or to tolerate his rigidity. Brahms's bluntness and Wolf's fiery, sensitive nature were ill-matched, and Wolf's indignation at the supposed slight he had received swelled into immediate and enduring 'anti-Brahmimentum' (his own term). As in Shaw's London, the younger, radical set tended to brand Brahms as a reactionary and hail Wagner as progressive, and Wolf belonged to just such a group of fanatical Wagnerites who copied their master to the point of aping his vegetarianism. (For Wolf, to whom sausage was ambrosia, this was a considerable sacrifice and lasted only about 18 months in 1881–2.) In addition to the anger and disappointment over his reception by Brahms, Wolf was at times short of money and in disputes with his ever-gloomy father, but his new life in Vienna was not entirely grim. He was particularly close to Mahler at this time, and in April 1879 he first met the Lang family, including Melanie Köchert (née Lang), who five years later became his mistress and lifelong protector. Her sister Henriette and brother Edmund also became close friends. But Wolf was still in love with Vally Franck (he more in love than

she, a fact she recognized with a sense of pain), although they were separated for most of 1879 by her absence on holiday. Wolf's letters to her and the songs he composed and dedicated to her, including the Lenau settings *Herbstentschluss*, *Traurige Wege* and *Der schwere Abend*, are darkly passionate outpourings of Wagner-tinged late Romanticism – offspring of the *Wesendonck Lieder*.

Wolf's patterns of cyclic mood swings and sporadic creativity were already clearly delineated, and the depression of 1879 was followed by happier times in 1880. The Eichendorff songs *Erwartung* and *Die Nacht* (26 January and 3 February) were included in the first edition of the *Eichendorff Lieder* but withdrawn as not representative of his best work when the chance arose for a new edition. He composed the slow movement of his quartet – this is among the best works of his youth – under the influence of the *Lohengrin* Prelude and the late Beethoven quartets, especially the 'Heiliger Dankgesang' of op.132, while on an idyllic summer holiday at Mayerling (in 1889 the site of the Austrian Crown Prince Rudolf's suicide) with the family of an architect named Viktor Preyss, who took Wolf in as a member of the household and treated him with great understanding and kindness. There Wolf's mature songwriting style continued its slow burgeoning, nurtured by studies and transcriptions of Wagner (from *Die Meistersinger* and *Die Walküre*). Among the summer visitors to the Preyss family were their relatives the Werners, whose then seven-year-old son Heinrich was devoted to Wolf and later served his cause nobly as editor, critic and biographer. Contributing to Wolf's happiness that summer were visits from Vally and rambles in the beautiful countryside; Wolf liked to compose in the open air, as we know from inscriptions that tell of composition on park benches in the Prater and other *plein air* sites, and his love of nature is an element in many of his most beautiful songs.

Wolf returned from blissful holiday to troubles in Vienna. Devoted to both parents, Wolf had nonetheless to endure his pessimistic father's reproaches and his bitterness about his children's futures (Wolf's brother Gilbert was a source of even greater anxiety for their father). Vally Franck, who had returned to her native France, wrote to him shortly before his 21st birthday to break off their often interrupted affair for good, and Wolf was heartbroken. Some of his suffering is almost surely reflected in his six remarkable choruses on poems by Eichendorff, the *Sechs geistliche Lieder* composed in April 1881. The spiritual sufferings of the poetic persona, 'wounded unto death', became the surrogates for the composer's desolation, the result of Eros rather than religion; 22 years later, the beautiful *Ergebung* from this choral cycle was sung in Vienna's Votivkirche as part of Wolf's funeral service. In the wake of Vally's letter, the unhappy Wolf returned to provincial Windischgraz, where he quarrelled with his elder brother and composed only the Eichendorff song *Da fahr ich still im Wagen* for a projected cycle entitled *In der Fremde*. The faithful Goldschmidt had arranged in November 1881 for Wolf to become second Kapellmeister for Karl Muck in Salzburg, where he was principally responsible for rehearsing the soloists and chorus in Strauss, Lortzing and Millöcker operettas. Music of this sort was not to the Wagnerite Wolf's taste at all, and he had neither the baton technique nor the patience to make orchestral and choral musicians happy under his direction. After unknown imbroglios, he left Salzburg in high dudgeon and, unable to find another post as a Kapellmeister, returned to Vienna in early 1882 to resume his former tenuous existence as a music teacher and accompanist. Philipp, angered by yet another failure, wrote that he was 'more out of tune than our piano' and bitterly compared himself to Sisyphus, condemned for all eternity to push the same boulder uphill, only to see it roll back down again. Father and son were estranged for a brief time, but then reconciled.

We know little about Wolf's activities in 1882. It is probable that he was conscripted into the Austrian army early in the year, but he was not retained long, whether because of friends' influence, his smallness of stature or a temperament unfit for military life (one can hardly imagine anyone less suited for soldiering). In his *Daten aus meinem Leben*, Wolf curiously indicates this as a year of 'hideous moral hangover', whatever that may mean. Another summer holiday with the Preyss and Werner families in Mayerling saw him contemplating an opera on the subject of Heine's Princess Ilse from the *Harzreise*, although the plans came to nought. He did, however, compose his second song on a text by Eduard Mörike and his first comic masterpiece: *Mausfallen-Sprüchlein*, published in the *Sechs Lieder für eine Frauenstimme* of 1888. In August he travelled to Bayreuth for the *Parsifal* festival, where he stared at the windows of Wahnfried in the hope of seeing Wagner, to no avail, and was predictably overwhelmed by the two performances he heard. After Bayreuth he was once again at a compositional standstill until December 1882 or early 1883, when he began composing songs on texts by Robert Reinick, including the lovely paired lullabies *Wiegenlied im Sommer* and *Wiegenlied im Winter*.

2. Years of uncertainty (1883–7). More Eichendorff and Reinick songs followed in 1883, with *Rückkehr* an effective early premonition of the later Eichendorff song *Das Ständchen* (in both, the piano takes the role of music external to the poetic persona – a street serenader – to which the singing persona adapts his song), but Wolf was in a quandary about his life's direction. Through the intermediary of his friend Tilgner, Wolf sent his songs to Eduard Hanslick for his opinion and advice on possibilities for publication; Hanslick, later quite hostile to Wolf, commended him for his 'sensitive, interesting songs' and suggested that he try his luck with Simrock. Probably because of Wagner's death on 13 February, a shattering event for Wolf, he did not send his works to Brahms's publisher Simrock but rather to Wagner's publisher Schott, who rejected them, as did Breitkopf & Härtel. Despite these disappointments, he received encouragement from none other than Liszt, who visited Vienna in April 1883. At a meeting engineered by Goldschmidt, Wolf was able to play some of his songs, including *Die Spinnerin*, for Liszt, who was impressed and even embraced the younger composer. Liszt, like Wagner and Brahms, advised that Wolf work in larger forms, and these words prompted the beginnings that summer of the symphonic tone poem based on Heinrich von Kleist's *Penthesilea*, long an obsession of Wolf's; Kleist's reversal of the post-Homeric legend in which Achilles slays the Amazon Penthesilea, such that Penthesilea rends Achilles to death, is among the most powerful works in all of literature about the violence wrought by female sexuality upon men. In June Wolf also composed a setting of

Justinus Kerner's *Zur Ruh, zur Ruh*, possibly as an elegy on the death of Wagner; this song (among the best of his pre-1888 works) is premonitory of his mature style in its string quartet texture, chromatic part-writing and careful attention to prosody and textual nuance. After a second pilgrimage to Bayreuth to hear *Parsifal* he visited the Köcherts in Rinnbach, staying there for seven weeks in August and September. It was here that he made a new friend in the writer Hermann Bahr and quarrelled with the Breuers over his vitriolic verbal abuse of a woman (the mother of a child prodigy); incensed by Frau Breuer's reproof, Wolf broke off all contact with them for ever. He did likewise with Schönaich and also stormed out of the house of a prominent industrialist named Fritz Flesch, who had generously offered the entire first floor of his home for the composer's use, because his host passed him a pear on a toothpick – as a syphilitic sensitive about the possibility of infection, Wolf took violent offence. The darker side of his personality, his capacity for bitterness and anger (his nickname 'Fluchu' reflects his propensity for elaborate cursing), was often evident during these years of apprenticeship and trial, before the accession of fully fledged compositional mastery, and must be weighed in the context of his immense artistic frustration, his despondency about his compositional destiny in Wagner's wake. 'What remains for me to do?' Wolf reportedly lamented. 'He has left me no room, like a mighty tree that chokes with its shade the sprouting growths under its widely spreading branches'.

It is, however, also revelatory of his personality that so many friends remained loyal to him, despite his snappish outbreaks. First and foremost among them was Melanie Köchert, whose husband Heinrich Köchert was the Vienna court jeweller; an influential advertiser in the fashionable weekly newspaper, the *Wiener Salonblatt*, he exerted his influence to obtain for Wolf an appointment as their music critic, a post Wolf held from January 1884 to April 1887. The 'wild Wolf' (who did nothing by halves) became an institution, an uncompromising voice for musical quality in a city where the views of Hanslick, with his incessant complaints about the 'Wagner-Influenza' afflicting all of Europe and his touting of second- or third-rate anti-Wagnerian composers like Anton Rubinstein, overwhelmingly held sway. If Wolf was often unfair in his attacks on Brahms, whom he excoriated for 'nullity, emptiness, and hypocrisy' (but he praised the String Quintet in F op.88 in print), he was not merely partisan, and his articles are vivid mirrors of their time and place. Furthermore we learn much about Wolf's views on music, discovering that Meyerbeer was now a fallen idol, that Wolf had the highest regard for Chopin, that singers and conductors often permitted unpardonable alterations to Wagnerian staging, that he was a fanatical devotee of Liszt, that he had no respect for bel canto opera, that he considered Schubert's songs the highest attainment of art but found his symphonies loose in their construction. The writing is emphatic, often sardonic, vivid in its imagery and thoroughly enjoyable to read. Unfortunately, his critiques made him many enemies, who neither forgot nor forgave and had the means to make Wolf suffer for their rancour.

Wolf composed very little during the three-year period as a critic. He went on a six-week summer holiday at Rinnbach with the Köcherts in 1884, and it was probably at this time that Melanie and Wolf made a secret pledge of love for one another. Composition did not come easily, however: fragmentary sketches of incidental music for Kleist's *Prinz Friedrich von Homburg*, sketches for the last movement of the D minor Quartet, the scoring of his *Penthesilea* music, and one completed song (the Mörike setting *Die Tochter der Heide*) are the sole products of an otherwise arid summer. On a visit to his sister Modesta and her husband Josef Strasser at Öblarn in August, he met the folk poet and singer Johann Kain and was entranced by his songs. In the autumn he returned to Vienna to write reviews. His attempts to secure performance of his quartet and Eichendorff choruses were in vain, and Wolf resolved to spend the summer of 1885 completing his *Penthesilea* and *Prinz Friedrich* scores for submission to the Vienna Philharmonic. The latter remained unfinished, but he submitted the completed *Penthesilea* to Hans Richter himself and his quartet to the famed Rosé Quartet, all four players being members of the Philharmonic as well. The violist Sigismund Bachrich, his ego wounded by Wolf's attacks on the orchestra's conservative programming policies and on his own ineptitude as a performer, egged the group into administering a sharp snub to the composer: 'we ... have unanimously resolved to leave the work for you with the doorkeeper of the opera house'. Worse humiliation was to follow. After the summer of 1886 in which Wolf composed the bulk of his Intermezzo in E♭ for string quartet, he received the news that his *Penthesilea* would be played at a Philharmonic trial of new works on 15 October; a year had lapsed beween submission of the piece and the actual run-through. The trial (the *mot juste*) was a disaster at which the orchestra supposedly burst into derisive laughter at the end and Wolf overheard disparaging remarks by Richter about people who dared to criticize the great Brahms. It is difficult to disentangle conflicting accounts of the fiasco, which Wolf believed had been engineered to give the Brahmsian faction malicious delight, but Wolf's fury at such a crushing blow is all too plain ('they shall be roasted in hell's brimstone and immersed in dragon's poison – I have sworn it'). In the aftermath of this bitter incident, Wolf put the score away and did not return to it in order to clarify the excessively thick orchestration until he was confined in the asylum and could no longer accomplish coherent work. His grand symphonic tone poem was not published until 1903, shortly after his death, and then in a badly bowdlerized version (it has subsequently been re-edited to reflect the original manuscript).

Wolf was not the most patient of men, but beneath the frustration engendered by his slow compositional maturation and by setbacks in the external world was an underlying persistent faith in his mission as a composer. The texts by Eichendorff (*Der Soldat II*) and Joseph Victor von Scheffel (*Biterolf* and *Wächterlied auf der Wartburg*) composed in December 1886 and January 1887 and the Goethe songs of late January and 1 March (*Wandrers Nachtlied* and *Beherzigung*) all have to do with staunchness of purpose and resolution in times of adversity. More Eichendorff songs in a lighter vein, about love, women's witchery and beauty and nature's magic, followed in spring 1887 (*Der Soldat I*, *Die Kleine*, *Die Zigeunerin*, *Waldmädchen*, *Nachtzauber* – the last of these songs has a nocturnal nature-magic that suggests an idiosyncratic mixture of Schumann with Debussy's Verlaine song *Clair de lune*), as did the *Italienische Serenade*

for string quartet, composed 2–4 May. Perhaps it was this renewal of his creative powers that was responsible for Wolf's decision to abandon music journalism for ever; he handed in his last critique on 24 April. The tongue-in-cheek caricature of a serenade, its ironic mastery a sign that the apprenticeship years were virtually over, may have been inspired by the Italian serenade in Eichendorff's novella *Aus dem Leben eines Taugenichts*, in which Wolf could see many correspondences with his own life. But at precisely this moment, Wolf was struck another devastating blow when he was summoned home for his father's death on 9 May. For all Philipp's pessimism, he had loved his son dearly, telling him in one of his last letters, 'Don't despair: the sun of recognition will shine on you yet ... think only that you have a father who loves you and whose only hope and joy you are'; and Wolf was devastated by his death. He composed nothing further that year. It was a tragic irony that Wolf's friend Friedrich Eckstein offered in November to help arrange for publication of some of Wolf's songs by the small Viennese firm of Emil Wetzler. From among his many manuscripts, Wolf chose six songs for women's voice (*Sechs Lieder für eine Frauenstimme*, dedicated to his mother) and six for men's voice (*Sechs Gedichte von Scheffel, Mörike, Goethe und Kerner*, dedicated to his father's memory). Overjoyed, he wanted only to compose; overwhelmed by the onrush of renewed creativity, he sought solitude at the Werners' summer home in Perchtoldsdorf, a market town half an hour's train ride from Vienna, to give his Muse Polyhymnia full rein.

3. MASTERY AND FAME (1888–97). Although Wolf arrived at his somewhat arctic (a reluctant stove the culprit) compositional haven in mid-January 1888, it was not until one month later that the true *Wunderjahr* began, comparable in intensity, volume and variety to Schubert's wellspring of song in 1814–15 and Schumann's in 1840. *Wo wird einst* of 24 January was Wolf's last attempt to tune his lyre to Schumann's foremost poet Heine, but his setting of Reinick's *Gesellenlied* composed that same day is his hail-and-farewell to the long apprenticeship years – a delightful comic song in which an apprentice longs to be a master, set to strains cheekily reminiscent of Wagner's David in *Die Meistersinger*. Wolf had brought with him to Perchtoldsdorf the poems of Eduard Mörike (1804–75), long his favourite poet; 'Mörikeana', as Wolf dubbed his Mörike songs, had no doubt been quietly taking root in his musical imagination well before February 16 and the composition of *Der Tambour*, but now a floodtide of lieder emerged, to his delighted and disconcerted astonishment. On 22 February he wrote to Edmund Lang, 'I have just put a new song down on paper [*Der Knabe und das Immlein*]. A divine song, I tell you! Quite divinely marvellous! ... I feel my cheeks glowing like molten iron with excitement, and this state of inspiration is more an exquisite torment to me than pure pleasure'. Stunned by the violence of the event, he questions, 'What will the future unfold for me? ... Have I a calling? Am I really one of the chosen? ... That would be a pretty kettle of fish'. The answer was happening to him even as he wrote those words, and by March he surely knew it. Later that same day he told Melanie's brother (by 1888 Wolf and Melanie had consummated their passion for one another, although they could only meet by stealth) to say that two more songs had come into being (*Jägerlied* and *Ein Stündlein wohl vor Tag*, the latter fashioned from musical materials in *Der Knabe und das Immlein* and linked to it in a manner of Wolf's creating, not Mörike's). 'This is an eventful day', he concluded happily.

More such eventful days would follow, one after another. Nine Mörike songs were composed in less than two weeks in February, 20 more followed in March, and eight in April; 'I'm working at 1000 horsepower from early morning until late at night', he wrote to his brother-in-law Joseph Strasser, adding, 'What I now write, dear friend, I write for posterity too. They are masterpieces'. In one anecdote we are told that when schoolboys were playing in the street, he would rush out and confiscate their toys so that they could not interfere with the quiet he needed for composition. With each new success he joyously notified his friends, telling Edmund Lang on 20 March that *Erstes Liebeslied eines Mädchens* was 'by far the best thing that I have done up to now ... the music is of so striking a character and of such intensity that it would lacerate the nervous system of a block of marble'. The next day he retracted the declaration to say that what he had written that morning (*Fussreise*) 'is a million times better. When you have heard this song you can have only one wish – to die'. By 18 May he had composed 43 songs and needed a holiday, while the Werners reclaimed their vacation home. He went on a walking tour of Upper Styria and Carinthia (on this trip, he heard an Aeolian harp in a deserted castle and was impressed at the resemblance between its sounds, which he had never heard before, and his own setting of *An eine Äolsharfe*, composed seven weeks earlier) and again travelled to Bayreuth to hear *Parsifal*, which reduced him to weeping outside the theatre at the end of the performance. At the end of August he was back in Vienna and staying at the faithful Ecksteins' house, where he composed Eichendorff's *Verschwiegene Liebe*, a poem he had attempted earlier but abandoned. His success with the song persuaded him to retreat into solitude once more at the Eckstein's country house in Unterach am Attersee in order to compose more Eichendorff songs – 12 of them in the last half of September (two were composed in post coaches en route to Unterach). In October he resumed work on his Mörike songs ('I have once again industriously "Möriked" [*gemörikelt*]', he told Eckstein, who was arranging for the publication of the volume) and composed nine songs in eight days (4–11 October), including such masterpieces as *An den Schlaf*, *Schlafendes Jesuskind*, *Wo find' ich Trost?*, *Karwoche*, *Gesang Weylas* and *Der Feuerreiter*. The next day he began his return trip to Vienna and work on yet another mammoth lied project, this time to poems by Goethe, with the final Mörike song (*Auf eine Christblume II*) committed to paper during a visit to Perchtoldsdorf on 26 November. In an outburst even more intense than the Mörike floodtide, Wolf set to music 50 poems by Goethe between 27 October 1888 and 12 February 1889, with the 51st and last Goethe song coming on 21 October 1889. If he set many poems not treated by other composers, such as *Anakreons Grab*, *St Nepomuks Vorabend* and *Cophtisches Lied I* and *II*, he also directly challenged the legacy of Schubert and Schumann by setting ten famous texts well known in their settings by the earlier masters.

News of what Wolf called 'the unheard-of wonder' spread quickly beyond Wolf's small circle. Wolf played many of his songs for the Thursday concerts of the Vienna Wagner Verein, whose members included the Vienna

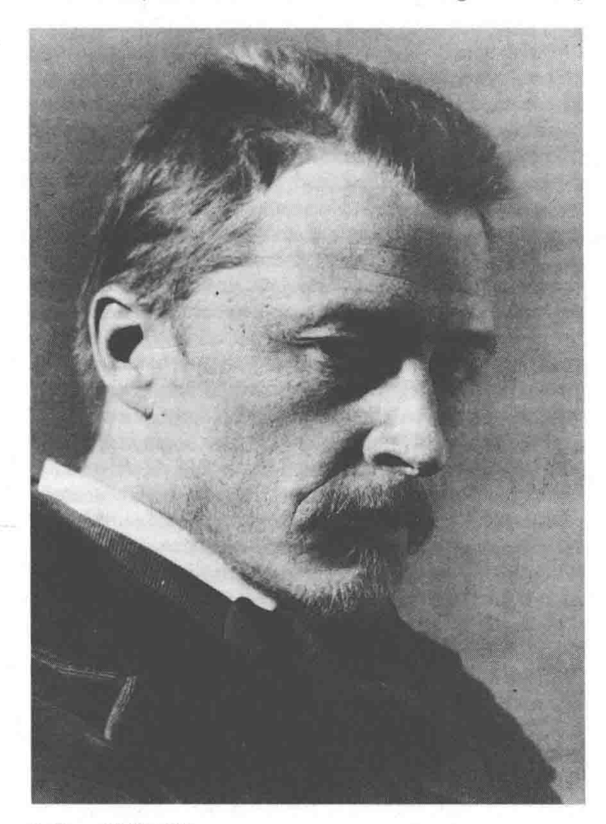
Conservatory professors Joseph Schalk and Ferdinand Löwe. On 8 November 1888 three of Wolf's Mörike songs were performed by a Vienna Hofoper soprano with Schalk accompanying, and the great Wagnerian tenor Ferdinand Jäger (who had sung Parsifal at Bayreuth) was in the audience. Jäger became Wolf's Johann Michael Vogl, serving Wolf's cause as Vogl had served Schubert's; little more than a month later, on 15 December Jäger and Wolf performed nine songs at a public concert in the Bösendorfer-Saal. Although the audience responded to Wolf's songs with enthusiasm, the critics (among them Wolf's erstwhile friend Paumgartner) felt it was presumptuous to juxtapose Wolf and Beethoven as the only two composers on the programme. But success had finally come and Wolf had cause for rejoicing. He had even more cause in 1889 and 1890 when Wetzler brought out the *Mörike-Lieder* and the small Viennese firm of Lacom published the *Eichendorff-Lieder* and the Goethe volume (the latter appeared in 1890), with financial aid from Eckstein and an American woman named Elizabeth Fairchild; Wolf also used some of the money he inherited from his father to defray the costs of publication. Wolf insisted upon truly fine volumes – he had no compunction about administering periodic tongue-lashings to the printers – and fussed over every detail of ornamental borders, paper, number of staves per page, number of bars per line, colour of the covers and lettering.

In May 1889 he returned to the Werners' house in Perchtoldsdorf, where he worked on several large-scale compositions: fragments of an opera based on *A Midsummer Night's Dream* (the *Elfenlied* in piano score, orchestrated in 1891 for soprano solo, women's chorus and orchestra, and the *Lied des transferierten Zettel*, or Bottom's 'The ousel-cock so black of hue', for voice and piano, are all that remain of this project), the choral and orchestral work *Christnacht* (begun at the end of 1886, completed in May 1889), and orchestral arrangements of the Mörike songs *Seufzer*, *Karwoche* and *Auf ein altes Bild* (the date for the latter is uncertain). More orchestration of his recent songs followed, including the Goethe songs *Der Rattenfänger*, *Anakreons Grab*, *Kennst du das Land?*, *Ganymed* and *Prometheus* and the Mörike songs *Er ist's*, *Gesang Weylas* and *Schlafendes Jesuskind*. In the wake of holiday visits to Bayreuth and to his mother in Windischgraz, Wolf returned to Perchtoldsdorf in October 1889 to work on his *Spanisches Liederbuch*, the source an 1852 volume of translations of Spanish poems by the poets Emanuel Geibel and Paul Heyse (the latter a writer of many novellas and winner of the Nobel Prize); Wolf's choice of 44 poems included works by Juan Ruiz, Cervantes, Lope de Vega and Luís de Camoens, as well as anonymous songs. Given the long-enduring vogue for Spanish exoticism in Germany, this anthology had been popular with song composers, including Schumann (the *Spanisches Liederspiel* duets, for example) and Brahms, for over 40 years; but Wolf characteristically chose poems overlooked by previous composers, a fact which earned him a quibble from his new publisher Schott. Thanks to his friend Gustav Schur, a banker and the treasurer of the Wagner Verein, the efforts of Jäger and Schalk, and Engelbert Humperdinck's approbation of the music he was asked to evaluate, Wolf had the attention of one of Germany's foremost music publishers.

In fact, his fame was now on the march outside Vienna's boundaries. Heinrich Rauchberg's article 'Neue Lieder und Gesänge' on the Mörike and Eichendorff songs appeared in the November–December issue of the *Österreichisch-ungarische Revue* and was privately printed and distributed shortly after to spread the word about Wolf. Even more significant, Schalk wrote a lengthy article 'Neue Lieder, neues Leben' in the *Münchener allgemeine Zeitung* for 22 January 1890 in which he praised Wolf's achievement to a new south German audience and pointed out the composer's service to the 'half-forgotten Swabian master' Mörike. Upon reading this article, Emil Kauffmann, the Tübingen music director and son of Mörike's friend Ernst Friedrich Kauffmann (a mathematician and composer who set many of Mörike's poems to music), wrote to Wolf, thanking him for his music with the magnificent gift of a Mörike autograph manuscript; the gift and Kauffmann's first letter arrived fortuitously on Wolf's 30th birthday. Both Kauffmann and the Mannheim judge Oskar Grohe, who also learned of Wolf's existence from Schalk's article, became close friends, and the composer's correspondence with these two trusted non-Viennese adherents is a valuable window on to his life. Grohe introduced Wolf's music to the music publisher Karl Heckel and to Felix Weingartner, Kapellmeister at Mannheim, who asked Wolf to contribute works for a concert in commemoration of Wagner's birthday. Furthermore, a hugely successful recital given by Jäger for the Graz Wagner Verein led to still another concert, this time with a new Wolfian adherent, the dentist and amateur pianist Heinrich Potpeschnigg, accompanying. 'Hugo Wolf is a lieder composer of the first rank', wrote the critic for *Die Tagespost*, continuing, 'Since Schubert we have seen few equal to him'.

But Wolf was also encountering renewed opposition from his enemies as a result of new-found fame. The great Wagnerian singer Amalie Materna withdrew from an engagement to sing some of Wolf's songs in the Wagner Verein when she was threatened with a boycott by the critics, and Richard Heuberger, Hanslick's underling at the *Neue freie Presse* (who refused to allow his own songs to be performed on the same programme as Wolf's), later told of a conversation with Brahms and Hans Richter in November 1890 about 'the Wagnerians and in particular Hugo Wolf, whom they now praised as a great songwriter, the inventor of the "symphonic song", whereas Schubert, Schumann and Brahms are said to have written songs as if with guitar accompaniment'. Brahms's later biographer Max Kalbeck wrote scathing reviews of Wolf's 'childish, tinkling, arid things' with their 'ludicrous harmonic convulsions', but Wolf was undeterred by the opposition and began energetically searching once more for suitable opera librettos – the *idée fixe* of his life, his Holy Grail. 'Die Oper und immer wieder die Oper!' (The opera, always the opera!), he cried out in a letter to Kauffmann. Wolf had believed his Spanish songs to be a preparatory stage for operatic composition, and his friends therefore encouraged the feminist and journalist Rosa Mayreder in 1890 to prepare a libretto based on Pedro Antonio de Alarcón's *El sombrero de tres picos*. Wolf rejected it savagely (he would later accept it in revised form), nor did plans to adapt *The Tempest* into a full-scale opera come to anything; given Wolf's love of tendentious humour, it is characteristic that he praises Caliban, Trinculo and Stephano as perfect for his purposes. The poet Detlev von Liliencron offered Wolf his play *Pokahontas* (it is difficult to imagine the exclamation 'Kranke

Wigwams!' set to post-Wagnerian harmonies), but this too was rejected, as was the publisher Karl Heckel's proposal of a poetic drama on the life of Buddha. The latter was too reminiscent of Wagner for Wolf, who did not want to be an epigonic creator of still more 'world-redeeming tragedy'; he preferred, so he told Grohe, comedy ' ... in happy and original company, with strumming of guitars, sighs of love, moonlit nights, champagne carousels, etc.'. But despite his search for a drama to compose, he was soon rendered very unhappy indeed by a commission in 1890 to compose incidental music to Henrik Ibsen's *The Feast at Solhaug* for a new production at the Burgtheater. 'It [the play] is a thoroughly botched piece of work – with damned little poetry', he wrote crossly; he was uninspired and tardy, his dilatoriness delaying the opening until 21 November 1891. Only a portion of his music could be performed because he had scored the work for too large an orchestra, while one of the singers found the music too difficult and recited his songs to harp accompaniment instead.



In May and June of 1890 Wolf set a series of six poems from the *Alte Weisen* of the Swiss poet and novelist Gottfried Keller, whose novel *Der grüne Heinrich* he had long loved. Shortly afterwards Wolf orchestrated four more of his Mörike songs (*Gebet*, *An den Schlaf*, *Neue Liebe*, *Wo find ich Trost?*) and began work on the *Italienisches Liederbuch*, which had a difficult and protracted genesis. Between 25 September and 14 November 1890, he set seven poems from the 1860 translations of Italian folk poems by Paul Heyse, then turned to the Ibsen commission. After the first four Italian songs had been composed in one burst of creative energy, he made an important journey to Germany (Munich, Stuttgart, Tübingen, Mainz, Mannheim) in October and November 1890 in order to conclude negotiations with Schott and to visit such friends as Kauffmann and Grohe. In his letters to Melanie, Wolf recounted his pleasure when Kauffmann showed him Mörike's letters to Kauffmann's father and told the biographical history of Mörike's Peregrina, which Wolf had not known when setting those poems to music. But the next year was not so felicitous. Mental and physical exhaustion complicated by depression and bouts with throat inflammation (almost certainly a secondary result of his syphilis) prevented further work for much of 1891. 'You ask me about the opera! Dear God, I would be contented if I could write the smallest song, let alone an opera! I firmly believe that I am finished, completely finished', he wrote to Kauffmann on 6 August. 'I am the most unhappy creature on this earth', he told Hermann Wette in a letter written one week later, and he had to endure this unhappiness until 29 November, when the clouds parted and he was able to compose *Dass doch gemalt all' deine Reize wären*. 14 more *Italienisches Liederbuch* songs followed, the compositional spurt ending on 23 December with *Man sagt mir, deine Mutter woll' es nicht*. Although he had chosen still more poems from the Heyse anthology for inclusion in his Italian songbook, darkness fell once again, longer and more impenetrable than ever. Four years would pass before he could complete his last lengthy song collection.

Wolf filled the lean years in part with concerts of his works, beginning in Berlin with a private recital on 3 March for the Berlin Wagner Verein (Wolf himself played and sang additional songs after the singer had to leave for another engagement) and a public recital on 5 March 1892, with the mezzo-soprano Friedrike Mayer and a local tenor replacing Jäger, who was ill with gout. Wolf's loyal friends in the Wagner Verein prevailed upon the proud composer to accept their help toward the advancement of his art and contributed a dress suit and travel funds. In Berlin he made valuable friends, including Baron Lipperheide, the wealthy proprietor of a fashion paper who became a loyal patron, and his wife Baroness Frieda; the critic Richard Sternfeld, a director of the Berlin Wagner Verein who wrote the laudatory article 'Ein neuer Liederfrühling' for the 12 March issue of the *Magazin für Literatur*; and Siegfried Ochs, the conductor of the Berlin Philharmonic choir who conducted the first Berlin performance of the *Elfenlied* two years later. Although Wolf was angered by the musical liberties Mayer permitted herself in performance and the two never saw one another thereafter, the concert was a success; if the critics showed little real comprehension of Wolf's importance, they praised him nonetheless. Also in Berlin, the librettist Richard Genée recommended Alarcón's *Il niño de la bola*, the German translation entitled *Manuel Venegas*, as a suitable text for conversion into an opera, and Wolf began the search for a librettist, a search which cost him the friendship of two men (Gustav Schur and Hermann Wette) and shows him at his inflammatory and self-centred worst. He returned to Vienna in early March and fell ill with another throat inflammation immediately upon arrival and was nursed back to health at the Köcherts' for ten days before returning to his hermitage in Döbling. On 11 April Jäger and Schalk gave a recital in Vienna's Bösendorfer-Saal, and the occasion was a triumph. 'It seems in fact as if I were becoming fashionable', the pleased composer wrote, adding 'It is high time'. In April and May of 1892 he worked on the scoring of the *Italienische Serenade* for small orchestra and an orchestral version of *Geh', Geliebter, geh' jetzt* (Wolf chose to end the *Spanisches Liederbuch* with this magnificent extended song of passion), the latter exercise possibly inspired by Melanie's solicitous presence during his illness. June saw a performance of the music to *Das Fest auf Solhaug* at the International Exhibition of Music and Theatre in Vienna – from all accounts, not a good performance but still a *succès d'estime*.

Success, while not hollow, could not make up for the compositional wasteland Wolf now inhabited. From 1892 to 1894 he wrote nothing. 'I would like most to hang myself on the nearest branch of the cherry trees which now stand in full bloom', he told Kauffmann in April 1893, Nature's fruitfulness only exacerbating his awareness of aridity. 'I could just as soon begin suddenly to speak Chinese as compose a single note', he wrote in despair to Grohe. Travel and the obsessional quest for an opera libretto helped to pass the time, if not peacefully. 'I already own a small library of the most atrocious, bestial, bloody, idiotic, hair-pullingest, murderously shameful opera texts imaginable', said 'Fluchu', and yet he longed for 'the right one! the true one!' ('Der Rechte! der Echte!') with every fibre of his being. In October and November 1892 he completed a mammoth arrangement of the Mörike ballad *Der Feuerreiter* (always one of Wolf's favourites among all his compositions) for chorus and orchestra, first performed, along with the Shakespeare *Elfenlied*, under Siegfried Och's direction in Berlin in January 1894. While in Mannheim in 1894 Wolf made a new friend in the barrister and amateur singer Hugo

Faisst, who was unbounded in his admiration and support of the composer thereafter. Early in this same year Wolf became infatuated with the mezzo-soprano Frieda Zerny and had an affair with her of several months' duration; he even contemplated emigrating to America to begin life anew with her. She came to Vienna in March to give a recital of Wolf's songs with Jäger and Faisst, with Wolf himself accompanying, but by June the brief liaison, perhaps born of the desire to bring his long compositional drought to an end, was over. The matter caused Melanie great distress – in one letter to Frieda, Wolf reveals that Melanie's hair had turned grey from grief – before Wolf's return to her. Heinrich seems to have discovered the longstanding love between his wife and Wolf in the summer of 1893 and to have understood the matter in some extraordinary fashion; he neither renounced his wife nor abated his loyal patronage of Wolf. Wolf spent the summer months of 1894 first at her country house in Traunkirchen and then with the Lipperheides near Brixlegg in the Tyrol. When he returned to Vienna, he stayed with either the Köcherts or Eckstein and was reportedly in a terrible state of depression, broken only by the performance on 2 December of the *Elfenlied* and the choral-orchestral version of *Der Feuerreiter* at the Gesellschaft der Musikfreunde (a concert attended, and warmly applauded, by Brahms and reviewed approvingly by the critics, even Hanslick) and by the successful Vienna production of Humperdinck's *Hänsel und Gretel*.

Both of these events almost surely played a role in Wolf's renewed operatic obsession. He returned to the notion of an opera based on Alarcón's *El sombrero de tres picos* and, after rejecting a scenario by Franz Schaumann, chairman of the Vienna Wagner Verein, returned to the formerly despised libretto entitled *Der Corregidor* by Rosa Mayreder. Where before he could find nothing right in it, he could now find no fault. The day before his 35th birthday he began the work of composition, the long, arid period of blocked creativity finally over. In April 1895 he moved to Perchtoldsdorf and threw himself 'like a madman' into the composition of his first and only completed opera, moving to the Lipperheide château in Brixlegg in May when the Werners returned to their summer home. In nine months of feverish work he composed and orchestrated the entire opera, which he designated as an 'Oper' rather than a comic opera. The sufferings caused by adulterous passion were not, as he knew to his cost, comic at the core. Wolf had quarrelled with Schott and therefore the score was printed by Karl Heckel in Mannheim, where the opera was first performed on 7 June 1896 under the baton of Hugo Röhr (Wolf had offered it to Vienna, Berlin and Prague, with no success). After fraught rehearsals, exacerbated by Wolf's nerves and his customary outspoken criticism of the performers, the opera was a resounding initial success, but the second performance was a failure and the Intendant dropped it from the roster. Much the same fate has been repeated at every revival of this work, which for all its beautiful passages is undramatic and marred by a poor libretto – Wolf's judgment of the text was correct the first time.

2. *Hugo Wolf, 1895*

At the end of March 1896, Wolf asked Melanie for his copy of the *Italienisches Liederbuch*, then went to Perchtoldsdorf to complete the last section of the songbook. After composing 24 songs in the five weeks between 25 March and 30 April he returned to Vienna and, for the first time, an apartment of his own at Schwindgasse 3, thanks to the generosity of Faisst and other friends. He had always lived penuriously in lodgings or as a guest in other people's homes but could now look forward to furnishing a place with 'all the devil's stuff that really makes a dwelling comfortable'. For the remainder of 1896 Wolf revised the score of *Der Corregidor* with the help of the devoted Potpeschnigg, composed one song to a poem by Reinick (*Morgenstimmung*) and two songs to translations of Byron (*Keine gleicht von allen Schönen* and *Sonne der Schlummerlosen*), and importuned Rosa Mayreder to concoct a new version of his old obsession, *Manuel Venegas*.

4. Breakdown and terminal illness (1897–1903). But time was running out for the composer, and the sword of Damocles poised over his head for almost 20 years was soon to fall. As a Christmas present from Paul Müller, the founder of the Hugo Wolf-Verein in Berlin, he received a copy of Walter-Heinrich Robert-Tornow's German translations of Michelangelo's poetry from which he took the texts for four Michelangelo songs composed in March 1897 (he destroyed the fourth song as unworthy). On 22 February he accompanied Jäger and the soprano Sofie Chotek in a recital of his works at the Bösendorfer-Saal including the complete Hatem-Suleika sequence from the Goethe volume; this was to be his last public appearance in concert. As a consequence of this recital, he became friends with Michael Haberlandt, the curator of the Natural History Museum and founder of the Hugo Wolf-Verein in Vienna; the society's first meeting on 14 May 1897 featured a recital of Wolf's songs (Wolf did not attend but participated in the celebration afterwards). That same month Mayreder completed her libretto, but

Wolf was soon unhappy with it. Haberlandt persuaded a colleague at the University of Vienna, one Moritz Hoernes, to recast the text; when Hoernes gave him the new libretto Wolf proclaimed it Shakespearean in quality. This judgment of a sick mind was accompanied by other ominous signs, including a loss of pupillary reflex (a symptom of the impending paralysis of tertiary syphilis) and by outbursts of temper and restlessness beyond his usual irascibility. In late July and early August he made a start on *Manuel Venegas*, but he then came to a standstill and only resumed work the second week of September, when he shut himself in his apartment to work from dawn to dusk, producing some 60 pages of piano score before his reason gave way. By 19 September it was evident to his distressed friends that he had lost his mind. Gustav Mahler had been appointed Kapellmeister of the Vienna Hofoper and, according to Wolf, had promised to produce *Der Corregidor*, then changed his mind. The disappointment was the last straw, and the delusional Wolf insisted that he was the new director of the opera and had dismissed Mahler from his post. The terrible real-life scene in which the mad Wolf played portions of *Manuel Venegas* for his horrified friends became a model for the scene of Adrian Leverkühn's madness in Thomas Mann's *Doktor Faustus*. He was taken away under restraint to Dr Wilhelm Svetlin's asylum for the insane from which he wrote letters of accusation against the friends who had 'betrayed' him and devised grandiose plans for the establishment of his fame, the latter will-o'-the-wisp supposedly to occur under the auspices of the Grand Duke of Weimar. For a few months in 1898 he was well enough to visit resorts at Cilli, Graz, Semmering and Trieste, with Melanie and his sister Käthe to take care of him, and even moved to a new apartment furnished by the Köcherts. After two months he terminated the lease and moved to Gmunden, but at the beginning of October his madness was renewed and he tried to drown himself in the Traunsee. He was returned at his own request to an asylum, the Lower Austrian Landesirrenanstalt in the Alsergrund district of Vienna, on 4 October 1898. His maintenance became the responsibility of Haberlandt and the Hugo Wolf-Verein; the devoted Haberlandt saw to it that he had a large room with a piano and a view of the Stephansdom, but Wolf was incapable of all music-making after the summer of 1899 (among his last comprehensible words was the exclamation 'loathsome music') and thought that the view was only a painting. Melanie visited him three times a week during the long agony of his insanity until his death on 22 February 1903. She then sank increasingly into melancholia and self-reproach ('I have been a bad wife', she is reputed to have said repeatedly) until finally she threw herself from the fourth-floor window of her Vienna home to her death on 21 March 1906. She is buried in the family plot at Hietzing, and Wolf, whom she loved so devotedly, is buried in the grove of honour in Vienna's central cemetery, by the graves of Schubert and Beethoven.

3. Hugo Wolf, with his nurse in the background

5. EARLY SONGS. Wolf travelled a long road to the song year of 1888, a road littered with experiments, musical conceptions only partially realized and compositions more self-educative than musically valuable. Wolf, who may speculatively have kept his early manuscripts in order to revisit them on occasion and thereby enjoy the distance he had travelled musically, did not begin as a song composer finely responsive to poetry; it required over a decade of apprenticeship before he could harness mastery of compositional elements to the results of deep reading and before he could recognize where his talents lay. At first he was misled into the belief that large-scale forms were the only proper preparation and the sole sign of mastery, but his temperament militated against that direction. A self-willed and poetic nature gravitated instinctively to voice and keyboard rather than academic disciplines such as chamber music or a public forum such as orchestral composition. Even so, his earliest extant songs, for example, the three Goethe songs of op.3 (not published in Wolf's lifetime but designated as op.3 by the composer), show him struggling for control of the most basic compositional procedures and producing glaring errors of part-writing, maladroit prosody and inept forays into chromaticism. (In a foreshadowing of the *Wilhelm Meister* songs, defiantly placed at the beginning of the later Goethe anthology, the 15-year-old Wolf selected three poems famously set by Schubert half a century earlier: *Sehnsucht*, *Der Fischer* and *Auf dem See*.) Already obsessed with opera (he had begun work on a gory four-act Romantic opera entitled *König Alboin* in 1876–7), he quickly began thinking in terms of musical characterization and atmospheric depiction, as in the unintentionally comical demisemiquaver left-hand figures depicting rushing, swelling water in *Der Fischer*. These tendencies, however, would serve him well in his mature songs.

In an 1898 essay *Das deutsche Lied seit dem Tode Richard Wagners*, the musicologist and conductor Hermann Kretzschmar observed that a majority of the songs composed from about 1855 to 1880 were influenced by Schumann, and Wolf in his youth was no exception.

Songs such as *An** to a text by Lenau, composed in April 1877, seem a hybrid of Schumannesque traits and elements borrowed from Liszt, another of Wolf's youthful idols; the lied perfectly exemplifies the over-indulgence in pathos which Kretzschmar condemned in many Schumann imitators. (Works such as *Über Nacht* to a text by Julius Sturm, composed in May 1878, seem especially Lisztian in their lush harmonies and slightly overblown grandiloquence.) One notes in *An** the prolongation of the words 'auf immerdar' while a chromatic bass line rises menacingly upwards at the song's end; the progression culminates in Romanticism's favourite diminished 7th 'horror' chord, followed by a melodramatically sombre piano postlude extended à la Schumann, not a repetition of the introduction but newly composed. In the 1877 setting of Friedrich von Matthisson's *Andenken* (a 19th-century 'bestseller' of a song text), the postlude goes on and on tiresomely, typical of the formal imbalances of Wolf's earliest songs. By the early 1880s, however, the imitations of Schumann are often uncannily skilful: Wolf's *Das ist ein Brausen und Heulen*, for example, seems a latter-day homage to Schumann's *Lust der Sturmnacht* from the Kerner songs op.35. To compose under the sign of Schumann meant composing virtually independent *Charakterstücke* in the piano to which a vocal line was added, sometimes a vocal part which echoes the right-hand melody in the piano (*Morgentau*, one of the few early songs Wolf ever judged worthy of publication), sometimes a more declamatory line. As in songs by Schumann and Schumann's disciple Brahms, contrapuntal devices of a sort he would later scorn appear on rare occasions, such as the fragmentary imitation between the left-hand and right-hand parts in the introduction to the Heine song *Ich stand in dunkeln Träumen* of May 1878, followed by a vocal line which begins with the same figures in rhythmic augmentation (one thinks of Brahms's *Liebestreu* op.3 no.1). But the influence of Schubert is also detectable in these early years as well, such as the clearly recognizable echo of the first variation in the Impromptu in B♭ op.142 no.3 in Wolf's 1876 setting of Heine's *Wenn ich in deine Augen seh* or the hint of Schubert's *Der Doppelgänger* at the beginning of Wolf's *Nach dem Abschiede*, no doubt called into being by Hoffmann von Fallersleben's words 'Dunkel sind nun alle Gassen, / Und die Stadt ist öd und leer'. It is possible too that Schubert's *Der Hirt auf dem Felsen* swayed the creation of uncharacteristic vocal melismas in the Lenau song *Frühlingsgrüsse* from early 1876, an echo of the welcome to spring in the final section of Schubert's German concert aria-cum-lied.

But Schumann was the foremost influence. For a time Wolf's favourite poet was Schumann's favourite poet Heinrich Heine; Wolf chose texts from Heine on five separate occasions in the years from 1876 to 1888 before realizing that this poet's subjectivity, lack of dramatic elements, obsession with unrequited love, and possibly his brimstone-and-gall misogyny as well, were not Wolf's cup of tea. Despite his later renunciation of Heine, it was in this repertory that Wolf first devised the separation of voice and piano into different elements of a mini-drama, for example, the military music in *Es blasen die blauen Husaren* or the tinkling *Trivialmusik* salon piece in *Aus meinen grossen Schmerzen* or the 'party music' in *Sie haben heut' Abend Gesellschaft*; in these songs alienated protagonists are set apart from the resonant social world around them. The latter song is especially remarkable because Wolf imbues the background music with the protagonist's anger and misery, erupting unchecked in the long postlude. This is both *echt* Schumann and yet a reversal of Schumann's psychological strategem of reconciliation with memory in the lengthy piano passage at the end of *Dichterliebe*. There is often just such an individual touch, something premonitory of the real Wolf, in these Schumann imitations even at their most slavish (the ethereal non-legato chordal figures in the piano one finds in *Du bist wie eine Blume* are, for example, a foreshadowing of similar figuration to accompany the gentle laughter of the stars in Mörike's *An die Geliebte*, or the apotheosis of a humble peasant woman who imagines her arrival in heaven in *Wie glänzt der helle Mond*). These exercises in autodidacticism by mimicry could on occasion prove inhibiting to composition. He attempted in May 1878 to set Chamisso's *Was soll ich sagen?* (also set by Schumann), but abandoned the attempt after 31 bars, at some time inscribing the comment 'Zu viel Schumannisch; deshalb nicht vollendet' on the manuscript. His skill in aping Schumann, however, in Heine and Eichendorff poems not set to music by his predecessor was eventually so accurate that he undertook to pass off some of his 'Schumannisch' creations as the genuine article at a recital given by the Austrian Alpine Society, probably in 1882, but the master of ceremonies gave away the hoax in his introduction, and the infuriated Wolf ran off the stage and disappeared.

In the early 1880s Wolf turned from Heine to Eichendorff as a textual source also hallowed by Schumann, although now he knew to avoid Schumann's choices. Going from song to song chronologically (*Nachruf* in 1880, *In der Fremde I* of 1881, *In der Fremde II* and *Wolken, wälderwärts gegangen* of 1883, *Rückkehr* of 1883 and *Die Kleine* of 1887), one can trace the acquisition of greater skill, of harmonic adventurousness under greater control and even more innate response to verbal gesture, although compositional maturity still eludes him. Schumann remains very much an unbanished ghost, as when the succession of single pitches rising from the low bass at the beginning of *Wolken, wälderwärts gegangen* is actually split into two contrapuntal lines – one thinks of Schumann's *Zwielicht* – or when Schumannesque syncopation appears near the end of the same song ('Doch du harrst nicht mehr mit Schmerzen'). However, one can hear the results of Wolf's immersion in Wagner as well when the sad revenant of *Rückkehr* tells of heart and mind afire at the sound of music and the sight of a happy crowd; the Wolfian *verklingend* (dying away) postlude is on display at the end of the latter song as well. Wolf would later complain in Eichendorff's dreamy vagueness and would turn to poets given to greater psychological activity and more vivid images; here, he gropes for musical gestures to suit poetic imagery – drifting 'wandering cloud' quaver figures in the piano part of *Wolken, wälderwärts gegangen*, for example – and yet the music often seems curiously divorced from the text, the composer posing musical challenges for himself rather than plumbing poetic depths. Even where figure is matched to image, the results are not always very inspired: witness the figure at the beginning of *In der Fremde I*, wheel-like but dull, or the neo-Baroque 'walking bass' throughout *In der Fremde II*, which is unimaginable in the later Wolf. He was happiest with Eichendorff either

when the imagery was specific, as in the village music-makers of *Rückkehr*, or when in 1887 he chose a folklike *Rollenlied* entitled *Die Kleine* and dressed it up with quasi-dramatic musical characterization; the lusty *villageoise* maiden longing to be married laments her manless state to affective harmonies in the middle section, then returns to her irrepressibly merry self at the end. But the prosody is unforgivably awkward, filled with misaccentuations; Wolf had not yet secured the harnessing of declamatory principles to melodic imperatives. This song, like most of the Eichendorff songs of the early 1880s, is not one he later considered worthy of publishing.

During these same years of apprenticeship Wolf found material for lieder in yet another Schumann text source, the poet and illustrator Robert Reinick. Of the eight Reinick songs composed in 1882–3, the paired lullabies *Wiegenlied im Sommer* and *Wiegenlied im Winter* (Wolf's pairing or collecting impulse was already at work) are perhaps the most successful, albeit in a style and a manner one does not associate with the mature Wolf. The summer lullaby is a strophic lied *im Volkston* (was it perhaps from Schubert's *Im Frühling* that Wolf learned to devise a continuous faster treble melody in the right hand against a vocal line in even crochets or quavers?), the beautiful vocal melody and gentle chromatic touches within a diatonic framework completely assured, while the winter lullaby alternates another such charming tune with sections depicting a not-really-menacing winter wind whose displacement by springtime beauty is promised at the end. However, the best songs of the period before February 1888, the ones which foreshadow his mature style most clearly, are settings not of such poetic nonentities as Reinick but of Mörike and Mörike's Swabian friend Justinus Kerner (the poet of Schumann's op.35). Wolf's early lieder tend to divide into light, comic pieces and deeply serious songs, as exemplified respectively by the Mörike song *Mausfallen-Sprüchlein* of June 1882 and the Kerner song *Zur Ruh', zur Ruh', ihr müden Glieder* of 1883. Wolf would not be ready for Mörike's more profound poems until six years later, but the rapidly changing poetic metres and line lengths of this magic charm for mousers, its colloquial tone, its vivid poetic persona (a child with a streak of cruelty) and the vivacity of its brief phrases impelled a foretaste of 'Wolf's own howl'. In an entirely serious vein, the Kerner song also bespeaks Wolf's mature manner in the combination, fully achieved, of chromatic part-writing in his characteristic string-quartet-like texture, carefully disposed prosody and close attention to the nuances of the text. But despite these hints of greatness to come Wolf was not yet able to step outside a poem and view it with sufficient objectivity and attention, detached from his own concerns, to produce the best lieder. (It seems only appropriate that he was first able to do so through the agency of Mörike, who sought to veil deeply personal inner concerns from view or to rewrite experience rather than create art in a confessional vein.) By Wolf's own stringent but accurate criteria, only 19 of the 100 or so songs before 1888 were worth publishing in the *Sechs Lieder für Frauenstimme*, *Sechs Gedichte von Scheffel, Mörike, Goethe und Kerner*, and the Eichendorff anthology (seven songs in the latter). Wolf was better able in these early years to test the relationship between literature and music within the larger confines of instrumental works, where the link with words, though still vital, was not a criterion of excellence.

6. Instrumental music and the 'Christnacht' cantata. There is a curious category of chamber compositions by 19th-century composers famous for other genres. Although these works deserve inclusion in the standard repertory, they are infrequently performed, in part because they stand outside their creators' principal claims to fame. Verdi's String Quartet is one such composition; Hugo Wolf's D minor Quartet – a flawed but powerful work – is another. If its lengthy genesis resulted in a certain unevenness by the end, if the closeness and density of the texture (a common propensity of Wolf's in his youth) render details unclear in performance, its many passages of tragic intensity make it well worth knowing. The Scherzo, originally intended as the third movement but later shifted to second place, where it should properly remain, was the first movement to be composed, between 30 December 1878 and 16 January 1879; four days later, on 20 January, Wolf began work on the first movement, but had abandoned it by 7 April, telling his father that 'it did not seem good enough to finish'. He did so, however, and continued onwards: the composition of the slow movement belongs largely to summer 1880, and the undated fourth and final movement was almost certainly composed in 1884, as sketches for it appear with sketches for the 1884 unfinished incidental music to Kleist's play *Prinz Friedrich von Homburg*. Wolf wrote a lengthy statement at the end of this last movement but at some time scraped it off with a knife so thoroughly that his signature is barely decipherable. It seems likely that the work, minus its fourth movement, was performed as an integral composition at a private performance in Natalie Bauer-Lechner's home early in 1881; after its rejection by the Rosé Quartet, it was not performed in public until 3 February 1903, shortly before Wolf's death.

When Wolf began this composition, he had recently contracted syphilis, and his score bears the Faustian motto 'Entbehren sollst du, sollst entbehren'; one could almost declaim those words to the double-dotted *fortissimo* chords at the beginning of the Grave introduction. Nothing in his earlier teenage compositions had given reason to suspect him capable of such intensity at such length, and one can only speculate that the combination of immersion in late Beethoven and awareness of mortality produced such a work. The *Grosse Fuge* was the obvious model for the gigantic leaps, textual extremes, and treatment of dissonance in the introduction, and the spiky counterpoint of the first movement proper, which stretches the sonata principle close to breaking point. The extravagantly sweeping scalar gestures for the first violin in the introduction, the equally dramatic way in which the two violin parts cross paths when the Grave returns, the long crescendos (bars 314–49, for example), all convey a cataclysmic sense of turmoil. The Scherzo recalls the Allegro assai vivace ma serioso of Beethoven's F minor Quartet op.95, and is Beethovenian as well in the plethora of off-beat accents and the contrast between the 'sehr ausdrucksvoll und sangbar' middle section and the forceful dotted rhythms (the movement is marked 'Resolut') on either side of it. The slow movement begins with an obvious reference to Wagner, the hushed, high chords evocative of the beginning of the *Lohengrin* prelude or, perhaps more suggestively, the 'pardon' motif in *Tannhäuser*; for Wolf, to whom erotic transgression and suffering were a reality, the citation seems personal. What follows is not Wagnerian, however, but a continued

transmutation of late Beethoven through youthful Wolf. Such overt Beethovenian influence recurs only in the Mörike song *Der Genesene an die Hoffnung* (in which Wagnerian influence is also apparent), likewise a work charting a spiritual progression through despair to faith and hence to recuperation. But even the expressive cello recitative and the long-breathed cantilena which emerges after the Wagnerian head-motif do not endure for long before extreme tension intrudes in the form of hammering figures which reappear near the end, although the movement ends peacefully. The energetic finale, combining aspects of both sonata and rondo forms, prefigures the manner of the later *Italienische Serenade* in several passages; by 1884 the 24-year-old Wolf was no longer the fraught youth who had begun this quartet, and the finale accurately registers the musical distance he had travelled in the interim.

In Hermann Bahr's reminiscences of Wolf one hears of Bahr and Edmund Lang returning at a disreputable hour to the Trattnerhof rooms they shared with Wolf in 1884, to be met with Wolf's dramatic readings from Kleist's plays; later, Wolf would insist upon prefacing each performance of his songs with a reading of the poem, the words thus separately acknowledged as a vital part of the content. Wolf was obsessed with Kleist, who lived in the age of Goethe but created denizens of a modern world in which identity and consciousness are dubious quantities, and 'truth' resides only in the unconscious. His principal characters are mysterious to themselves and to others; the excess of self wreaks havoc, and everything in the universe is simultaneously its opposite: love = hate and desire for domination, leading to murder. In *Penthesilea* (1807), the title character, the queen of the Amazons, leads her warrior maidens to Troy and wages war on both sides, on men of any nation or kind. Enamoured of Achilles, as he is of her, Penthesilea avenges her subjection to him in love and war when she incites her war-hounds to rip him to pieces and joins them in rending his flesh. Brought back from murderous madness to awareness of what she has done, she wills herself to die, slain from within by the erotic chaos which rages throughout the entire 24 scenes. For Wolf, an excessive personality fascinated with psychological workings, and much preoccupied at the time with the havoc inflicted by love, this was the perfect source for a symphonic tone poem, but if ever a work was a *Schmerzenskind*, this is it. The disaster with Richter was followed by sporadic attempts at revision, including the addition of english horn and percussion parts in 1897, after his confinement in the asylum, and a new eight-page section composed at the same time and depicting Penthesilea's memories of childhood (the pages were destroyed in an air-raid on Berlin). He never heard it again after the 1886 Vienna Philharmonic trial, although he briefly considered having his tone poem performed at a Wagner memorial concert in 1890. It is not surprising that he even thought in his insanity of turning it into the overture to a long-dreamt-of Kleist opera.

Disdainful of post-Beethovenian symphonies, Wolf sought to counter 'the barren soil of absolute music' with a more poetic music which he felt perforce had to break out of symphonic convention in order to create plastic form moulded to literary ideas. This was how Liszt, in Wolf's view, had created such works as *Tasso*, and this was the model he would follow; it was after his meeting with Liszt on 6 April 1883 that he began the initial compositional work on *Penthesilea*. Wolf's ambitions were not small: the characters are of epic scale, and so are their passions, while the play is filled with massive panoramas of ritual and conflict. Wolf sought a musical narration of similar heroic stature, incorporating the extremes of contrast in Kleist's universe. Perhaps in an attempt to outdo his revered model Liszt (despite his ardent praise of this composer he wrote of Liszt's music as 'more intellectual than deeply felt'), he scored his tone poem for a giant and highly colouristic orchestra with, for example, antiphonal trumpets on either side to enclose the listener in sounds of war. The formal structure for the work is a mixture *sui generis* of characterization and quasi-narrative, beginning with two shorter sections entitled 'Departure of the Amazons for Troy' and 'Penthesilea's Dream of the Rose Festival' (a festival of love in which selected Amazons mate with chosen captured heroes). Availing himself of the sort of thematic symbolism evident in Liszt's *Faust-Symphonie*, Wolf fashions the principal themes presented at the start of the first two sections as different manifestations of the same material, the first section in a dark, stormy F minor, the second in the relative major with the rhythmic tensions of the theme's initial appearance as war music banished. One thinks inevitably of Berlioz (like Liszt, another of Wolf's most important early models) and *Les Troyens* upon hearing the march of the Amazons, with much ado for the four horns, four trumpets, three trombones and tuba, in addition to the full complement of wind, strings and percussion. The tone poem thus begins with successive sections depicting Penthesilea's duality before bringing the sides of her nature into musical conflict in the final, and by far the longest, section of the tone poem ('Battles, Passions, Madness, Destruction'), a huge development section of all the themes previously presented, plus new thematic material which grows from the old.

Wolf had carefully considered the structural idiosyncrasies of the symphonic tone poem and demonstrated his theories about its nature in this work. In literary tragedies the climax, or peripeteia, the moment when all becomes clear to the fallen epic protagonist, occurs near the end. Before that moment tension builds as hints of revelation, of disaster, of possible rescue withheld, accumulate until, too late, the full truth appears. Wolf differentiates his 'developmental section' in *Penthesilea* from that of a purely symphonic work by presenting only fragments and shifting shapes of the section's main theme (Penthesilea's fury and madness) until bar 832, where it unfurls to full length and fury. Before that point Wolf brings back the love-dream at bar 520 and develops it in contention with the motifs of warlike hatred until a quasi-recapitulatory arrival at the battle music from the beginning of the entire work culminates in tutti sound-and-fury at bar 832. As the unarmed Penthesilea is dying, Wolf had his chance to compose a Liebestod and took it, including a final transformation of the love theme from minor to major mode before the work ends in darkness. Without knowing Kleist's play, it is difficult to discern the rationale for this particular formal structure, inventively cut to fit Kleist's ideas as well as condensed narrative, and this helps to explain why *Penthesilea* has never entered the standard repertory despite its brilliance. The orchestration later struck Wolf as needing revision; the first editors of the work thought so as well and made massive inexcusable cuts in the initial edition, including the entire section in

which permutations of the Rose-Festival theme do battle with the emerging motifs of madness. A unique formal structure was thereby turned into gibberish, but the composer's full text has since been restored.

From one Kleist play to another: Wolf spent much of the summer of 1884 working on incidental music to *Prinz Friedrich von Homburg*, but very little remains (16 bars of the introduction for yet another immense orchestra, 35 bars of orchestral accompaniment to a Hamlet-like soliloquy in Act 4, and a fragment in full score of the *Trauermusik* at the end of Act 2). Wolf played the funeral march in its entirety for Eckstein, who admired it, but the extant bits and pieces are too brief for meaningful evaluation of their significance. In 1889 he did complete, at Eckstein's urging, what was to be his answer to Bach's *Christmas Oratorio*: the cantata *Christnacht* to a text by August Graf von Platen-Hallermünde, yet another early 19th-century source for this composer rooted poetically in the Biedermeier era. (He told Paul Müller near the end of his creative life that he planned to set his contemporary Nietzsche's poem *An den Mistral* for chorus and orchestra, but the plan came to nought.) The first sketches for the work are dated Christmas Eve 1886, appropriately enough for a work about the Incarnation whose musical inception is a southern Styrian Christmas carol that Wolf himself had sung in his boyhood. In a letter to Oskar Grohe (26 February 1891), Wolf wrote that he had conceived the composition as a portrait of Christ's personality in two manifestations, the child and the 'Weltüberwinders', or hero who overcame the world. At the end, these themes and other musical ideas merge and unfold 'with tongues of flame the dogma of God made man and of salvation', he told Grohe, adding that if the execution did not keep pace with the concept it was 'nobody's fault but my own'. The last phrase is perhaps revelatory of an underlying if unadmitted suspicion that the music did not fully live up to his stated aims for it, and not solely because of the overloaded orchestration. The tutelary deities presiding over this piece were clearly Liszt in his ecclesiastical guise – similar contrasts of purified naivety and heroic sublimity appear in some of his religious works – and Wagner. Wolf calls for two soloists (a soprano Angel of the Annunciation and a shepherd with a smaller role), four- to eight-part mixed chorus and a large orchestra. *Christnacht* has much to commend it and many admirable effects in the lengthy orchestral introduction alone: the delicate use of the high wind instruments at the start to evoke shepherds' flutes, the antiphonal brass and wind ceremonial fanfares, the frequent and skilful use of the mediant modulations that would become a hallmark of his tonal language, the beautifully scored passage for wind and high strings preceding the angel's first solo, belying the notion that Wolf could not orchestrate. One can hear in the angel's solo passages Wolf on the way to blending declamation with pure melody successfully, even in the lilting 6/8 metre of some passages, and an exquisitely atmospheric orchestral passage in bars 296–309 leads to a funereal premonition of future terror ('I hear people striding – they breathe doom', the angel proclaims). But Wolf being neo-Bachian/Lisztian in huge brass-laden choruses is Wolf being bombastic, especially in the chorus of believers (Platen indicates shepherds here, but this was insufficiently solemn for his purposes, so Wolf told Grohe, hence their new designation as 'Gläubigen') and the final chorus, and the work is in consequence not an unmitigated success.

No such pomposity mars Wolf's next two instrumental works, the Intermezzo in E♭ for string quartet and the Serenade in G (in a letter of 2 April 1892, Wolf calls it 'an Italian Serenade', a title later reserved for the orchestral second version of the piece). Wolf sketched the Intermezzo's main theme on 3 June 1882, with further undated sketches following no later than the second half of 1884, then abandoned the work until the summer of 1886. Wolf referred to it as a 'Humoristisches Intermezzo' in a letter to Grohe of 16 April 1890, and this has led some to posit an unknown programme, possibly based upon Mörike whose delightful humorous poems Wolf would have discovered by that time. Certainly the grace-noted figures in the cello at bars 22–6 seem a premonition of *Rat einer Alten*, and other effects (bars 111–26) foreshadow Mörike's elfin creatures, but Wolf never specified a literary source of any kind. The Intermezzo is fashioned as a rondo whose main theme comes back twice in the tonic key (from bar 235 in the second violin and viola, from bar 431 in the viola alone, each occurrence with new counterpoints). In between Wolf derives the intervening episodes from the 16-bar main theme with a rigour that is Beethovenian and a lightness of touch, a verve, that are his own. The Serenade in its original string quartet version was composed between 2 and 4 May 1887 during a period when Wolf was preoccupied with Eichendorff settings (7 March – 24 May) and seems thematically related to one of them (by family resemblance, not quotation): *Der Soldat I* of 7 March. In this lighthearted *Rollenlied*, a soldier clip-clopping along on his horse invokes a sweetheart at the nearby castle; she is not, he confides, the prettiest girl in the world, but she pleases him best – until she speaks of wooing ('Freien'), at which he hastily decides to remain free ('bleibe im Freien') and rides away. Eric Sams has postulated a connection between the Serenade and Eichendorff's novella *Aus dem Leben eines Taugenichts*, in whom Wolf might have seen a charmed, and charming, version of himself. Its protagonist is a young musician who leaves his country home and his grumbling father for various adventures, including several at a castle in Italy where a serenade played by a small orchestra is a central plot mechanism and thus a possible link between *Der Soldat I*, with its castle and serenading adventurer, the novella and the instrumental Serenade. As in his Eichendorff song *Das Ständchen*, composed in September 1888, Wolf begins the Serenade with some preliminary strummings on open 5ths and repeated single pitches (to test tuning), in mimicry of musicians preparing themselves before the piece really starts, but the wistful song is in a very different mood from the earlier instrumental work. With this composition Wolf created the first in a series of comic serenades, where love and laughter mingle, the laughter suffused with irony and love's language and rituals gently caricatured. We are told at the outset that this is a humorous affair when eight bars of preliminary strumming on the tonic, G major, culminate in 'wrong-note' repeated E♭ pitches – isolated for maximum comic effect – and a *forte* dominant 7th of E♭, upon which the inner strings slyly (pizzicato) restore the proper cadential chords; what follows is further entertainment.

As in the Intermezzo, Wolf resorts to rondo form, but rondo modified by a quasi-dramatic conception in which

the instruments seem like *dramatis personae* in a comedy of love. The initial section can be heard fancifully as the lover several times readying himself for a declaration, the syncopations and trills of the preparatory gestures leading to more preparation until at last (bar 130) the change of metre to 6/8 ushers in a passionate outburst. The main theme returns, with new and florid countermelodies in the second violin, followed in turn by a dialogue between the cello in fiery recitative passages and the other instruments responding, at first mockingly and then, as if in acquiescence, with the cello's first figure. After further dancelike strains, the rondo recurs, and the work closes as it began, with the soft strumming and twanging of mock guitars. Everything about the music suggests characterization and scene-painting, including the clear sense of dialogue or colloquy between the instruments, the symbolic invocation of speech in the cello recitative, the gestural liveliness of the sweeping violin flourishes and the predominance of the first violin (the object of the cello's affections?); one thinks of the 'Taugenichts' in chapter 8 of Eichendorff's novella, with garden arias in the moonlight, to the accompaniment of guitars' light laughter. The scene, if such was Wolf's intent, is the instrumental concomitant to the kind of opera Wolf then wanted most to write, a comedy of love with amorous sighs, moonlit nights, guitars and champagne banquets (see the letter to Grohe, 28 June 1890), and the putative link to his operatic ambitions may explain Wolf's ten-year preoccupation with arrangements and developments of his *Italienische Serenade*. Virtually everyone, however, is in agreement regarding the superiority of the original string quartet version over the 1892 arrangement for string orchestra (he also thought of adding second and third movements to the work but never did so); the fleetness of foot that is so crucial to the work is muddied or lost in the transference to larger instrumental forces. Once again, the smaller-scale conception is the finer.

The composition of works as skilful and delightful as the Intermezzo and Serenade brought Wolf at last to the point of mastery. It was at this juncture and surely for this reason that Wolf threw over his detested duties as a critic and readied himself for the marvel that was 1888.

7. MATURE SONGS. For the nine scant years, punctuated by long silences, of Wolf's maturity as a composer, his songs display an idiosyncratic merger of traditional and novel elements, both noted by the critics. Comparisons with Schubert and Schumann in his own day abound, and with reason; he remained true to the established dimensions of the earlier 19th-century lied, indeed conservatively so – there is, for example, nothing comparable to the immensity and formal radicality of Schubert's *Im Walde* D708. Wolf was acutely conscious of his heritage: 'They fairly threaten me with Schubert', he is reported to have said, 'but must I keep silent because a great man lived before me and wrote wonderful songs?' Wolf's taste in poetry is another indication of his conservative bent, as he generally preferred the textual choices of an earlier generation – anonymous folk poetry translated into German, *Vormärz* poets, Goethe – and savagely excoriated contemporary poets as bunglers. The Biedermeier poet Mörike (1804–75) could not have been more perfect for his purposes in 1888: Wolf, who prided himself on his ability to create different characterizations in music, was drawn to the Protean variety in Mörike's output (poems about love, about nature, *Rollenlieder* or 'role' poems about genre characters, religious subjects, comedy, erotic poems, songs of fantastic-supernatural creatures, ballads and more). Moreover, Mörike had not been appropriated by Wolf's great songwriting predecessors in the way that Schumann, for example, is forever linked with Heine. Schumann did set nine poems by Mörike to music, but they are not among this composer's greatest songs, nor would the earlier settings by Robert Franz and others have constituted a powerful model for Wolf. The psychological depths of this verse, and its avoidance of overt subjectivity, were other attractions of a poet Wolf could claim as his own in a manner that liberated his creative imagination.

Beset by the ghosts of Wagner, Schubert and Schumann, Wolf was both eager to assert the novelty of his enterprise and at the same time to point out his place in a continuum based on tradition (he continued, for instance, the ballad-writing art of Carl Loewe, whom he admired). The Wolf myth has subsequently stressed difference, insisting upon his extraordinary attention to poets and poetry, his scrupulous prosody, the post-Wagnerian flexibility of his vocal declamation and his bold harmonic language; but the truth of the matter is more complex. His predecessors and peers were hardly unconcerned about these aspects – even Brahms, whom Wolf excoriated for his supposed 'yodelling' melodies, reliance on folksong and poor declamation. But Wolf, too, sacrificed correct declamation to musical imperatives, as in the Mörike song *Der Gärtner*, where the gentle *Schwung* of the 6/8 rhythmic patterns in the vocal line distorts the prosody – a compositional choice designed to enhance the fairy tale eroticism of the poem. His justly famous declamatory vocal style is often a second-stage adjustment or the result of emendations in page proof to what were initially more conventionally conceived melodic lines, the result an idiosyncratic mixture of symmetrical phrase construction and Wagner-influenced declamation. For example, in the Goethe song *Blumengruss* one hears two-bar phrases given a declamatory cast, especially at the beginnings, until the final two phrases, which are cast in more customary lyric-melodic terms (the influence of Schubert's Goethe song *Geheimes* is audible as well). Wolf unquestionably venerated the great poets Eichendorff, Heine, Goethe and Mörike (as had other composers before him), but approximately half of his mature songs are settings of anonymous folk poetry of dubious literary value, even in Geibel's and Heyse's expert translations, and his practice of taking a back seat to the poet on the title-pages of his Mörike, Goethe and Eichendorff songbooks (*Gedichte von Eichendorff in Musik gesetzt von Hugo Wolf*) has precedents in Schumann. He even used inauthentic texts, probably lifting his incorrect version of Mörike's *Das verlassene Mägdlein* from Schumann, whose setting he admired, rather than the fourth edition of Mörike's anthology (he used 'schwinden' rather than the poet's 'verschwinden' in line 2, 'drein' rather than 'darein' in line 7). Wolf inveighed against textual repetitions for the distortion thus imposed on poetry, but he excised one entire verse of *Geh', Geliebter, geh' jetzt* (a praiseworthy editorial emendation) and repeated words, phrases, and whole strophes on occasion. He repeats the last line of *Du denkst mit einem Fädchen* to delicious comic effect, and he was evidently unwilling to end *Benedeit die sel'ge Mutter* with the all-too-premonitory words 'Ach, der Wahnsinn fasst mich an!' in the tonic minor, made more

unstable by chromatic sequences; therefore, he repeated the entire first stanza, thus creating a classically balanced *ABA* form (Schubert does likewise with Müller's *Mein!*). He was prone to add pictorial or programmatic elements to his chosen poems, and those additions are not always congruent with the poet's purposes – the poetic persona of Mörike's *Auf ein altes Bild* falls silent at the thought of Christ's future agony on the Cross (the unspecified painting is of the infant Jesus) – but Wolf adds a piano postlude decipherable in programme music terms only as a depiction of the Passion, with the moment of death being the 19th century's favourite 'horror harmony', the diminished 7th. The song is furthermore filled with hints of modality (' ... ein *altes* Bild') and with Picardy 3rd cadential resolutions which foreshadow redemption well before the final major mode chord of the postlude. His separation of piano and voice into different musical personae, deliberately disjunct (the nocturnal serenader of the Italian song *Mein Liebster singt am Haus* plays a passionate Chopinesque mazurka in the piano while the object of his affections laments in the vocal line that she must lie in bed and merely listen), is familiar from Schumann and so is the prominence of the piano's role. If Wolf's piano parts are occasionally virtuoso in their demands (*Er ist's*, *Der Feuerreiter*, *Der Rattenfänger*), composers such as Schubert (*Der Erlkönig*) and Mendelssohn (*Andres Maienlied*) had preceded him in this regard; it was no novelty to fling the gauntlet of technical difficulty at the pianist or singer. Despite Wolf's stated belief that certain poems had to await a post-Wagnerian tonal language before they could be adequately rendered into music, he also insisted to Kauffmann in a letter of 21 May 1890 that even his boldest harmonies were explicable within the framework of known theoretical practice, and one can certainly cite remarkably complex chromatic progressions in the songs of Schubert (*Die Gebüsche*), Schumann (*Stille Tränen*) and Brahms (*An eine Äolsharfe*).

But Wolf was innovative in the degree to which he took certain chosen aspects of song composition, however traditional, and in his approach to organizing a song anthology. In the harmonic and tonal realms, he was a master of ambiguity created in numerous ways, such as his use of a dual focus on two tonal areas at once and his frequent recourse to harmonic substitution of chords that act in place of those expected in conventional functional progressions, especially plagal substitutions (*Harfenspieler I*). Given the 19th-century fascination with the possibilities of new 3rd relationships, Wolf was prone to key schemes built as chains of 3rds, sometimes within a tonic–dominant axis and sometimes not (*Die ihr schwebet um diese Palmen*, *Und steht Ihr früh*, *Gesegnet sei das Grün*); although Wolf's usage is ordinarily conservative, he does on occasion explore the harmonic ambiguity inherent in certain 3rd relations to create a highly complicated tonal language (*In dem Schatten meiner Locken*). If Schubert set a precedent for progressive tonality in song (*Auf der Donau*, *Ganymed*), Wolf moved even further beyond the bounds of traditional tonal schemes in such songs as *Lebe wohl*, *Der Mond hat eine schwere Klag' erhoben* and *Mir ward gesagt, du reisest in die Ferne*. As with Schubert, however, most of Wolf's songs begin and end in the same key. Of crucial importance is the fact that Wolf's explorations of extended tonality were harnessed to explorations of poetic content, as when the conflict between two tonal centres and their resolution into one tonality make audible the conflict between two lovers that is resolved by angelic intervention in *Wir haben beide lange Zeit geschwiegen*. Words seemed to have been vitally necessary to awaken musical inspiration for Wolf, especially in the first years of his maturity, and the bond between musical gesture and poetic idea (his reading of the poetic idea, sometimes at odds with the poet's) is remarkably close. Wolf once told a teacher in Stuttgart that the second half of the *Italienisches Liederbuch* contained more absolute music than the first, a claim perhaps justifiable in a few songs, such as *Wohl kenn' ich Euren Stand*, but poetic content prompted compositional decisions here no less than in more obviously pictorial songs. Wolf's reluctance to set poems he felt had already been successfully composed by someone else (he made an exception in the case of *Das verlassene Mägdlein*) originates from an implied view of song composition as a kind of translation, with only one 'ideal' realization possible, rather than an idiosyncratic personal commentary on the poem. Despite Wolf's espousal of this aesthetic (peculiar to him), his own views, opinions and values are often evident from within the music. To cite only two examples, when the Muse dictates poetic drivel in Mörike's *Warnung* and Wolf sets the nonsense rhymes as a parodistic mockery of Beethoven's Ninth, one hears Wolf's scorn of Brahms's Beethovenian symphonic aspirations, and there is perhaps a reminiscence of Wolf's years of giving piano lessons in the brief, pungent citation from Beethoven's *Für Elise* in *Schweig einmal still*, with its irritated woman singer forced to endure a comically inept serenade in the piano. For all the avowed, and sincere, allegiance to poetry, poetic humour always becomes musical humour, and poetic anguish becomes musical commentary on Wolf's own historical situation.

Another of Wolf's most important innovations – the way in which he ordered the content of his large lieder volumes – possibly had its origins in defensiveness, a strategy to counter the era's denigration of his foremost genre. To be a *Lieder-Komponist* was to be a second-class citizen throughout the 19th century. The critic who dubbed Schubert 'an indefatigable song composer' was thereby conveying his condescension for those who composed miniature works; only success in opera and symphonic music could garner the full measure of attention and respect in the musical world, and it was to those forms that Schubert turned when he began consciously to challenge Beethoven's hegemony. 50 years later, the same attitude still held sway, and Wolf subscribed to it, all the more so as his early idols Wagner and Liszt pushed him in that direction. Over and over in his letters, he worried about being merely a song composer. 'For the moment they [his compositions] are admittedly only songs', he told Strasser on 28 March 1888 even as his true vocation was at last under way, and one week after the Mörike miracle began, he spent part of the day (22 February) improvising a comic opera at the piano. He thought of his Spanish songs as paving the way for opera, as preparation for a kind of composition which meant more to him, and he cried out to Grohe in a letter of 1 June 1891 that he could not 'possibly continue for 30 years more to write songs or music to Ibsen's plays', this in the midst of a jeremiad about the lack of an opera text. A few months later, in a letter of 12 October 1891, Kauffmann received an even more desperate outcry: 'Truly I shudder at my songs. The flattering acknowledgement

of me as a "song composer" distresses me to my innermost soul. What else can it mean but a reproach that I continue to compose only songs, that I only rule over a miniature genre and even that not completely, since there is in the songs only the predisposition for dramatic works … God help me!' If syphilis was the principal cause of his eventual insanity, opera too drove him mad.

It is surely for this reason – the obsession with larger forms – that Wolf organized each of his mature songbooks into an ordered, even dramatic, succession as a way of suggesting to singers that they could cull entire recitals from these collections and would find therein all the contrasts necessary to make a programme interesting for the audience. Hanslick in a dyspeptic mood had said that 'Wolf composes not songs but entire poets', and in a sense he was right. Wolf's concern with grouping songs into larger collectives begins at the smaller level with paired songs and then extends into thematic groupings throughout a whole volume. (It is noteworthy that Schubert used lengthy cycles to create song compositions that would challenge opera and symphony in size and scope, whereas Wolf avoided, or perhaps did not find, such texts, resorting to the format of an ordered anthology instead.) In addition to the pairing of Mörike songs nos.2 and 3 already mentioned, nos.20–21 (*Auf eine Christblume I* and *II*) and nos.33–4 (*Peregrina I* and *II*) are paired, the latter via a pianistic 'corridor' by which the postlude of the first song becomes the introduction of the second. (Mörike wrote a cycle of five Peregrina poems, but Wolf implied in an 1890 letter to Melanie during his tour of Swabia, or 'Mörike country' as he called it, that he had not set three of the poems because he did not understand the anguished biographical backdrop.) He had precedents both for linking poems the poet had kept separate – Schumann did so as well – and for pairing songs musically, as Schubert had done in his Müller cycles, and he perhaps took other organizational cues from them as well. For example, Wolf begins the Mörike volume with a dedicatory encomium to hope and ends with a farewell (*Abschied*) in a manner reminiscent of Schumann's *Widmung* and *Zum Schluss* at the start and close of his *Myrthen* cycle; in between these framing songs for the Mörike volume, one finds thematic groupings of songs with religious content (nos.20–28, at the centre of the volume), songs of love in different guises (nos.30–36), songs about fantasy worlds and supernatural creatures (nos.44–7), and a final section of comic songs (nos.48–53). Within each of these groups is a diversity of sizes, shapes, moods and musical procedures, as in the contrast between the small mock-funeral dirge of *Bei einer Trauung* and the extravagant ballads such as *Storchenbotschaft* in the comic songs. The same concern with an all-embracing conceptual design characterizes the other songbooks as well: the Eichendorff volume contains groups of night songs and *Rollenlieder* while the Goethe volume begins with the Mignon and Harper songs – a gesture of defiance in the face of Schubert's and Schumann's settings – and ends with a group of Hatem and Suleika songs from Goethe's *West-östlicher Divan* (1819). The Spanish songbook, like its textual source, is divided into spiritual songs at the beginning and secular songs thereafter (Wolf chose ten of the 12 'geistliche Lieder' and 34 'weltliche Lieder'). Those two larger groupings are further subdivided; for example, the spiritual songs begin with dedicatory songs to the Virgin (nos.1–2), which lead to songs tracing the Nativity and Christ's infancy (nos.3–6), songs of the penitent Magdalen (no.7) and the penitent Christian soul (no.8), and two Crucifixion songs (nos.9–10), while the songbook ends with the magnificent lover's farewell (*Geh', Geliebter, geh' jetzt*) as the farewell to the volume. The 46 songs of the Italian songbook alternate between works in a male and a female poetic voice (a few could be assigned to either gender) and trace a psychologically and dramatically acute narrative of love, courtship, quarrels, reconciliations, mockery and parting: there is no happy ending here. Wolf originally intended his Michelangelo songs of 1897 to be a portrait of the artist, but *Manuel Venegas* and insanity intervened to put a halt to that design.

There is also ample evidence within individual songs of dramatic conception, albeit on a small scale. Wolf gives the merry serenader of *Ein Ständchen Euch zu bringen* (*Italienisches Liederbuch*, no.22) an initial full bar of silence in which to assume his wooing posture and prepare to strike the first mandolin or guitar chords; when the young man realizes in line 2 that he is serenading not the maiden but her father, his shock is registered in a radical harmonic swerve, while his sangfroid is evident when he does not miss a beat but continues strumming his pianistic guitar. (Wolf had reason to be particularly proud of his comic songs and told Melanie in 1896 that 'humour had entered the realm of song for the first time' in his works. He was exaggerating, but he did reinvent the comic lied for the world after Bayreuth.) Wolf once stated that he imagined a *mise-en-scène* for each of his songs, such as the goddess Weyla of Mörike's island fantasy world Orplid sitting on a reef in the moonlight, playing her harp in *Gesang Weylas*, or a chorus of wise men joining in the refrain of *Cophtisches Lied I*. Numerous other songs attest to his propensity for *tableaux vivants* in song. For these *tableaux*, Wolf took pains to complete the scenario in the piano: when the protagonist of the Mörike song *In der Frühe*, who has spent a sleepless and tortured night, bids the soul rejoice because 'morning bells have already awakened', Wolf lulls the persona peacefully to sleep in the postlude, while the protagonist of *Abschied* dances a rambunctious waltz at the end, after kicking a critic down the stairs. Wolf's fondness for creating a piano part representing one character in a mini-drama while the singer takes another role is also evidence of his hunger for drama in music; one thinks of the Eichendorff song *Das Ständchen*, which begins with a pianist-serenader tuning his mandolin before launching into a serenade, while the elderly man who inhabits the vocal part remembers his bygone days of serenading a beloved woman, now dead. As he muses, he takes the serenader's simpler strains unto himself and renders them richer and more complex until at the end he relinquishes the music of love and life to the younger man in the piano part, the song reverting at the end to the more uncomplicatedly lyrical music of youthful love. Such psychological shadings of musical characterization are typical of this composer. Even Wolf's liking for 'dying away' piano postludes is part of his intent to turn song into compressed opera, as when the piano introduction to *Der Rattenfänger*, beginning with sounds illustrative of a whip cracking (not in Goethe's poem, however), is more than doubled in length for a postlude depicting the near-diabolical Pied Piper of Hamelin vanishing into the distance. Wolf also uses root position triads in unusual juxtapositions and progressions in order to suggest the elemental power of the legendary creature (a lighter, more

piquant manifestation of the same use of root position triads for supernatural creatures can be found in *Nixe Binsefuss*). Music does everything: paints the *mise-en-scène*, conveys the psychological inner workings of the characters, provides the chorus, orchestra and dancers, traces conflict and resolution through plot and subplot and rounds off the final scene as the curtain comes down.

Wolf's comment to Mayer about his pride in achieving a more abstract figuration in the later songs for the *Italienisches Liederbuch* reflects in part the premium placed upon 'absolute music' (especially in a Vienna where Hanslick held sway), although it also tells of Wolf's recognition that he was no longer quite so dependent upon poetry to awaken musical ideas. The defensive subtext of the remark comes from awareness that his pictorializing gifts were, like the genre of song itself, considered second-best in comparison with abstract instrumental music without any programmatic 'taint'. Wolf had a genius for vivid, varied musical analogues to sights and sounds of the external world evoked in his chosen poems, and there were those in Wolf's day and later who disdained onomatopoeia in music, despite the fact that his pictorialisms are always subsumed into a structure explicable in purely musical terms. It is a pity that he should have felt any shame, however veiled or momentary, for such a brilliant aspect of his compositional art as the buzzing bee of *Der Knabe und das Immlein*, the carillon of bells in *Zum neuen Jahr* and *St Nepomuks Vorabend*, the combination of trilling birds and deep muted bell chimes in *Karwoche*, the tumultuous winds gusting throughout the *Lied vom Winde*, the donkey's braying in *Schweig einmal still* and *Lied des transferierten Zettel*, and clip-clopping horses' hooves in *Der Gärtner* and part of *Denk' es, o Seele!* Wolf also mimics human beings making unmusical sounds: yawning in *Der Schäfer* (here Wolf may have taken his cue from *Im Dorfe* in Schubert's *Winterreise*), both yawning and groaning in *Der Tambour*, panting desire in *Nimmersatte Liebe*, and an attack of tipsy hiccups in *Zur Warnung*. More rarefied specimens of extra-musical evocation include the delicately 'dissonant' striking sounds of a pounding headache in *Köpfchen, Köpfchen, nicht gewimmert*, dissonances which finally resolve to euphony when the charm against headache works its magic, or the spoiled only child flagellating himself in *Selbstgeständnis* (another instance in which Wolf adds something to the poetic scenario not sanctioned by the poet), where the whip-cracking forms a comic counterpart to the Pied Piper's whips in *Der Rattenfänger*. Wolf was also drawn to pianistic depictions of other musical instruments, as in the echoes of janissary music in *Epiphanias*, the broken-chord and arpeggiated harp playing in *An eine Äolsharfe* and *Gesang Weylas*, the inept violinist of *Wie lange schon war immer mein Verlangen* who slaughters a graceful salon tune in the postlude (for one performance of the last-named song, Grohe recruited an actual violinist, and Wolf was amused to hear of it), the evocations of military march music in *Sie blasen zum Abmarsch*, *Ihr jungen Leute* and *Der Tambour*, and various guitar-strumming effects in the secular songs from the *Spanisches Liederbuch* (*Sagt, seid Ihr es, feiner Herr* and *Bitt' ihn, o Mutter*). Extra-musical scene-painting was expected in ballads and surely constituted an element of Wolf's attraction to this genre (which was undergoing a nationalistically inspired revival in Wolf's day), as shown in the shrilling bells and gallimaufry of the crowd in *Der Feuerreiter* or the storks clapping their wings in *Storchenbotschaft*, but Wolf delighted in onomatopoeia for non-narrative lieder as well. Much of this stylized depiction was couched in the piano part, often formidably difficult as a result.

Wolf's writing for the voice varies from outright lyrical melody, or song style in symmetrical phrases without declamatory elements (the use of this conservative melodic manner in *Der Gärtner* is Wolf's way of signalling the 'pastness' of the fairy tale text and the perfect order of its fantasy world), to the declamatory style evident in *Ach, wie lang die Seele schlummert!* or at the beginning of *Beherzigung*, with its declamation on repeated pitches and its recitative-like gestures. Wolf did not begin with declamatory principles as his given *modus operandi*; on the contrary, he evolved a flexible melodic manner shaped by the application of declamatory gestures to an original lyric inspiration, and one can see the more conventional melodic shapes in the early songs. (According to an anecdote from Eckstein's reminiscences, Wolf had closely studied Schumann's song declamation and praised it to his friends.) In the mature works, the rise and fall of the melodic line, its rhythmic profile and its mixture of declamatory and lyrical elements (often a compromise between the two) often seem to arise directly from Wolf's interpretation of the poem; for example the sage's series of questions at the start of *Beherzigung* are rhetorical – he already knows the answer – and hence Wolf ends each query with a falling, not a rising, inflection, and then states the answer in the last stanza as a series of march-like equal crochets, certainty (with an ironic seasoning of pomposity) writ large in the rhythmic ordering of the vocal line. Against the slow, regular chorale-like chords in the piano of *Schlafendes Jesuskind*, Wolf softens the vocal line by beginning every phrase just after the strong first beat, surely in order to enhance the profoundly meditative atmosphere of the poem, and accounts for Mörike's wonderfully changeable poetico-rhythmic gestures by means of the occasional interpolated triplet figure. The epitome of Wolf's vocal writing can be found in such melodic lines as that for the words 'welche Bilder hinter dieser Stirne, diesen schwarzen Wimpern' from the same song, where wonderment is signalled in the slight prolongation of 'wel-che' and where the composer winds sinuously through the bar-line so that the words 'Stir-ne' and 'Wim-pern' on the second beat in 4/2 metre (this ekphrastic poem was inspired by a 16th-century painting, and Wolf accordingly uses a metre which looks antique on the page) are the melodic goals of a chromatic sequence. It is from just such interplay between purely melodic and harmonic concerns, phrase construction, overall poetic interpretation and inflections of poetic detail that Wolf's declamatory art was created.

The importance of radical tonal manoeuvres and complex harmonic manipulations to Wolf's poetico-musical art cannot be too strongly emphasized. It was central to this composer's appropriation of poetry that an emotion, an idea, an image in the poem is given harmonic flesh and bones, sometimes with breathtaking audacity, although he rightly insisted upon the traditional compositional framework from which his boldest harmonies emerged. For example, Mörike, unable to believe the religious dogmas of his breadwinning profession as a pastor, wrote a German paraphrase of a Latin hymn verse about the inability to believe, despite the desire to do so

(*Seufzer*), and Wolf set it to music whose saturated chromaticism shows that he had assimilated the furthermost limits of *Parsifal* and turned them to his own devices. From the start one wonders 'What hell is this? Where are we tonally?' Wolf begins with motion towards the tonic, as if this were the goal of the poetic persona's desire, but the tonic is immediately denied and remains in abeyance thereafter, the chromatic alterations producing a shifting world with no solid ground. And yet the music is rigidly organized in its part-writing, motivic patterns and tonal substitutions: anguish has its own structure. Soprano–bass dissonances are everywhere; deceptive motion is regnant (almost to achieve 'resolution' and rootedness, then to have it snatched away, is Wolf's sounding analogue for extreme misery); and the ultimate and only tonic cadence – a 'tonic' called into doubt – at the end is weakened by its approach through the Phrygian flat 2nd, nor is there any Picardy 3rd at the end to hint at surcease or redemption. It is often characteristic of Wolf to delay the arrival at the tonic, and he does so here in an especially exaggerated way in order to make audible a claustrophobic hell of the soul. (The poetic persona's enclosure in a torment only partially expressible is something Wolf also conveys by framing the texted body of the song in lengthy piano passages to suggest wordless mental anguish before words are possible, an eight-bar introduction and seven-bar postlude framing a mere 16 bars of word-setting. Those 16 bars are, moreover, almost continuous, despite a few rests in the vocal line, and the slow non-stop motion of the text adds to the impression of airless psychological pain beyond bearing.) In perhaps the most famous Mörike song, *Das verlassene Mägdlein*, the muddled mind of a pain-stricken woman caught between waking and sleeping is translated harmonically into dissonance and functional ambiguity: is the F–A–C–E chord in bar 9 an embellished tonic following the dominant harmony in bar 8 or a submediant chord with its own embellishing seventh degree? Not until the singer resolves F to E in the final words 'O ging er wieder', the resolution then echoed in the piano, do we hear a solution to the dilemma in the first and only unambiguous tonic harmony. In the great Goethe song *Grenzen der Menschheit*, the endless chain of being invoked by the poet gapes open musically in a succession of augmented triads carried beyond the norms of late 19th-century practice; in Wolf's reading of Goethe, the 'unendliche Kette' evokes more fear than piety, and both the open-endedness of time and the tension aroused by fear at its contemplation find expression in this way. One could cite dozens of similar examples throughout Wolf's works in which poetic ideas gave rise to specific, complex harmonic and tonal ideas.

In matters of song form as well, Wolf exercised dazzling ingenuity. He was not one of those later 19th-century composers who adhered to the tradition of the strict strophic form for lieder. Schubert, closer to the 18th century, composed many such songs, Schumann somewhat fewer, and Wolf almost none. He was interested in folk music, but his lied aesthetic was not for the *Lied im Volkston*. Although he often uses other traditional formal song structures, he varies them, adapting them to poetic and musical purposes unique to that one setting. *Ein Stündlein wohl vor Tag*, for example, is a varied strophic form, with each of Mörike's three verses set as a discrete section, the second verse a near-exact transposition of the first; but the song is quite radical, and possibly unique, in its transposition of the second and third verses upwards by a semitone each time. In a wonderfully imaginative musical structure for *Nixe Binsefuss*, Wolf devised an inexact palindrome form, a ringlike *ABCBA* succession (the repetitions are not literal) which serves to underscore the nixie's supernatural powers (the ring being a symbol of eternity) and bears no resemblance to the poetic structure. Even where musical strophes are repeated literally or almost literally to different words, the form is nonetheless both unusual and tailored to the poetic content, as when Wolf draws an exact musical parallel between Christ's agony on the Cross (Mörike's stanza 2) and the protagonist's shamed awareness of lust, of an 'evil pleasure' piety cannot tame (stanza 4), in *Wo find' ich Trost?*; the Parsifalian echoes in this depiction of sexual shame fraught with mystical religiosity are remarkable. In his setting of Goethe's late (1820) poem *St Nepomuks Vorabend*, the contours of three-part song form, matching the poet's three quatrains, are subtly blurred, the middle section a further development of the same bellringing motifs which sound throughout the song, while the vocal part is extensively varied in the return of the *A* section. Much the same flexible handling of three-part form as a continuous development and recollection of the same material is evident in *Anakreons Grab* (a single six-line stanza, with two lines of verse to each division of the musical form) as well. Wolf also fashions three-part forms across and through very dissimilar poetic structures for reasons of content and imagery. For example, Mörike was a poet obsessed with time, memory and the past, and this perhaps inspired Wolf to set *Im Frühling* as a large three-part form, the words 'Ich denke dies und denke das' read by the composer as memory (the same is true of *Peregrina II*, where Wolf implies that the protagonist and his ghostly companion are mutely remembering the past at the words 'Fremd sassen wir' by bringing back the beginning of the song). The formal structure of *Erstes Liebeslied eines Mädchens* 'legt sich im Ring': this song is remarkable for the manner, typical of Wolf, in which poetic images generate form. The poetic speaker is a woman in the throes of first sexual experience, with the piano acting as her lover; Wolf sets the song as a frenetic, unlyrical waltz – a dance considered scandalous in the late 18th century and the 19th because of the close contact between dancers – in which three figures (a plunging motif, a panting syncopated figure and a rising motif) alternate in various transpositions but are otherwise remarkably unchanged (one hears similar panting figuration at the beginning of *Geh', Geliebter, geh' jetzt*). Wolf cited *Erstes Liebeslied* in a letter to Emil Kauffmann (5 June 1890) as a perfect specimen of the 'truth to the point of cruelty' ('Wahrheit bis zur Grausamkeit') he sought in art, and the formal structure he created in his setting is a witty concomitant to an aperçu about sex in Freud's Vienna.

Wolf later spoke of seeing 'Wölfer's own howl' in his early songs, and that 'howl' is compounded in part of certain recurrent and consistent musical usages, despite his concern for individual poetic reading. For example, the concepts of littleness, or littleness and mockery combined, resulted on several occasions in motifs filled with harmonic seconds, as in *Mögen alle bösen Zungen*, *Elfenlied* and *Mein Liebster ist so klein*, where the small size of the interval and its dissonance form the perfect concomitant to the sentiments expressed. In several of his

4. Autograph MS of the opening of the second orchestral version of Wolf's 'Anakreons Grab' ('Wo die Rose hier blüht'), dated 13 November 1893 (A-Wn S.M.0005)

religious songs (*Nun wandre, Maria*; *Zum neuen Jahr*; *Führ mich, Kind, nach Bethlehem*; *Ach, des Knaben Augen*), Wolf mimics in his own manner the streams of parallel thirds found in many 19th-century *geistliche Lieder* published for use in the home. States of ecstasy produced on certain notable occasions descending cascades of octaves in the right-hand part against full-textured harmonies (*Geh', Geliebter, geh' jetzt!* and *Auf einer Wanderung*, the latter as the Muse descends upon the poet in the wordless interlude following 'die Rosen leuchten vor'). Stylized evocations of folkishness or the open countryside or guitar playing were often created by a plethora of open-sounding parallel 5ths in the left-hand part (the last half of *Schon streckt' ich aus im Bett*; *Und schläfst du, mein Mädchen*; *In dem Schatten meiner Locken*; portions of *Auf einer Wanderung*). Several rhythmic patterns are recurrent features of Wolf's songs, including a quasi-syncopated figure consisting of a quaver–crochet–quaver pattern (*Wenn du mich mit den Augen streifst und lachst*, the birdsong section of *Der Knabe und das Immlein*, *Wer sein holdes Lieb verloren*, *In der Frühe*), while themes of beautiful death and slumber on two occasions prompted remarkable 'floating' rhythmic patterns in which triplets and duplets alternate in a repeated-pitch ostinato and the beginnings of beats are veiled by tied notes (*Alle gingen, Herz, zur Ruh* and *Sterb' ich, so hüllt' in Blumen*). Wolf clearly had personal associations with particular keys, as had Schubert and Schumann before him. Thus A♭ major was associated with tenderness and ardour (*Und willst du deinen Liebsten sterben sehen*), extreme flat keys with profound emotional states (the C♭ major of *Der Mond hat eine schwere Klag' erhoben*, the G♭ major of *Geh', Geliebter* and *Wenn Du, mein Liebster, steigst zum Himmel auf*), A minor with women's laments both tragic and comic (*Das verlassene Mägdlein*, *Schweig einmal still*), C major with bluff and jovial clarity (*Gesellenlied*), and so on. There are many exceptions, but such associations, usual in all songwriting, are especially significant in Wolf.

Despite these hallmarks of Wolf's 'own howl', it has often been remarked that each of his songbooks has its own distinct character, owing to Wolf's different musical responses to different poetic repertories. But the choice of those poetic repertories was also directed from within by an artistic trajectory, the changes in poetic taste paralleling different degrees of dependence upon poetic imagery to

awaken musical gestures. Wolf's first source of sustained poetic inspiration was, not surprisingly, a poet associated with Schumann, but Wolf sought to mine new musical veins in this repertory untouched by his predecessors. What most attracted him were character portraits that invited vivid musical portrayals or else scenes of nocturnal magic (the almost Debussyan swaying, hovering 7th chords in the piano part of *Verschwiegene Liebe* demonstrate the depth of his response to Eichendorff's mystical night poems). However, he would later tell Kauffmann that 'beyond the costumes and a little colour, there is nothing individual to note in Eichendorff's figures ... only vague, shadowy outlines ... like still dreams overhead', and he would find in Mörike's more complex poetry the source for a correspondingly more advanced tonal language. 'Divine Mörike!' ('Göttlicher Mörike!'), Wolf called this poet, whose symbol-imbued poems provided him with many points of contact, from a mutual reliance on fickle muses to similar bouts of insomnia to a liking for humour with anger as its substratum. Furthermore, Mörike's poems gave Wolf a variety of forms, moods and types on which to test his newly expanded tonal resources and the necessary specificity of verbal images to provide a fertile source of musical analogues. In every way Mörike invited Wolf to greater ambition; for example, the way in which the independent yet intertwining piano and vocal parts overlap in *Im Frühling*, coming together fully only in the final phrase of the song ('Alte unnennbare Tage!') when past and present, nature and protagonist, converge in memory, is far more complex than anything in the early songs. The orchestral richness of the piano accompaniments in songs such as *Er ist's* and *Die Geister am Mummelsee*, the harmonic radicalism of *Um Mitternacht*, *Der Genesene an die Hoffnung*, *Lebe wohl* and *Seufzer*, were new proving grounds for the composer and for the lied; it is no wonder that the word 'new' made an appearance in so many of the first critiques of these songs when they first burst on to the scene. It was here that Wolf could and did develop his distinctive gift for humour in music, whether in small-scale songs like *Bei einer Trauung* or in extended comic scenas like *Abschied*. Mörike, who lived in the recently expanded kingdom of Württemberg, had ample opportunity to hear of loveless marriages among the aristocracy, and Wolf turns the poet's stinging, comic account of one such wedding into a mock-funeral dirge filled with augmented triads, 'wrong-note' resolutions, tritones and progressions gone woefully awry.

Comedy, with the exception of what Wolf called 'world-redeeming comedy' à la Wagner, was not associated with a progressive or experimental musical language at the time; operettas, waltz songs, comic operas were generally composed in a conservative, downright regressive harmonic style, but Wolf endowed Mörike's humour with all the refinements of tonal nuance available to a late 19th-century composer. Religious songs (both Mörike and Wolf had complicated, idiosyncratic relationships to their religious upbringings, Lutheran and Catholic respectively) likewise become a more sophisticated endeavour in Wolf's hands, as when the attempt to pray conventionally in *Gebet*, to sing a stereotypical hymn, veers away and becomes something quite other than orthodoxy. Always attracted to the fantastic and the supernatural, Wolf created extensive song panoramas to go along with Mörike's Orplid mythology, as in *Die Geister am Mummelsee* and the *Elfenlied*, and the poet's other phantasms, most notably his fire-rider; somewhat in the spirit of a latterday Mendelssohn, Wolf delighted in elfin scherzos in the high treble register. Although the older Mörike might not have approved, as he and his friends were ardent anti-Wagnerites, his poetry gave Wolf the scope to incorporate Wagner as well as Schumann into his musical mix, with *Karwoche* and *Wo find' ich Trost?* both mini-Parsifals (the so-called Spear figure stabs its way through the latter song). In sum, the Mörike songs are Wolf's rough equivalent to Monteverdi's Vespers in their demonstration of variety, of mastery over old and new, with the old rendered new in the process.

The Goethe songs continue the same processes to even greater lengths. There can be no more grandiose quasi-orchestral writing for piano than in Wolf's setting of the Mignon song *Kennst du das Land?*, and the ballads (*Ritter Kurts Brautfahrt*, *Gutmann und Gutweib*) are more sprawling, episodic and virtuoso than before (Mörike's *Der Feuerreiter* – Wolf's *Erlkönig* – is organized as a refrain structure, but not so the Goethe ballads). The small lyric songs maintain the epigrammatic intensity of the Mörike songs, especially in works such as *Anakreons Grab* (Goethe's moving hail and farewell to the ancient Greek poet whose verse had been a major inspiration in his youth), *Blumengruss* and *St Nepomuks Vorabend*. Even more than in the Mörike volume, the impulse to form cycles and sub-collections expands to new and different dimensions. Like the Peregrina songs, Wolf's Harper songs are musically linked, but here Wolf steps beyond the customary pairs and trios of songs to larger groupings from still larger contexts: the ten *Wilhelm Meister* songs at the beginning of the Goethe volume and, at the end, 15 songs from *West-östlicher Divan*, Goethe's late volume of poems inspired by Joseph von Hammer-Purgstall's translations of the 14th-century Persian poet Hāfiz. As he would later do in the *Italienisches Liederbuch*, Wolf divides the pseudo-Persian set (this is a notional Orient of sultans and harems, innkeepers and taverns, invocations of the Qur'an, etc.) into men's songs for Hatem/Goethe and women's songs for Suleika/Marianne von Willemer (a late love of the elderly Goethe); as in the Italian songs, the man is given the wistful gems of compressed lyricism (*Wie sollt ich heiter bleiben* and *Wenn ich dein gedenke*, akin in the mixture of parallel major and minor modes in both songs) and the most ardent specimen of *Innigkeit* (*Komm, Liebchen, komm!*). It is noteworthy that Wolf did not set the two Suleika poems previously given musical life by Schubert, although he did set all three of Goethe's homages to Pindar set by Schubert (*Prometheus*, *Ganymed*, *Grenzen der Menschheit*) and all of the *Wilhelm Meister* songs. From this immersion in a Teutonized Oriental exoticism, it was not far to find a Teutonized Spanish exoticism with dramatic overtones – a *mise-en-scène* in song.

With the Goethe songbook behind him, Wolf no longer looked to the best in the earlier generation of German poetry for verbal inspiration. It is a noteworthy aspect of his songwriting art that his most advanced musical techniques found no poetic concomitant in the poetry of his own day; while never freeing himself entirely from the intersection of words and music, he came increasingly to rely more on music first and foremost, rather than responses to symbol-drenched words by the likes of Mörike and Goethe. Instead he next turned to Geibel and

5. Opening of the autograph sketch for Wolf's 'Mignon' song 'Kennst du das Land', completed 17 December 1888 (A-Wn NLU.19.565)

Heyse's Spanish songbook, which contains a small amount of fine poetry in skilful German paraphrase (Lope de Vega, Camoens, Cervantes) and quite a lot of anonymous folk poetry which in the aggregate becomes a blank slate on which to inscribe an intense post-Wagnerian chromaticism. The Spanish songbook is not an exercise in diversity, but is instead confined to religious subjects with a distinctly Spanish mystic-erotic tinge (the first ten songs) and purely erotic themes (34 songs). There are no more ballads, comic songs, nature songs or supernatural creatures in this collection; as a result, the focus is tighter, and the tone more intense. The chromatic sequences which suffuse *Ach, wie lang die Seele schlummert!* and *Herr, was trägt der Boden hier* seem a fusion of Bachian chromaticism at its most piercing and Wolf's most convoluted post-Wagnerian idiom, and the same statement is true of many other songs in this anthology as well.

With the six Keller songs of 1890 Wolf returned to *Rollenlieder* and to psychological studies in song, with the poetry once again the chief source of inspiration. (He was also attempting to negate Brahms's Keller song *Therese* by setting the same text, entitled *Du milchjunger Knabe* in Wolf's *Alte Weisen*, in a pointedly un-Brahmsian manner.) The results were mixed; although the depiction of the howling charcoal-burner's wife in *Das Köhlerweib ist trunken* is a grand display piece for both pianist and singer, with a bitter twist, and *Wie glänzt der helle Mond* (with its affectionate reminiscence of Hans Sachs's cobbling motif at the end) is sheer magic, the other four songs are less successful, perhaps because Wolf was swimming against the current of his own musical course.

In the Italian songbook he continued the trends established in the Spanish songbook but with even more focus and a different overall character, lighter, brighter and clearer. None of the poems in this anthology constitute 'great' poetry, although they are skilfully translated by Heyse, whose polished style is omnipresent; all are quite brief, of roughly uniform small size; and all have to do with secular love. The tortured mystic strain of both Caritas and Eros in the Spanish songs is no longer a factor, and Wolf consequently casts over the entire *Italienisches Liederbuch* a string-quartet-like clarity of texture (four-part writing had become his wont) which contributes to the sense of overarching unity in the volume, despite the gamut of human emotions he traverses. The uniformity is all the more remarkable because of the lengthy cleft between the two periods of composition which produced this songbook, although

Wolf may have sketched in 1890 more songs than he completed at that time. The manuscripts of *Gesegnet sei das Grün* and *O wär dein Haus durchsichtig* from 1896 bear the marginal inscriptions 'Phönix no.1' and 'Phönix no.2', which suggests that they were new inspirations, but they and the other 1896 songs continue the stylistic hallmarks of the first group. This volume is the radiant summit of Wolf's songwriting art.

At the end, inspiration slipped, regained control, faltered again. The three Michelangelo songs, in consequence, are not marked by the same unfailing mastery evident everywhere in the Italian songbook but revert to earlier strains. The introduction to the third song (*Fühlt meine Seele*; fig.6) in particular brings back figures from *Peregrina I* and *II* in the Mörike songs, the echo an obvious one. But the second song, *Alles endet, was entstehet*, is one of his masterpieces: Wolf, six months away from insanity, told Grohe in a letter of 27 March 1897, 'If in your emotion over it you do not lose your reason, you cannot ever have possessed any. It is truly enough to drive one mad, and furthermore of a staggering, truly antique simplicity … I really stand in awe of this composition, for I am afraid of losing my mind from it.' The entire song is derived from an intervallic figure consisting of a rising and a falling semitone whose kinship/difference is designed to convey a message from the *ars moriendi* of the Middle Ages, the whited sepulchres with their variations on the inscription 'I was that which you are, and what I am that you will be'. The circularity of the figures implies the circularity of life and death, the one contained within the other. So too is the death of tonality contained within tonality and foreshadowed when the voices of the dead speak from this song: 'Und nun sind wir leblos hier'. Of such monumentality in miniature is Wolf's penultimate lied.

8. Stage music. It should be clear by now that Wolf was a miniaturist (not, as he thought, a derisive description at all), that his entire creative bent was for multiple nuances compressed into a small space, not for canvasses painted with a large brush. His basic mode of musical thought was in terms of piano and solo voice as the original conception, which he would then expand as orchestration, choral writing and operatic dialogue under the impetus of his desire for larger forms. His operas, one finished, one unfinished, are marked by their birth as, in effect, a string of songs, many of them beautiful, powerful,

6. Autograph MS of the opening of the third song ('Fühlt meine Seele') of Wolf's 'Drei Gedichte von Michelangelo', dated 22–8 March 1897 (A-Wn S.M.19.586.)

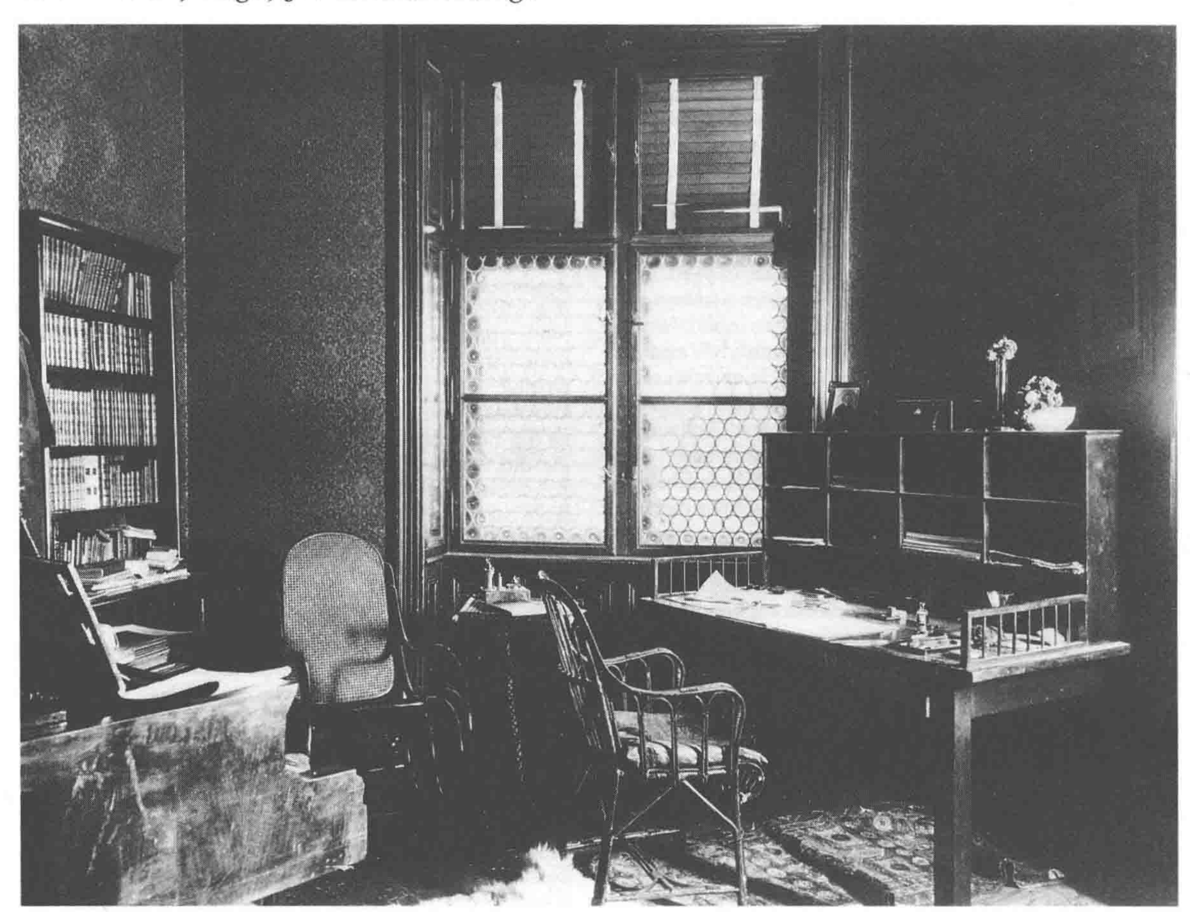
psychologically acute in musical characterization, but not expansively conceived. Had he lived longer, Wolf could perhaps have devised a form of opera akin to novella, a genre midway between opera and song, although whether this would have satisfied him is questionable. Despite encroaching illness, he was approaching just such a hybrid in *Manuel Venegas* when the devil of disease came for his soul in September 1897, and it is sadly intriguing to think of what he might have done both in song and opera had his mind held out.

Flaws in first operas are the rule rather than the exception, and there are unquestionably flaws in *Der Corregidor*, large ones at that. The most frequently cited objections include complaints that the libretto is structurally weak; that there are no cumulative developments leading to strategic dramatic goals; that the opera consists of a series of lyrical moments; that Wolf was averse to massed ensembles of Wagnerian breadth and shunned any hint of spectacle, hence denying a basic ingredient of the genre. At the confrontation in front of the Corregidor's house in Act 4, Wolf has a town guardsman burst through the door and demand to know the Corregidor's whereabouts; where Wagner might have concocted a wonderful choral-orchestral-solo tumult from Frasquita's lamentations, Repela's assertions that Lukas is the Corregidor, the Corregidor and his constable shouting in rage, and the soldiers milling about, Wolf dispenses with the matter in fewer than 20 bars. Defensively, he confused expansiveness with pandering to the box office and quoted Nietzsche's condemnation of theatrical folk as lacking the finest senses of their art in a letter to Rosa Mayreder. There are loose ends as well: characters are expected but never actually appear (the bishop at the end of Act 1), or else appear once and then disappear (the jealous neighbour). One major character – the Corregidor's wife – is not fully known to us by the end of the opera; denied a solo monologue, a 'Porgi amor' to tell us of her nature and her plight, or even a lengthy passage of dialogue, she acts as a *dea ex machina*, the hints in both libretto and score of a complex, wronged and yet powerful woman never developed at sufficient length to satisfy our curiosity about her. Temporal incongruities abound, that is, mismatches between the duration of narrative events and their duration in musical setting. In particular, time in Act 2 is so skewed that it is difficult to discern whether the chronologies of different events overlap or time has been implausibly compressed, the transitions from one time and place to the next far too short.

Whatever his earlier wish for un-Wagnerian 'guitars, moonlight and champagne', Wolf actually wanted to create psychological drama, not light entertainment, and he and Rosa Mayreder accordingly turned Alarcón's tale of social satire, spiced by ironic incongruities, in *El sombrero de tres picos* into something more Wolfian. For Wolf, whose relationships with authority figures were troubled at best and antagonistic at worst, the title figure of *Der Corregidor*, whose full name is Don Eugenio de Zuñiga y Ponce de León, gave him the opportunity to depict figures of authority as possessed of genuine power wielded for ignoble purposes and to defeat that power in the end. The three-cornered hat was additionally a symbol for Wolf of a sexual triangle between the miller Lukas, his spirited wife Frasquita, and the Corregidor; what is farcical in Alarcón becomes more serious in Wolf, who gives the Corregidor music of Tristanesque ardour for his attempted seduction of Frasquita and makes Lukas's Act 3 scene iii jealousy monologue the *pièce de résistance* of the opera. (The importance of jealousy as a theme in this opera is established at the beginning of Act 1, when Frasquita's beauty, Lukas's good fortune and the mill's hospitality are invoked by a jealous neighbour in conversation with the miller.) Furthermore, Wolf, who was involved with a married woman, idealized marriage as only the unmarried can, and his opera hinges on the polarity of one happy married couple (the peasants Lukas and Frasquita) and an unhappy one (the aristocratic Corregidor and his wife Mercedes); the beautiful but songlike Act 1 duet 'In solchen Abendfeierstunden' for Lukas and Frasquita may have provided the model for Richard Strauss's Act 2 duet 'Und ich will dein Gebieter sein' in *Arabella*, a vision of future matrimonial happiness in the same key of E major and sharing the same euphonious parallel 3rds, quasi-chanted declamation on repeated pitches and rhythmic unanimity. In addition to the quartet of major figures, a small gallery of secondary characters – the Corregidor's repellent constable Repela, the feisty maid Manuela and a drunken mayor, Juan López – provides the comedic elements, such as Repela's Act 4 scene ii anti-serenade, 'Blim blam! Blim blam! Mach' auf!'. This was Wolf's reply to Beckmesser's 'Morgen ich leuchte in rosigem Schein', complete with a melismatic jab against the vocal acrobatics Wolf disliked in Italian opera. The misogynistic, snuff-taking Repela is also characterized by musical outbursts of sneezing and by a theme similar to the principal accompanimental figure throughout the Goethe song *Spottlied* (from the *Wilhelm Meister* songs); Repela too is a mocker.

At a social occasion in 1905, Wolf's friend Grohe expressed regret to Mahler that the text of *Der Corregidor* was not effective on stage, to which Mahler (unaware of Grohe's friendship with Wolf) replied that the text was fine but 'the music is not worth anything ... Wolf did not have enough ideas. One cannot make an opera nowadays with a few motifs loosely joined together'. His judgment was far too harsh, but Wolf did think in terms of themes (most of them not really comparable to Wagnerian leitmotifs but longer, more lyrical statements) that would constitute capsule characterizations not only of the characters but of the relationships between them, and it is true that they become obsessive on occasion (there are almost 100 statements of Lukas's theme in the first act alone). 'Have you noticed', Wolf wrote to Mayreder while working on the composition of Act 1, 'how I treated "our" neighbour with a truly apt musical expression of enmity? The neighbour's motif is in perverse opposition to that of Tio Lukas, where the two figures cross one another. This is not just purely musical but deeply grounded in psychology'. (It is an unpleasant touch of Viennese anti-Semitism that Wolf points with pride to the nasal tone – associated with 'Jewishness' – he has indicated for the neighbour.) For example, the Corregidor's theme and that of his constable are similar, since both belong to what Saary calls 'the domain of power' in the opera, but the constable's theme is simpler, even banal, without the menace and power conveyed by the outlined augmented triads of the Corregidor's figure, while Lukas and Frasquita both have themes filled with anticipations and appoggiaturas to show their close relationship. The Corregidora Mercedes's theme is set apart from the others, its majestic, 3rd-related chords seeming like a

latterday descendant of block-chordal invocations of the names of Christ and the Virgin Mary in Giovanni Gabrieli's polychoral motets for S Marco, similarly evocative of solemnity and majesty. Several of Wolf's themes were evidently invented with contrapuntal artifice, transformation and combination in mind, as when Lukas's theme appears in the rhythmic garb of the Corregidor's figure (the two men exchange clothes in the drama). The saturation of the texture in these figures shows Wolf measuring himself, as ever, against Wagner, in particular *Die Meistersinger*. Wolf studied this opera assiduously throughout the composition of his own initial foray, referred to it often in his letters, and outdid Wagner's orchestra in size if not in effectiveness. He even wanted his opera printed in Gothic type because Wagner's operas were. 'Without the *Meistersinger* the *Corregidor* would never have been composed', he told Rosa Mayreder.



Der Corregidor has many virtues as well as faults and can just as well be considered a success in a hybrid genre of Wolf's own devising as a failure in an older genre. Lukas's jealousy monologue proves that operatic breadth was indeed within Wolf's ken; this is not song material, and Wolf does not treat it as such. Comparisons have justly been made to Ford's jealousy monologue 'E sogno? o realtá?' in Act 2 of Verdi's *Falstaff*. Vivid moments abound throughout the opera, the small scenes often of great beauty (Frasquita's song to the moon, 'Neugier'ge Mond', in Act 3 scene i, for example) or humour (the four-part canon in Act 2 about El Cid retiring to bed early, ample justification for the inebriates singing the canon to do likewise and additionally a Wolfian critique of pedantry: he despised overt displays of contrapuntal artifice). But there are too many elements at cross-purposes with one another, too many incompatible ideals – Wolf at war with Wagner all too audibly – and *Der Corregidor* has never entered the standard repertory, nor can one imagine that it ever will.

Wolf had not even completed the composition of his opera before he was once again on the trail of another libretto, and this time he was willing to consider tragic subjects. After considering Hauptmann's drama *Dies versunkene Glocke*, Wolf pressed Rosa Mayreder to adapt Franz Eyssenhardt's translation of Alarcón's short novel *El niño de la bola* ('The Boy on the Globe', meaning the Christ Child); she was reluctant to do so because its Catholicism offended her non-religious sensibilities, but she obliged nonetheless. Moritz Hoernes, whose libretto Wolf chose over Mayreder's, was also inexperienced in the special requirements of opera, and Wolf made substantial revisions on his own, striking out some 100 of 350 lines and revising 66 more. (In the asylum, he told the director Dr Svetlin and Rosa Mayreder that he had become a poetic genius and would write his own opera texts, the *folie de grandeur* truly tragic.)

It may be futile to mourn what fate has left unfinished, but it is difficult not to do so when one surveys the 600-bar fragment of Act 1 of *Manuel Venegas*. The Spring Chorus (scored for SATT) which follows the 'orchestral' introduction and the full chorus of the villagers, its antiphonal crowd interjections a latterday secular reminder of Bach's Passion choruses, are reminders of Wolf's ambition to enhance his reputation by means of choral composition. In particular, the mentally unbalanced title character's homecoming aria, 'Stadt meiner Väter', makes one regret the loss. It is a tragic possibility that Wolf was drawn to this subject because of unconscious identification with its protagonist. The score breaks off at Manuel's cry of pain when he remembers the incident in the past which led to his leavetaking from the town; those who read this score may be similarly pained at such an end to Wolf's dream of opera.

9. Critical writings. Wolf was what one might call a messianic critic, someone who wore his partisan heart on his sleeve and fought his battles pro Wagner and contra Brahms with all the impatience, fervour and trenchancy one also finds in his letters. He refused to allow the publication of his collected critical writings later in his life on the grounds that the writing style was faulty (his writing is actually vividly readable, filled with literary allusions, imaginative metaphors and sarcastic wit), but he did not recant the opinions he had expressed earlier. He did not need to: whatever the intemperance of his animadversions against Brahms, most of his views retain their currency to the present day. With the brashness of youth and in the fervent conviction that his judgment was right, he went against the tide of critical and public opinion on numerous occasions, as when he inveighed against the popular virtuoso pianist Anton Rubinstein as a composer 'prone to promising beginnings that come to nothing' or damned certain novelties on Viennese concert programmes as 'petit bourgeois music'. It is revealing to read two reviews from early 1887 about the new epidemic (Wolf's term) of lieder recitals – he would organize his own recitals only a few years later – with their potpourri of works by the likes of Brüll, Schütt, Goldmark, Hager and Heuberger. His reasons for condemning the individual songs on the programmes reveal by negative deduction aspects of his own aesthetic: he criticized one for its resemblance to Schubert's *Gretchen am Spinnrade*, another for its dullness, one for a melody like a street tune, another for being 'one of those perfumed things flirting coquettishly with the naive simplicity of folk music, and in a Brahmsian mask at that'. Even before the wonder of 1888, he knew that his works were superior to much of what was trumpeted as praiseworthy, and he could and did give readers critical insight into his own aesthetic through his critiques.

But self-consolation and self-promotion were not his purposes. Already an avid concert- and operagoer, he learned much from the experience, whatever his later denigration of it and his relief when he was freed from its bonds: it was a disciplined endeavour which imposed a schedule and deadlines, it gave him a new understanding of language and its relation to music (crucial for his idiosyncratic mission), and it provides readers then and now with a window on to his art. From his reviews one learns how deeply involved in his own milieu, in the *fin-de-siècle* German-speaking world, he was and how important he considered the educative place of music in society to be. To him music was the foremost symbolic language of human emotion and thought, related to life in a fundamental way, its workings as organic as the mind and body. He had no use for absolute music divorced from the human word or from organic human experience and considered all academic contrivances (elaborate fugues, for example) a waste of time and energy, mere arid pedantry. When he found music unacceptable, it made him physically miserable, as when he says of Brahms's First Piano Concerto, 'The air that blows through this composition is so icy, dank and foggy that it

7. Hugo Wolf's study

could easily freeze your heart and take your breath away; you could catch a cold from it. Unhealthy stuff!' Music he liked (including, to give him credit for minimal fairness to Brahms, that composer's G major Sextet and F major Quintet) he compared to nature, spring, health and well-being, emotional and physical; good music was restorative. Like Wagner (but not in quite the same way) he thought of opera as an art within and belonging to society, and he commented upon every aspect of its rendering in his reviews – scenery, costumes, acting, singing and conducting – especially with regard to the Mozart and Wagner operas he considered had the most to convey to people about humanity's profounder truths. His most fundamental aesthetic belief appears in his statement that the forms and contents of Liszt's symphonic tone poems, no less than the thematic material, were derived from the literary works that inspired them: this is, in a nutshell, Wolf's own credo.

Wolf's was a life dedicated wholly and utterly to music, a life flamelike in its fierce singleness of purpose – it is no wonder he felt such an affinity with Mörike's ballad of the fire-rider. 'When I can no longer compose', Wolf once wrote to Rosa Mayreder, 'you may throw me on a dunghill', and he compared life without composition to that of a frog, 'not even a galvanized frog', he concluded ruefully. But the composition to which he was so devoted was of a special kind. Wolf attempted to extract every nuance he could find in poetry, from simple sound effects to complex symbolism, and to render each detail audible in a post-Wagnerian tonal language. He saw his artistic mission as a matter of truthfulness to life, not *verismo* or naturalism or realism, but the psychological and emotional truths of human experience. 'For me the sovereign principle in art is rigorous, harsh, inexorable truth, truth to the point of cruelty', he told Emil Kauffmann in a letter of 5 June 1890, and his dedication to this mission gives his brief compositional life a comet-like intensity. He was not a Renaissance man, no more than Chopin, whom he so admired; he did not engage in many different genres, as did his older contemporary Brahms, but at the point where words and music intersect or coincide he can rightly claim greatness in company with Schubert and Schumann, whose legacy he carried forward and whose songs he equalled in refinement and power.

ERIC SAMS/SUSAN YOUENS (1–4), SUSAN YOUENS (5–9)

Wolf, Johannes (*b* Berlin, 17 April 1869; *d* Munich, 25 May 1947). German musicologist. In addition to his practical music studies at the Berlin Hochschule für Musik, Wolf studied musicology (under Spitta and Heinrich Bellermann) and German literature at the University of Berlin. He took the doctorate under Riemann at Leipzig in 1893 with a dissertation on an anonymous music treatise of the 11th–12th centuries. After studying

medieval music sources in France and Italy he completed the *Habilitation* in 1902 at Berlin University with a work on Florence and 14th-century music history, and lectured on early music history and church music. From 1899 to 1903 he was secretary of the new International Music Society. He became professor in 1907. From 1908 until 1927 he also taught at the Akademie für Kirchen- und Schulmusik in Berlin. In 1915 he became director of the early music collection at the Prussian State Library, Berlin, and in 1927 he became director of all the music collections there. He retired in 1934, shortly after Hitler came to power, and proved himself to be one of the few musicologists in Germany to express disapproval with the new political situation. In 1933 he resigned from the board of the Deutsche Musikgesellschaft out of solidarity with Alfred Einstein, who was dismissed as editor of its journal because he was Jewish, and in his contribution to Peter Raabe's Festschrift (1942) he insinuated subtle condemnations of the wholesale removal of Jews. Wolf was thereafter held in suspicion by his colleagues and was closely watched by Nazi authorities.

Wolf was a pioneer in the field of musicology based on source studies. The most important aspects of his work were devoted to palaeography, music of the Ars Nova, the history of music theory and Protestant church music. His two most important works, the three-volume *Geschichte der Mensuralnotation von 1250–1460* (1904) and the two-volume *Handbuch der Notationskunde* (1913–19) remain model standard works, based on thorough study of the sources. In them Wolf not only demonstrated the development of the so-called 'black' and 'white' mensural notation, but was also the first to deal thoroughly with the complex field of tablature notation. In connection with these studies he made many important new discoveries about medieval music. His studies of music theory are based on Riemann's work, but here too he arrived at new conclusions. A conscientious editor of early church music, he published compositions of J.R. Ahle, the *Newe deudsche geistliche Gesenge* (originally published by Rhau at Wittenberg, and a work of prime importance in the history of Protestant church music) and, above all, a complete edition of the works of Obrecht. He was also responsible for the two-volume edition of Isaac's secular works and the Squarcialupi manuscript, the most important source work for the Italian Trecento. Without his pioneering source work the resulting growth in medieval and Renaissance music studies would hardly have been possible. Wolf was also instrumental in helping to publicize and promote the study of non-Western music, and co-founded the *Zeitschrift für vergleichende Musikwissenschaft* in 1933.

Wolf, Maria Carolina. *See* BENDA family, (7).

Wolf, Martin. Organist, possibly identifiable with MANFRED BARBARINI LUPUS.

Wolfe, Jacques (Leon) (*b* Botoşani, Romania, 29 April 1896; *d* Bradenton, FL, 22 June 1973). American composer and pianist. He went to the USA with his family in 1898. He studied composition with Goetschius and piano with Friskin at the Institute of Musical Art, and then after World War I taught music in New York public schools, was a concert pianist and accompanist, and served as president of the Composers and Authors Guild.

He moved to Miami in 1947, where he became chairman of Grass Roots Opera and a noted photographer.

Wolfe is best known for his songs and arrangements in the style of negro spirituals, such as *Shortnin' Bread*, *Gwine to Hebb'n*, and *De Glory Road* (to words by Clement Wood), which achieved international familiarity. He also wrote descriptive chamber music, including *Maine Holiday* for piano and *Prayer in the Swamp* for violin and piano, a serenade for string quartet and three operas, of which *John Henry* (New York, 10 Jan 1940), first performed with Paul Robeson in the title role and a nearly all-black cast, was loosely adapted from black American folktales. Wolfe's revision of the work as *Mississippi Legend* (New York, 24 April 1951), performed by the Village Opera Company, received wide attention. While the *New York Times* critic found 'neo-Gershwinesque' harmonies and 'traces of artiness' in the musical settings, he praised the prosody as 'well-nigh perfect' and held that 'this score deserves to be studied by all American operatic composers'.

DEANE L. ROOT

Wolfe, Julia (*b* Philadelphia, 18 Dec 1958). American composer. She attended the University of Michigan, Ann Arbor (BA 1980), where she studied with Jane Heirich, George Wilson, Leslie Bassett and others. After helping to found the Wild Swan Theater (Ann Arbor) and writing music for its productions, she continued her studies with Bresnick at Yale University (MM 1986). In 1987 she co-founded, with David Lang and her husband Michael Gordon, the Bang on a Can Festival, a showcase for postminimal and vernacular-based new music. In 1992 a Fulbright Fellowship enabled her to work with the Orchestra de Volharding in Amsterdam and brought her into contact with Louis Andriessen, who became a notable influence.

Wolfe's early music, such as the wind quintet *On-Seven-Star-Shoes* (1985), is in a postminimal style influenced by Stravinsky, and features running quavers and frequent metre changes. Later works grow out of irregular repetition patterns and embrace extremes of consonance and dissonance within a circumscribed set of harmonies. The orchestral works *The Vermeer Room* (1989) and *Window of Vulnerability* (1991) exhibit a wealth of timbres and percussive sonorities, earning her a reputation as a colourist. The influence of rock music, particularly that of Led Zeppelin, becomes explicit in *Lick* (1994), a sextet beginning with a series of fragmented rock beats that gradually resolve into a flowing continuity. In addition to its narrowly-focussed nervous energy, Wolfe's music is characterized by gradual processes that build through levels of accumulation rather than through linear change. In *Tell Me Everything* (1994), for example, harsh chords articulated in polyrhythms gradually reach a degree of frenzied consonance.

KYLE GANN

Wolff, Albert (Louis) (*b* Paris, 19 Jan 1884; *d* Paris, 20 Feb 1970). French conductor and composer. He studied at the Paris Conservatoire under Leroux, Gédalge and Vidal. At the same time he played the piano in cabarets and was organist at St Thomas-d'Aquin, Paris. In 1906 he joined the staff of the Opéra-Comique, the theatre which became the centre of his career. He was appointed conductor in 1911 and made his début with the première of Laparra's *La jota*. In 1921 he succeeded Messager as musical director for three years, and in 1945 he was appointed director-general. Although he soon resigned from this position, he continued to conduct occasionally at the theatre. He was also second conductor (from 1925), then president (1934–40), of the Concerts Pasdeloup, president of the Concerts Lamoureux (1928–34) and conductor at the Opéra (from 1949). In 1911 he conducted the French season in Buenos Aires, and he returned there during a South American tour (1940–45) when he conducted the première of his Symphony in A. He also conducted (1919–21) the French repertory at the Metropolitan Opera, including the première of his own *L'oiseau bleu*. In Paris Wolff conducted many French premières of works by foreign composers, but there, as in other countries, he was best known as a dedicated exponent of the French music of his time. He gave, among many others, the first performances of Milhaud's *La brebis égarée* (1923) and First Piano Concerto, Roussel's Fourth Symphony and Poulenc's *Les mamelles de Tirésias* (1947). Wolff's conducting combined strength and sensitivity, and he was a helpful accompanist. His compositions show a similarly sensitive character.

WORKS

CHRISTIANE SPIETH-WEISSENBACHER

Wolff, Auguste (Désiré Bernard). French piano maker who became head of the firm of Pleyel, Wolff & Cie in 1855. *See* PLEYEL (ii).

Wolff, Charles (Johannes) de (*b* Onstwedde, 19 June 1932). Dutch organist and conductor. He studied the organ at the conservatory in Utrecht with Stoffel van Viegen and George Stam, at the Amsterdam Conservatory with Anthon van der Horst, and with Jeanne Demessieux in Paris. He also studied conducting in Hilversum (1956–9). His favoured organ repertory is, in addition to the organ works of J.S. Bach, contemporary Dutch and French music. He gave the premières of many Dutch organ works during the Schnitger festivals (1967–82) on the Schnitger

organ in the Michaelskerk in Zwolle. Wolff has conducted various choirs, including the Nederlandse Bach Vereniging; he also directed annual performances of Bach's *St Matthew Passion* in Naarden (1965–83). As conductor of the Noordelijk PO in Groningen from 1964 to 1989, he gave many first performances in the Netherlands of modern works, notably by Messiaen.

GERT OOST

Wolff, Christian (*b* Nice, 8 March 1934). American composer of French birth. He moved to the USA in 1941 and became associated with Cage, Earle Brown and Feldman in New York in the early 1950s. Almost entirely self-taught as a composer, he studied classics at Harvard (BA, PhD), remaining there as a teacher until 1970, when he was appointed professor of classics and music at Dartmouth College. He became Strauss Professor of Music at Dartmouth in 1979. Wolff's honours include an award from the American Academy and Institute of Arts and Letters, and several commissions, notably those from West German Radio, the Concord String Quartet, the Wesleyan Singers and Ursula Oppens.

Of the four 'New York' composers, Wolff has been most concerned to engage the performers in what he terms 'parliamentary participation', allowing them to mould the music, to act and to react to sounds in a manner that may be more or less free; the 'monarchical authority' of the conductor is eliminated. However, Wolff's early compositions (*c*1950–57) are fully notated. The great importance of silence in these pieces derives aesthetically from Cage and technically from Webern, though 12-note and serial procedures are not used, nor is tonality. The music is stripped of a sense of goal or climax, and the repetitive use of pitch leads to a degree of stasis, accentuating interest in individual sounds rather than progressions.

In the music of a second phase (1957–*c*1964) Wolff introduced performer choice within fixed time spans, and the most distinctive characteristic of his work, the technique of 'cueing', appeared during these years. This technique provides that the decisions of one performer are to some extent directed by the sounds of another, so that chains of action and reaction may be set up, requiring the musicians to be alert and flexible and lending the result an improvisatory quality. An early example of this kind of music was the *Duo for Pianists II* (1958), which gives each player a set of units of imprecisely notated material (durations are almost always determined, but other aspects may be strictly fixed, somewhat limited, or completely free). The choice of which unit to play next is more or less specifically ruled by what the performer has last heard; both pianists play continuously until an agreed period of time has elapsed.

Wolff's work after 1966 provides material and rules that are still less determinate, permitting a wide scope for improvisation. He has summarized the convictions behind such music under four headings: a composition must make possible the freedom and dignity of the performer; it should allow both concentration and release; no sound or noise is preferable to any other sound or noise; and the listeners should be as free as the players. From the early 1970s onwards Wolff's works reflected an interest in political subjects and a desire, as he has said, 'to stir up ... a sense of the political conditions in which we live and of how these might be changed, in the direction of democratic socialism'. This theme is expressed through the use of texts addressing political issues, as in *Wobbly Music* (1975–6) and *Changing the System* (1972–3), and the use of material borrowed from traditional and contemporary labour and protest songs, as in the collection of works drawn from the song 'Bread and Roses' and *Hay una mujer desaparecida* (1979). A handful of recent compositions also draw upon particular works or techniques from western art music history, such as *Aarau Songs* (1994), which refers to *Malheur me bat* (ascribed to Ockeghem), or *Percussionist Songs* (1995), which borrows from a Josquin chanson.

WORKS

Duo for Vns, 1950; For Prepared Pf, 1951; Nine, fl, cl, hn, tpt, trbn, cel, pf, 2 vc, 1951; Trio I, fl, tpt, vc, 1951; For Magnetic Tape, 1952; For Pf I, 1952; For Pf II, 1953; Suite I, prepared pf, 1954; For Pf with Preparations, 1955; Duo for Pianists I, 1957; Sonata, 3 pf, 1957; Duo for Pianists II, 1958; For Pianist, 1959; Music for Merce Cunningham, vn, va, tpt, trbn, pf, db, 1959; Duet I, pf duet, 1960; Suite II, hn, pf, 1960; Duet II, hn, pf, 1961; Duo for Violinist and Pianist, 1961; Summer, str qt, 1961; Trio II, pf duet, perc, 1961

For 5 or 10 People, any insts, 1962; In Between Pieces, 3 players, 1963; For 1, 2, or 3 People, any insts, 1964; Septet, 7 players, conductor, 1964; Elec Spring I, hn, cbn, elec gui, elec db, 1966; Qt, 4 hn, 1966; Elec Spring II, t rec + a rec, trbn, gui, elec gui, elec db, 1966–70; Elec Spring III, vn, hn, elec gui, elec db, 1967; Edges, any players, 1968; Pairs, 2/4/6/8 players, 1968; Toss, 8 or more players, 1968; Prose Collection, any players, 1968–9; Tilbury, any inst/insts, 1969; Tilbury 2 and 3, any inst/insts, amp ad lib, 1969; Snowdrop, hpd and/or other insts, 1970

Burdocks, 1 or more orchs of 5 or more players, 1970–71; Accompaniments, 1972; Lines, str qt/other str ens, 1972; Variations (Extracts) on the Carman's Whistle Variations of Byrd, kbd/other insts, 1972; Changing the System, 1972–3; Exercises 1–14, any 3 or more insts, 1973–4; Songs, unison vv, 1973–4; Studies, pf, 1974–6; Str Qt Exercises out of Songs, 1974–6; Str Bass Exercise out of 'Bandiera rossa', db, 1975; Exercises 15–18, kbd, trbn, any insts, 1975; Wobbly Music (texts from World War I history), mixed chorus, insts, 1975–6; Bread and Roses, pf, 1976, version for vn, 1976

WILLIAM BLAND/DAVID PATTERSON

Wolff, Christian Michael (*b* Stettin [now Szczecin in Poland], 1707; *d* Stettin, 3 Jan 1789). German organist and composer. Both his grandfather Friedrich and his father Christian Friedrich (*d* October 1721) occupied important musical posts at the church of St Mary's in Stettin, where he himself was organist for almost 60 years. He spent three years in Berlin (1729–32), and on his return succeeded his former composition teacher, Michael Rohde, as organist of St Mary's. In 1745 he applied for the additional position of castle organist: 'An organist cannot live on 100 gulden without additional work. In any event the cantor and *Musicus instrumentalis* [of St Mary's] also go up to the castle since its church service falls within an hour of their own'. Wolff took part in the dedication of two new organs, at the castle in 1751 and at St Mary's in 1776. For the latter he composed a cantata, possibly one of many that have not survived.

Scarcely six months after the composer's death St Mary's caught fire during a violent thunderstorm and was destroyed. Wolff's reputation was almost as transient, though he was held in high esteem in Stettin. The publication of his music as far afield as Berlin and Leipzig also indicates a certain renown. His attractive collection of six sonatas might well revive his name today. Except for the fourth sonata, which can be played by harp and violetta or viola da gamba, Wolff's choice of instruments (harpsichord and violin or flute) is conventional, but his keyboard writing is not. The highly decorated style is sometimes almost brilliant, and the melodic instrument does not merely duplicate the keyboard part; the contrapuntal art of the organist is never far absent. His collection of organ preludes for church use, on the other hand, are rarely more than perfunctory examples of their kind with chromatic tendencies. His surviving vocal music includes an unpretentious collection of little songs, the extended motet *Unendlicher Gott* and a cantata in the Italian style, *Gott, ich bin in dir erfreut*.

WORKS

Andantino and chorale, Freu dich sehr, in Sammlung kleiner Clavier- und Singstücke (Leipzig, 1774)

Motet, Unendlicher Gott, in Vierstimmige Motetten und Arien, ed. J.A. Hiller (Leipzig, 1776)

Sei sonate, hpd, vn/fl/violetta (Stettin, 1776)

Sammlung von Oden und Liedern (Stettin, 1777)

Six duettes, 2 fl, op.1 (Berlin, *c*1778)

Orgelübung-Vorspiele vor funfzig Melodien bekannter Kirchen-Gesänge (Leipzig, 1782)

Cantata, Gott, ich bin in dir erfreut, B, hn, 2 vn, bc, *D-Bsb*

HUGH J. McLEAN

Wolff, Christoph (*b* Solingen, 24 May 1940). American musicologist of German birth. He studied the organ and the harpsichord at the Hochschule für Musik in Berlin. He took a performer's diploma at the University of Berlin in 1963 and the doctorate at the University of Erlangen in 1966, where his professors included Adrio, Ruhnke, Smend and Stäblein. He began teaching at the University of Erlangen in 1966 and he joined the editorial board of the Bach new collected edition in 1967; he then taught at the University of Toronto (1968–70). After working as professor of music at Columbia University (1970–76) and visiting professor at Princeton University (1973–5), he was appointed Professor in 1976 at Harvard University, where he has been William Powell Mason professor (from 1985), chair of the music department (1980–88; 1990–91) and graduate dean (from 1992). He has been on the editorial boards of the collected editions of Samuel Scheidt (general editor, from 1975), Buxtehude (from 1980), C.P.E. Bach (1982–97), Brahms (from 1983), and the series Recent Researches in the Music of the Baroque Era. Together with H.-J. Schulze, he was editor of the *Bach Jahrbuch*, 1974–91, and he has been on the editorial boards of the *Journal of the American Musicological Society* (1979–83), Studies in Music History (general editor with L. Lockwood, from 1983), the *Harvard Dictionary of Music* (1986, 1996), *Musical Quarterly* (from 1991), *Bach Perspectives* (from 1995) and the *Basler Jahrbuch für historische Musikpraxis* (from 1997). His affiliations with professional societies include serving as AMS chair (1981) and as a member of the executive committee of the Neue Bachgesellschaft, Leipzig (from 1982). He was awarded the Dent Medal in 1978 and was made honorary professor at Freiburg University in 1990.

Wolff's interests include early keyboard music and music of the 17th and 18th centuries, particularly the works of J.S. Bach and Mozart. His Bach research has been particularly significant; in his monograph on the *stile antico* in Bach's music he drew on biographical data, stylistic analysis and performing practices to show Bach's knowledge and application of the style and to give a probable chronology of compositions employing it. His later writings continue to investigate Bach's biography, the sources of Bach's music and the related challenges they pose for an editor, as well as questions of performing practice. He has also published important works on Mozart, including a monograph on the Requiem (1991). A prolific author and dedicated music editor, Wolff may be considered one of the most important Bach scholars of his generation.

PAULA MORGAN/R

Wolff, Edward (*b* Warsaw, 15 Sept 1816; *d* Paris, 16 Oct 1880). Polish pianist and composer. He studied under Zawadzki (piano) and Elsner (composition) at the Warsaw Conservatory. He then moved to Vienna and continued his studies under Würfel. After his début there he went in 1835 to Paris, where he remained until his death, making his living as a pianist and composer. He wrote well over 300 compositions, chiefly for piano, including a concerto, five sets of studies, nocturnes, romances, fantasies, many transcriptions from operas, and a great number of duets for violin and piano: 32 jointly with Bériot, eight with Vieuxtemps, one with Panofka and three duets for cello and piano with Alexandre Batta. His music was excessively influenced by Chopin.

CZESŁAW R. HALSKI/R

Wolff, Fritz (*b* Munich, 28 Oct 1894; *d* Munich, 18 Jan 1957). German tenor. He studied in Würzburg and made his début as Loge at Bayreuth in 1925, returning regularly until 1941 as Loge, Walther and Parsifal. After engagements in Hagen and Chemnitz, in 1928 he took part in the première of Schreker's *Der singende Teufel* at the Berlin Staatsoper, where he remained until 1943 and, in addition to his Wagner roles, sang the title role in Pfitzner's *Palestrina*. He appeared regularly at Covent Garden (1929–38) in Wagner roles and as Aegisthus (*Elektra*). He also sang in Vienna, Paris, Prague and other European cities, and as Walther in Cleveland (1934–5). His beautiful voice and dignity of bearing admirably suited him to such roles as Lohengrin and Parsifal.

HAROLD ROSENTHAL

Wolff, Hellmuth (Sylvio Gustav) (*b* Zürich, 3 Sept 1937). Canadian organ builder of Swiss birth. He was apprenticed to Metzler & Söhne, and received further training with several firms in Europe and the USA, including Rieger in Austria and Charles Fisk in Gloucester, Massachusetts. In 1963 he emigrated to Canada, where he worked as a designer for Casavant Frères in their newly established mechanical-action department. He designed their organs for St Pascal, Kamouraska, Quebec (1963); Our Lady of Sorrows, Toronto (1964); and Marie-Reine-des-Coeurs, Montreal (1965).

After a brief period working as a voicer and designer in Geneva, he returned to Canada in 1966 to work with Karl Wilhelm, before establishing his own business in Laval, Quebec, in 1968. James Louder (*b* 1948) joined the firm as an apprentice in 1974, eventually becoming a partner in 1988. The firm was incorporated under the name Wolff & Associés Ltée in 1981. By 1997 Wolff had built 40 instruments ranging from a small one-rank practice organ to the organ with four manuals and 50 stops built for Christ Church Cathedral, Indianapolis, Indiana (1989). Other instruments include: the Trappist monastery, Oka, Quebec (1973); Trinity Cathedral, Davenport, Iowa (1979); Travis Park United Methodist Church, San Antonio, Texas (1985); and the new recital hall at the University of Kansas (1996; a French Romantic organ). Drawing inspiration mainly from French and German classical traditions, Wolff's instruments, however, offer a more eclectic and modern design that meets the needs of modern organ culture.

Wolff has on occasion produced instruments which are more distinctly historical, such as Redpath Hall, McGill University, Montreal (built in the French Classical style), and Knox College, University of Toronto. The latter organ (especially the pipework of the main divisions) is closely modelled on the 1725 Swedish Baroque organ built by J.N. Cahman in Leufsta Bruk. These instruments, each the first of its kind in Canada, set new standards in that country for this type of work. Although Wolff exclusively builds new mechanical-action instruments, in 1993 he undertook to construct a new tracker organ in an historic organ case (made by the 19th-century Canadian organ builder Samuel Russell Warren) at the Church of the Visitation in Montreal. About half of the stops in this instrument are made from restored Warren pipework. In a similar undertaking in 1994, Wolff moved the historic Rudolf von Beckerath instrument of 1959 (the first modern tracker organ built for a church in Canada) across Montreal from the former Queen Mary Road United Church to St Andrew's, Dominion-Douglas United Church, Westmount. The instrument was meticulously restored and, while remaining true to the original design, the stop-list was augmented by two new pedal stops, the case was expanded with pedal towers added on either side, and the casework was painted.

KARL J. RAUDSEPP

Wolff, Hellmuth Christian (*b* Zürich, 23 May 1906; *d* Leipzig, 1 July 1988). German musicologist and composer. He studied with Schering, Abert, Sachs and Blume at Berlin University (1925–32), where he took the doctorate in 1932 with a dissertation on Venetian opera in the second half of the 17th century; he completed the *Habilitation* at Kiel in 1942 with a work on Baroque opera in Hamburg. He was professor at the musicology institute of Leipzig University from 1954 to 1971, but in 1967 he was banned from teaching or publishing his work there after submitting an article to a Berlin newspaper implicitly criticizing the East German Communist authorities. In 1992, four years after his death, he was officially rehabilitated in the wake of German unification.

Wolff's reputation rests on his many publications rather than on his compositions which were rarely performed. He wrote extensively about the history of opera, particularly Baroque opera in Venice, Naples and Hamburg, on the Netherlandish music of the Renaissance, and the music of Mendelssohn. His interest in the visual aspects of music culminated in his edition of the volume on opera in the series Musikgeschichte in Bildern (1968). In addition to his operas, he wrote a ballet as well as orchestral and chamber works. In later years he became known as a painter.

WORKS
(*selective list*)

Stage (all librettos by the composer): Der kleine und der grosse Klaus (chbr op, 1, Wolff, after H.C. Andersen), op.27, 1931, rev. 1940; Die törichten Wünsche (Das kalte Herz) (op, 3, Wolff, after W. Hauff), op.35, 1942–4; Esther (scenic orat, 2, Wolff), op.40, 1945; Der Tod des Orpheus (op, 3, Wolff), op.50, 1947; Ich lass' mich scheiden (chbr op, 2, Wolff), op.59, 1950; Moresca (ballet), op.73, 1969; incid music

Orch: 3 Werke, op.16, chbr orch, 1932; Conc. for Orch, op.20, 1933; Conc., op.21, ob, chbr orch, 1933; Heitere Musik über ostinate Rhythmen, op.32, 1938; Suite, op.33, 1940; Inferno 1944, op.42, 1946; Serenade, op.44, str, 1946; Conc., op.53, pf, str, 1947; Vn Conc., op.54, 1948; Sinfonia da missa, op.56, 1949; Db Conc., op.72, 1968; Händel Suite, op.74, 1970; Paul Klee Suite, op.75, 1973

HORST SEEGER/ANDREW CLARK

Wolff, Hugh (MacPherson) (*b* Paris, 21 Oct 1953). American conductor. After graduating from Harvard University, he gained a master's degree at the Peabody Conservatory and spent a year at the Paris Conservatoire. He studied the piano with Leon Fleisher, composition with Messiaen, Crumb and Leon Kirchner, and conducting with Charles Bruck. From 1979 to 1982 he served as Exxon/Arts Endowment Conductor of the National SO, Washington, DC, under Rostropovich, and in 1980 made his Carnegie Hall début with that orchestra. Subsequent appointments included music director of the Northeastern Pennsylvania PO (1981–6), associate conductor or the National SO (1982–5) and music director of the New Jersey SO (1985–93). In 1988 Wolff was appointed principal conductor of the St Paul Chamber Orchestra, in 1992 its musical director, and in 1997 chief conductor of the Frankfurt RSO. His guest engagements have included the principal orchestras of Boston, Chicago, New York, Philadelphia and San Francisco, and the LPO, LSO and Czech PO. He has recorded music ranging from Haydn's Paris symphonies to works by Stravinsky, Shostakovich and Copland, and has conducted the premières of works by Stephen Albert, Michael Colgrass, Corigliano, Aaron Kernis, Tod Machover, Panufnik and Takemitsu. Wolff's conducting is characterized by clean lines, concise and often elegant phrasing and rhythmic strength.

CHARLES BARBER

Wolff, Kurt von. *See* WOLFURT, KURT VON.

Wolff, Martin (*d* before 6 March 1502). German composer. A cleric by this name held a benefice controlled by the Elector Palatine from about 1490 until 6 March 1502, when it was given to another, since Wolff had died. This circumstance, together with the transmission of Wolff's works in publications edited by Georg Forster, who had studied and gathered music in Heidelberg, led Pietzsch to conclude that Wolff belonged to the Palatine court in Heidelberg. Most of Wolff's 11 songs (all in RISM 1539[27], ed. in EDM, 1st ser., xx, 1942/*R* four pubd earlier in 1513[2]/*R*) combine imitation with a tenor cantus firmus; his most famous song, however, *So wünsch ich ihr ein gute Nacht*, sometimes attributed to Thomas Stoltzer, uses no imitation. The songs are outstanding for their tunefulness and independence of accompanying voices. Wolff's single surviving motet, *Conserva me Domine* (in 1538[6]; ed. in Keyl, 438–49), recalls Josquin in its use of paired voices, occasional close imitation and careful declamation of the text.

STEPHEN KEYL

Wolf-Ferrari [Wolf], **Ermanno** (*b* Venice, 12 Jan 1876; *d* Venice, 21 Jan 1948). Italian composer. (He added his mother's maiden name, Ferrari, to his surname around 1895.) Although he learnt the piano and was profoundly affected by music from an early age, he also showed signs of having inherited the talents of his father, a painter of

Bavarian origin. He therefore studied at the Accademia di Belle Arti, Rome (1891–2), keeping music as a spare-time activity. In 1892, however, after he had moved to Munich to continue his art studies, he entered the Munich Akademie der Tonkunst, where he was a counterpoint pupil of Rheinberger. In 1895, without having completed his final examination, he returned to Venice. He also spent some time in the late 1890s in Milan, where he became a protégé of Boito and met Giulio Ricordi, who did not, however, accept his music for publication. Thus began the long period in which his music repeatedly proved more acceptable in Germany than in Italy.

During 1900–03 Wolf-Ferrari was again in Munich, after the failure in Venice of *Cenerentola*. But the successes in Germany of the same opera's revised version, and of his cantata *La vita nuova*, resulted in his being appointed director of the Liceo Musicale, Venice (1903–9). After resigning from that post, he devoted himself almost entirely to composition, living near Munich but regularly visiting Venice. In 1911–12 he visited the USA. World War I (during which he took refuge in Zürich) inevitably came as a severe shock, in view of his mixed blood and background and his hypersensitive yet childlike temperament: he composed little during the conflict or the years immediately thereafter. Having become more active again from the mid-1920s, he was in 1939 appointed professor of composition at the Salzburg Mozarteum. In 1946 he moved to Zürich once more, but returned to Venice for the last year of his life.

Taken as a whole, Wolf-Ferrari's output is strangely heterogeneous. Although best known for his comic operas of 1902–9, in which he revealed a special flair for graceful semi-pastiches of 18th-century music, he had first come to prominence, around 1900, as a composer of high seriousness, responsive to many different aspects of the Romantic tradition. Among his first published compositions only the Serenade in E♭ fairly consistently foreshadows the nimble archaisms of the Goldoni operas. In most of the other early pieces such premonitions tend to be obscured by elements which are frankly, even ponderously Germanic. The chamber works owe much to the Mendelssohn–Schumann–Brahms tradition, but have a tendency to loose-jointed rhapsodizing which weighs heavily, for instance, on the unusually scored *Sinfonia da camera*. Wagnerian influences too are evident; there are deliberate echoes of *Tristan* at the beginning of the A minor Violin Sonata's second movement. The same sonata's impassioned, rhythmically obsessive first movement carries chromaticism to extremes that parallel Reger. Among the choral compositions the much-praised *La vita nuova*, which by 1937 had had over 500 performances abroad (but only two in Italy), looks back to Bach through late 19th-century eyes, with results which sometimes recall the neo-Bachian music of Brahms.

Even *Cenerentola* only intermittently anticipates the *opera buffa* qualities of Wolf-Ferrari's next few operas. This extremely eclectic score is notable, rather, for the delicate yet sometimes surprisingly dissonant chromaticism of some passages: the very first bars repeatedly sound D, D♯ and E simultaneously. Then, in 1902–6, the combined impacts of Mascagni's *commedia dell'arte* opera *Le maschere* (about which Wolf-Ferrari had mixed feelings, but which evidently set him thinking) and of Goldoni's famous comedies led to the composition of *Le donne curiose* and *I quatro rusteghi*. The latter is a particularly successful free evocation of the world of *opera buffa* (especially of the Venetian variety) in a style flexible enough to admit many romantic touches (some of them relatable to the Verdi of *Falstaff*) and even a few gently ironic 'modernisms' where the dramatic situation warrants them – for instance at the beginning of Act 3. *Il segreto di Susanna*, though even more popular than *I quatro rusteghi*, is less sure-footed in its mingling of 18th-century idioms with others of more recent origin. This opera's shortcomings are, however, negligible compared with those of *I gioielli della Madonna*, in which Wolf-Ferrari suddenly – perhaps in an attempt to break down Italian resistance to his music – jumped on to the bandwagon of post-Mascagnian *verismo*, with results which, though uninhibitedly colourful in its evocation of Neapolitan idioms, are often of a vulgarity that had hitherto seemed foreign to him. The return of his special vein of lighthearted satirical comedy in *L'amore medico* confirms that even to attempt a crude melodrama like *I gioielli* was a betrayal of his true nature.

The psychological crisis aroused by World War I inevitably left its mark on Wolf-Ferrari's few works of those years. The little-known, problematic *Gli amanti sposi* is particularly interesting in this respect. Although it too is based, freely and not altogether satisfactorily, on a Goldoni comedy, much of the music has an expressive complexity far removed from the simple-heartedness of *I quatro rusteghi*. In these passages free pastiche tends again to yield place (as in parts of *L'amore medico*) to a chromaticism relatable to, but more purposefully deployed than, that of *Cenerentola*. Something of the same disturbed state of mind is still evident in *Sly*, notably in the central character's intense monologue in Act 3: but, as subsequent revivals have demonstrated, for all its eclecticism, this is the most genuinely powerful of Wolf-Ferrari's few serious operas. In *La vedova scaltra* and *Il campiello* he returned yet again to Goldoni, and this time reverted, for much of the time, to a style very close to that of the pre-war comedies. Neither of these later Goldoni operas achieved the worldwide fame of *I quatro rusteghi* and *Il segreto di Susanna*; but *Il campiello* in particular contains scenes in which the earlier operas' sparkle is fully rekindled, and others which show that Wolf-Ferrari was still capable of striking new departures: the formidable quarrel scene in Act 3 of *Il campiello* is probably the most 'modernistic' passage in any of his works.

Meanwhile Wolf-Ferrari was again, after a long interruption, turning his attention to instrumental music. The *Idillio-concertino* is a particularly successful small-scale embodiment of his best light manner, while the rhapsodic though pleasingly melodious Violin Concerto suggests that by the 1940s he had lost touch with even the mildest modern trends, and was content to ring the changes on manners already familiar from his earlier music. His last decade also saw the publication of his book, *Considerazioni attuali sulla musica* (Siena, 1943).

JOHN C.G. WATERHOUSE

Wolffheim, Werner (*b* Berlin, 1 Aug 1877; *d* Berlin, 26 Oct 1930). German music collector and critic. After taking a degree at Leipzig University in jurisprudence (1899) and practising as a lawyer for some years, he studied musicology with Fleischer, Klatte, Kretzschmar and Wolf at Berlin (1906–9). Though he published some articles on music history and music bibliography, he was active mainly as a music critic, and became a chairman of the Verband Deutscher Musikkritiker and secretary of the Gesellschaft für Ästhetik. His most conspicuous achievement was the methodical amassing of a music library of manuscripts and printed source material from the Middle Ages to the 20th century and a comprehensive collection of writings about music. After trying unsuccessfully to find a buyer for the whole collection at 650,000 marks, Wolffheim had the library auctioned by the firms of Martin Breslauer and Leo Liepmannssohn of Berlin on 13–16 June 1928 and 3–8 June 1929. The elaborate and well-illustrated auction catalogue (1928) has become a standard work of bibliographical reference. Numerous European and American public and private libraries enriched their holdings through purchases made at this, the most important auction of its kind in the 20th century.

ALBI ROSENTHAL

Wölfl [Wölffl, Woelfl], **Joseph** (*b* Salzburg, 24 Dec 1773; *d* London, 21 May 1812). Austrian pianist and composer. His earliest musical instruction was as a chorister at Salzburg Cathedral from 1783 to 1786, where he studied with Leopold Mozart and Michael Haydn. In 1790, on his father's advice, he went to Vienna, apparently to study with the younger Mozart, though it is unclear whether he ever became his pupil and how close their relationship actually was. Some authorities claim, however, that it was through Mozart's intervention that Wölfl was

appointed composer to Count Ogiński in Warsaw, where in 1792 he made his first public appearance as a pianist.

Having established a reputation both as a performer and a teacher, Wölfl returned to Vienna in 1795, where his talents propelled him to the forefront of public attention. He was soon regarded as the only serious rival to Beethoven; indeed, the *Allgemeine Musikalische Zeitung* preferred his 'unpretentious, pleasant demeanour' to Beethoven's more emotionally charged style and praised him for playing that showed 'not just a pleasing originality, but also a very rare combination of power and delicacy'. In 1798 he married the singer Therese Klemm and the following year embarked on a lengthy concert tour that took him to Brno, Prague, Dresden, Leipzig, Hamburg, Berlin and Paris. He was well received everywhere (in Hamburg his skill at improvisation led to favourable comparisons with C.P.E. Bach), but nowhere more so than Paris, where his welcome was every bit as rapturous as that he had received in Vienna, with the *Journal de Paris* describing him as 'one of the most exciting pianists in Europe'.

In addition to his activities as a performer, Wölfl was also establishing a reputation as a composer. His first opera, *Der Höllenberg*, to a libretto by Schikaneder, was well received on its first performance in Vienna in 1795, as was *Der Kopf ohne Mann* three years later and the pasticcio *Liebe machen kurzen Prozess*. In Vienna he also began to compose instrumental music in earnest (his first two piano sonatas op.1 were probably composed several years earlier), dedicating his three piano trios op.5 to Haydn and his set of three piano sonatas op.6 to Beethoven. These activities continued in Paris, where in early 1804 his opera *L'amour romanesque* was performed to considerable acclaim.

The reasons for Wölfl's sudden departure from Paris in 1805 are unclear. Some authorities ascribe it to the lukewarm reception accorded his next opera, *Fernando*, though that seems unlikely given the high regard in which he was otherwise held. What is almost certainly true is that neither of two other popular explanations has any basis in fact: either, as Fétis would have it, that he fell in with the bass singer Ellenreich, who was a notorious card sharp and dragged Wölfl into some unspecified scandal; or, according to Schilling, that he became music master to the Empress Josephine, accompanied her to Switzerland following her divorce, and thence made his way to England.

In May 1805 Wölfl arrived in London and immediately set about establishing his reputation. He was enthusiastically fêted both as a performer and as a composer. His G major Piano Concerto op.36 (known as 'Le calme') was especially popular and performed at four concerts within the space of just two months; among his orchestral works, the G minor Symphony op.40, which he dedicated to Cherubini, was highly regarded. As in Paris, Wölfl tried to make his mark as an operatic composer, but apart from two well-received ballets, given at the King's Theatre, he failed to secure a commission. He died suddenly in May 1812, but for almost two years there was speculation, fuelled in part by the *Allgemeine Musikalische Zeitung*, that he was still alive.

Tomášek has left a vivid description of Wölfl: 'tall, very thin, with huge hands that could easily stretch a 13th'. He noted, however, that 'Wölfl's peculiar virtuosity apart, his playing had neither light nor shade – he was entirely lacking in manly strength'. His piano compositions in many respects bear out this verdict. While they make, by the standards of the day, high technical demands, they generally lack emotional substance. Indeed, the commentary in the *Allgemeine Musikalische Zeitung* on the op.6 sonatas has a rather wider application: 'they are, on the whole, in the style of Clementi's best work, though are rather more learned and less delicate' (*AMZ*, i (1798–9), 237). Though rarely performed today, Wölfl's piano music maintained its place in the repertory for several decades after his death and was only supplanted when its technical demands were overtaken by the advances of Schumann's generation.

Posterity has treated his other instrumental music even less kindly, for it passed out of circulation even more quickly. Here, Wölfl once again demonstrated his capacity for composing music whose essentially facile construction was cleverly masked by an instant melodic charm and grace. Above all, he was adept at writing for amateur performers: his flute sonatas op.35 were judged to be 'just the kind of sonatas that second-rate dilettantes, especially the English, will want' and which 'a composer like Wölfl would write in his sleep' (*AMZ*, x (1807–8), 110). At his best, however, as in the contrapuntal minuet of the G minor Symphony, Wölfl demonstrated a mastery of formal technique that is rarely encountered in composers of his kind. Despite his ardent desire to achieve recognition as an operatic composer, Wölfl achieved no lasting success with his stage works. *Der Höllenberg* contains some engaging melodies, but suffers from a weak libretto whose flaws Wölfl proved unable to mask satisfactorily.

As a teacher, Wölfl had a significant influence: his most distinguished pupil was Cipriani Potter. His pupils described him as exacting, and his *Méthode de pianoforte* is testament to the importance he placed on securing a rigorous and thorough technique. Several of his concert works were also written with a pedagogical purpose in mind. Of these, the most famous was his sonata 'Non plus ultra', whose final movement is a set of brilliant variations on Nägeli's song *Freut euch des Lebens*.

WORKS

STAGE

published as vocal scores

Der Höllenberg (heroic-comic op, 2, E. Schikaneder), Vienna, auf der Wieden, 21 Nov 1795 (Vienna and Brunswick, n.d.)

Das schöne Milchmädchen, oder Der Guckkasten (comic operetta, 1, J. Richter), Vienna, Kärntnertor, 5 Jan 1797

Der Kopf ohne Mann (heroic-comic op, 2, J. Perinet), Vienna, auf der Wieden, 3 Dec 1798; excerpts in *Leipziger Zeitung*, i/30

Liebe macht kurzen Prozess, oder Heirat auf gewisse Art (pasticcio, Perinet, after J. Rautenstrauch), Vienna, auf der Wieden, 26 March 1798, collab. F.X. Süssmayr, J. Henneberg, M. Stegmayr, F.A. Hoffmeister, I. von Seyfried, J. Haibel, J. Triebensee

Das trojanische Pferd (comic op, Schmieder), 1799, ?inc.

L'amour romanesque (Die romanhafte Liebe) (oc, 1, A. Charlemagne), Paris, Feydeau, 3 March 1804 (Leipzig, 1804)

Fernando, ou Les maures (heroic op, 3), Paris, Feydeau, 11 Feb 1805

La surprise de Diane (ballet), London, King's, 21 Sept 1805 (London, 1806)

Alzire (ballet, after Voltaire), London, King's, 27 Jan 1807 (London, ?1810)

EWAN WEST

Wolfram von Eschenbach [Her Wolveram] (*fl c*1170–1220). German poet. On the basis of his epics *Parzival* (?*c*1200) and *Willehalm* (?*c*1215) he counts as probably the greatest medieval German poet and was named one of the 12 'alte Meister' by the Meistersinger (*see* MEISTERGESANG). His seven surviving lyric poems (ed. in Kraus) have no music. Two melodies are connected with Wolfram, however. The *Schwarzer Ton* is ascribed to him in one 14th-century manuscript (for facs. of three sources *see* SOURCES, MS, fig.26, fig.27, and fig.28; for comparative edn. *see* TON (i), ex.1). It was often used by the Meistersinger. The other melody is for his fragmentary epic *Titurel* (? after 1217) with a complicated four-line stanza form that was much used for later poems. The melody appears with one of the earliest of these, Albrecht von Scharfenberg's late 13th-century *Jüngerer Titurel* (*A-Wn* 2675, f.1*v*; clearest edn in Taylor, i, 107–8); and a later version, with several significant differences but enough similarity to contribute considerably to our understanding of its nature, appears with the Monk of Salzburg's song *Beschnyten wirdiclichen wort* in the Kolmarer Liederhandschrift (*D-Mbs* cgm 4997, f.662; ed. in Gennrich, p.194). Further varied, it appears in several later Meistersinger manuscripts. Its importance is that it is one of the few known examples of a melody appropriate for epic singing and by far the most intricate such melody.

□

Wolfrum, Philipp (*b* Schwarzenbach am Wald, Upper Franconia, 17 Dec 1854; *d* Samaden, Grisons, 8 May 1919). German conductor, concert organizer, teacher and composer. He became an elementary teacher at the Altdorf teachers' seminary. In 1875 he was appointed second music teacher at the Bamberg teacher's seminary. He then studied in Munich at the Königliche Musikschule with Rheinberger and Franz Wüllner. Humperdinck was a fellow pupil, and they became lifelong friends. Wolfrum returned to the Bamberg seminary from 1879 to 1884, when he was appointed to teach music at the University of Heidelberg. He became music director at the university in 1885, and in the same year founded and directed the Akademischer Gesangverein and the Bachverein, which made Heidelberg an important musical centre. Wolfrum was made professor of music history in 1898. His pupils included Fritz Stein, Karl Hasse and Hermann Poppen.

Wolfrum was a champion of the works of Liszt, Bruckner, Strauss and Reger. He conducted all of Reger's works composed between 1898 and 1916, including many premières, and with Reger gave many two-piano Bach recitals. He revived a number of Bach's works which had

been neglected for two centuries, including cantatas and oratorios. He gave the first German performances of choral works by Elgar, with whom he corresponded. He also recognized the merit of E.T.A. Hoffmann's *Undine* long before Pfitzner and anticipated Riemann's championing of J.C. Bach and the Stamitzes. He declined invitations to conduct at festivals in Cologne, Bayreuth and Munich, remaining loyal to Heidelberg until his death: the climax of his 35 years there were the festivals of 1909, 1911 and 1913. In 1911 he was awarded a doctorate for his thesis on evangelical church music. He was also a campaigner for composers' performing rights.

His major composition was the oratorio *Ein Weihnachtsmysterium* op.31 (1899). The inclusion of a Gregorian melody and several Christmas carols, as well as pastoral melodies of his own, gives the work a folk-like character. It is characteristic of late 19th-century Christmas music.

Wolfrum's brother Karl (*b* Schwarzenbach am Wald, 14 Aug 1856; *d* Neustadt an der Aisch, 29 May 1937) was a respected teacher and composer of organ music.

WORKS
(*selective list*)

opp.1–12 published in Heidelberg, opp.13–32 published in Leipzig

FRIEDRICH BASER/RUDOLF WALTER

Wolfurt [Wolff], **Kurt von** (*b* Lettin, 7 Sept 1880; *d* Munich, 25 Feb 1957). German composer and conductor of Latvian birth. After early education in St Petersburg, he studied natural sciences at German universities. In Leipzig he also studied music with C. Heymsen and R. Teichmüller in 1901, and the following year became a pupil of Max Reger (counterpoint) and Martin Krause (piano) in Munich. After a few years of travel, during which he befriended Henri Matisse in Paris, Wolfurt served as choral director at theatres in Strasbourg (under Pfitzner) and Kottbus before the outbreak of World War I. During the war he returned to Latvia to manage a paper mill; afterwards he lived for a while in Stockholm and then Berlin, where he taught composition at the municipal conservatory (1936–45). From 1923 to 1945 he also served as the secretary of the music division of the Prussian Academy of the Arts. Wolfurt taught composition at Göttingen (1945–9) and accepted a similar position in Johannesburg (1949–52), where he also conducted. He then retired to Munich to devote himself entirely to composition. Most of his instrumental works depend on older models, such as variation form (on themes of Mozart or Tartini) or the concerto grosso; he also wrote a *Sinfonia classica* op.39. Among the vocal works the *Gedichte von Goethe* op.1 are fine examples of the best tradition of German lieder.

WILLIAM D. GUDGER/ANDREW D. McCREDIE

Wolkenstein [Nephelius], **David** (*b* Breslau [now Wrocław], 19 Nov 1534; *d* Strasbourg, 11 Sept 1592). German mathematician, music editor, ?composer and writer on music. From 1553 he studied at the Viadrina at Frankfurt an der Oder, where he was a pupil of the mathematician Helias Camerarius. In 1555 his name appeared, as 'David Nephelius Wratislaviensis', in the matriculation register of the University of Wittenberg. From at least 1568 until his death he was a teacher of mathematics and a Kantor at Strasbourg. He is of musical interest for his editing of two volumes of psalms: *Psalmen: mit 4 Stimmen zu singen in den Kirchen und Schulen in Strassburg* (Strasbourg, 1577) and *Psalmen für Kirchen und Schulen auff die gemeine Melodeyen syllaben weiss zu 4 Stimmen gesetzt* (Strasbourg, 1583), as well as *Die teutsche Litanei: für Kirchen und Schulen zu vier Stimmen gesetzt* (Strasbourg,

1583). According to Zahn the first collection of psalms is based principally on old melodies, most of which are in the tenor part. The second contains mainly melodies from Strasbourg and from the Bohemian Brethren, which are in the cantus part. It includes nine unidentified tunes fashioned on definite rhythmic models and thus related to the reformed psalter; Wolkenstein may have written them himself. The second collection can profitably be seen as a link between the French psalter and Lucas Osiander's *Fünfzig geistliche Lieder und Psalmen* (Nuremberg, 1586), although Wolkenstein's settings, unlike Osiander's, are not wholly homophonic. Wolkenstein is also known to have written *Primum musicum volumen scholarum Argentoratensium* (Strasbourg, 4/1585), but no copy survives. According to Eitner he prepared the Strasbourg edition (1596) of Heinrich Faber's *Compendiolum musicae*.

WALTER BLANKENBURG/CLYTUS GOTTWALD

Wolkenstein, Oswald von. *See* OSWALD VON WOLKENSTEIN.

Woll, Erna (*b* Sankt Ingbert, Saar, 23 March 1917). German composer. She studied church music at the Evangelisches Kirchenmusikalisches-Institut, Heidelberg (1936–8), with Fortner and others, and school music in Munich (1940–44), where her teachers included Joseph Haas; she then studied in Cologne (1946–8) with Lemacher and others and also studied German and musicology in Heidelberg, Munich and Würzburg. She worked as a church organist and Kantor in Cologne, Munich, Heidelberg and elsewhere in Germany, and between 1948 and 1972 taught at the church music institute in Speyer, the Gymnasium in Weissenhorn and at the University of Augsburg, specializing in music education techniques; her publications on the subject include *Buchprogrammiertes Musiklernen* (Wolfenbüttel, 1970) and *Praxis der programmierten Unterweisung im Musikunterricht* (Frankfurt, 1972). Most of her output is vocal, mainly sacred, music. Between 1957 and 1987 she composed about 50 choral works, including masses (one to a Dutch text, *Eer aan God*, 1967), cantatas and psalm settings. She has also composed songs, including *Lieder der Liebe* (1945), for mezzo and keyboard instrument, and the chamber work *Spielmusik*, for three violins and cello. Her music has been widely published in Germany.

DETLEF GOJOWY

Wollaneck [Wollanek], **Anton.** *See* VOLÁNEK, ANTONÍN.

Wollank, (Johann Ernst) Friedrich (*b* Berlin, 3 Nov 1781; *d* Berlin, 6 Sept 1831). German composer. A lawyer by profession, he studied music in his youth with J.A. Gürrlich and at the Singakademie with K.F.C. Fasch. He was a founder-member of Zelter's *Liedertafel* (1808), and with Hinrich Lichtenstein was one of Weber's circle of Berlin friends. His music was on the whole modest in aim, consisting chiefly of songs, choruses and some chamber music for strings; but he also wrote a three-act opera *Die Alpenhirten* to a libretto by H.W. Loess, a work in Singspiel manner which Max Maria von Weber described as 'Romantic through and through'. It had some success at its Berlin première on 19 February 1811; however, when Weber gave it in Prague in 1815 (with Caroline Brandt as Betty), it was considered too long and after the first performance (7 May) was cut by five numbers, still leaving the public cold. Weber also praised Wollank's Trio for piano, violin and viola, and dedicated six male-voice songs to him. In 1826 Wollank was one of the founders of the Berlin Philharmonic Society.

JOHN WARRACK

Wolle, Peter (*b* 1792; *d* 1871). American Moravian composer, and editor of the first Moravian tunebook published in America. *See* MORAVIANS, MUSIC OF THE, §3.

Wolleb, Johann Jakob (*b* Basle, 26 Jan 1613; *d* Basle, 30 Oct 1667). Swiss composer, theorist and theologian. He studied theology at Basle and Geneva. From 1634 to 1638 he was assistant at St Peter, Basle, and from 1638 to 1667 was vicar of St Elisabeth there. From 1637 to 1641 he was acting professor of rhetoric at Basle University. Since 1577 there had been at the university a so-called *Professor musices*, who was at the same time organist at the cathedral. The first incumbent was Samuel Mareschall, and Wolleb was the second. He was elected in July 1642. He retired in 1649 but was elected again in 1650 and held the position until shortly before his death (he was succeeded by his son, who was also called Johann Jakob). The duties of the professor of music were precisely laid down for the first time in 1649: he had twice a week to rehearse the students of the faculty of philosophy in vocal music, paying particular attention to psalmody, and to play the organ in the cathedral on Sundays, provide music for public graduation ceremonies and superintend teaching of music at the grammar school. Thus Wolleb came to write a textbook on musical theory, *Rudimenta musices figuralis nova facilitate sic adornata ut paucissimae regulae sufficere possint* (Basle, 1642), and to prepare a new version of the hymnbook that Mareschall had produced in 1606, *Ambrosij Lobwassers Psalmen Davids: sampt anderen geistlichen Liedern ... hiebevor von Samuele Mareschallo ... zu IV Stimmen gebracht. Anjetzo von newem übersehen und auff jetzige musikalische Art gerichtet* (Basle, 1660, 5/1743; some pieces ed. in Laudinella-Reihe, ix, xlvii, Basle, 1963, 1966). His

most important contribution, however, is the so-called Gonzenbach Songbook – *Vollständiges Gesangbuch* (Basle, 1659). This contains hymns with the cantus firmus in the tenor part.

LUISE MARRETTA-SCHÄR

Wollick [Wolquier, Volcyr], **Nicolaus** [Nicolas] (*b* Serouville, Lorraine, *c*1480; *d* Nancy, after 23 May 1541). Lotharingian theorist and historiographer. Although his family name was actually Wolquier, his Latin musical writings, first published in Germany, carry the name 'Wollick'; his French historical and literary writings, published in Lorraine, were ascribed to 'Volcyr'. As a result, musicologists have neglected the other aspects of Wollick's work. He was the son of a poor patrician and studied at Cologne University from 1498, where he was taught music by Melchior Schanppecher. In 1501 Wollick took the degree of Master of Arts and published in Cologne his *Opus aureum musicae* (5/1509). The third and fourth parts, which deal with composition for the first time in Germany, were written by Schanppecher. The sources for the book are the writings of Adam of Fulda, Hugo of Reutlingen, Keinspeck and Cochlaeus. The main subject is practical music rather than the 'musica speculativa' of the Middle Ages. By his use of the distinction between 'musica usualis sive vulgaris' and 'musica regulata' Wollick pointed the way towards a new definition of the distinction between 'musicus' and 'cantor' as the difference between the 'artless' folksinger (that is, one without formal learning or the skills of the craft) and the learned musician. In 1506–7 Wollick finished his theological studies at Cologne and became master of the choirboys at Metz Cathedral. From 1508 he was a teacher in Paris and in 1509 he published there a revised and expanded version of his treatise under the title *Enchiridion musices* (4/1521); it was praised by Gaffurius (*SpataroC*, letter 2). From 1513 he was employed as a secretary and historiographer by Duke Antoine of Lorraine, who ennobled him in 1520. His most famous work is his chronicle, written in 1526, about the peasant rising in Lorraine in 1525.

KLAUS WOLFGANG NIEMÖLLER/R

Wołowska, Maria Agata. *See* SZYMANOWSKA, MARIA AGATA.

Wolpe, Michael (*b* Tel-Aviv, 4 March 1960). Israeli composer. He studied composition at the Rubin Academy, Jerusalem, and at Cambridge University (MA 1994). He is profoundly attached to the socialist ideology of the founders of the secular Jewish community in Israel, to modern Hebrew poetry, and to an ardent belief in the educational and human properties of music. This led him to settle in the kibbutz Sdeh Boker, where he founded a regional music school. He has also taught at the High School of Sciences and the Arts (from 1991 on) and at the Rubin Academy in Jerusalem (after 1996).

By means of diverse stylistic strategies and richly connotative quotation, Wolpe delivers his ideological messages and comments. His highly individual idiom is exemplified in works such as the Trio (1996), in which dense dodecaphonic writing contrasts with a lyrical folk-like tune and ironic quotation of modern pop music, or in his *Songs of Memory*, in which a powerful pacifist message is symbolised by combining an Arabic soprano with Arabic and western instruments and textures.

JEHOASH HIRSHBERG

Wolpe, Stefan (*b* Berlin, 25 Aug 1902; *d* New York, 4 April 1972). American composer of German birth and Russian parentage. He began studies in theory and composition at the age of 14 and in 1920–21 attended the Berlin Hochschule für Musik, where he studied under Paul Juon. He then applied to Busoni's masterclass at the Akademie der Künste; though he was not accepted, Busoni befriended him and passed on valued advice. Drawn to the avant garde from an early age, Wolpe took part in an exhibition of the Berlin dadaists and became associated with *Melos* and the circle around Scherchen and Tiessen. His first published work, an Adagio for piano, appeared in *Melos* (1920). In 1923 he joined the Novembergruppe, an association of socialist artists where he became active as pianist and composer, and in 1927 he collaborated with Stuckenschmidt.

Wolpe attended lectures and exhibitions at the Bauhaus at Weimar and was greatly influenced by the Bauhaus aesthetic of utopian socialism. In later life, not wishing to compose only for élite audiences, he would write for amateur groups and take great interest in the popular music and folklore of his successive homelands. He saw no difference between a musical intelligence that shapes simple ideas and one that works with highly complex, advanced musical material. A continual interplay of visual, kinetic and sound imagery in Wolpe's thinking may have its origin in the multimedia experiments at the Bauhaus.

Wolpe destroyed most of his early works, keeping only a few songs and instrumental pieces, and song cycles on poems of Hölderlin, Kleist and Tagore. The major works from the 1920s are two chamber operas: *Schöne Geschichten*, a series of seven absurdist scenes with music suggesting the influence of Schoenberg's *Pierrot lunaire* and Berg's *Wozzeck*, and *Zeus und Elida*, a comical satire of Hitler (Zeus) set to music abstracted from current dance styles. As the situation in Germany deteriorated Wolpe became more active politically. From 1929 to 1933 he supplied dozens of songs, marches and anthems for unions, dance and theatre companies and agit-prop

troupes. In 1931 he became musical director for Die Truppe 1931, a theatre collective directed by Gustav von Wangenheim. *Die Mausefalle*, the first and most successful of their three shows, satirized current social conditions while demonstrating Marxist doctrine. When the Nazis seized power in 1933 they banned Die Truppe, and Wolpe was forced to flee.

In August of the same year he arrived in Vienna to study with Webern and began using the 12-note method; the second of the *Zwei Studien* for orchestra is a Passacaglia on a 12-note row of 3rds and tritones. He also began a four-movement Konzert für neun Instrumente with nearly the same instrumentation as Webern's own Konzert op.24. Wolpe assimilated Webern's ideas to the concepts of Hauer and Schoenberg, with which he was already familiar. In *Vier Studien über Grundreihen* (1935–6) he worked with derived sets and combinatory hexachords, concepts he explored further in *Kleinere Canons* and *Suite im Hexachord*. At the end of 1933 Wolpe was again forced to flee, this time to Palestine, where he taught at the Palestine Conservatory in Jerusalem (1936–8). In Palestine Wolpe became fascinated by Jewish songs from Syria and Yemen and by classical Arabic music; the *Octatonic* scale, which he used in many works from that time on, can be derived from the *maqām ṣaba*. In the music of the Middle East he discovered a music-stasis that provided an alternative to the goal-directed forms and rhetoric of German Expressionism. He found in it a stirring but non-subjective expressivity.

In 1938 Wolpe emigrated to the USA and settled in New York. He held teaching posts at a number of institutions, including the Settlement Music School, Philadelphia (1939–42), the Brooklyn Free Music Society (1945–8), the Contemporary Music School (1948–52), of which he was founder and director, and the Philadelphia Academy of Music (1949–52); he was director of music at Black Mountain College (1952–6) and chairman of the department of music at C.W. Post College, Long Island University (1957–68). He influenced a wide range of musicians through his teaching, among them George Russell, Eddie Sauter, Haim Alexander, Herbert Brün, Morton Feldman, Ralph Shapey and David Tudor. From the 1950s Wolpe also lectured at Darmstadt.

In the works of the 1940s Wolpe demonstrated that diatonicism and dodecaphony are not mutually exclusive modes of musical thought, but that between them lies a rich spectrum of resources. Assimilating concepts from Bartók, Schoenberg and Stravinsky, he composed with pitch cells in a fully chromatic environment, and rhythmic phrases of great intricacy and diversity. Seeking to go beyond classical serialism he developed techniques for applying serial principles to harmony. The movements of the dance scores *Zemach Suite* and *The Man From Midian*, however, are variously diatonic, octatonic and 12-note. Not surprisingly, critics had difficulty classifying Wolpe's music. After 1945 Wolpe continued to be socially committed while seeking an ever more abstract and constructed idiom. One of the many technical studies from the 1940s is titled 'Displaced Spaces, Shocks, Negations, A New Sort of Relationship in Space, Pattern, Tempo, Diversity of Actions, Interreactions and Intensities'. The intent is to replace familiar, layered musical space, in which thematic materials are assigned specific registers, by a mobile, open, non-figurative space in which phrases are fractured and dispersed freely throughout the total sound. To organize such a constellatory time-space he developed a system of proportions, based on principles learned at the Bauhaus, in which the distances between pitches are divided symmetrically and asymmetrically by clusters or additional pitches. He demonstrated the system in *Seven Pieces* for three pianos (1951), which he dedicated to Varèse.

During the 1940s and 50s many jazz musicians came to Wolpe to extend their ideas in terms of concert music. Wolpe regarded jazz as a much needed corrective to the tightly controlled scores of classical composers. In the Saxophone Quartet (1950) jazz connotes Wolpe's populism and his resistance to McCarthyism, and yet the piece attains a high level of abstraction with its spatial effects. *Enactments* for three pianos, the Oboe Quartet and the Symphony – in addition to being examples of abstract Expressionism – are notable for their notion of 'organic modes', according to which the ordering of the 12-note row is coordinated with expressive content, musical events and large-scale structural processes.

The works of the 1960s achieve a synthesis between MOMENT FORM and integral serialism. For his pieces Wolpe prepared charts and row forms but applied them with great latitude and spontaneity. Successive images are succinct, sharply defined and maximally contrasted in a fully written-out open form. The compositions are generally in two parts: the first is often slower, its mode of thought directed, orderly and stable, while the faster part scatters and disperses, producing a disrupted and dissociated effect. A new sound evolved in *Form* for piano (1959) after which he titled many works Piece or Form. During this period his music was championed by several ensembles such as the Group for Contemporary Music, founded by Sollberger and Wuorinen.

Wolpe received many awards and honours, including two Guggenheim fellowships and membership of the National Institute of Arts and Letters. His last years were overcast by parkinsonism and by a fire which damaged all his papers and destroyed his collection of paintings. Despite these adversities he continued to compose, completing his last piece a few months before he died.

AUSTIN CLARKSON

Wolpert, Franz Alphons [Alfons] (*b* Wiesentheid, 11 Oct 1917; *d* Wiesentheid, 7 Aug 1978). German composer and teacher. His early studies were in Regensburg, where he was a choirboy at the cathedral. In 1937 he was appointed assistant chorus master at the Stadttheater in Regensburg, where he also attended classes at the Catholic church music school. He began studies in 1939 at the Mozarteum in Salzburg, attending the master classes of Wolf-Ferrari, Krauss and Walther Lampe. Wolpert taught music theory and the piano at the Mozarteum from 1941 to 1944; from 1950 he taught in Salem on Lake Constance. He received the Düsseldorf Schumann Prize in 1956. His music adopts the harmonic language of Bartók and Hindemith; in particular, the *Banchetto musicale* no.1 (1952) demonstrates an affinity with Bartók's earlier string quartets. Wolpert's book *Neue Harmonik* is an admirable summary: all vertical sonorities are explained through Rameau's principles as triads, triads with notes added, or chords built in 4ths; further possibilities are created by the inversion or respacing of these sonorities.

WORKS
(*selective list*)

Stage: Haiti 1803, n.d.; Der goldene Schuh (ballet), 1956; Pechvogel (Singspiel) n.d.; Der eingebildete Kranke (comic op, after J.-B.P. Molière), Vienna, Volksoper, 1975

Other vocal pieces: Dafnis (after A. Holz), n.d.; Urworte: Orphisch (J.W. Goethe), solo vv, chorus, orch; Das Göttliche (Goethe), S, chorus, orch, n.d.; Requiem, S, chorus, org, n.d.; Ave Maria, S, chorus, str, 1977; more than 50 lieder

Orch: Prelude: Wie es euch gefällt, 1952; Banchetto musicale no.1, vn, chbr orch, 1952; Banchetto musicale no.2, pf, orch, 1953; 3 concs.: vc, pf, orch, 1961, va, orch, n.d., vn, orch, n.d.; Schubert-Variationen, 1969–74; Wiesenthieder Aufzugsmarsch, wind orch, 1976

Chbr and solo inst: Konzertante Sonata, va, pf, 1969; Danze e serenate bavarese, fl, pf, 1970; Miniaturen, pf 4 hands, 1973; Ritornell, 3 vc, 1975; pieces for pf, org

Principal publishers: Breitkopf & Härtel, Heinrichshofen

Wolstan of Winchester. *See* WULFSTAN OF WINCHESTER.

Wolters, Gottfried (*b* Emmerich, Lower Rhine, 8 April 1910; *d* Emmerich, 25 June 1989). German choirmaster and musicologist. He studied German philology and musicology in Cologne with Kroyer and Bücken and in Berlin with Schering. After some years as a publisher's reader, his work as a choral conductor began in 1942 and resulted in the formation of the Norddeutscher Singkreis in Hamburg in 1950. Wolters's excellent work with this choir has had a lasting influence on the style of other choirs. His series of 120 songsheets, *Das singende Jahr* (1951–68), drew on old and new German material and on folksongs from all over Europe. He was a co-founder, with César Geoffray, of the European Federation of Youth Choirs, and helped to shape the federation's 'Europa Cantat' festivals. He composed many songs and choruses, and prepared several editions, notably of works by Monteverdi (including a critical edition of the Vespers, 1966) and Carissimi; his articles include a contribution on folksong to *Musikalische Zeitfragen*, vii (1959).

KLAUS L. NEUMANN

Woltersdorf [Wolterstorpius], **Joachim** (*b* Salzwedel, 1508; *d* Magdeburg, 1554). German Lutheran pastor and music theorist. After early studies in Hamburg he went to Wittenberg and became conrector there in about 1534. In 1537 he went to Magdeburg and served as pastor in several churches. He wrote a treatise entitled *De musica* (*I-PLcom* 3Q9B98; ed. in Kast) devoted to the elements of music. Although its text is a model of conciseness, the corrupt state of the musical examples makes it difficult to evaluate the importance of the treatise. Woltersdorf also contributed a foreword to Martin Agricola's *Rudimenta musices* (Wittenberg, 1539).

CLEMENT A. MILLER

Woltz, Johann (*b* *c*1550; *d* Heilbronn, 10 Sept 1618). German organist and anthologist. His father, also named Johann, served as town clerk and organist in Würzburg. The younger Woltz took an organ post at Heilbronn in *c*1572, and from 1592 he also served as Würzburg representative at an ecclesiastical court in Heilbronn. His *Nova musices organicae tabulatura* was published in Basle in 1617 (RISM 1617[24]/*R*; 1 piece ed. in *Cantantibus organis*, vii, Regensburg, 1962). In compiling this anthology of keyboard music, Woltz collaborated with his nephew, CHRISTOPH LEIBFRIED (1566–1635), organist, jurist and court clerk in Rötteln. 85 motets with Latin titles appear first, mostly by Giovanni Gabrieli (22), Hassler (13) and Andrea Gabrieli (10). Other composers, apart from Merulo, Lassus and Monte, are less well known, and are mostly Italian and German. 53 intabulated German songs occupy the second section; here works by Hassler and Franck predominate. 50 *canzoni alla francese* and 27 other instrumental pieces, mostly *fugae*, close the collection. The composers in this third section are the Italians Maschera, Merulo, Antegnati, Tresti, Banchieri and the two Gabrielis. 20 of the *fugae* are attributed to Simon Lohet.

Woltz set his music in new German organ tablature with spaces between the bars. He indicated in the preface that the music had been simplified for easy reading and playing by reducing all scores to four voices, though leaving intact imitative entries, suspensions and characteristic decorations. The first piece serves as a model for the application of coloration; other works employ little, if any, added ornamentation. The collection is intended for the amateur's use, especially in services and for private devotions. Pedal indications occur twice, though the player could use the pedals at any time to overcome awkward stretches in the left hand. Woltz's tablature marks the end of the colourist tradition in German keyboard music and the widespread acceptance of original Italian keyboard writing by Germans in the early Baroque period.

CLYDE WILLIAM YOUNG

Wolzanus, Nicolaus. *See* FABER, NICOLAUS (ii).

Wolzogen, Hans (Paul) Freiherr **von** (*b* Potsdam, 13 Nov 1848; *d* Bayreuth, 2 June 1938). German writer on music. His mother was the daughter of the Berlin architect and artist Karl Friedrich Schinkel; his father, Alfred von Wolzogen (1823–83), was for a time director of the Schwerin court theatre. Following his mother's death in 1850, Hans was brought up by Schinkel relatives at the Berlin Bauakademie, founded and built by his grandfather. He had no formal musical training, though both parents had studied singing with F.W. Jähns (the biographer of Weber). After being parted from his father in infancy, he rejoined him at the age of 14 in Breslau, where he began to develop a passion for theatre and opera. A performance of *Tannhäuser* there in 1864 made little impression, but two years later he heard it again in Berlin, along with *Lohengrin*; these experiences marked the beginning of what was to become a lifelong dedication to Wagner's works and ideology. As a student in Berlin (1868–70), Wolzogen cultivated an interest in historical linguistics as well as classical and Germanic mythology and literature. He also developed an enthusiasm for the ideas of Schopenhauer. All of this, and his 'strong inclination for *Weltanschauung*', prepared the way for his eager reception of Wagner's *Beethoven* essay and Nietzsche's *Birth of Tragedy*, followed by Wagner's earlier theoretical writings.

Wolzogen passed through Bayreuth in the autumn of 1872 with his new wife, Mathilde von Schoeler, and observed the early stages of work on the Festpielhaus. He had written his first piece of pro-Wagnerian journalism in response to the Berlin production of *Die Meistersinger* in 1870, and contributed articles on Wagner to the *Musikalisches Wochenblatt* in 1871–3. His first extended encounter with the composer occurred in 1875 during the rehearsals for the first *Ring* cycle. For that event he

produced his most influential contribution to the Wagner literature: the first of his thematic guides to the leitmotifs of the music dramas (1876). Although the term 'leitmotif' had been in circulation for some time, these guides contributed greatly to the dissemination of this influential concept. The first guide was expanded in 1877 and followed by similar guides for the other music dramas, up to *Parsifal* (1882). After the first Bayreuth festival, Wolzogen was charged with publicizing plans for a musical-dramatic conservatory that would propagate a true Bayreuth style of singing, acting and stagecraft. When these plans came to nothing, he helped instead to found a journal, the *Bayreuther Blätter*, which he continued to edit for 60 years until his death in 1938. Wolzogen settled in Bayreuth in 1877 and remained, together with Cosima Wagner, at the centre of the 'cult' of faithful Wagnerians whose conservative and nationalistic-chauvinistic aesthetic ideology was easily assimilated by the Nationalist Socialist regime in the 1930s. With H.S. Chamberlain and others of this group, Wolzogen promoted Arthur Gobineau's racial theories and the anti-Semitic polemics of figures like Adolf Stöcker and Ludwig Schemann.

After Wagner's death, Wolzogen continued to write extensively on the music dramas and the Bayreuth *Weltanschauung* in general, as well as on numerous other topics regarding German language, literature and theatre. He wrote a number of plays and opera librettos from the late 1880s to about 1900, mainly in an unassuming comic vein (out of consideration for Wagner's hegemony in the realm of serious music drama); a number of these were set by Hans Sommer (*Das Schloss der Herzen*, *Saint Foix*, *Münchhausen* and *Augustin*) but the most successful was *Flauto solo*, set by Eugen d'Albert (1905). Wolzogen also strove to integrate a strand of Protestant Christian doctrine into many of his writings, of which Wagner (even at the time of *Parsifal*) did not always approve. Wolzogen himself admitted that much of what he published was scarcely noticed outside the immediate Bayreuth circle. By his own account, his most widely read publications were the motivic guides (*Leitfäden*), his *Erinnerungen an Wagner* (1883) and *Richard Wagner und die Tierwelt* (1890).

His half-brother Ernst von Wolzogen (1855–1934) wrote the libretto for Strauss's *Feuersnot* (1901); he also founded the satirical 'Überbrettl' Cabaret in Berlin, for which Oscar Straus and Schoenberg, among others, wrote music.

THOMAS S. GREY

Women in music. Historical surveys of women in music have traditionally focussed on accounts of exceptional women as performers and composers. They are associated with the sizable literature on music as a traditional component of women's socialization and education. As a contemporary category of enquiry, the study of women in music is directly related to women's history, itself one of several scholarly research areas associated with the systematic study of gender. In this context, gender is treated as a socially constructed concept based on perceived differences between the sexes and a primary way of signifying relationships of power.

This article focusses on the collective experience of women within Western and non-Western musical traditions. For details of the lives and works of women musicians, see the articles on individual women.

See also FEMINISM; GAY AND LESBIAN MUSIC; GENDER; MUSICOLOGY, §II, 11; and SEX, SEXUALITY.

I. Historiography. II. Western classical traditions in Europe and the USA. III. World music.

I. Historiography

Western classical music is an art that has unfolded within the hierarchies of gender that mark our civilization as a whole. On the social structure of patriarchy rests the premise of the woman musician as a category in itself. The category has served as a way of both denigrating women, and valuing them and highlighting their accomplishments. The benefit of focussing on gender as the primary historical variable is to produce a history where little existed before. The danger is that women's achievements are compared primarily with those of other women and unduly segregated from mainstream narratives.

The category of women in music has provenance in both women's history and in Western music. W.C. Printz's *Historische Beschreibung der edelen Sing- und Kling-Kunst* (1690), the first major German history of music, uses two virtually synonymous terms for women – 'Frauenmusicantinnen' and 'Weiber Musicantinnen' – to index figures from antiquity and the Old Testament (e.g. Sappho, Corinna, Lamia, Miriam). These examples served as sources of legitimacy for women's creativity for centuries. Their names appear not only in music dictionaries, but also within the more general literature known in women's history as the 'catalogue' tradition – the many books, essays and treatises from antiquity to the present

where authors have written collectively about notable (and notorious) women, to express generalized views of the female sex and its achievements. A reference to Sappho, for example, appears in Boccaccio's *De claris mulieribus* (*c*1359) and in Christine de Pisan's *Le Livre de la Cité des Dames* (1405). In a French translation of Boccaccio (*Des cleres et nobles femmes*, *c*1470), Sappho is depicted with a harp, psaltery and organ, providing a rare illustration of a historical female musician. Miriam is celebrated in Bathsua Makin's *Essay to Revive the Antient Education of Gentlewomen in Religion, Manners, Arts, and Tongues* (1673).

In the 1700s, names of contemporary female musicians slowly made their way into music lexicography and history. Here professional opera singers far outnumbered women in any other category. Their visibility stands in sharp contrast to the haphazard historical treatment of female composers, few of whom appear in 18th-century musical dictionaries. Important precedents were set by the singular entry for Elisabeth Jacquet de la Guerre in Titon du Tillet's *Le Parnasse François* (1732) and by the addition of five more women in Walther's *Musicalisches Lexicon* (1732). Burney listed hosts of singers and two composers (Francesca Caccini and Barbara Strozzi). Calling 'Jacquette' de la Guerre 'a female musician', Hawkins also indexed categories for 'singers, female' and 'women singing', to comment on prohibitions in church and public performance. At the end of the century, more composers – around a dozen or so – appear in Gerber's *Historisch-biographisches Lexikon der Tonkünstler* (1790–92).

Subsequent patterns of inclusion for female musicians varied greatly in the 19th century. The four-volume revised edition (1812–14) of Gerber's dictionary doubled the number of entries, and more than 50 female composers are included in Fétis's *Biographie universelle des musiciens et bibliographie générale de la musique* (1835–44, 2/1860–65). Fetis's singular attention to repertory coincides with the emergence of a sufficiently large number of female composers to form a distinct critical category. In Germany, the term 'Damenmusik' ('women's music') is found as early as August 1811 in the *Allgemeine musikalische Zeitung*: it was used pejoratively to indicate a dilettante. In this case the anonymous critic admitted he approached a piano sonata by a female composer with 'a feeling of dread', only to find himself pleasantly surprised by (yet another) exception to the rule of 'Damenmusik'. Far more charitable assessments grace the first known article on female composers, where its author, Maurice Bourges (J1847), linked his topic to the lively disputes over 'l'emancipation de la femme'.

Despite the increase in numbers of women composing music in the 19th century, mainstream recognition in dictionaries and histories on the whole slowed rather than accelerated. Grove included only 29 female composers in his first *Dictionary of Music and Musicians* (1879–89). Within music history, female composers vanished from narratives of stylistic periods represented by great men. Ambros, for example, mentioned only one female composer (Caccini) in his *Geschichte der Musik* (1862–8). In his widely known *Illustrierte Musikgeschichte* (1880–85), translated into several languages and known in England and the USA as *History of Music* (1882–6), Emil Naumann wrote that 'all creative work in music is well-known as being the exclusive work of men'. Such discrepancies and pronouncements point up the historical contingencies that affect the process of recognition.

Between 1870 and 1910 cultural feminism produced for the first time a literature to challenge the limits of such music history. The topic of 'women in music' was explored in various formats, among them dictionaries (Michaelis, C1888, is the earliest), celebratory essays about 'women's work in music', and polemics, where authors rebutted theories of biological determinism with sociological critiques of the effect of class and gender on musical creativity. Two important articles were associated explicitly with feminism. In the USA, the Association for the Advancement of Women sponsored Fanny Ritter's *Woman as a Musician* (1876), a work indebted to Margaret Fuller's *Woman in the Nineteenth Century* (1845). In Germany, Jessel's monograph *Warum giebt es so wenige Componistinnen!* was published in 1898 by the Frankfurt branch of the Allgemeine Deutsche Frauenverein.

Musicological scholarship between 1900 and 1940 witnessed an important new emphasis on a collective approach to women's history. Two pioneering generations of female musicologists, among them Marie Bobillier (publishing as Michel Brenet), Yvonne Rokseth and Kathi Meyer, produced studies of women's musical institutions such as the convent and the female choir, marshalling evidence from literature and iconography to support the social vitality of women's roles. Influenced by Meyer's work, Sophie Drinker expanded her research (F1948) beyond a particular institution or era, thus pioneering the historiography of women and music as a topic in its own right. However, the implications of such work had little impact on mainstream musicology until the end of the century.

In the 1970s the revival of feminism produced an explosion of activity in revisionist history and a new discipline initially named 'women's studies'. Here much of the new scholarship has been advanced by female historians, who after 1970 received professional training in musicology in greater numbers than ever before in the USA. By 1980 academic courses in 'women in music' began to be taught in American universities; their subsequent proliferation in the USA and European countries, in addition to general interest, created a demand for scores and sound recordings. In the 1970s some recording companies, such as Leonarda (founded by Marnie Hall, 1977), began to specialize in historical and contemporary work by women. Furore Verlag, founded in 1986, was the first publishing house to concentrate on printing music by, and books about, women composers. In the 1980s some exceptional recordings of this new repertory, pioneered by outstanding performer-advocate soloists and ensembles, moved into the mainstream: the success of the group Sequentia (founded by Benjamin Bagby and Barbara Thornton), known particularly for their recordings of music by Hildegard of Bingen, is a case in point.

By 1990 women's history in music had developed within three interlocking categories – repertory, social process and ideology. In respect of the essential enterprise of investigating a neglected repertory, much music by women composers is still unexcavated. The comprehensive *New Grove Dictionary of Women Composers* (1994) contains over 900 entries. A second research trajectory has concentrated on social process, that is to say, the

impact of gender on the diverse ways music is transmitted through a culture. This research focusses on restoring historical 'agency' to women and investigating the degree of their access to sophisticated modes of cultural production, notably within separatist institutions. One example is the current boom in research on convents. Other scholars have synthesized interdisciplinary evidence from diverse fields, such as archaeology, iconography and literary sources, to reconstruct unwritten traditions and performing practices where women played important roles. By implication such methods temper the exclusivity of notation-based style analysis and theory. Even now, however, the history of music as an accomplishment for the privileged (i.e. the highly educated, middle- or upper-class) woman has yet to be comprehensively described. Here one confronts ideology at every turn, that is, the prescriptive literature of musical socialization, education, aesthetics and theory. All these are influenced by the duality of gender and its social construction of 'masculine' and 'feminine'. In this area Rieger (F1981), Citron and Solie (both F1993) have made pioneering contributions. Ideology links women's history with the history of sexual difference, research areas that overlap but are not identical. Here McClary (F1990) has led the way.

The process of integrating women's history into mainstream narrative texts, and into the methodology of historiography itself, remains a profoundly important challenge. Nevertheless, the study of gender in music from various perspectives and through diverse approaches is now more widely countenanced.

II. Western classical traditions in Europe and the USA

1. Antiquity to 500 CE. 2. 500–1500. 3. 1500–1800. 4. Since 1800.

1. ANTIQUITY TO 500 CE. Music played an integral role in the cultures of ancient Greece and Rome. It was performed at various public cultural events, such as religious rites, life-cycle rituals, plays, festivals and competitions. In private life, it provided diversion at home; in larger social settings, professional musicians entertained at banquets and symposia. Because music formed an important part of education in ancient Greece, a painting of a school scene was as likely to feature a lyre as it was a scroll. Our understanding of the extent and nature of women's participation in all these areas rests primarily on iconography, supplemented by archaeological evidence and anthropological interpretations.

Women's choruses played a highly visible role in festivals and rituals. One body of evidence comes from the imagery on 5th- and 6th-century BCE Athenian vase paintings. Of some 100 surviving vase paintings depicting choruses, nearly 80 show choruses of girls or women. Even in Athens, where women led the most restrictive lives of any in the Greek city-states, they were nevertheless involved in nearly half of the city's 30 annual festivals. Such rituals, where choral dance and music merge, could involve specific poetic forms, among them *epithalamia* (choral wedding songs) and *parthenia* (virgins' songs).

Women's choruses also participated in musical festivals and competitions. From Sparta, the only city-state that granted women citizenship, comes an account of one such performance. Barker (G1990) described a 7th-century female chorus, who performed a *partheneion* by the poet-composer Alcman as part of a Delian festival, where the singers refer unambiguously (although the matter is much discussed) to a rival choir with whom they compete.

Athenian vase paintings also depict women in scenes that regularly include musical instruments – in interiors, where the aulos, kithara and lyre are common elements of the iconography of respectable womanhood, and at banquets and symposia, where the aulos and harp are played by *hetairai* (courtesans), who were often slaves. These social contexts for music-making by women provoked much comment from the Greek philosophers. Both Plato (in *Protagoras*) and Aristotle (in the *Politics*) differentiated respectable domestic female musicians from entertainer-musicians.

The relationship between a woman's public performance and outcast sexual status was to persist for many centuries – a taboo that belied a more complex reality. Some evidence from Hellenistic Greece suggests the possibility that professional women musicians could make an honourable career of performing in theatres and at festivals. In 86 BCE one Polygnota, daughter of Socrates of Thebes, was paid 500 drachmas for her kithara-playing and singing at Delphi; and a 2nd–3rd century CE gravestone carries the inscription 'Eutychousa and Nais, unfortunate; sisters, both musical, both eloquent, both trained to play the harp and the lyre, here the earth covers them gently, O stranger' (Lefkowitz and Fant, G1982).

From Greek antiquity comes the legendary figure of the poet-singer Sappho of Lesbos, whose remarkable innovation of personal monody made her one of the most famous poets in Western culture. 'Come, divine lyre, speak to me and find yourself a voice', Sappho wrote, and a famous vase painting from around 460 BCE depicts her holding a barbitos. After Sappho, female poet-musicians appear in the Greek world in every century.

From classical Greece also comes a legacy of beliefs linking musical aesthetics with sexual difference. Plato's comments on ethos and musical style included warnings to men that music could induce effeminacy and equally stern admonishments to women about sexual licentiousness. Hence his recommendation (in the *Republic*) for antidotes of noble and manly music for men and modest submissive songs for women. Men should also avoid excessive expressions of grief, such as 'weak and feminine' musical lamenting (Sultan, G1993).

Old Testament references describe women singing, playing instruments and dancing. Miriam's Victory Song at the Red Sea (which extols the defeat of the Egyptians) is the most influential portion of scripture: 'Miriam the prophetess, Aaron's sister, took a timbrel in her hand, and all the women went out after her in dance with timbrels. And Miriam chanted for them, "Sing to the Lord, for He has triumphed gloriously; the horse and his rider He has thrown into the sea"' (*Exodus* xv.20–21). Of Miriam, so prominent in Handel's oratorio *Israel in Egypt*, Fanny Ritter wrote (F1876): 'Who can say that her song of triumph was not her own composition?'.

Miriam's Victory Song has been at the centre of the recent explosion of Bible research by the first modern generation of female scholars and theologians. Among the Dead Sea Scrolls are fragments that give evidence of a longer song of Miriam. Was Miriam's Victory Song a distinctive women's genre, a drum-dance-song ensemble in which only women were the instrumentalists? Meyers (1993) took this position, supporting it with archaeological evidence of Syro-Palestinian terracotta figurines, typically found at excavation sites from the Second Iron Age (which corresponds roughly to the period of the First

Temple and the Monarchic Period, 1000–540 BCE). Many female figures hold hand drums, others lyres or double flutes. To Meyers such evidence suggests women's musical participation during a period when biblical references to female musicians diminished.

The participation of women in formal Jewish liturgy was another matter altogether. In the early Rabbinic period (*c*300–600 CE) Jewish scholars promulgated various prohibitions against *kol isha* (Hebrew: 'voice of woman'). A phrase in *1 Samuel* – 'Listening to a woman's voice is sexual enticement' – supported the separation of sexes during worship and prohibitions against female leadership in liturgy. Because female responses to psalms chanted by male voices were permitted, one finds occasional references to schismatic Jewish cults where both men and women had separate choirs, each led by male and female preceptors. The Jewish Hellenistic philosopher Philo described a service of the *therapeutae* where hymn- and psalm-chanting occurred between two such antiphonal choirs. Many centuries later, in the German town of Worms, a group of women had their own synagogue, adjoining that of the men. A 13th-century tombstone commemorates 'the eminent and excellent lady Uranya bat harav Avraham who was the master of the synagogue singers. She also officiated and sang hymns with sweet melodies before the female worshippers. In devout service may her memory be preserved' (Taitz, H1986).

In the early centuries of Christianity, the Church Fathers intensified the polemics surrounding the moral censure of professional female musicians and the prohibitions from Jewish exegesis on *kol isha*. Patristic authorities elaborated St Paul's famous dictum 'mulieres in ecclesies taceant': 'Let your women keep silent in the churches, for they are not permitted to speak, but they are to be submissive, as the law also says' (*1 Corinthians* xiv.34). Cyril of Jerusalem (*c*315–86) advised nuns to pray 'so that their lips move, but the ears of others do not hear. . . . And the married woman should do likewise'. The fear that secular music harboured sexuality and subversion within it looms large in this passage from the Church Father Pseudo-Basil:

> You place a lyre ornamented with gold and ivory upon a high pedestal as if were a . . . devilish idol, and some miserable woman, rather than being taught to place her hands upon the spindle, is taught by you . . . to stretch them out upon the lyre. Perhaps you pay her wages or perhaps you turn her over to some female pimp, who, after exhausting the licentious potential of her own body, presides over young women as the teacher of similar deeds.

In practice, the early centuries of Christianity heard *vox feminae* more than these writings suggest. The testimony of the Spanish pilgrim Egeria of around 400 CE authenticates the 'continuous psalmody' practised by the 'monazontes' (monks) and the 'parthenae' (nuns) in antiphonal style at a Jerusalem church. But the writings of the Church Fathers were to remain authoritative sources for social and intellectual control in subsequent centuries. A thousand years later, in *De institutione feminae christianae* (1523), a book whose popularity nearly matched that of Castiglione's *Il libro del cortegiano*, Juan Louis Vives lamented the 'intolerable degree of insolence' of women who 'did not read or hear tell of those splendid exhortations of the Fathers of the Church concerning chastity, solitude, silence and feminine adornment and attire'.

2. 500–1500. The monastic movement, which was formalized in the 6th century, played a crucial role in women's music history during the Middle Ages. The Rule of St Benedict (*c*530 CE) established convents as well as monasteries, while around 512–34 Caesarius, Bishop of Arles, wrote the first rule especially for a women's community. Administrative structures were similar, so that abbeys had an abbot or abbess, a prior or prioress, and a cantor or cantrix. Despite the fact that most positions within the church hierarchy would have remained closed to women, that monasteries would have been more powerful, numerous and wealthy than convents, that equivalent educations were not provided and Latin not routinely taught, convents nevertheless functioned like monasteries in the propagation and preservation of medieval music.

Some exceptional convents were famous centres of learning. Two organa survive from the celebrated illuminated religious encyclopedia *Hortus deliciarum* (*c*1167–85) by Herrad of Landsberg which is no longer extant. A major 14th-century manuscript of polyphony comes from the Spanish convent of Las Huelgas, Burgos. The 15th-century Utrecht Liederbuch comes from a Franciscan nunnery. Yardley (1986) listed 14 additional manuscripts from convents containing music from the 12th century to the 15th.

Convents offered some women access to musical literacy. The first surviving music by a female composer is a set of troparia by Kassia (*b* 810), a renowned Byzantine composer of chant. The most stunning achievement of the era belongs to the abbess Hildegard of Bingen, a leading figure in 12th-century culture and one of several prominent female mystics in the 12th and 13th centuries. Music history has long acknowledged her existence, but only recently her stature: Hildegard created the largest single body of attributed monophonic chant of the Middle Ages. She also wrote the first allegorical morality play (*Ordo virtutum*), the only medieval music drama in which both the music and the text are attributed. Like Sappho and Miriam, Hildegard entered the world of illustrious paradigms. In 1523 Vives wrote that 'the letters and learned books of the German maiden, Hildegard, are in everyone's hands' (*De institutione feminae christianae*), yet only in the last two decades of the 20th century did her musical genius win recognition beyond the scholar's circle.

How much new music was created more routinely by other religious women is the subject of research often focussing on the special ceremonies unique to convent life (such as the consecration service of Virgin Brides to Christ). Manuscript corroboration can be found in many countries. Over half the antiphon repertory in the music of St Birgitta of Sweden (1303–73) is unknown outside its main source, the *Cantus sororum*. The Dutch nun Suster Bertken (1426/7–1514) published eight sacred songs, the melody of one of which survives through its concordance in the Utrecht Liederbuch. In England, chants unique to specific monasteries survive in a 15th-century hymnal from Barking Abbey and from a Benedictine nunnery at Chester (including the still familiar carol *Qui creavit celum*).

Convent life and culture varied greatly by era, region, order and class. Some convents served the daughters of the rich, forced to take vows by their families (indeed, the theme of the forced nun appears in contemporary popular

songs); others were shelters for the random poor. The discipline and control exercised by local ecclesiastical authorities varied as well. As early as 789 CE Charlemagne issued an order that 'no abbess should let those under her . . . dare to write love songs [*winileodas*]'. This points not only to now buried repertories but to social behaviour more diverse and less predictable than church doctrines suggest. By the 12th century the ubiquitousness of the religious woman as music teacher modified the iconography of La Donna Musica – Lady Music – which moved from allegory into contemporary allusion. The mid-13th-century Florentine manuscript known as 'F' contains an illumination of the three Boethian categories of music: one of the figures is dressed in the garb of a convent music teacher. Awareness of all these factors has changed the climate of scholarship around medieval music to some extent, so that no longer is Gregorian chant defined as 'single-line melody sung by men', as it was in 1980 in Grout's influential *History of Western Music*.

More questions than answers still surround the practice of polyphony in convents. Ecclesiastical decrees suppressing polyphony imply conventions of musical performance already in place. In 1261 the Archbishop of Rouen forbade the convent at Montivilliers to continue to perform conductus and motets. Yet this convent enjoyed enough of a reputation for knights in the *Roman de l'Escouffe* to attend a Mass sung by the Montivilliers 'nonnains'. The Las Huelgas Manuscript contains a two-part solfège exercise annotated with directions for convent use. Still awaiting more historical investigation is a late 14th-century manuscript 'Notitia de valore delle note del canto misurato' from a Florentine convent, which teaches 'musica mensuralis', including the reading and composing of motet tenors.

With respect to secular music, four important currents flow through the period 1000–1500: (1) the continuation of employment as musician-entertainers; (2) the representation of women's experience in sophisticated genres, producing 'women's song' in every medieval Romance-language repertory; (3) the emergence of the 'trobairitz' and female trouvère; and (4) the pervasive musical activity of amateur female musicians, both in urban social life and in court culture.

Working-class women made livings as professional musicians – both as freelance, sometimes itinerant, minstrels (known as *joglaresse* in Provençal, or *jougleresse* in Northern French) and as court entertainers. In the French *romans*, heroines have adventures in which they darken their skin to disguise themselves as Moorish *jougleresses* (*Aucassin et Nicolette*) or *menestrelles* (*Galeran de Bretagne* and *Guillaume de Dole*). Illuminations in the late 13th-century Cantigas de Santa Maria include a depiction of a female servant-lute player entertaining two ladies. In other 13th-century French manuscripts illuminations realistically portray women musicians playing the vielle, harp, rebec and gittern.

Most guilds, according to Etienne Boileau's *Livre des metiers* (1270), accepted women. In 1321 eight women were among the 37 who signed the statutes of the professional guild of *menestriers* (minstrels), whose articles of incorporation mention 'menestreus et menestrelles' and 'jougleurs et jougleresses'. In England, the Musicians' Company of London (founded 1472) included women as well as men. Sometimes an obscure source provides a confirming detail. For example, the household accounts of Dame Alice de Bryene, a wealthy English widow, mention payment to 'Margaret Brydbek, one harper' at a New Year's banquet in 1413 (Amt, 1993). Diverse archives from the courts of Louis IX, of Burgundy, of the Duke of Berry and of Savoy provide similar corroboration, mentioning employment of a 'cantatrix' or 'chanteresses' and 'menestrières'.

Between 1000 and 1500, as vernacular artistic forms gained literary prominence, the medieval lyric, which was rooted in centuries of aural tradition as well as classical literary practice, developed into formal genres in several Romance languages. With that came a significant literary corpus for the representation of women's experience and sexual love. Love songs written from the point of view of a female subject appear as *cantigas de amigo* in Portugal, *Frauenlieder* in Germany and *chansons de femme* in France. Songs about pregnancy appear in *Carmina Burana*. Social critiques of marriage appear in the French *chanson de malmariée* or its Italian counterpart the *malmaritate*. Women in French *romans* often sang a *chanson de toile*, a weaving song that spins a tale of unrequited love. The genre of 'women's song' is found in 15th-century Italian chansonniers.

Who sang such songs? Who listened? As an accomplishment for an ideal heroine or a socially ambitious young woman, music was promoted in literature and in advice books. In around 1200 Garin lo Brun's *Ensenhamens* urged women to sing and recite poetry for their guests. The *Ensenhamen de la donsela* by Amanieu de Sescars (*c*1291–1295), a Catalan, explicitly suggests that young women practise the arts of the 'trobairitz' and write 'jocs partis' (jeux-partis, or love-debate duets), thus endorsing a high level of cultural literacy. The subject of Chretien de Troyes' *Philomena* composed poetry and played the psaltery, vielle and other instruments. In Gotfrid von Strassburg's *Tristan*, Isolde achieves the musical skill one associates with Orpheus, enchanting men (instead of beasts) through her music: she fiddles an *estampie*, plays the lyre and harp expertly, and sings a variety of chansons, including a pastourelle, rotrouenge and rondeau, some of which she may have composed.

Thus the step from 'chansons de femme' to actual female poet-musicians is not great. Alongside the troubadour is the 'trobairitz', a term found in the *Roman de Flamenca* (*c*1250). About 20 female poets flourished between 1170 and 1260, among them Alamanda, Azalais de Porcairages, Maria de Ventadorn, Tibors, Castelloza, Garsenda and the Comtessa da Dia. Dominating the total known corpus of about 40 poems are two genres – the *tenso* (debate dialogue), and the *canso* (love song). Only one *canso* by an Occitanian composer, the beautiful *A chantar* by the Comtessa da Dia, has survived with a melody (*F-Pn* fr.844). Of around 15 chansons by female trouvères, five survive with melodies. Coldwell (1986) transcribed one chanson each by Maroie de Dregnau de Lille and Blanche de Castile and a duet by Dame Margot and Dame Maroie, a rare example of a jeu-parti. 13th-century chansonniers containing this repertory include the famous Manuscript du Roi (*F-Pn* fr.844, *c*1246–1254); the Chansonnier cangé (*F-Pn* fr.845); *F-Pn* n.a.fr.21677; *F-AS* 657 (*c*1278); *I-Rvat* Reg.Lat. 1490; and the Chansonnier de Noailles (*F-Pn* fr.12615). The composing 'domna' (lady) was, according to the *vidas*, most often a noblewoman. But that does not mean she wrote for herself alone: a 13th-century Italian manuscript

(MS H) is exceptional in depicting eight trobairitz, significantly seen in performance poses, with hands outstretched toward an imaginary audience, or holding a pointer.

Although the trobairitz and women trouvères contributed perhaps 1% of the total repertory, their symbolic stature as the first female composers of extant European secular music has attracted many historians and literary critics. In 1935 Rokseth asserted the 'fraîcheur' and 'sincérité' of the chansons of the Comtessa da Dia. More recently, literary critics have searched the repertory to demonstrate 'écriture féminine', that powerful if ambiguous idea of sexual identity inscribing itself into art.

Why the 12th century produced such enduring examples of women's musical creativity as Hildegard of Bingen and the trobairitz remains unexplained. It has been asserted (in landmark scholarship by Kelly-Gadol, H1977) that 12th-century cultural achievements paralleled the comparative growth in power and wealth of medieval women in general, particularly in Occitan, where the trobairitz resided. No comparable figures emerge within the repertory of polyphonic music until three centuries later.

It is true that anonymity was the rule rather than the exception for both men and women composers until the 15th century (e.g. there are no named composers for the 13th-century motet repertory). For women, moreover, conventions of modesty and class restraints increased the likelihood of their donning the protective veil of anonymity. That there were fewer women composers then (as now) also seems likely, a fact related directly to their subordination in society. Notated polyphony in Western music, which was becoming increasingly important, depended precisely on the kinds of training women usually did not receive – study at a cathedral school, or apprenticeship to a master player.

The lack of compositions attributed to women has occasionally been interpreted as evidence of their exclusion from late medieval musical life. But too much circumstantial evidence shifts the burden of proof away from assumptions of exclusion towards more sophisticated interpretations of performing practice. Many examples of literary allusion and visual imagery document the ubiquitous presence of women in the musical culture of the late Middle Ages. It is significant that in Boccaccio's *Decameron* women musicians outnumber men.

The tradition of music as an élite accomplishment sanctioned their training on instruments (like the vielle or harp), especially to relieve the tedium of young girls 'who would not last shut in' – that is, sequestered in the home – without some diversion (Francesco da Barberino, *Reggimento e costumi di donna*, 1316–18). This early Italian treatise devoted to women's socialization contains one of the earliest uses of the word 'chamber' to describe musical activity in a space that links intimacy with emotion: 'E questo canto basso, chiamato camerale, e quel che piace e che passe ne' cuori' ('And this soft singing style, called of the chamber, is what people like and will affect the heart'; Beck in Schliefer and Glickman, A1996).

The brilliant courts, so important to the prestige of feudal and monarchical governance, required both women and men. Music as entertainment, as symbol of wealth and royal breeding, depended on the female courtier as much as on her male counterpart. Specialized studies of particular courts, such as that of Princess Marguerite of Scotland, where the creative work of several women poets has been documented, may eventually also unearth names of women composers.

Some noblewomen became important musical patrons. The Mellon Chansonnier (*US-NHub* 91) was probably prepared as a gift to Beatrice of Aragon, reflecting her tastes and interests. The chanson album of Marguérite of Austria, prepared under her direction, includes her poetry and perhaps even a composition of hers (*B-Br* 228 and 11239). Other notable patrons include Marie of Burgundy, Anne of Britanny and, above all, Isabella d'Este. Isabella played a formative role in the development of the frottola, employing women (among them Giovanna Moreschi, the wife of Marchetto Cara) as professional singers at the Mantuan court. Manuscript corroboration for the use of women's voices in the frottola survives (*I-Fn* Magl. VII. 735, *c*1510).

3. 1500–1800. The early modern period witnessed a number of important developments. Precedents of all sorts were set, among them access for women to professional performing careers on stage and in the concert hall, as well as to publication. Nothing remotely resembling equality of education or opportunity prevailed, but new social institutions, like the salon and the boarding-school, mediated boundaries between public and private musical expression. The special historical position music occupied within women's separate and unequal education had far-reaching consequences. Amateur musical life for both women and men in this period can hardly be understood without reference to the voluminous literature of gender ideology, ranging from the polemical 'Querelle des femmes' (the debate over equality of the sexes and the nature of 'woman', inaugurated *c*1400 by Christine de Pisan and begun in earnest *c*1500) to the didactic treatises on educating daughters.

The publication record for female composers begins in 1557 with an organ setting of the hymn *Conditor alme* by the Spanish nun Gracia Baptista in Luis Venegas de Henestrosa's *Libro de cifra nueva para tecla, harpa, y vihuela*. In 1566 four madrigals by Maddalena Casulana appeared in the collection *Il desiderio*, the earliest printed vocal music by the first woman to consider herself a professional composer. Outside Italy, other countries followed suit in the next century: Germany in 1651, with hymn melodies by Sophie Elisabeth, Duchess of Brunswick-Lüneberg, one of the earliest documented German female composers after the Middle Ages; England in 1655, with the three songs by Mary Dering included in Henry Lawes's *Second Book of Ayres, and Dialogues*; and France in 1678, initially with *airs* by Mme Sicard printed in a Ballard collection, but more substantively in 1687 with a collection of keyboard music by Elisabeth Jacquet de La Guerre. In addition to Jacquet de La Guerre, a celebrated professional performer and composer in diverse genres ranging from harpsichord music to opera, a few other women gained exceptional professional renown as composers. Among others whose music is now enjoying active rediscovery are Francesca Caccini, Barbara Strozzi and the prolific nun-composer Isabella Leonarda.

The most sweeping and radical change in the status of women musicians was the result of their increased participation in professional singing. In the 1580s the success of the 'concerto delle donne' – a virtuoso female vocal ensemble at the Ferrara court, whose repertory of madrigals was fed by such composers as Luzzaschi,

Marenzio and Monteverdi – propelled into prominence the novel option of exclusive women's voices. The Ferrara ensemble, which initially included Livia d'Arco, Anna Guarini, the famous Laura Peverara and, later, Tarquinia Molza, was emulated at other northern Italian courts. Such ensembles offered greater opportunities for women to be employed at court specifically as musicians.

The recognition of the female voice as a separate musical entity as distinct from other treble options (e.g. boy soprano, or castrato) had enormous consequences for the development of singing in general, as well as for composition, where it shaped the progressive stylistic trajectory of late Renaissance Italian vocal music, first in the madrigal and later in opera. Opera unfolded through the assimilation of 'woman' as both subject and agent. As subjects, operatic heroines (whose thematic weight made their names the very titles of operas) embodied female archetypes often popularized in the catalogue tradition of famous or notorious women, familiar from myth (Eurydice, Dido) and antiquity (Poppaea). Over 30 of Boccaccio's 106 subjects in *De claris mulieribus* were transformed into operatic characters on the 17th-century Venetian stage.

As an agent, the woman singer commanded 'a rhetorical authority, a previously unknown power to move and seduce audiences'. Access by Italian women to the public stage had originated in the 16th-century *commedia dell'arte* (where Isabella Andreini was a pioneer). With the onset of commercial public opera in Venice in 1637, the doors opened to greater fame and fortune. Singers such as Vittoria Archilei, Laura Guiddiccioni Lucchesini and Andriana Basile were followed by Anna Renzi, the Venetian soprano whose career created the typology of the prima donna in the burgeoning opera industry of the 1640s. With the dissemination of Italian opera throughout the rest of Europe, new opportunities abounded.

Probably the first English female singer to appear on a professional stage was Catherine Coleman in 1656; by 1662, a royal warrant decreed that women actors rather than boys were to play female roles. Early 18th-century Londoners celebrated Catherine Tofts as one of England's first native prima donnas. Later in the century, Mme Mara (Gertrud Elisabeth Schmeling) was the first international opera star of German birth. Largely excluded from royal appointments at Louis XIV's court, French women gained access to the stage through the Académie Royale de Musique, first as dancers, later as singers. Their subsequent participation as singers in opera in Paris and at Versailles, and as instrumentalists at the Concert Spirituel, has been well documented. Some 18th-century women gained real international fame, among them the singers Faustina Bordoni and Francesca Cuzzoni.

To compose opera and get it produced, greater obstacles had to be surmounted, but a few women gradually began to succeed in this ambitious genre, as well as in the related genres of oratorio and *opéra comique*. The historical record in Italy is somewhat paradoxical. While Venetian women wrote about 50 opera librettos between 1700 and 1750 (over half the total for Italian female authors as a whole – see Hufton, T1996), few women after Francesca Caccini composed *opera seria* (Antonia Bembo's opera *Ercole amante*, written for Louis XIV in 1707, remains unperformed). Between 1670 and 1724, four Italian women composed oratorios and other dramatic works performed at the Imperial Chapel in Vienna. No music has survived for *Le sacre visioni di Santa Teresa* by the Austrian nun Maria Anna de Raschenau, but there are extant oratorios by Catterina Grazianini, Maria Grimani and Camilla de Rossi (notably Rossi's *Il sacrifizio di Abramo*, 1708). In France, Jacquet de la Guerre, Mlle Duval, Henriette de Beaumesnil and de Vismes composed operas for the Académie Royale de Musique, in 1691, 1736, 1784 and 1800 respectively. The long span between these works suggests how hard it was to get opera produced. Even so, occasional references to other obscure figures suggest a still relatively unexplored breadth of participation by women. In the Netherlands, the great 18th-century *epistolaire* Isabelle de Charrière (or Belle van Zuylen) wrote several operas: fragments of her *L'Olimpiade* are extant. Also worthy of mention is her compatriot, the aria composer Josina Boetzelaer. In France, women achieved greater visibility writing *opéra comique*. Henrietta de Beaumesnil had six works produced in Paris between about 1781 and 1792, and Julie Candeille became famous for her *Cathérine, ou La belle fermière* (1792), which received 113 performances during the Revolution. Candeille justified her career in 1795 by claiming traditional feminine virtues: 'No insensitive pride, no arrogant pretension, has ever guided me in the service of the arts. . . . Submissiveness and necessity led me to the theatre; a propensity for such work and a love of it emboldened me to write. These two resources, united, are my sole means of survival' (Sadie, I1986).

Opera and oratorio were 'companionate' musical genres, that is, they allowed for equal participation from both sexes. It was to take many more decades for other 'mixed' parallels to emerge. Johann Hiller founded a singing school open to women in 1771 in Leipzig, to oppose the exclusion of women from choral singing, especially in church. His most famous pupil was the lied composer Corona Schröter. A parallel endeavour in Berlin was the Singakademie, founded by C.F.C. Fasch in 1792. That year, perhaps for the first time in Germany, a mixed chorus of adult voices presented a public choral concert.

In Catholic countries, and in Italy in particular, convents saw sophisticated music-making throughout the 17th century. Over half the women whose works were published in Italy between 1566 and 1700 were nuns. In the post-Tridentine period, before the 18th-century decline of the Italian convents, their records include thousands of organists, singers and composers. Despite the Council of Trent's ban on polyphony in convents, its installation of 'clausura' or total cloistering, as well as continued ecclesiastical decrees attempting to control musical expression, at least 26 Italian cities had musically important convents. Some even enjoyed international reputations. In their writings, Bottrigari and Artusi immortalized the orchestral concerts at S Vito in Ferrara, where Raffaella Aleotti, a member of the convent, composed the earliest printed collection of sacred music by a woman. Other musically renowned convents include S Geminiano in Modena; many in Milan, but especially S Radegonda (where Chiara Margarita Cozzolani published music); in Bologna, S Lorenzo (where Monteverdi's motets were sung) and S Cristina della Fondazza (home of the composer Lucrezia Vizzana); and S Orsola in Novara (home of the prolific Isabella Leonarda).

Notable French counterparts include the abbey at Feuillants (where the famous singer Anne de la Barre appeared in 1656); the Abbaye Royale des Religieuses de

Longchamp, Port-Royal, Assomption, and the religious but uncloistered community Petite Union Chrétienne des Dames de Saint Chaumont, where Antonia Bembo composed motets and psalm settings.

A unique institution in Venice was the 'ospedale' (a state-run shelter for chronically ill, poor and homeless children), which provided the first formally organized music education for women outside the convent. Four women's *ospedali* became famous musical centres: the Incurabili, Pietà, Derelitti and Mendicanti. Unencumbered by Vatican rules, they trained choruses of young girls and offered private lessons on instruments and in singing. By 1630 some were offering instruction to non-resident girls, and accepted as boarders female students, *figlie di spezi*, who paid for tuition. Between 1585 and 1855 the *ospedali* employed about 300 male professional musicians (among them Legrenzi, Vivaldi, Galuppi and Hasse) and over 70 *maestri di cappella*, who also held prestigious posts at establishments with high cultural visibility (Burney's accounts of them are particularly notable). These composers produced a specialized repertory of psalms, motets, liturgical dramas and oratorios (often about female saints and biblical heroines) for women's voices, which still remains largely unintegrated into our understanding of church music of the period. From the ranks of around 850 *figlie di coro* came some notable musicians, including Anna Maria della Pietà, the renowned leader of the orchestra at the Pietà, for whom Vivaldi wrote 28 concertos, the opera singers Nancy Storace and Faustina Bordoni; and the composers Maddalena Laura Lombardini Sirmen and Antonia Bembo. Even so, artistic freedom did not prevail at the *ospedali*, which decreed marriage or the convent for its graduating wards and limited autonomy in music by curtailing composition. A letter from Lavinia della Pietà written some time before 1800 offers a rare glimpse into the mentality of a rebel (Berdes, I1996):

> You must understand that I could not do otherwise [than compose in secret]. . . . They would not take me seriously, they would never let me compose. The music of others is like words addressed to me; I must answer and hear the sound of my own voice. And the more I hear that voice, the more I realize that the songs and sounds which are mine are different. Woe betide me should they find out.

At courts, noblewomen across Europe were musically active as performers, composers and patrons. In the 17th century, both Catherine de Medici and Anne of Austria sponsored their own women musicians. In the 18th century, Anna Amalia, Princess of Prussia, and Anna Amalia, Duchess of Saxe-Weimar both composed music; the Holy Roman Empress Maria Theresa extended patronage to Gertrud Mara and Maria Theresia von Paradis; Marie Antoinette brought the prodigy Lucile Grétry to court; and Maria Antonia Walpurgis, Electress of Saxony, and Wilhelmina, Princess of Prussia, both composed opera. Such regal examples reinforced music as a paradigm of courtly accomplishment, which spread beyond the upper classes to the new urban élites. As material life improved and literacy increased, more families aspired to the social mobility that educated daughters represented.

In a period that differentiated sharply between the humanistic, Latin-centred university education available to men and the informal, unsystematic education offered to women, music loomed much larger in the training of women, because they had few opportunities to learn much else. In Italy it made them employable at court. An especially detailed treatise by Anibal Guasco, *Ragionamento a D. Lavinia sua figliuola della manera del governarsi ella in corte; andamo per Dama* (1586), describes a sophisticated training in singing and in playing several instruments, as well as counterpoint. Few amateurs could match the standards of the Italian female courtier described here, but they tried. An ideal day in the life of a lady could, according to Pierre Erondelle (*The French Garden: for English Ladyses and Gentlewomen to walk in, or a Sommer Dayes Labour*, London, 1601), run like this (Austern, I1989):

> Lady . . . At what houres do your Maisters come? Charlotte [the eldest daughter]. Our dauncing Maister commeth about nine a clocke: our singing Maister, and he that teacheth us to play the virginalles, at tenne; he that teacheth us on the Lute and the Violl de Gambo, at foure a clocke in the after noone: and our French Maister commeth commonly betweene seaven and eight a clocke in the morning.

The education of daughters kept musicians employed. Henry Lawes survived the demise of the court of Charles I because, as Hawkins wrote, he 'betook himself to the teaching of ladies to sing'. In Vienna, Haydn received free board in exchange for teaching the harpsichord to Marianne von Martínez, who became a distinguished composer, leaving the largest extant body of music by a Viennese woman in this period. The demand to train daughters on appropriate instruments, such as the harp, lute and keyboard, implicates gender in many ways. The very names for early keyboard instruments – 'virginalls' in English and 'Jungfernklavier' in German - suggest the pervasive stereotyping of that instrument. In 1612–13, the humanistic title of the first British collection of keyboard music, *Parthenia*, emphasized 'virginal' contexts even further. Similarly, the lute was feminized to the extent that Thomas Mace (*Musick's Monument*, 1676) felt it necessary to refute the stereotype of the lute as a 'weak, feeble, soft instrument', in short, a 'woman's instrument'. Was it not difficult to master? If so, then 'it cannot so properly be called a woman's instrument, in regard they are the weaker vessels, and therefore not so fit to set upon and attempt the mastery of things of such difficulty'.

.The long tradition of music within female education buttressed training in new institutions such as the boarding-school and the salon, which were overlapping worlds for urban élites. The first boarding-school in London opened in 1617; by the 1660s this prestigious school in Hackney was known as the 'ladies university of the female arts' and had educated Mary Dering. John Blow's *Venus and Adonis*, as well as Purcell's *Dido and Aeneas*, were written for and first performed by girls at similar establishments. Parallel activity prevailed in other countries as well.

In France, where convent schools were the norm for upper-class girls, collections of pieces were specifically written 'for the use of young ladies brought up in houses of religion'. Such a repertory acquired particular distinction at the Maison Royale St-Louis de Saint-Cyr, founded by Mme de Maintenon. The tragedies *Esther* (1689) and *Athalie* (1691), which she commissioned from Racine, featured choral music and spiritual songs by the school composer Jean-Baptiste Moreau. Such was their success that Mme de Maintenon, who was fond of maxims such as 'Learn to obey, for you will obey forever', forbade further performances. Nevertheless, these two tragedies became staples of the girls' school repertory. At the end of the next century, an equally distinguished director,

Mme Campan, staged Moreau's *Esther* at her famous school in St Germain (founded 1793).

Although advances in education benefited men more than women, the trend towards the broad marketing of culture proved powerful. With expanding female literacy came many magazines edited for and by women, first in England, then in France (and only at the end of the 18th century in Italy, Germany and the Netherlands). Along with coverage of prominent female musicians and musical education, both the words and the music of popular songs were routinely included in, for example, the *Journal des dames* (1759–78), the *Lady's Magazine or Entertaining Companion for the Fair Sex* (1770–1832) and the *New Lady's Magazine* (1786–95). The existence of the specialized *Journal de musique pour les dames* points again to the importance of amateur music-making, often at a sophisticated artistic level, among privileged women.

All across Europe, the salon (an urban gathering in the public space of a private home outside the court) offered female musicians a dynamic new venue. In 16th- and 17th-century Venice, the 'ridotti' helped the careers of Casulana and Strozzi. In Lyons at the same period, the organist Clémentine de Bourges was befriended by the distinguished poet Louise Labé, who wrote of her salon sisters, 'they take their pen and lute in hand; they write and sing about their passions'. In the 18th century, musical salons gained prominence as well. Stéphanie-Félicité, Countess of Genlis, a famous harpist and educator, left among her annual salon chronicles an account in 1767 of Marie Emmanuelle Bayon Louis, who brought the fortepiano into vogue in France. Anne Louise Brillon de Jouy, whom Burney called 'one of the greatest lady players on the harpsichord in Europe', ran her own salon in the 1770s and performed her own compositions there. The careers of Mme de Genlis and Mme Brillon during the *ancien régime* were on a level with the best professional musicians in Paris. If 'the 18th-century salon transformed a noble leisure form of social gathering into a serious working space', then musicians like Jacquet de La Guerre, Martínez, Candeille, Maria Aghate Szymanowska, Elisabetta de Gambarini and Hélène de Montgeroult turned it into a venue for subscription concerts, teaching and for selling their compositions. At a time when women were largely excluded from orchestras, the salon was a gateway to diverse musical occupations and professional recognition.

Attitudes towards women's education and the role of music within it made allies of writers with otherwise opposing politics. Both the conservative royalist Bishop Fénélon and the anticlerical Rousseau sounded the same notes: modesty, reserve, subordination. Fénélon avowed that 'more extensive study might be allowed the musically talented girl', because 'if she have a voice and a genius for the beauties of music, do not hope to keep her always in ignorance of them: the prohibition will but increase the passion; you had better give an orderly course to this torrent, then undertake to stop it'. Rousseau's enormously influential views on women's education gave Fénélon's virtues a new place within the context of the Republican family.

Even some proto-feminist writers cast a sceptical eye on music as a subject traditionally associated with female vanity and the old order. To be feminist can mean to desire to transcend the socially constructed 'feminine'. In 1637 the famous Dutch scholar Elizabeth Schurmann assigned music to the 'place of pretty Ornaments and ingenious Recreations' (*Whether the Study of Letters is Fitting to a Christian Woman*, 1659). Some 18th-century women were less defensive. Mary Wollstonecraft (*Thoughts on the Education of Daughters*, 1787) neutralized the rhetoric surrounding music by noting how it could 'afford the most rational and delicate pleasure'. If a daughter possessed it, 'do not suffer it to lie dormant'. More advanced views were put forth by the English historian Catharine Macaulay-Graham: 'Confine not the education of your daughters to what is regarded as the ornamental parts of it, nor deny the graces to your sons. . . . Let your children be brought up together; let their sports and studies be the same'. She accused Rousseau of being the 'most conspicuous' and 'strenuous' asserter of 'a sexual difference in character' (*Letters on Education*, 1787).

This, in fact, was one source of Rousseau's enduring influence on 19th-century thought. In Germany, the Romantic writer Friedrich Schlegel was one of the few who resisted and championed women's rights. Following in Rousseau's footsteps were two prominent educationists, Johann Campe and Wilhelm von Humboldt. Espousing 'pure masculinity' as active sexuality, and femininity as passive receptivity, Humboldt set in place views about sexual difference that A.B. Marx and, later, Vincent d'Indy were to apply metaphorically to theories of sonata form.

4. Since 1800. Modernity opened the door to new possibilities for women in music, as they benefited from the economic and social changes of the 19th and 20th centuries. After 1800, women musicians, many influenced by an emerging feminist movement, made access to a complete musical education a major priority. By 1900, they attempted to reverse centuries of subordination in many aspects of musical activity: violinists challenged their exclusion from orchestras; composers demanded admittance to competitions like the Prix de Rome. Recognizing how little the celebrations of 'the eternal feminine' and aesthetic androgyny translated into tolerance for female musicians, intellectuals challenged the Romantic ideology of sexual difference. The 20th century contained an array of 'firsts' marking incremental changes in all these areas, some resulting from individual achievement, others through collective action or legal reforms. Women slowly stepped on to new podiums, won major awards, graduated from the leading universities and conservatories with advanced degrees, and, in the last decades of the 20th century, argued vigorously for equality of opportunity and over issues of identity. However, not even in 2000 were all these issues resolved.

Old habits died hard. The mentality of separatist intellectual inferiority marked the *Histoire de la musique* by Sophie de Champgrand de Bawr, who, as the first woman to publish a music history, wrote it for the *Encyclopédie des dames* (1823) and asked indulgence 'sur l'ouvrage qu'une femme a écrit pour des femmes'. And music *à la mode* prevailed in magazines like the *Ladies Cabinet of Fashion, Music, and Romance* (1832–70) and Godey's *Lady's Book* (1830–77). Newer goals of equality fired the reforming spirits of composers such as Nina D'Aubigny von Engelbrunner, and later Johanna Kinkel and Luise Adolpha Le Beau, as well as the earliest German feminists. In 1878, when Luise Buchner (in *Die Frau*) condemned ornamental education, Le Beau wrote:

Just do not limit, then, the training of girls. Rather, teach them the same things that are taught to boys. Grow accustomed to a system that has this same fundamental condition for every education, and then see what [girls] can do after acquiring technical skills and intellectual independence, rather than entrench yourselves against female capabilities by limiting the education of women!

The establishment of secular conservatories marked a crucial turning-point. Not only did it end church-dominated music education, but conservatories offered young women public formal schooling, albeit in one subject, even before some nation-states established any kind of public primary or secondary education for girls. Most conservatories admitted women, only to offer them lesser educations. At the Leipzig Conservatory, boys took a three-year course in theory, girls a two-year course, 'especially organized for their requirements'. The Paris Conservatoire ran women's classes in solfège and keyboard harmony, barring women from classes in written harmony and composition until the 1870s. Rather than composers, conductors, or conservatory professors, girls were expected to become performers – typically singers, pianists or harpists – or teachers in private studios, or accomplished ladies at home. On 18 December 1881 an official at the Berlin Königliche Hochschule für Musik asked the director, Joachim, to rescind the right of women to participate in orchestra classes and performances (Reich, 1993):

It is bad enough that women are meddling in every possible place where they don't belong; they have already taken over in almost every area of music. ... Their need for artistic knowledge will be well enough served if we permitted them to attend final rehearsals before performances, since they shall not be studying conducting, composing, nor instrumentation.

Yet as the climate for women's education improved, barriers fell. The American composer Clara Rogers could not study composition at Leipzig in the 1860s; in 1877 Ethel Smyth was able to enrol. In the USA, where private rather than publicly funded conservatories were the rule, Jeannette Thurber founded the influential National Conservatory in New York (1885), admitting black as well as white students and letting her female student violinists play in the orchestra. By the early 1900s, in many conservatories female outnumbered male students, often to the consternation of men. After accepting the composer Rebecca Clarke as his first female pupil in 1907, Stanford grumbled in his memoirs (1908) that British institutions had been overrun by women. But few matched the men-under-siege mentality of the critic Emile Vuillermoz, who in an article entitled 'The Pink Peril' for *Musica* (1912) warned that women were on the march: 'the Conservatoire, where they already hold the majority, will end by becoming their personal property'. In the USA, the tradition of music as a female accomplishment ensured high rates of participation at women's liberal arts colleges. Even there, however, curriculum policy sometimes reflected stereotypes. When Ernst Krenek was engaged to teach music at Vassar College in 1939, he was specifically barred from teaching the 12-note system to his female students, whom the chair of the department described as 'cultivated amateurs' for whom work of a 'highly advanced nature' would not be appropriate.

In the early and middle decades of the 19th century, as the various 'ornamental' arts detached themselves from one another, specialization became the rule. The governess who had previously taught French, music and embroidery slowly succumbed to the demand for expertise. As a result, the music profession experienced a surge of growth as a whole. Statistics for England and Wales between 1794 and 1951 show that between 1841 and 1891 the number of people employed as musicians and music teachers increased more than sixfold. Women jumped into this escalating market as fast as possible. Whereas in 1841 around 13·7% of the musicians and music teachers in England were female, by 1891 the figure was around 50%, and in 1921 it climbed to 76%. In the USA the number of women in music and music teaching increased eightfold between 1870 and 1910, and the proportion of women in music rose from 36% to 60%, before tapering off to 41% in 1940. Most women worked on the lower rungs of the teaching profession; few were employed in conservatories until the mid-1900s. At the Paris Conservatoire between 1797 and 1859, out of around 345 teachers only 26 women had positions (in singing, keyboard, keyboard harmony and solfège). In The Hague, where the Koninklijke Muzijkschool did not employ women, the composer Gertrude van den Bergh formed a women's chorus and taught women in her home as well. In Paris, Nadia Boulanger sustained her celebrated career as one of the great 20th-century composition teachers at her home studio.

In the 19th century music teaching loomed large, partly because little else was available. Once women left the conservatories they were stranded, excluded from professional orchestras, from conducting posts, from positions in universities and from the professional musical life of the Church (Fuller, 1992). Occupational segregation was one temporary solution, as late 19th-century female musicians formed all-women chamber groups and 'lady orchestras' in order to work. In 1887 Marie Soldat-Roeger (a pupil of Joachim) formed perhaps the earliest such group, the Soldat Quartet in Berlin. Among the earliest women's orchestras were those founded in Vienna and Berlin, both of which toured internationally. About 30 different women's orchestras flourished in the USA between 1925 and 1940. The practice was widespread: the Dutch composer Elisabeth Kuyper founded four women's symphony orchestras first in Europe, then in the USA. In 1937 the Cuban composer Ernestina Lecuona Casado helped found the Orquesta Feminina de Concierto. A few such groups exist today, some formed in the 1970s, defining their mission as the championing of music composed by women. Among the most prominent are the Women's PO (formerly Bay Area Women's PO; founded 1982), directed for many years by JoAnn Falletta and now by Apo Hsu, and the European Women's Orchestra, founded by Odaline de la Martinez in 1990.

What most female instrumentalists wanted, however, was an end to exclusion and a chance to compete. In the early 1900s, women in France organized to press for admission to theatre orchestras. Eugène Ysaÿe employed female string players for his orchestra in Brussels and was emulated in London by Henry Wood, who had four female violinists and two female viola players in his New Queen's Hall Orchestra in 1912. In the USA, the World War II era accelerated change; the shortage of available men forced most major American orchestras to employ their first female players by 1945, with the exception of the New York PO, which took them only in 1966. Data from the American Symphony Orchestra League confirm the acceleration of this upward trend. Between 1947 and 1982, female employment in the major American symphony

orchestras increased from 8% to approximately 26%. In 1996, 46% of the musicians in American orchestras were female, although most of them were clustered in less important institutions.

This growth reflects changes in the status of women in Western societies more than changes in musical culture. In the USA, both the Civil Rights Act (1964) and the inauguration of gender-blind orchestra auditions had an impact. In Britain, a law dealing with gender discrimination changed the makeup of London orchestras. On the other hand, Austro-German resistance was more deeply entrenched. Only in 1982 did the Berlin PO employ its first female player, causing a great public stir. In 1997 protests against the policies of the Vienna PO led the orchestra to admit its only female player to membership status (although it remains no closer to a gender-blind admissions policy). In that year, statistics compiled about the Vienna PO and five other major orchestras in German-speaking countries (the Vienna SO, the Dresden Staatskapelle, the Dresden PO, the Berlin PO and the Leipzig Gewandhaus) showed only a minimal representation of women (Buzzarté, 1997). In 1998 the Czech PO rescinded its men-only policy.

Like all-women's instrumental ensembles, all-female professional societies were formed in reaction to discrimination. In Britain, barred from the Royal Society of Musicians (founded 1838), women founded the Royal Society of Female Musicians in 1839. In 1865, the two societies merged. The pattern repeated itself in the 20th century when, in 1905, the newly founded Society of British Composers included no woman among its 48 members. In 1911 the Society of Women Musicians was founded in London, with Liza Lehmann as its first president (it disbanded in 1972). In 1925 Amy Beach was elected president of the Society of American Women Composers, a group that lasted only a few years. Few other such organizations were formed in the middle decades of the century.

In the activist years of the 1970s and 80s, however, women's music organizations re-emerged on the cultural horizon: at least 13 were founded between 1975 and 1990. In 1975 Nancy Van de Vate founded the (International) League of Women Composers, in response to the impact of International Women's Year in 1975; this was followed in 1976 by American Women Composers, Inc. In 1978 two German organizations, the Frau und Musik-Internationaler Arbeitskreis, and Musikfrauen e.v. Berlin, supported primarily by musicologists and conductors, were founded, with additional archival goals. The 1980s saw the foundation of the Association of Canadian Women Composers (1980–88), Frauenmusik-Forum in Switzerland (1982), the Stichting Vrouw en Muziek (Foundation for Women in Music) in the Netherlands (1987) and the re-emergence of British Women in Music (1988), as well as other organizations founded in Denmark, Spain and Japan. The Finnish association Nainen ja Musiikki ry (Woman and Music) began in 1995. In the same year, a merger of two American organizations – the International League of Women Composers and American Women Composers, Inc. – with the International Congress on Women in Music (1982) produced the International Alliance of Women in Music (IAWM); the IAWM acts as a clearing-house for many individual national societies and internet research websites (it helped to support demonstrations against the admissions policy of the Vienna PO in New York in 1998).

The idea of festivals and thematic concerts devoted to music exclusively by women, as a way to get works heard and performed, emerged in the late 19th century. Concerts and events for the Women's Building at the World's Columbian Exposition in Chicago in 1893 set important precedents in the USA. Many annual festivals in the late 20th century continue this tradition. Of note is the Donne in Musica festival founded by Patricia Adkins Chiti in 1982, in collaboration with the Unione Donne Italiane, the oldest and most militant feminist organization in Italy. Important Women in Music festivals were held in Bonn and Cologne in 1980. The International Congress of Women in Music began its Annual Festivals in New York in 1981. The Frau Musica Nova conference in Cologne in 1998 brought together composers from Asia, Europe and the USA.

Continuities as much as change shaped career patterns for female performers since 1800. Singers stood at the apex of international success, among them Angelica Catalani, Henriette Sontag, Wilhelmine Schröder-Devrient, Maria Malibran, Pauline Viardot and Jenny Lind. So great was the adulation of the 19th-century singer that writers like George Sand, George Eliot and Willa Cather made her the symbol of the 'femme libre' – the emancipated woman – whose voice represented power, freedom and a moral authority that transcended convention. Exemplifying this spirit was the soprano Mary Garden, who wrote: 'I believed in myself and I never permitted anything or anybody to destroy that belief. My eye never wavered from the goal, and my whole life went into the operas I sang. I wanted liberty and I went my own way'.

In the 20th century singers continued to reign supreme. Among the many great internationally renowned artists, a few became cultural icons, including Maria Callas, Marian Anderson, Elena Gerhardt, Kirsten Flagstad, Ernestine Schumann-Heink, Amelita Galli-Curci, Rosa Ponselle, Renata Tebaldi, Joan Sutherland, Beverly Sills, Kiri Te Kanawa and Jessye Norman. Furthermore, the association between professional singers and social power spread beyond opera to popular styles. Black American singers such as Bessie Smith, Ma Rainey and Billie Holiday have been models of empowerment in contemporary black American literature.

Options for performing careers widened slowly but surely throughout this period, as virtuoso women in areas other than singing became increasingly common in the 19th and 20th centuries. In the catalogue of virtuoso women by Marie Lipsius (writing as La Mara), pianists rivalled singers. In the 19th century the outstanding artists were Clara Schumann, Marie Pleyel, Teresa Carreño and Annette Esipova. In the USA notable figures in the late 19th century include Julie Rivé-King (the first American-born woman to achieve a concert career) and Fanny Bloomfield Zeisler. By 1920 American woman pianists had 'come to stay', according to Harriet Brower (1918). Still, around 20 years later their professional vulnerability was commented on by Olga Samaroff: 'men pianists and women pianists were as rigorously separated in the managerial mind as the congregation of a Quaker meeting . . . and women received lower fees than a man with the same degree of success and reputation' (1939). Other notable keyboard performers included the harpsichordist Wanda Landowska and the pianists Myra Hess, Guiomar

Novaes, Annie Fischer, Clara Haskil, Marguerite Long, Rosalyn Tureck, Alicia de Larrocha and Moura Lympany; the younger generation includes Martha Argerich and Mitsuko Uchida. Outstanding pianist-composers working in jazz include Mary Lou Williams and Marian McPartland.

Other instruments, particularly the violin, soon found their champions as well in the 19th century. Wilma Neruda, Camilla Urso and Maud Powell set important precedents. In the 20th century, celebrated violinists include Erica Morini, Ginette Neveu, Gioconda De Vito and Ida Haendel, and, more recently, Anne Sophie Mutter, Viktoria Mullova, Kyung-Wha Chung and Midori. Notable cellists include Beatrice Harrison, Guilhermina Suggia, May Mulke, Zara Nelsova and Jacqueline du Pré. Some sex-typing of instruments such as timpani, horn and saxophone still prevails. Here, the virtuoso percussionist Evelyn Glennie is an outstanding exception. In the male-dominated field of jazz, horn player Melba Liston and the soprano saxophonist Jane Ira Bloom are worthy of mention. Around 350 participants attended the first International Women's Brass Conference held in St Louis in 1993.

Given the problems with orchestral employment, relatively few women have been able to make careers as symphonic conductors. Marie Wurm, Antonia Brico, Ebba Sundstrom and Ethel Leginska relied heavily on women's orchestras for work. The American Symphony Orchestra League reported in 1997 that only 27 out of 425 member orchestras were conducted by women (*c*7%). In every country there is a history of one or another individual female musician being 'the first' to conduct some major symphony orchestra or appear on the podium of an opera house. The career of Nadia Boulanger in the first half of the 20th century, and that of Iona Brown in the second half, contain many such moments. Leading figures in the 20th century made more prominent careers in the choral world, among them Alice Parker, Margaret Hillis and Jane Glover, and in opera Eve Queler and Sarah Caldwell. What paths will be taken by Anne Harrigan, Simone Young, Sian Edwards, Marin Alsop and Gisele Ben-Dor in the current generation, remains to be seen.

Among all areas of professional music-making, perhaps composition is marked by the deepest sense of emotional divide between past and present. In the 19th century, class propriety and attitudes towards the roles of women in public stigmatized professional careers for some privileged women. Reich (J1993) pointed to the widening gulf between amateurs and professionals, with two tracks shaped by class mores: one for the professional woman from the artist-musician class and the other for the aristocratic or bourgeois lady, whose parlour domain reflected the 'cult of domesticity'. Here the careers of Clara Schumann and Fanny Mendelssohn demonstrate its effects. Schumann was one of the great concert pianists of the century, in the public limelight for almost all her life. A prodigious talent, Mendelssohn was encouraged to learn music but discouraged by both brother and father from publishing her work. Instead, she adopted the 18th-century solution of turning a private salon into a professional milieu. While the compositions of both women have been revived with great success, each expressed her ambivalence about composing, echoing the prevailing 19th-century theories about female inferiority.

Through revivals and re-evaluation within women's history, the work of other 19th- and early 20th-century female composers is being heard once more. Among the most prominent are Amy Beach and Ethel Smyth. Many await further evaluation, such as Emilie Meyer, Augusta Holmès, Ingeborg von Bronsart, Agathe Backer Grøndahl and Rebecca Clarke. Florence Price was the first black American woman to compose symphonic music. In one way or another, all these women surmounted the confines of 'women's work in music', which, throughout the early 1900s, relegated female composers to the 'smaller forms' such as songs and piano pieces, and placed the 'higher forms' of symphonic composition out of their 'sphere'. The extent to which each composer felt burdened by gender ideology varied considerably, but none of them was indifferent or unaffected, particularly in the reception of their music. Smyth stands alone in her pioneering feminist writings about women in music.

Along with the revival of individual composers, women's history and feminist criticism are shaping new perspectives for 19th-century genres previously stigmatized by their associations with women's work, particularly in demeaned salon traditions. Salon piano music, the French *romance*, the English art song, the American parlour song: all these have been the subject of recent research. Perhaps Loïsa Puget will find new advocates in the future, as have already Cécile Chaminade and Maude Valérie White.

In the first half of the 20th century, female composers lived in a period of transition between old mores and new freedoms. On the one hand, modernist rhetoric about sexual difference perpetuated 'virility' as the musical antidote to Romantic excess, and attitudes towards music composed by women were often patronizing. On the other hand, a more general social and political emancipation for women stabilized a sense of creative possibility that had not really existed earlier. Some important figures are the impressionist Lili Boulanger and the modernist Ruth Crawford Seeger. In England, Elisabeth Lutyens espoused serialism when few men had adopted this approach. Neo-classical sympathies mark the music of Germaine Tailleferre and Louise Talma, while a more dissonant post-tonal idiom characterizes music by Elizabeth Maconchy, Grażyna Bacewicz and Miriam Gideon.

In the second half of the 20th century and at the beginning of the 21st, women composing music are less hampered by ideologies of sexual difference. No style, idiom, form, genre or technology is beyond them. Among the many established composers working today are the American-born Nancy Van de Vate living in Austria; Nicola LeFanu and Judith Weir in Britain; Kaija Saariaho in Finland; Betsy Jolas in France; Karin Rehnqvist in Sweden; Thea Musgrave, Joan Tower and Ellen Taafe Zwilich in the USA; and several from Eastern Europe and Russia, who have become increasingly prominent since the end of the Cold War. Among these last are Russian-born Sofiya Gubaydulina and Galina Ustvol′skaya and the Polish-born Marta Ptaszyńska.

Given the importance of *vox feminae* in women's history, the contributions of female composers to modernist and contemporary vocalism has continuities with the past. Many female composers are working with new approaches to the voice, blurring boundaries between composition and performance. In Romania, such sonic explorations are associated with Myriam Marbé and her

pupil Violeta Dinescu, and in Germany with Adriana Hölszky. In the USA, such internationally renowned jazz singers such as Ella Fitzgerald, Sarah Vaughan and Betty Carter showed one direction vocal virtuosity might take; in the smaller avant-garde world, Cathy Berberian, Joan La Barbara and Meredith Monk showed another.

Within electro-acoustic music, women have made important contributions. Bebe Barron pioneered electronic scores for film. Pauline Oliveros has helped shape the avant garde since the 1960s. Pril Smiley and Alice Shields have been involved with the leading Columbia-Princeton Electronic Music Center since the 1960s. Ruth Anderson founded an electronic music studio in 1968 at CUNY. In 1970 Françoise Barrière co-founded the Concours Internationaux de Musique, at which Vivian Adelberg Rudow was the first female composer to win a first prize (1986). Other important figures include Annea Lockwood and Lucia Dlugoszewski; and, in the next generation, Laurie Spiegel.

How viable is the category 'woman composer' for the current generation? This question raises the issue of identity, to which each woman gives her own answers. The spectrum of responses ranges widely, as one survey has suggested (Barkin, J1980–81). Some women have composed music containing feminist social critique. The wry wit of the innovative performance-artist Laurie Anderson is well known. The British composer Rhian Samuel describes 'a growing sense of obligation' among women to 'take a woman's point of view' in their compositions; and she, like many others, supports an aesthetic based on the belief in 'a woman's voice'. Yet other composers consider gender to be an arbitrary factor, aspiring to be heard beyond category.

Such internal issues of identity must be separated from external questions of professional careers in music, which today is both art and commodity in an international corporate marketplace. It seems clear from the growing international literature on the status of women in music professions that marginalization still exists. In the USA, women constituted about 10% of those teaching composition in colleges and universities in 1975–6 (it is important to remember that not all composers on such faculties teach composition). For the period 1954–82, the number of recordings of music composed by women on CRI, a principal label for American 20th-century music, was about 5%. American women have in general received meagre support from the leading foundations granting commissions and prizes. Similar patterns were found to prevail in Britain as well. Nicola LeFanu's survey (1987) gave disturbing statistics for the record of the Arts Council of Great Britain: between about 1973 and 1987, women composers comprised about 15% of the composer pool and yet received only 22 out of 360 commissions, about £7000 out of £160,000 disbursed to composers, and were shut out of touring programmes of contemporary music, in which 186 men were represented. A survey by the Women's PO (San Francisco) of the repertory of 43 American orchestras in 1998–99 season found only 23 works by women out of a total of 2292. In the USA statistical data document both increased access to training and far slower access to employment. Between 1971 and 1986 the percentage of women receiving music doctorates more than doubled (from 16.3% to 36%). In a virtually comparable time frame (1974–1986), the percentage of women employed full-time as post-secondary faculty barely changed (from 21.4% in 1974 to 23.2% in 1986 (Jezer, M1993)). The extent to which such inequities are replicated in other countries has yet to be documented.

The scholarly investigation of 'women in music' has many challenges ahead of it. Comprehensive syntheses and overviews of the extraordinary research explosion that occurred after 1970 still remain to be written. Integration of this material into mainstream writing is hardly secure. In 1849 the German feminist Louise Otto-Peters wrote: 'The history of all times, and of today, especially, teaches that women will be forgotten if they forget to think about themselves'. Writing such history for women in music is still a work in and for progress.

III. World music

The past 30 years have seen an increase in women's social, economic and political status in many cultures worldwide, as well as increasing opportunities for women to create, perform and control all aspects of their music-making. In addition, scholars in fields such as ethnomusicology, anthropology, folklore and cultural studies have become increasingly interested in understanding the social and political relationships between men and women in a wide variety of cultures that foster or restrict men's and women's participation in diverse musical contexts. This section presents some of the current issues and research devoted to women's music and, more broadly, to music and gender. It centres on areas where (1) women's music is the main focus of study; (2) women are the main cultural informants; or (3) gender is the main context for the discussion of music. It concentrates on a variety of contemporary cultural settings, primarily outside the matrix of the Western classical music system.

For further information on women's music in non-Western cultural traditions, see articles on individual countries.

1. History of research and analysis. Literature devoted to the study of women's music in world cultures falls into three historical yet overlapping periods, each marked by different research and analytical paradigms. The first (*c*1910–present) dealt with the near invisibility of women's musical activity in the scholarly literature, concentrating primarily on collecting, documenting and

notating women's music, essentially contributing to a more holistic view of the world's musical cultures. The second wave (since *c*1965), influenced primarily by anthropology and folklore, began to refashion the question of women's music, framing it instead within the broader context of gender relations. Scholars looked at various societies' gender arrangements, ranging from gender hierarchy (where men controlled most aspects of women's public and expressive life) to gender equality (where men and women had equal autonomy). They also examined gender styles – ways in which power and value were negotiated or mediated between men and women, ranging from coercion to collaboration – and looked at music creation and performance as contexts for reinforcing, changing or protesting gender relations. The third wave of literature (since *c*1985), heavily influenced by postmodern scholarship in feminist theory, cultural and performance studies, semiotics and psychoanalysis, has sought to understand the links between social and musical structures, and how each can be seen as embedded within the other.

A quick glance at the geographical range of the literature shows that not all the world's musical cultures have been equally researched and that much more information is needed on all aspects of women's musical behaviour, especially among the traditional cultures of Central and South America, Africa and Asia. In all the literature, however, one universal exists: nowhere do men and women have equal access to all musical opportunities within a culture. Gender-based restrictions of some sort exist everywhere, from the mildest and most subtle (such as steering a young American boy away from playing the harp in the school orchestra) to the most violent (threats of gang rape against the Mundurucú women of central Brazil who catch sight of men's sacred flutes).

One of the problems facing the study of women's music in world cultures, and of gender issues in music in general, is that the analytical tools and models are largely Western-orientated, concentrating on Western constructs (such as the bi-polarity of the sexes) and a unitary Western conception of music. Although all societies recognize two human biological categories ('male' and 'female') and use them as a primary basis for the division of labour, gender categories ('man' and 'woman') are social constructs seen within specific contexts. Each society thus invents gender ideologies (often linked to religious, social, economic and other systems within the culture), which act as models, or templates, for gender-typical behaviours. Gender categories and ideologies are thus fluid, and constantly changing across time and space. There are no societies in which men and women have had total gender equality, that is, equal access to all political, economic and expressive aspects of culture, although there are many where men's and women's separate activities are, for the most part, equally valued or necessary to cultural maintenance. Likewise, although all societies select certain sounds to perform, and value such sounds over others, not all would refer to them as 'music', a term associated in many cultures with public, sexual or decadent (Western) values. Thus, it is crucial that future research takes into account indigenous understandings of analytical categories as much as possible.

2. Women's music in everyday and ritual life. In many of the world's cultures, especially those based on traditional agrarian or exchange economies, women are still primarily defined by their biological roles as bearers and nurturers of children, and much of their everyday and ritual activity is either empowered or constrained by these activities. Most of the existing literature on women's music thus reflects this status, focussing on music and life-cycle rituals (those associated with birth, puberty, marriage and death), on women's roles in calendrical rituals and ceremonies, on women's roles in religious systems and on their traditional roles as healers.

In the Americas, for example, a long history of research on Amerindian women concentrates on puberty and initiation rituals, or on ceremonies that celebrate the power of women's fertility and spirituality to sustain tribal life. Similarly, in parts of Africa, especially among the Venda in the south, the central rainforest BaAka, and women in Sudanic Africa, as well as in India, Australia, Peninsular Malaysia, Papua New Guinea and the Pacific Islands, women's powerful and valued status as mothers and nurturers is reflected in studies of childbirth songs, and in celebrations of women's specialized sexual and ritual knowledge. Indeed, in cultures where there is an ideology of gender-equality, women's music is both necessary and sufficient for maintaining social and spiritual balance.

Two important genres of music almost universally performed by women and often linked together, especially in societies that are patriarchal and patrilocal, are wedding songs and laments. Young women, on marriage, generally leave the protection of their original homes, families and communities, and many have historically faced hardships in the homes of their husbands or mothers-in-law, frequently dying in childbirth. Women who survive the birth of many children, the death of other family members, and grow into old age, often take on new, important roles as lamenters within their communities and assume the responsibilities of communal mourning and burial.

Collections and other documentation of songs of love, courtship and marriage are found in great numbers in the literature: wedding and other life-cycle songs among Jews and Muslims in Morocco and Israel; wedding songs performed by women in North India, Albania and Canada; love songs composed and performed by Zulu women in Africa and by young, unmarried women, as part of long rituals of courtship, in the Philippines and in Turkey. Studies of lament, or of women's roles in funerary rituals, are found predominantly in the literature on Greek, Finnish and Hungarian women and among the Ga in south-eastern Ghana (*see also* Lament).

In addition to life-cycle rituals, there are numerous studies that address women's and men's ritual responsibilities during the yearly agrarian cycle of planting, harvesting and preserving. Some of the earliest and most important collections and discussions of folksongs from eastern and southern Europe and the USA, as well as from northern Thailand, for example, document women's songs associated with gender-based work activities, such as sewing, cooking and working bees, and with special ritual contexts accompanying planting and harvesting. Issues of women's identity and work are also addressed in a study of Kpelle women in Liberia.

Most world religious systems are male-dominated, in that men generally control the ritual, legal and expressive aspects of religious activity. Women, though always present, have often been overlooked in this context, and there is a small but growing literature documenting

women's musical roles in major religious systems worldwide. The most extensive documentation outside the Western Classical music system (itself largely based on early Christian musical practice) is found in the literature on black American gospel and other church-related musics; Jewish liturgical and para-liturgical musics; and Muslim women in Saudi Arabia, North India and Pakistan. In addition, the 'feminine spirit', often seen as crucial to the efficacy of ritual, is frequently celebrated in traditional Amerindian culture, as well as within the Hindu and Buddhist traditions, primarily in Cambodia and Java, as well as elsewhere.

In many societies women take on the role of shaman and often practise outside the sanctioned religious systems of their communities. Part-healer, part-musician, spirit-guide and actor, the shaman is frequently called on to cure individual, family and community illness. Women are often regarded as more powerful than men in this role, as their fertility and perceived psychological openness seem to make them better adapted to mediating between the spirit and human worlds. Nowhere has this tradition been more fully documented than in Korea, with major studies on *mudang* (female shamans) and the ritual known as *kut*. Other studies have also appeared documenting female shamans in Siberia, Haiti and the USA.

3. MUSIC IN THE COURT AND HAREM. From about 1000 CE to the present day, many societies, especially in Europe, the Middle East, North Africa and Asia, developed intricate religious and politically centralized court systems, where the ruling nobility or élite, usually defended by a warrior class, owned and controlled the land. This socio-economic system proved advantageous for the arts, especially for music, as court rituals and ceremonies required many elaborate performances and a constant stream of musicians and composers. The patronage system that developed in these areas disappeared with the rise of the urban middle class, where musicians, especially in western Europe, often acted as free agents and gained more control over their musical activities. But the legacy of the politico-religious court system still lingers in many of the world's cultures.

Women were frequently drawn from surrounding villages and farming areas to participate as courtesans in court life, as musicians, singers, dancers and composers. Indeed, many of the world's classical music systems developed and grew within court contexts, especially in Europe, India, China and Indonesia. In most societies, however, courtesans (but not courtiers) were viewed with some ambivalence. Contrary to the norm, these women were often highly educated, professional musicians, singers and dancers, who were also viewed as public women, that is, women who publicly performed not only their music but also their sexuality, primarily for male patrons. Courtesan traditions have been fairly well documented, especially in China, Korea, Japan, Indonesia, Egypt, India, Nigeria, Tunisia, Cyprus, and within the medieval Arabo-Islamic courts and the Christian courts of Europe (*see* COURTESAN).

4. POPULAR AND COMMERCIAL MUSIC. The 20th century has seen the unprecedented growth of technology and spread of Western music throughout the world, via the importation of Western styles of teaching and through the commercial recording industry. Thus, it is not uncommon today to see Western-style schools of music in many parts of Africa and Asia, or, even in the most remote villages, to hear the latest hits from American, Asian or European groups on radio, cassette tape or CD. Women, long associated with singing and dancing within the courtesan traditions (if less so as instrumentalists), have often become articulate spokespersons for cultural change and modernization, or for protesting their gender status.

A tremendous amount of popular literature exists that chronicles the lives and times of female singers, especially in the West; the scholarly literature, however, is relatively small by comparison. Most work centres on black American blues and jazz singers, especially in the first half of the 20th century when women such as Ma Rainey and Bessie Smith were stars. Blues lyrics, especially, provided a context for women to protest various gender issues, such as infidelity, abandonment and other abuses. Other work on popular female singers includes publications on women-identified (i.e. lesbian) music in the USA, on popular singers in Mali, South Africa and Croatia, and on the great Egyptian singer Umm Kulthum, a powerful icon of Egyptian nationalism and modernization in the first half of the 20th century. *See also* POPULAR MUSIC, §II.

5. NEW RESEARCH. Since about 1985, new, postmodern studies addressing the issue of gender in song lyrics and in musical structure itself have begun to appear, most prominently within the literature on Western classical and popular musics. These studies examine song texts, sound structures and actual performances as materializations of gender relationships and, in openly political ways, try to understand and address the power imbalances found between men and women in virtually all world cultures. Some literature, such as that on the popular performers Madonna, Annie Lennox and other contemporary Western singers and songwriters, focusses on the strategies used by these powerful women to subvert or overthrow male domination by questioning and playing with the bi-polarized constructions of gender in Western culture. Similarly, recent scholarship on rock, rap, blues and American balladry, and on women's musical life stories, openly addresses questions of sexual identity politics within music, the music industry, and within such contexts as the home and the Internet. Outside the USA, scholars working on a number of areas – the Arab Middle East, Jewish communities in Israel, female singers in Ethiopia and Turkey, folksingers in north India, Australia and among the Maori – are examining the ways in which culture-specific constructions of gender and resulting inter-gender relations are actually performed through the musical and sexual body.

Far more research and far more understanding of the wide variety of gendered musical and social behaviours and contexts are needed. Women have always been at least one half of the world's population, yet little of their music or musical performance has been documented within the Western academy, itself a male-dominated institution. This is changing as more women and men become sensitive to the diversity and creativity of both gendered constructs and the varied musical sounds the world offers, but much more research and analysis is needed in order to balance the picture.

JUDITH TICK (I–II; bibliography with MARGARET ERICSON), ELLEN KOSKOFF (III)

Wonder, Stevie [Morris, Steveland Judkins] (*b* Saginaw, MI, 13 May 1950). American singer, songwriter, keyboard player, harmonica player and drummer. Blind shortly after birth due to receiving too much oxygen from an incubator, he was brought to the attention of Berry Gordy, the owner of Motown Records who signed him to Tamla records (a subsidiary of Motown), at the age of ten. Wonder displayed his prodigious abilities as a multi-instrumentalist and singer from the start of his career, and had a major hit with the live recording, *Fingertips, Pt. 2* (1963) at the age of 13. He did not repeat the success until he emerged from adolescence with *Uptight* (1966), which featured the manic vocal intensity over a driving dance track that was to become a trademark in other hits from the period 1966–70, including *I was made to love her* (1967), *For Once in my Life* (1968) and *Signed, Sealed, Delivered, I'm Yours* (1970). Although Wonder's music is generally divided into a stylistically narrow, pre-1971 period and an eclectic post-1971 period, his earlier recordings featured a broader stylistic palette than the majority of Motown artists: he sang melodic ballads with sophisticated harmony, such as *My Cherie Amour* (1969), and protest songs including Bob Dylan's *Blowin' in the Wind* (1966). This variety only hinted at the transformation in style that occurred when, in 1971, Wonder signed a new contract with Motown giving him vastly increased artistic autonomy. On the albums that followed – *Where I'm Coming From* (1971), *Music of My Mind* and *Talking Book* (both 1972), *Innervisions* (1973), *Fulfillingness' First Finale* (1974) and the double album *Songs in the Key of Life* (1976) – Wonder forged a style from elements

Stevie Wonder

of soul, funk, reggae, older Tin Pan Alley-style pop, experimental electronic music and African and Latin American rhythms (see illustration). These albums, which were among the first concept albums by a black artist, displayed an increased social awareness and utopianism in the lyrics, and an increased instrumental experimentalism: his use of the ARP and Moog synthesizers and the clavinet was particularly innovatory, as he introduced many new timbres and techniques to popular music.

After the artistic and commercial efflorescence of the period 1971–6, Wonder's productivity slowed. His next album, *Journey through the Secret Life of Plants* (1979) was a soundtrack for a film that was never released. The predominantly instrumental, subdued sound represented a departure for Wonder, and the record was unsuccessful commercially. Recordings in the 1980s returned to the sound of his mid-1970s work and included collaborations with Paul McCartney (*Ebony and Ivory*), Michael Jackson (*Get It*) and Julio Iglesias (*My Love*), and his biggest hit, *I just called to say I love you* (1984, from the soundtrack of *The Woman in Red*). His social consciousness found expression in songs such as *Birthday* (1980), which advocated a holiday in honour of Martin Luther King (granted on 15 January 1986), and in other efforts supporting anti-apartheid and fundraising for AIDS research, blind and retarded children and the homeless. He has continued to record and collaborate with a wide range of musicians and artists, including the film director Spike Lee (*Jungle Fever*, 1991) and Kenneth 'Babyface' Edmonds, *How Come How Long* (1997).

DAVID BRACKETT

Wonderlich, Jean-Georges. *See* WUNDERLICH, JEAN-GEORGES.

Wonnegger, Johannes Ludwig [Ioannes Litavicus] (*fl* 1540–60). German music editor. He was the son of Dr Johannes Romanus Wonnecker (or Wonegker) from Hanau, who in 1522 was rector of the University of Basle and opposed its acceptance of Lutheranism. When Wonnecker's widow married (*c*1540) the renowned Swiss musical humanist HEINRICH GLAREAN, Johannes Ludwig Wonnegger became Glarean's stepson. Wonnegger was later a lecturer at the University of Freiburg, but is best known as the editor of Glarean's *Musicae epitome* (Basle, 1557, 2/1559) and its German translation, *Uss Glareani Musick ein Usszug* (Basle, 1557). The aim of the treatises, according to Wonnegger's preface, was to popularize Glarean's theory of 12 modes by offering modestly priced editions to the general public. *Musicae epitome* is a concise, 151-page abridgment of the voluminous *Dodecachordon*. In book 1 brief plainsong examples illustrate each mode. Book 2, on mensural music, contains nine short polyphonic pieces which demonstrate proportions and other mensural procedures; seven of these compositions come from the *Dodecachordon*. Certain explanations in *Musica epitome*, particularly those related to *tactus*, are clearer and more detailed than those in the larger work. New pieces in the Latin and German editions of Wonnegger include an Agnus Dei for three voices by Johannes Wannenmacher, a Swiss composer and friend of Glarean. Another friend and former pupil, Homer Herpol, contributed the three-voice motet *Quia fecit* to the German edition. Wonnegger's role in both editions was mostly editorial; his remarks in the preface on the unfortunate expulsion of plainsong from church services clearly reflect the opinion of Glarean.

CLEMENT A. MILLER

Wood, Abraham (*b* Northboro [now in Northborough], MA, 30 July 1752; *d* Northboro, 6 Aug 1804). American composer and tune book compiler. He worked as a fuller of cloth, served as tax assessor and captain of a militia company, and led a choir in Northboro. He was a drummer and later a member of the Committee of Correspondence during the Revolution; several of his compositions relate to that conflict. The stirring *Warren*, an elegy for the patriot Joseph Warren, is one of 27 pieces by Wood in his and Joseph Stone's *The Columbian Harmony* (Boston, [1793]). *A Hymn on Peace*, published independently in 1784, was sold by William Billings, among others. The *Funeral Elegy on the Death of General George Washington* (Boston, 1800), also issued separately, was adapted and sung after the death of President W.H. Harrison in 1841. Wood compiled one tune book on his own, *Divine Songs* (Boston, 1789), containing 11 settings of poems by the English hymnodist Joseph Hart. A manuscript book, probably compiled by Wood, is owned by the Northborough Historical Society; it contains 55 of his compositions (several dated 1775), of which 26 were never published. His remaining known pieces include the secular *Ode to Spring* (published in the *Massachusetts Magazine*, May 1789). Wood's importance derives from his early prominence in his generation, the popularity of his fuging tune *Worcester* (reprinted 61 times before 1811), and the eloquence and nobility of his best compositions.

NYM COOKE

Wood, Anthony [self-styled Anthony à Wood] (*b* Oxford, 17 Dec 1632; *d* Oxford, 29 Nov 1695). English antiquary and amateur musician. He was the son of Thomas Wood, a landed proprietor, and was educated at New College School, Oxford, Lord William's School, Thame, and Merton College, Oxford, where he graduated BA in 1652 and MA in 1655. Music was his delight from his earliest years. He began as a viol player but in 1651 taught himself to play the violin, which he tuned in 4ths until he had regular lessons from a teacher in 1653. From 1656 he took part regularly in the chamber music meetings held in Oxford and entertained visiting violinists, including Thomas Baltzar. After the Restoration the professional musicians returned to London and within two or three years the regular meetings for chamber music came to an end. From that time Wood seems to have abandoned music. He became a recluse and devoted himself to collecting materials for a history of Oxford. In 1692 he was accused of libelling the 1st Earl of Clarendon in his *Athenae oxonienses* (London, 1691–2, rev. and enlarged 3/1813–20/R by P. Bliss) and was expelled from the university in 1693. He is buried in Merton College chapel. His other publications include *Historia et antiquitates*

Universitatis oxoniensis (Oxford, 1674), reissued in English in 1792 and 1796. He also compiled manuscript notes on the lives of musicians, mostly English (*GB-Ob*).

JACK WESTRUP

Wood, Arthur (Henry) (*b* Heckmondwike, 24 Jan 1875; *d* London, 18 Jan 1953). English composer, conductor and flautist. He gained early experience playing the flute in orchestras in Harrogate, then at Bournemouth under Dan Godfrey. He subsequently conducted at various London theatres (among them the Adelphi, Terry's, Daly's and Drury Lane), for over 30 years. He toured the USA with Messager's *Véronique* and recorded excerpts from the Savoy operas. He also composed musicals of his own, but these have survived less well than the splendidly scored orchestral works produced for Boosey & Hawkes, both original pieces and arrangements, for whom he was a staff composer.

His compositions include suites and separate movements, many betraying his northern origins and evoking the outdoors, also a concertino for his one-time instrument, the flute. His most durable piece is 'Barwick Green' from the suite *My Native Heath*, inspired by his home county of Yorkshire and used as the signature tune to the long-running BBC radio programme 'The Archers'. This apart, only *Three Dale Dances* is heard nowadays in an arrangement for brass band, an ensemble for which Wood also composed. His work is discussed in P.L. Scowcroft: *British Light Music: a Personal Gallery of Twentieth-Century Composers* (Thames, 1997).

WORKS
(*selective list*)

STAGE

dates those of first performance; musical comedies, unless otherwise stated

Oh, Caesar! (musical farce, 2, M. Pemberton, A. Ross, A.M. Thompson), Edinburgh, Royal Lyceum, 23 Dec 1916, collab. N.D. Ayer

Petticoat Fair (4 scenes, R. Courtneidge and G. Hartley-Milburn), Newcastle, Hippodrome, 23 Dec 1918

Fancy Fair (Courtneidge), Newcastle, Hippodrome, 14 April 1919

Too Many Girls (Courtneidge, Hartley-Milburn, J. Hulbert, H. Simpson), Liverpool, Hippodrome, 22 Dec 1919

The Sheik of Shepherd's Bush (musical farcical comedy, H. Lowther, A. Shirley), London, Brixton Theatre, 24 Nov 1924

Yvonne (3, P. Greenbank), London, Daly's, 22 May 1926, collab. J. Gilbert and V. Duke

Concertino, A, fl, orch (1948)

Orch suites: 3 Old Dances, 1902; 3 Dale Dances (1917); 3 Mask Dances [from F. Lehár: Die blaue Mazur] (1927); Widow Malone, 1937; Barnsley Fair, Yorkshire rhapsody; Ballerina Suite; My Native Heath; 3 More Dale Dances; Yorkshire Moors

Brass band: marches incl. All Clear; Royal Progress; transcrs. of own orch. works

Many arrs. for military band, incl. works by Berlin, Elgar, Ellis, German, Lehár, Millöcker, Rubens, Smetana, Stolz, among others

Many orch movts, incl. Coquetterie (1913); Shipley Glen, ov (1937); Drink to Me Only With Thine Eyes, orch poem (1938); Fiddlers Three (1940); Lancashire Clog Dance; Fairy Dreams; Greensleeves

Transcrs. of own works for pf

VOCAL

Many songs, incl. The Voice of the Drum (C. Reach) (1903); The Property Man, the Stage Hand's Lament (H.E. Melvin) (1911); My Greeting to You (H.E. Clarke) (1912); Shoulder to Shoulder, patriotic song (Sir J. Lyons) (1914); Since it Must be Good-bye (A. Anderson) (1918); A Man of Property (A. Melford) (1919)

Musical monologues, incl. The Man with the Single Hair (R. Ganthony) (1902); More than One Objection (C. Cameron) (1920)

PHILIP L. SCOWCROFT

Wood, Charles (*b* Armagh, 15 June 1866; *d* Cambridge, 12 July 1926). Irish composer and teacher. A chorister at Armagh Cathedral, he was educated at the cathedral school. He received training in harmony and counterpoint (1880–81) from T.O. Marks, the cathedral organist, as well as encouragement from his elder brother, William Wood (1859–95), himself a professional musician. In 1883 he was elected to the Morley Open Scholarship in Composition at the newly instituted RCM where he studied composition with Parry and Stanford. He won an organ scholarship to Selwyn College, Cambridge in 1888 where, after five terms, he migrated to Gonville and Caius as organ scholar. In 1888 he was appointed to teach harmony at the RCM and the following year he was made a lecturer in harmony and counterpoint at Caius. He was elected a fellow there in 1894, and in 1897 he became university lecturer in harmony and counterpoint, succeeding George Garrett. At Cambridge, Wood was awarded the degrees of BA and MusB in 1890 and those of MA and MusD in 1894. Besides playing an active part as organist at Caius, he assisted Stanford as conductor of the Cambridge University Musical Society (1888–94) and was bandmaster of the University Volunteers (1889–97). In addition to his work at the RCM he was an examiner for the Associated Board which took him to Australia (1901–2), was a founder member and vice-president of the Irish Folk-song Society (1904) and president of the Musical Association (1924). In recognition of his contribution to British musical life, he received an honorary PhD from Leeds University (1904) and an honorary DMus from Oxford (1924). In 1924, after Stanford's death, he was elected professor of music at Cambridge, a position he held for only two years until his death in 1926.

Wood is known today primarily as a composer of Anglican church music. His numerous settings of the evening canticles derive in part their thematic cohesion and textural variety from the example of Stanford though he rarely adopted the symphonic conception of his teacher. In his later settings, he showed a marked inclination towards contrapuntal and harmonic archaisms as demonstrated in his frequently performed *Magnificat* and *Nunc dimittis* in F 'Collegium Regale' for double choir with its elements of verse structure, antiphony and diatonic simplicity. A more intense antiquarianism, verging on the austere, is apparent in his *a cappella* settings of the *Nunc dimittis* for R.R. Terry at Westminster Cathedral (both 1916), his Communion Service in the Phrygian mode (pubd 1923) and the *St Mark Passion*, a preoccupation reinforced by his collaboration with the Rev. G.R. Woodward in the 1890s, which resulted in the publication of *The Cowley Carol Book*, *The Cambridge Carol Book*,

An Italian Carol Book and the hymn book *Songs of Syon*. Wood's thorough assimilation of 16th-century models also assisted him in the production of a series of fine large-scale anthems, *Hail, Gladdening Light* (1919), *Tis the Day of Resurrection* (1927) and *O King Most High* (1932), though it is in his anthems with organ, notably *O Thou, the Central Orb* (?1914–15) and the exquisite *Expectans expectavi* (1919), that Wood's harmonic imagination is given full rein.

Between 1885 and 1904 Wood produced intermittently a series of cantatas modelled essentially on those of Parry and Stanford: *On Time* (1897–8) found a powerful precedent in Parry's *Blest Pair of Sirens*, while *A Ballad of Dundee* (1904) looked to the narrative designs of Stanford's *Revenge* and *Voyage of Maeldune*. His most original choral work was his setting of Walt Whitman's *Dirge for Two Veterans* (1900–01), cast, episodically, in the mould of a funeral march. The *Dirge* represented the zenith of his admiration for the poetry of Whitman, an admiration which earlier had produced a clutch of fine songs including *Ethiopia Saluting the Colours* (1898), also inspired by the style form of the march. Wood's earliest cantata, *Spring's Summons* (1885), set words from A.P. Graves's *Songs of Killarney*, though a collaboration between the two men did not commence until the late 1890s in a series of publications of Irish folksong arrangements very much in the manner and fashion of Stanford's collections that had first appeared in the 1880s. These publications in turn raised both the profile and the role of Irish melody in Wood's vocal and instrumental compositions.

Although instrumental and dramatic music forms a smaller part of Wood's sizeable output, it is clear that he retained an interest in both genres throughout his life. Though there are indications that he attempted a symphony, his only complete extended symphonic work is *Patrick Sarsfield: Symphonic Variations on an Irish Air* (1899) which adheres to the four-movement structural analogy of Parry's Symphonic Variations of 1897. From surviving sketches it is evident that he also began a full-scale opera *Pat in Fairyland* (to a libretto by J. Todhunter), but this came to nothing. Instead he joined the ranks of Macfarren, Parry and Stanford in providing scores for the Cambridge Greek Plays (*Ion*, 1890; *Iphigenia in Tauris*, 1894) and towards the end of his life produced two Dickens-inspired chamber operas *A Scene from Pickwick* (1921) and *The Family Party* (1923). It was, however, to the intimacy of chamber music, and, more specifically, to the string quartet that Wood consistently returned as is reflected in the series of six quartets edited by Dent and published posthumously by OUP in 1929.

JEREMY DIBBLE

Wood, Haydn (*b* Slaithwaite, Yorks., 25 March 1882; *d* London, 11 March 1959). English composer. Wood was brought up in the Isle of Man, which later inspired several compositions. He studied violin and composition at the RCM, subsequently composing a *Phantasie* for string quartet (which won a Cobbett Prize), concertos for piano and violin and short choral pieces. His reputation, however, was made through lighter musical forms: his musical comedies, especially *Tina*, achieved modest success, and his songs, of which he composed over 200 in ballad style, included the popular *Roses of Picardy* and *A Brown Bird Singing*.

With his professional strength lying in melody and scoring, he is best remembered for his lighter orchestral music. The *Variations on a Once Popular Humorous Song* are resourceful and inventive, as were the orchestral rhapsodies, which included *The Seafarer*, based on sea shanties. He also composed lively overtures (*Eros*, *Apollo* and *Minerva*), and stirring marches such as *Elizabeth of England*, *Montmartre* and *Torch of Freedom*. He challenged Coates in the light orchestral suite, producing more examples than him and taking his inspiration from similar subjects, notably London. He also composed *Three Famous Pictures* and, after Ivor Novello, Dolores del Rio and Charlie Chaplin, *Three Famous Cinema Stars*. His work is discussed in P.L. Scowcroft: *British Light Music: a Personal Gallery of Twentieth-Century Composers* (London, 1997).

PHILIP L. SCOWCROFT

Wood, Sir Henry J(oseph) (*b* London, 3 March 1869; *d* Hitchin, 19 Aug 1944). English conductor. His father, an optician and engineering model-maker, was a keen amateur cellist who also sang in the choir of St Sepulchre's, Holborn, in London. Wood's early aptitude for music was mainly nurtured from home, though he also took organ and piano lessons from E.M. Lott, the organist of St Sepulchre's, and from the age of 14 won public notice as an organ recitalist. At the RAM (1886–8) he studied composition with Prout, organ with Charles Steggall and piano with Walter Macfarren, and he also developed skill as a piano accompanist for singers, playing for Manuel Garcia's lessons. Ambitious as a composer, he had several songs and other short pieces published while he was still at the Academy; three operettas were later produced, though without success.

In 1889 Wood was engaged as musical director of Arthur Rousbey's touring opera company, subsequently moving to a similar post with the Carl Rosa Opera and also assisting Sullivan in the preparation of *Ivanhoe* (1891). As assistant conductor in Lago's opera season at the Olympic Theatre he conducted *Yevgeny Onegin* (17 October 1892), the first London production of any Tchaikovsky opera. That occasion pointed to his future role as the first British-born career conductor. He undertook only one further operatic engagement, taking over the London run of Stanford's *Shamus O'Brien* (1896) after the opening performance, conducted the composer.

Wood's future was to be linked with that of the recently opened (1893) Queen's Hall. At the age of 26 he was engaged by its manager, Robert Newman, as conductor of the hall's first series of promenade concerts, which opened on 10 August 1895. Initially, as in London's earlier promenade concerts, programmes drew mainly on lighter music, including ballads, with a cautious infusion of classics. However, Wood's command over both players and audiences permitted an increase in the symphonic component; this gave the new series its distinction as an annual summer event (with occasional extensions to other times of year). By 1896 the dedication of Monday nights chiefly to Beethoven, Friday nights to Wagner, was in place. With rigorous rehearsal timing and copious precautionary marking of orchestral parts, Wood conquered the restriction of only three rehearsals per week for six nightly concerts. In January 1897 he took over the hall's prestigious Saturday afternoon symphony concerts. Wagner and Tchaikovsky were recognized as among his chief strengths; Queen Victoria chose selections from both when he and the Queen's Hall Orchestra performed at Windsor Castle on 24 November 1898. In Newman's London Music Festival of 1899, Wood and his orchestra were successfully matched against the Lamoureux Orchestra from Paris (Charles Lamoureux, its conductor, was Wood's senior by 35 years).

Wood, who had modelled his technique and even his bearded appearance on Arthur Nikisch, won equal success as a conductor of major choral festivals, including those of Birmingham, Norwich and, from 1902, particularly Sheffield, where his later radical reinterpretations of such works as Handel's *Messiah* would arouse both admiration and fury. In reporting the 1902 festival for the Berlin *Allgemeine Musik-Zeitung*, Otto Lessmann bracketed Elgar and Wood as representing 'a new epoch in English musical life'. When Wood appeared as one of the New York PO's guest conductors in 1904, his 'sweeping, incisive and picturesque' gestures impressed the American *Musical Courier*. Seven years later he declined that orchestra's permanent conductorship.

In 1898 Wood married a Russian-born divorcee, Olga Hillman, née Mikhailov. A gifted soprano, she performed as 'Mrs Henry J. Wood'; Wood's earliest recordings were made in 1908–9 as her piano accompanist. It was the happiest of marriages, cut short by her early death in 1909. A warm supporter of Wood from this time was Britain's leading Russian music scholar Rosa Newmarch, who became his first biographer in 1904. Wood's affinity for Russian composers was in constant evidence: works he introduced to Britain ranged from the *Nutcracker* suite and *Scheherazade* in 1896 to Shostakovich's Seventh Symphony in 1942 and Eighth in 1944.

After Newman's bankruptcy in 1902 the Queen's Hall Orchestra was supported by Sir Edgar Speyer, a banker of German origin. Wood proved his skills as a conductor of Debussy, Strauss and Sibelius, and as trainer of the orchestra which served those composers when they appeared as guest conductors. He was likewise the pioneer of Mahler in Britain, giving the First Symphony in 1903 and the Fourth in 1905. The occasional incomprehension or hostility shown by audiences and players he took in his stride, as when he gave the world première of Schoenberg's Five Orchestral Pieces in 1912 and the first British performance of Skryabin's *Prometheus* the following year. ('Stick to it, gentlemen', he urged the orchestra at a rehearsal of the Schoenberg. 'This is nothing to what you'll have to play in 25 years' time.')

In 1904 Wood strengthened his command, ending the custom that permitted a player to send a substitute if a more attractive engagement were offered. In 1913 he became the first to admit women to the general ranks of a major British orchestra. During this period, while continuing to bring new works to the Sheffield Festival, including Delius's *Sea Drift* (dedicated to him) in 1908, he also began to conduct for G.W. Brand Lane's concerts in Manchester. He was knighted in January 1911, and in June of that year married his second wife Muriel Ellen Greatrex.

At the beginning of World War I, Wood successfully resisted pressure to ban German music, but Speyer was driven out of Britain by anti-German feeling. The music publishing firm of Chappell took over the promenade concerts and others under Wood's baton, and the orchestra was renamed the New Queen's Hall Orchestra. From 1915 Wood began to make orchestral recordings. In 1917 he declined the permanent conductorship of the Boston SO, though he was to be a guest conductor in 1934 and would also appear in three summer seasons at the Hollywood Bowl (1925, 1926, 1934). In 1923 he accepted the conductorship of the RAM's first orchestra, giving priority in his diary to its twice-weekly rehearsals; he retained this post for almost 20 years. In 1927, for financial reasons, Chappell abandoned not only the promenade concerts but also the year-round symphony concerts at Queen's Hall, leaving Wood without an orchestra of his own at a time when his reputation was already being overshadowed by that of Beecham. Charges of heavy-handedness and routine were increasingly made, and his treatment of Bach and Handel, whose orchestration he habitually reinforced, was becoming unfashionable. The BBC took over the Proms (as they were now generally called) with Wood as conductor, but he began to depend perilously on what share of concerts he could achieve as one of many guest conductors in the year-round season of the BBC SO.

Henry J. Wood, c1938

The BBC chose Wood for important collaborations with Bartók (1936, as pianist-composer) and Hindemith, and for the first performance in Britain (1930) of Mahler's Eighth Symphony, also allotting him the annual Good Friday concerts usually devoted either to selections from *Parsifal* or to *The Dream of Gerontius*. But a time of depressed status and income coincided with a private crisis. In 1935 Wood left his wife and formed a permanent liaison with the widowed Jessie Linton, who as Jessie Goldsack had been a very young mezzo-soprano soloist in the promenade concerts of 1900–02. She changed her name by deed poll to 'Lady [as a forename] Jessie Wood', and was responsible for reinvigorating the conductor's last years.

The year 1938 was somewhat arbitrarily named as his fiftieth in the role of conductor. Widespread salutations culminated in a concert at the Royal Albert Hall on 5 October for which Vaughan Williams wrote (and dedicated to Wood) his *Serenade to Music*. When the BBC declined in World War II to organize the promenade concert seasons of 1940 and 1941, Wood kept them going by collaborating with a private entrepreneur, Keith Douglas. Queen's Hall, however, was destroyed by German bombing on 10 May 1941 and the concerts of that year were moved to the Royal Albert Hall, where they remained after the BBC resumed them in 1942. Though now past his seventieth birthday, Wood travelled widely amid the blackout to conduct the LSO, the Hallé and other orchestras.

From 1943 Wood's physical powers diminished perceptibly. In that summer's promenade season he was compelled not only to share the conducting of certain concerts but to withdraw entirely from others. Nevertheless in 1944 his 75th birthday was marked with due

pomp: a concert attended by the Queen was given in his honour on 25 March at the Albert Hall; the four London orchestras taking part were conducted by Wood, Adrian Boult and Basil Cameron. The 1944 promenade season, Wood's fiftieth, was curtailed by renewed German bombing. Instead, the BBC Symphony Orchestra (under Wood, Cameron or Boult) performed from its wartime base at Bedford only those items that were to be broadcast. The Bedford performance of Beethoven's Symphony no.7 on 28 July 1944 was the conductor's last: his three-week terminal illness began that night.

Wood wrote an autobiography, *My Life of Music* (1938), that is vivacious in style but factually misleading; his earlier four-volume treatise *The Gentle Art of Singing* (1927–8), however, embodies his considerable experience as a vocal teacher. Among his many orchestral arrangements are, most notably, a version of Musorgsky's *Pictures at an Exhibition* (1915, preceding Ravel's) and a mammoth version of Bach's Toccata and Fugue in D minor BWV565, which he ascribed to a fictitious 'Paul Klenovsky' in 1929. Wood's brilliant full-orchestral transcription of Grainger's *Handel in the Strand* is often taken to be the composer's own. His *Fantasia on British Sea Songs*, created for a Trafalgar Day centenary concert in 1905, has survived as a festive contribution to the Last Night of later Prom seasons. He remained through life a passionate amateur painter in oils: several of his paintings survive at the RAM along with his library of scores and other memorabilia. Created a Companion of Honour in 1944, he was also a member of the order of the Crown of Belgium (1920) and an officer of the French Légion d'Honneur (1926). He received the Royal Philharmonic Society's gold medal in 1921, was awarded honorary doctorates by several British universities, and became an honorary freeman of the Worshipful Company of Musicians in 1938.

Wood's artistic energy, variety of taste, and avidity for new music endowed the Proms (now called by his name) with their continuing creative and educational force. His orchestral players affectionately nicknamed him Timber – more than a play on his name, since it seemed to represent his reliability too. His tally of first performances, or first performances in Britain, was heroic: at least 717 works by 357 composers. Greatness as measured by finesse of execution may not be his, particularly in his limited legacy of recordings, but he remains one of the most remarkable musicians Britain has produced.

ARTHUR JACOBS

Wood, Hugh (*b* Parbold, Lancashire, 27 June 1932). English composer. Despite encouragement of his musical talents from Alan Bush at the Bryanston Summer School in 1948, Wood read history at Oxford, only to spend most of his time making music anyway, particularly as a composer for theatrical productions. After leaving university he studied privately with Iain Hamilton, W.S. Lloyd-Webber, Anthony Milner and Mátyás Seiber, while working as a music teacher, at first in various London schools, then at Morley College and the Royal Academy of Music. At the same time he was beginning to establish a reputation with his earliest published compositions, especially the First String Quartet (1962) and *Scenes from Comus*, his first orchestral work, written for the 1965 Promenade Concerts. He subsequently held posts at various universities – Glasgow (1966–70), Liverpool (1971–5) and Cambridge (1977–99); he is regarded as a passionate teacher as well as a lucid and engaging writer about music.

Already in the earliest scores, from the *Variations* op.1 onwards, Wood's music declares its roots in the Viennese tradition, from Beethoven and before to Schoenberg and after. At a time when many English musicians were mistrustful of any form of European modernism, this cosmopolitan approach set him apart from a prevalent parochialism, and it is telling that one of his chief mentors throughout his career was the Spanish emigré Roberto Gerhard. While Wood's eclectic tastes are clearly discernible (especially Stravinsky, and Messiaen's *Turangalîla symphonie*), Schoenberg's serialism was a potent influence, but in contrast to many of his contemporaries Wood's main interest in the technique was as a means to intensify motivic argument: all his music is conceived in terms of motifs, clearly presented and densely worked. Like Schoenberg, he has particularly cultivated Viennese classical genres, with an emphasis on chamber music. Sometimes the forms of individual movements can be compared to Beethovenian models, as in the Piano Trio (1984), with its sonata and rondo designs, but Wood has also developed different and wholly unclassical formal procedures, always projecting an assured sense of direction and purpose. His control of long-range design is widely admired, and often leads him to put the greatest weight onto the final movement, or to weave together successive movements into a single continuous span, as in

the Cello Concerto (1969). Like the previous *Scenes from Comus*, the concerto was acclaimed at its Proms première; the two works brought to the attention of a sizeable audience not only Wood's ability to shape dynamic forms on the largest scale, but also his characteristically intense, yearning lyricism, in which cantabile lines are stretched over angular contours defined by wide, dissonant intervals. Together with warm, sonorous harmonies based on 7th chords and moving by semitones or 5ths, such melodies reflect his love of Berg, the composer he is perhaps closest to in spirit. But there are also moments of reticence which give the music an oft-noted English quality, for all its European credentials. Indeed, this lyric impulse forms the basis of his idiomatic and refined response to English verse: his songs for voice and piano form a considerable part of his oeuvre and must be counted the most distinctive and substantial contribution to British song writing since Britten and Tippett.

After the success of the Cello Concerto Wood felt that he 'should be seeking some new means of expression'. In his next work, the powerful Second String Quartet (1969–70), he confronted two compositional ideas markedly at odds with his meticulously crafted and organically unified music up to that time, and inspired by the exciting 'roughness of outline, the unfinished quality' he found in the paintings of William Scott. The first, revealing the recent impact of certain 'texture' pieces by Lutosławski and Ligeti, is a bold use of unsynchronized writing. It is especially bold in that the disruptive potential of the free rhythms is maximized by counterpoint which does not merely reiterate a single prevailing harmony, but continuously develops it. But after the *Chamber Concerto* (1971) this technique was not used again. The other idea, however, represents a response to a long-standing and 'formidable challenge to all my formal preconceptions, and one of my favourite 20th-century works', Stravinsky's *Symphonies of Wind Instruments*. Already adumbrated in the early Trio (1961), it now became a distinctive feature of Wood's later style: this is the abrupt juxtaposition of contrasting and apparently unrelated fragments (again, accomplished in the Second Quartet with exhilarating vehemence), which are gradually made to interact and combine as this new, sectional thinking engages in a dialectic with Wood's original and still-underlying urge to integrate. This new style unleashed the creative energy for three large, symphonic works – the *Chamber Concerto*, Violin Concerto (1972) and *Neruda Song Cycle* (1974) – which were followed by a difficult period in which no major works were produced.

It was at this time that Wood began to grapple with ideas for a symphony. But the first piece to break the near silence was the Third String Quartet (1978), a moving work that depicts an awakening from paralysis to new life. There is an equally palpable sense of dramatic progression in the Symphony itself (1982), which traces a Beethovenian, heroic path from tempestuous violence to hard-won affirmation. His largest work to date, it exemplifies the way that he can inform a highly cogent thematic and harmonic argument with a directly communicative, late-Romantic kind of rhetoric, to overwhelming effect. As if in reaction, Wood then turned to two untried and exacting chamber genres, piano trio and horn trio, to produce finely-wrought works of great character and verve which demonstrate his contrapuntal invention at its height. He had begun a setting of Eliot's poem *Marina* before his daughter died tragically in 1988: together with the following Cantata (1989) and several later works it is dedicated to her memory. The Piano Concerto (1989–91), written for Wood's former student Joanna MacGregor, was another Proms success; it is characterized by an exuberant rhythmic drive which recalls his many scherzo movements (and perhaps ultimately Schoenberg's dance rhythms); it also finds space to tease out a hushed poetry from the jazz standard *Sweet Lorraine*. References to other music are quite frequent in Wood's oeuvre (surprisingly, perhaps, given the highly coherent and integrated nature of his musical language): they range from direct quotations – such as the passages from Wagner and Mozart in the Symphony which, like Berg's quote from *Tristan* in the *Lyric Suite*, clearly signal an almost programmatic import underlying the musical argument – to gestures wholly appropriated and reconceived (two striking examples are the ending of the Symphony and the opening of the Piano Concerto, with their evocation of equivalent passages in Janáček and Rachmaninoff). Throughout the 1990s Wood continued to write in orchestral, vocal and chamber genres with equal freshness and intensity. His Fourth String Quartet (1992–3), with its searingly expressive slow movement and powerfully cumulative finale, sums up the qualities of his music at their most compelling: the fierce energy, derived from an urgent counterpoint of vivid themes, the searching lyricism, the ability to sustain, fulfil and ultimately exceed long-range expectations, the ardently dramatic, involving nature of the musical argument, and the absolute commitment to the expressive value of pure music.

WORKS

Orch: Scenes from Comus (J. Milton), op.6, S, T, orch, 1965; Vc Conc., op.12, 1969; Chbr Conc., op.15, 1971, rev. 1978; Vn Conc., op.17, 1972; Songs-Cycle to Poems by Pablo Neruda (trans. Logue), S/T, chbr orch, 1973; Sym., op.21, 1982; Pf Conc., op.32, 1989–91; Variations, op.39, 1995–7; Serenade and Elegy, op.42, str qt, 1998–9

Choral: Songs from Springtime, chorus, pf, 1954, orchd 1958; 3 Choruses, op.7, SATB, 1966: The Hawk in the Rain (T. Hughes), Sirens (J. Joyce), All We (E. Muir); 2 Choruses (W.B. Yeats), op.16, SATB, 1973, rev. 1989; A Christmas Poem (D. Davis), op.27, SATB, 1984; Cant. (D.H. Lawrence), op.30, SATB, orch, 1989; The Kingdom of God (F. Thompson), op. 38 SATB, 1994

Songs (S/T, pf, unless otherwise stated): Laurie Lee Songs, 1959, rev. S, orch as op.28, 1986–7; Songs to Poems by Christopher Logue, op.2, Mez, cl, vn, vc, 1961; Songs to Poems by D.H. Lawrence, op.14, 1966; Robert Graves Songs, set 1, op.18, 1966–7; Robert Graves Songs, set 3, op.25, 1966–83; The Horses (song cycle, Hughes), op.10, 1967, rev. 1968; The Rider Victory (song cycle, Muir), op.11, 1968; Robert Graves Songs, set 4, op.36, 1972–84; Songs (Neruda and others), op.23, 1974–83; Robert Graves Songs, set 2, op.22, 1977–82; Songs (Neruda and others), op.37, 1984–93; Marina (T.S. Eliot), S/T, a fl, hn, hp, va, 1988–9; Gk. Songs (L. Durrell and others), op.41, 1993–8

JEREMY THURLOW

Wood, James (Peter) (*b* Barton-on-Sea, 27 May 1953). English composer, choral conductor and percussionist. He studied composition with Boulanger in Paris before becoming organ scholar at Sidney Sussex College, Cambridge. The New London Chamber Choir was founded by him in 1981 to perform medieval and Renaissance music alongside contemporary repertory. He was professor of percussion at the Darmstadt summer courses between 1982 and 1994, becoming increasingly involved in building percussion instruments, and established the London Centre for Microtonal Music, and its associated ensemble, Critical Band, in 1991. His awards number the Gemini Fellowship (1993), the Arts Foundation Fellowship for electro-acoustic composition (1994–6) and the Holst Foundation Award (1995).

Wood's major compositions reflect diverse interests. His song cycles for soprano and percussion are among several works stemming from oriental ideas, while *Phaedrus*, for voice and ensemble, belongs to a group of works inspired by ancient Greek subjects. In addition he has explored African traditions, and all his output has been influenced by rituals and ceremonies of various kinds. In the later 1980s, Wood moved away from a predominantly vocal output for two of his most ambitious scores: *Stoicheia*, for large percussion ensemble and electronics, and *Oreion*, for full orchestra. His preoccupation with microtonality has led to two further works for small orchestra: *Two Men Meet, Each Presuming the Other to be from a Distant Planet*, in which the percussion soloist mainly plays the microxyl, an especially constructed microtonal xylophone, and *The Parliament of Angels*.

WORKS

INSTRUMENTAL

Orch: Oreion (of Mountains…), 1988–9
Large ens: Venancio Mbande Talking with Trees, quarter-tone mar, 15 insts, 1993–4; Two Men Meet, Each Presuming the Other to be from a Distant Planet, perc, 24 insts, 1995; The Parliament of Angels, 18 insts, 1995
Perc: Rogosanti, 1986; Stoicheia, 15 perc, 4 kbds, elecs, 1987–8; Village Burial with Fire, 4 perc, 1989; Spirit Festival with Lamentations, quarter-tone mar, 4 perc, 1992; Elange N'Kake Singing to his Craft, perc + v, 1993
Chbr: Str Qt, 1984; Barong, 2 pf, 2 perc, 1985; Marsyapollonomachia, ob, perc, 1987; Cart-Wheels, b, cl, perc, 1993
Solo inst: Children at a Funeral, prep pf, 1996

VOCAL

With inst ens: Missa: in memoriam Lili Boulanger, S, double chorus, 4 tpt, 4 trbn, org, 1975–6; 2 Motets to Verses from the Prophet Isaiah, S, fl, ob, va, hp, 1981; Phaedrus (Plato [ancient Gk. text]), Bar, chorus, perc, wind ens, perc ens, 1985–6; Phainomena, 3 S, 3 Mez, 3 A, 3 T, 3 Bar, 3 B, 17 insts, tape, 1991–2
Unacc.: Drama (Aristophanes [ancient Gk. text]), 2 Ct, T, 2 Bar, B, 1983; Incantamenta (incantations), 24vv, 1991
With perc: Choroi jai Thaliai (revels and dances [ancient Gk. text]), S, perc, tape, 1982; Ho shang Yao (Songs by the River) (from *Shijing* [ancient Chin. text]), S, perc, 1983; T'ien chung Yao (Songs from the Fields) (from *Shijing* [ancient Chin. text]), S, cimb, 2 perc, 1985

JOHN WARNABY

Wood [Wodde, Wodds, Woods], **John** (*fl* ? 1560s). English composer. There has been some confusion over his identity. Due to the absence of forenames from ascriptions in some sources of his music he has sometimes been identified with Michael Woods, who flourished from about 1568 to 1573 and was organist and later a vicar-choral at Chichester Cathedral. However, there is no evidence that Michael Woods composed music. A more likely identification is based on the ascription 'Mr John Wood, Bachelor of Music', in the earliest and most prolific source of his music copied about 1575. However, there seems to be no record of the award of the BMus in the 16th century to anyone of this name; nor has any relevant document, such as a will, been found. The name John Wood had been thought to refer to the Master of the Children at Christ Church, Canterbury in about 1530. However, re-examination of the relevant document at Canterbury has revealed that the name of the Master of the Children about this time was Thomas Wood, and that the forename John was a misreading.

Nine Latin sacred pieces for three, four and five voices by John Wood survive. (The anthem *O Lord, the world's saviour* sometimes attributed to Wood is by William Mundy.) Wood's choice of texts suggests parallels with the Latin output of composers such as William Mundy, Christopher Tye and Robert Whyte from the 1560s or slightly later. This concurs with the earliest known appearance of Wood's music from about 1575. With the exception of *Igitur O Jesu*, the texts of all Wood's extant settings come from an adaptation of Psalm lxvii (Vulgate numbering) published in 1546. It is possible that Wood's settings from this psalm began their existence as a single long piece from which extracts were transcribed into different sources.

JUDITH BLEZZARD

Wood, John Muir (*b* Edinburgh, 31 July 1805; *d* Armadale, Cove, 25 June 1892). Scottish music publisher and writer on music. He was the son of Andrew Wood, a music publisher in Edinburgh, who named him after his partner John Muir. He received his initial musical education in Edinburgh, partly with Kalkbrenner, who visited the city in 1814. After periods of study in Paris with J.P. Pixis and in Vienna with Czerny, he returned to Edinburgh in 1828 for a while and taught music. For a number of years he was in London, where his interests were mostly literary. In 1848 he became director of the newly established Glasgow branch of the family publishing firm Wood & Co.; the branch became known as J. Muir Wood & Co., though it retained close links with the parent firm, and survived until 1899. He provided many notes for the later editions of G.F. Graham's *The Songs of Scotland* (the Edinburgh house's most important publication), especially the one-volume edition of 1884. Wood edited later editions of J.T. Surenne's *The Dance Music of Scotland*, originally published in about 1830, contributed excellent articles on Scottish music to the first edition of Grove's *Dictionary*, and edited the short-lived periodical *The Scottish Monthly Musical Times* (1876–8). He played a prominent part in Scottish musical and literary life, promoting Chopin's concerts in Scotland in 1848 and the tours of Thackeray and Dickens, as well as initiating the visit of Sir Charles Hallé and the Hallé Orchestra to Glasgow.

PETER WARD JONES

Wood, Joseph (*b* Bretton, nr Wakefield, 7 March 1801; *d* Harrogate, 6 Sept 1890). English tenor. Wood's early successes were in Rophino Lacy's pastiches; his London debut took place on 30 June 1828 at the English Opera House. In 1831 he married the Scottish soprano Mary Anne Paton, who had pursued a successful career in London from 1822 (*see* WOOD, MARY ANNE). As Mr and Mrs Wood the two appeared in New York, Boston and Philadelphia (1833–6; 1840–41). Both tours ended in controversy when the Woods were rebuked for interfering (apparently inadvertently) with other performers' benefit nights; Joseph was blunt and short-tempered, and inflammatory reports of his tactlessness precipitated serious disturbances in the theatres. In 1843 the Woods retired and settled in Yorkshire; after Mary Anne's death Joseph married Sarah Dobson, also a singer. Joseph was generally recognized as an excellent actor, a passable singer and a shrewd businessman.

WILLIAM BROOKS

Wood [née Paton], **Mary Anne** (*b* Edinburgh, Oct 1802; *d* Chapelthorpe, nr Wakefield, 21 July 1864). Scottish soprano. As a child she learnt the harp, piano and violin; her singing début was in 1810. She sang in London (1811–13) and Bath (1820), and made her stage début as Susanna in October 1822; in 1824 she sang Agathe in the first English production of *Der Freischütz*. That year she married Lord William Pitt Lennox. In April 1826 she created the role of Reiza in *Oberon*, which established her as a leading singer in London. She divorced Lennox in 1831, and later married the English tenor Joseph Wood. In the midst of her triumphant career in London, they left for the USA; their joint début was in New York (9 September 1833) in Michael Rophino Lacy's *Cinderella* (an adaptation of *La Cenerentola*). On two separate tours, often travelling in small troupes with other singers, they appeared in New York, Boston, Philadelphia and elsewhere (1833–6 and 1840–41), performing a repertory ranging from 18th-century ballad operas to contemporary English adaptations of Italian works. They contributed greatly to a general American interest (begun by Elizabeth Austin) in Italian bel canto melody, in particular by introducing Americans to Bellini's operas (*La sonnambula*, 13 November 1835, and *Norma*, 11 January 1841, both in New York). Mrs Wood, as she was known, was acclaimed as the finest English singer of her day. She had a pure soprano voice that was powerful, sweet-toned, brilliant and of extensive compass (*a* to *d'''*/*e'''*); she was an effective actress who was renowned for her beauty. In 1843 she and her husband retired to Yorkshire.

KATHERINE K. PRESTON

Wood [Wode], **Thomas (i)** (*fl* 1560–92). Scottish clergyman. He compiled an important set of partbooks, sometimes known as the St Andrews Psalter or 'Thomas Wode's Partbooks', containing Scottish (and other) music of the 16th century. A canon of Lindores Abbey before the Reformation (1560), Wood joined the reformers, settled in St Andrews in 1562, became vicar there in 1575, and is frequently mentioned in Kirk Session Registers until 1592. His duplicate sets of partbooks (*IRL-Dtc*, *GB-Eu*, *Lbl*, *US-Wgu*) contain the 106 four-voice psalm settings by David Peebles (1562–6), canticles by Angus, Kemp and Blackhall (1566–9), and motets, anthems, psalms, songs and instrumental pieces – Scottish, English and continental (copied from 1569 to 1592) – together with illuminating and entertaining comments by Wood on many of the items. Between 1606 and about 1625 further additions to the partbooks were made by other hands.

KENNETH ELLIOTT

Wood, Thomas (ii) (*b* Chorley, Lancs., 28 Nov 1892; *d* Bures, Essex, 19 Nov 1950). English composer and writer. The son of a master mariner, Wood spent much of his childhood on board ship and his music later drew much from sea songs, shanties and the sea itself. After private study he took the degree of MusB in 1913 and then proceeded to Exeter College, Oxford. Defective eyesight disqualified him from active military service, but he worked for the Admiralty from April 1917 until the end of the war. In 1918 he went to the RCM to study composition under Stanford and piano with Herbert Fryer. He took his DMus at Oxford in 1920, becoming director of music at Tonbridge School in the same year. In 1924 he returned to Oxford as a lecturer in music and precentor of Exeter College. He left Oxford and regular academic work in 1928, settling in Essex to devote himself to composition and writing, and occasionally undertaking examination tours for the Associated Board of the Royal Schools of Music. World War II brought him back to public service in various forms, including a semi-official mission to Australia. In 1947, as chairman of the Royal Philharmonic Society, and in conjunction with his wife, he founded six prizes for instrumental composition. In 1949 he was appointed chairman of the Arts Council's music panel and member of the executive committee.

Wood's compositional output was small and concerned mainly with vocal music. The three cycles of sea songs for chorus and orchestra, *Forty Singing Seamen* (1925), *Master Mariners* (1927) and *Merchantmen* (1934), represent him at his most attractive and typical. In the cantata for unaccompanied chorus *Chanticleer* (1947), his most ambitious work, and later in *Over the Hills and Far Away* (1949), he experimented successfully with a great variety of novel choral effects. More typically his work is conservative in style, stemming from Parry and Stanford but enlivened with many genuinely humorous touches and a breeziness of the kind associated with 19th-century sea songs. A man of many capacities, Wood engaged successfully in musical scholarship, journalism, broadcasting and publishing. His autobiography, *True Thomas* (London, 1940), makes singularly engaging reading.

WORKS

VOCAL

40 Singing Seamen (A. Noyes), Bar, chorus, orch, 1925; Master Mariners (J. Masefield, anon.), Bar, chorus, orch, 1927; The Ballad of Hampstead Heath (J.E. Flecker), chorus, orch, 1927; Merchantmen (R. Kipling, T. Wood), Bar, chorus, orch, 1934; Daniel and the Lions (V. Lindsay), chorus, orch, 1938; Chanticleer (G. Chaucer, trans. Coghill), chorus, 1947; Over the Hills and Far Away (anon.), chorus, 1949; The Rainbow (C. Hassall), chorus, brass band, 1951; solo songs, unison songs and partsongs

INSTRUMENTAL

MICHAEL HURD

Woodblock (Fr. *bloc de bois*, *tambour de bois*; Ger. *Holzblock*, *Holzblocktrommel*; It. *cassa di legno*). A term for a small wooden SLIT-DRUM (classified as a percussion tube; *see* IDIOPHONE), generally used to signify the Western orchestral instrument. Woodblocks are related to the rectangular wooden slit-drums that are used as time-beaters by the Han Chinese (*ban*), hence the occasional specification of 'Chinese woodblocks'. The two-toned cylindrical woodblock, however, is of Western origin. In ragtime and jazz, the woodblock is often referred to as 'clog box' or 'tap box'.

The orchestral woodblock is generally in the form of a rectangular block of teak or similar heavy hardwood with one or sometimes two slotted longitudinal cavities. The instrument varies from about 15 to 30 cm in length, 8–15 cm in width and 7–10 cm in depth. The tone of this small instrument is resonant and penetrating. It is normally suspended on a special fitting or rested on a felt-covered surface, and is struck on the surface or the edge above the slot with wooden drumsticks or beaters such as those used for the orchestral xylophone.

20th-century composers to score for these instruments in orchestral works include Walton in *Façade* (1921–2); Prokofiev in his Fifth (1944) and Sixth (1945–7) Symphonies ('legno') and Copland in *Music for a Great City* (1964; 'woodblocks, high and low'). Cage's *Amores* (1943) requires seven woodblocks. Britten specified two tuned woodblocks in his church parables *The Burning Fiery Furnace* (1966) and *The Prodigal Son* (1968; A and E, and A and D♯ respectively).

JAMES BLADES/JAMES HOLLAND

Woodbury, Isaac Baker (*b* Beverly, MA, 23 Oct 1819; *d* Columbia, SC, 26 Oct 1858). American composer, editor, teacher and writer. He studied music in Boston, London and Paris. On his return he worked as a private teacher, church organist and choral conductor. His first musical publications were tune books compiled in collaboration with his cousin Benjamin F. Baker, with whom he also formed the National Musical Convention, a training school for teachers.

During the 1840s and 50s Woodbury travelled extensively as a choral conductor and baritone soloist. He was organist at Marlborough Chapel, Boston (1843–4), and from 1846 to 1848 was corresponding editor of the *World of Music*. He was organist at Rutgers Street Church, New York (1850–51); he also edited the *American Monthly Musical Review* (1850–53) and the *New York Musical Pioneer* (1855–8). His health began to fail in the 1850s and he spent his final years struggling against tuberculosis; he visited Europe and the Mediterranean in 1851–2 and 1857–8 and Florida in 1856–7, and died on a second trip to Florida in 1858.

Woodbury produced nearly 700 compositions and publications. His sacred music was published principally in 15 tune books, and includes Anglican chants, hymn tunes and ensemble music for soloists or chorus. The bland devotional style of this music closely resembles that of Lowell Mason. His 'Montgomery' was the first American hymn tune to be printed in *Hymns Ancient and Modern*. Woodbury published 14 secular tune books containing glees, choruses and school music; his four secular cantatas (among the earliest of their kind in the USA), three oratorios and one musical drama also appeared in these tune books. The texts are highly sentimental and the plots of the dramatic works are weak. Woodbury attempted to improve the prevailing standards of taste, while insisting that the making and enjoying of music was appropriate for every person. He wrote seven

instrumental tutors and one in harmony and composition in addition to the theoretical introductions to his tune books.

WORKS
(*selective list*)

printed works published in Boston unless otherwise stated

VOCAL

Collections and editions: The Boston Musical Education Society's Collection of Church Music (with B.F. Baker) (1842); The Choral (with Baker) (1845); The New England Glee Book (1847); The Timbrel (with Baker) (1848); The Dulcimer (New York, 1850) [D]; Liber musicus (New York, 1851) [L]; Cottage Glees (New York, 1853); Harp of the South (New York, 1853); The Lute of Zion (with H. Mattison) (New York, 1853); The New York Normal School Song Book (with L.A. Benjamin) (New York, n.d. [1853]) [N]; The Whip-Poor-Will (New York, 1853) [W]; The Columbian Glee Book (1854); The Cythara (New York, 1854) [C]; The Anthem Dulcimer (New York, 1856); The Song Crown (New York, 1856) [S]; The Thanksgiving (New York, 1857)

ROBERT M. COPELAND

Woodcock [Woodcoke, Woodecock], **Clement** (*b* ?1540; *d* Chichester, 1590). English singer, organist and composer. He was a lay clerk at King's College, Cambridge in 1562–3. In 1565 he was appointed a singer at Canterbury Cathedral, becoming a full lay clerk in 1568. About 1570 he left Canterbury to take up the position of organist and Master of the Choristers at Chichester Cathedral. He presumably took orders at this time since he acquired the position of priest vicar on 1 April 1574. He was granted the living of Rumboldswhyke, near Chichester, on 7 November 1589.

Of his five known compositions (all ed. in MB, xliv, 1979), all instrumental, four appear in *GB-Lbl* Add. 31390. This manuscript is dated 1578 and has Chichester connections. Woodcock may well have been involved in its compilation; he had already been paid a consultancy fee at Canterbury in connection with the copying of new music books there. However, the discovery of examples of his signature at Canterbury now seems to discount the previously suggested possibility that he copied the Chichester source.

Woodcock's three In Nomines all have their cantus firmus transposed to G final. In his In Nomine no.3 the cantus firmus is in the top voice, adding to the constraints already imposed by monothematicism to produce a certain stiffness. The remaining two In Nomines have the melody in the middle voice and are more successful, particularly the first whose deliberately paced textures resemble those of other contemporary composers of instrumental music, notably Byrd. *Browning my dere* comprises ten variations on a popular song melody which migrates from one instrument to another, with systematic contrast between three- and five-voice texture. It probably is a response to a similar work by Stonings with only five variations, and appears to have provoked Byrd's 20-variation set. *Hackney*, possibly also based on popular material, has an unusual homophonic texture. The work consists of a series of cadences in C, with few additional chords other than F and G.

WARWICK EDWARDS

Woodcock, Robert (bap. Chelsea, London, 9 Oct 1690; *d* Chelsea, 10 April 1728). English composer and woodwind player. His parents ran a school for girls in Chelsea. The engraver George Vertue, who knew him, wrote that Woodcock had 'a place or clerkship in the Government' until about 1725, leaving to devote himself to marine painting, and that he was 'very skillful in music, had judgement and performed on the hautboy in a masterly manner'. Hawkins called Woodcock 'a famous performer on the flute [i.e. recorder]', but he was more likely an enthusiastic amateur on the oboe, recorder and flute. He died of gout, leaving his family in penury.

In 1720 Woodcock set Newburgh Hamilton's St Cecilia's day ode, *The Power of Musick* (London, music lost). His only surviving compositions are a set of *XII Concertos in Eight Parts* (London, 1727), three for sixth flute (descant recorder in d″), three for two sixth flutes, three for flute and three for oboe; nine have no violas among the strings. They are of historical importance as

the first flute concertos ever published and the first oboe concertos published by an English composer. Nos.1–4 and 6–8 are essentially Venetian in conception, with the fast–slow–fast sequence of movements; the main influences are Vivaldi and Albinoni. The first-movement ritornellos generally include attractive, well-contrasted and balanced phrases, but the passage-work in the episodes is routine and largely scalar. The slow movements are dances (sicilianas and sarabands) or Handelian adagios, and the finales are simple dances or binary movements with regular phrases echoed as variations. Nos.5 and 9–12 are melodically more Handelian and more varied in construction, variously avoiding or obscuring the ritornello principle, having four movements (slow–fast–slow–fast), or incorporating viola parts; three manuscript sources (*D-HRD* Fü 3625a; *D-SWl* 2436; *S-Uu* ihs19:24) attribute no.12 to Handel, under whose name it has been published (Braunschweig, 1935). A similar Venetian-Handelian split is evident in Babell's recorder concertos. Woodcock's no.11 is a concerto grosso in which the oboe mainly doubles the violins. There is no support for Priestman's allegation that Woodcock may have stolen one or more of the concertos.

DAVID LASOCKI

Wooden fish. *See* TEMPLE BLOCKS.

Woodfield, Ian (*b* London, 2 Aug 1951). British musicologist. He studied at Nottingham University (1969–72) and King's College, University of London (1973–7), where his teachers included Howard Mayer Brown and Margaret Bent. He took the doctorate at King's College in 1977 with a study on the origins of the viol. After one year as research fellow at Bath University (1977–8), he was appointed lecturer (1978), senior lecturer (1989), reader (1994) and director of the school of music (1995–) at Queen's University, Belfast. His areas of research include the history of the viol, music in 18th-century Anglo-Indian society, Italian opera in London during the 1770s and the role of musicians in exploration of the 16th and 17th century.

PATRICK DEVINE

Woodfill, Walter L(incon) (*b* Spokane, WA, 7 Nov 1910). American historian. He was educated at the University of California at Berkeley, obtaining the BA in music and political science and, in 1940, the PhD with a dissertation on music in English social history from the mid-15th to the mid-16th century; while at Berkeley he worked with Albert Elkus and Glen Haydon in the department of music and George H. Guttridge in the department of history. Woodfill taught history at Princeton University from 1947 to 1952 and at the University of Delaware from 1952 to 1961. In 1961 he became professor of history at the University of California at Davis.

As a historian, Woodfill has concentrated on English social history between the 15th and the 18th centuries, with particular emphasis on music and musicians and, to a lesser extent, the other arts. His book *Musicians in English Society from Elizabeth to Charles I* (1953) is a sociological and historical rather than a musical study; but the many sources cited in it and quotations from contemporary material are of great value not only to the historian but also to the musicologist and even to the general reader.

PAULA MORGAN

Woodforde-Finden [née Ward], **Amy** [Amelia] (*b* Valparaiso, Chile, 1860; *d* London, 13 March 1919). British composer. She was one of nine children of an American serving as British Consul in Valparaiso; on his death her mother took the surviving children to London. She began composing at an early age and was a pupil of Carl Schloesser and Amy Horrocks. Under the name Amy Ward she wrote some early songs which received little notice. In 1894 she married Woodforde-Finden of the Indian Army and for some years lived in India; when her *Four Indian Love Lyrics* (from Laurence Hope's *The Garden of Kama*) were published privately in 1902, their success, particularly that of the *Kashmiri Song* ('Pale hands I loved beside the Shalimar'), gained her a regular publisher and a faithful public. She followed these songs with *A Lover in Damascus* (Charles Hanson Towne; 1904), *On Jhelum River* (Frederick John Fraser; 1905), *The Pagoda of Flowers* (Fraser; 1907) and other collections, as well as many individual songs, often with oriental subjects and notable for their fluent, sentimental melody.

Woods [Wodds], **Michael.** *See* WOOD, JOHN.

Woodson [Wodeson], **Leonard** (*b* Winchester, *c*1565; *d* ?Eton, ?1641). English composer. He was a choirboy at Winchester Cathedral from 1573 to 1577, and lay clerk at Windsor from 1598. He was acting Master of the Choristers at Windsor from 1605 and became organist of Eton College in 1615. He is mentioned in the Eton audited accounts until 1641 and in 1647, but the last entry appears to be an error since Woodson's successor Charles Pearce is described as organist in rough accounts for 1645. Woodson is presumed to have died in 1641 as he is represented in John Barnard's *First Book of Selected Church Musick* (London, 1641/*R*), which claimed to include no music by any living composer.

Woodson's grandson, also Leonard (bap. Windsor, 1 July 1659; *d* Windsor, 14 March 1716/17), became a lay clerk at Windsor in 1679, a Gentleman of the Chapel Royal in 1681 and a member of the Private Musick in 1689; he was also a member of Westminster Abbey choir from 1697 to 1716. He is named as a bass soloist in the manuscripts of three of Henry Purcell's odes: *Hail, bright Cecilia*, *Celebrate this festival* and *Who can from joy refrain?*.

JOHN CALDWELL/ALAN BROWN

Woodson [Wodson], **Thomas** (*d* ?London, after 1605). English composer. He was a singer at St Dunstan-in-the-West from 1576 to 1578 and also at St Paul's Cathedral. He became a member of the Chapel Royal in 1581 and 'solde his place to William West of Canterbury' in 1605. The only works undoubtedly by him are the 20 canonic settings of *Miserere*, laid out as for keyboard, in *GB-Lbl* Add.29996 (six canons ed. H.M. Miller, *JAMS*, viii, 1955, pp.14–21). To these should probably be added the textless three-part *Ut re mee fa* in John Baldwin's Commonplace Book (*Lbl* R.M.24.d.2) and the keyboard *Miserere* (non-canonic) ascribed to 'Wodson' in *Och* 371 (ed. in EECM, vi, 1966). The latter, however, may be the work of an earlier composer, on account of its style, appropriateness to the Latin liturgy, the date of the manuscript (*c*1560) and the spelling of Woodson's name. It certainly has no point of contact (apart from the cantus firmus itself) with the settings in *Lbl* Add.29996. (*BDECM*)

JOHN CALDWELL

Woodstock. Town in New York State, USA. It was the site of a rock festival held in 1969. *See* FESTIVAL, §6.

Woodward, Richard (*b* ?1743; *d* Dublin, 22 Nov 1777). Anglo-Irish organist and composer. He completed his apprenticeship as a choirboy at Christ Church Cathedral, Dublin, in June 1759, having presumably joined the choir shortly after his father, Richard Woodward senior, came over from England in 1751 to serve as a stipendiary in the choir. He continued as a member of the choir until 1760 or after. He also served in the choir of St Patrick's Cathedral. At the age of 22, after the death of George Walsh, Woodward was appointed organist and vicar-choral of Christ Church Cathedral (28 February 1765); in 1770 he also became a vicar-choral of St Patrick's. By June 1766 he was already sharing the duties of Master of the Choir Boys with his father, who had been appointed to that position in 1768. In October 1776 his father resigned the post in his favour, but he died suddenly one year later. Although he is described on his monument as 'Preceptor to the Children of the two Choirs', Samuel Murphy appears to have held the post of Master of the Choristers at St Patrick's from about 1766 until 1780.

In 1771 Woodward was awarded the degree of MusD by Dublin University. At that time the Earl of Mornington was occupying the newly-created chair of music there, and it was to him that Woodward dedicated his op.1, the *Songs, Canons and Catches* of 1767. This publication consisted of vocal canons, catches, duets, trios and other partsongs with continuo, and solo songs with accompaniment for various instrumental combinations. It includes the canon *O Almighty Lord* which that same year had won a prize medal of the Catch Club of Pall Mall, London, and the canon *Let the words of my mouth* which had won the first prize of the Noblemen's and Gentlemen's Catch Club, London, in 1764. The names of William Boyce and other well-known musicians are on the list of subscribers. He also published his *Veni creator spiritus* (of which only the title is in Latin) in 1767; this was composed for the consecration of the Bishop of Cloyne at Christ Church Cathedral on 31 May. Woodward's third and last publication, the most substantial of the three, appeared in 1771: his *Cathedral Music*, op.3, dedicated to the Archbishop of Dublin, and consisting of seven anthems, chants and a large-scale Service in B♭. It also includes a revised version of his *Veni creator spiritus*. The advanced keyboard style exhibited in the accompaniments to his vocal music suggests that he may have written some independent keyboard music, but none has come to light.

From 1767 until his death he regularly gave his services as conductor at the benefit concerts for Mercer's Hospital. His tomb, in Christ Church Cathedral, Dublin, is surmounted by an inscribed tablet erected by his father, who outlived him by 18 years. Further discussion of his career and music is given in W.H. Grindle: *Irish Cathedral Music* (Belfast, 1989), 47–9, 187–91 and B. Boydell: *Music at Christ Church before 1800: Documents and Selected Anthems* (Dublin, 1998).

BRIAN BOYDELL

Woodward, Roger (*b* Sydney, 20 Dec 1942). Australian pianist. Encouraged by Eugene Goossens, he studied at the Sydney State Conservatorium, taking piano lessons with Alexander Sverenksy and composition lessons with Raymond Hanson. In 1964, after winning the Australian Radio (ABC) Competition, he moved to London to study with Ilona Kabos, and the following year was awarded a Polish government scholarship to study at the Warsaw Academy of Music with Zbigniew Drzewiecki. He remained in Poland for the next six years, and embarked on a concert career, making successful débuts in Warsaw and London (1967), and in Paris and Havana (1969), as well as playing with the leading orchestras in Poland and

eastern Europe, and returning to Australia for two concert tours. He won the 23rd International Chopin Festival in Warsaw in 1968, and the International Gaudeamus Competition in the Netherlands in 1970. He has toured widely in Europe, Australia, New Zealand and East Asia.

Woodward is a pianist of wide musical sympathies, gifted with a powerful virtuoso technique, as highly regarded for his performances (sometimes controversial, always stimulating) of Chopin, Skryabin and Prokofiev as for his interpretations of avant-garde scores. Many composers, including Barraqué, Berio, Birtwistle, Boulez, Carter, Donatoni, Feldman, Gehlhaar, Lutosławski, Radulescu and Takemitsu, have written works for him. He founded the Alpha Centauri Ensemble, a group specializing in contemporary works, in 1989, and is also the founder of the annual Sydney Spring Festival devoted to contemporary music. Notable recordings include solo piano works by Chopin, Prokofiev and Debussy, and Xenakis's *Keqrops* for piano and orchestra. He was appointed OBE in 1980.

DOMINIC GILL/CYRUS MEHER-HOMJI

Woodwind instruments (Fr. *bois*; Ger. *Holz*, *Holzblasinstrumente*; It. *legni*, *strumentini*; Sp. *instrumentos de madera*). A term used to describe instruments, in particular Western orchestral instruments, of the flute, recorder and reed-actuated types, whether made of wood or of some other material (e.g. ivory, bone or metal). For further details, see entries on individual instruments; *see also* REED INSTRUMENTS and INSTRUMENTS, CLASSIFICATION OF.

□

Woodworth, G(eorge) Wallace (*b* Boston, 6 Nov 1902; *d* Cambridge, MA, 18 July 1969). American choral conductor, organist and music educationist. At Harvard University he studied history (BA 1924) and music (MA 1926), and on a Paine Traveling Fellowship studied conducting under Malcolm Sargent at the RCM (1927–8). As an undergraduate he was accompanist for the Harvard Glee Club and on graduating he was appointed instructor of music at Harvard and conductor of the Radcliffe Choral Society (1924). Subsequently he was conductor of the Pierian Sodality Orchestra (1928–32), conductor of the Harvard Glee Club (from 1933) and university organist and choir director (from 1940). He succeeded A.T. Davison as James Edward Ditson Professor of Music at Harvard (1954–9), and in 1958 resigned all conducting and performing posts to devote himself to teaching.

From 1951 until his death Woodworth broadcast a series of lectures called 'Tomorrow's Symphony' on Boston radio (WGBH). He was a Senior Fulbright Scholar in London, conducting and lecturing at the RCM (1966–7), and was awarded honorary doctorates in music by the New England Conservatory of Music and the University of Hartford and an honorary LittD by Miami University; he also served as the first president of the College Music Society (1958–60). Woodworth's influence on music education in the USA is incalculable; his special concern was for the 'amateur listener'. He was also a champion of the music of Giovanni Gabrieli when it was unknown in the USA.

RODNEY H. MILL

Wooldridge, H(arry) E(llis) (*b* Winchester, 28 March 1845; *d* London, 13 Feb 1917). English musical scholar. He was Slade Professor of Fine Arts at Oxford (1895–1904) and a man of practical ability in several arts, especially painting. His revised edition of Chappell's *Popular Music of the Olden Time* with the title *Old English Popular Music* (1893/*R*) marked a significant advance over Chappell's standards, distinguishing editorial material and providing new piano harmonizations in an attempt at 16th-century English style. He collaborated with G.E.P. Arkwright in his researches for the Purcell Society (The Works of Henry Purcell, xiv, xvii; 1904, 1907), and with his friend the poet laureate Robert Bridges on *The Yattendon Hymnal* (1899). Wooldridge's chief contribution to historical knowledge was his work on the polyphonic period which formed the first two volumes of the *Oxford History of Music* and traced the developments of such music from organum to the end of the 16th century.

His grandson David Wooldridge (*b* Seal, Kent, 24 Aug 1927), a conductor, composer and writer on music, published *Conductor's World* (New York, 1970) and a biography of Ives, *From the Steeples and Mountains* (New York, 1974; published in London, 1975, as *Charles Ives: a Portrait*. His musical works include concertos for viola (1949) and cello (1957), four string quartets and theatre and film music.

H.C. COLLES/ROSEMARY WILLIAMSON

Woolfenden, Guy (Anthony) (*b* Ipswich, 12 July 1937). English composer and conductor. He received his early musical education at Westminster Abbey, where he was senior chorister. After graduating from Cambridge University (BA 1959), he studied conducting at the GSM with Norman Del Mar and worked as a professional horn player at Sadler's Wells Opera (1960–61). In 1961 he joined the music staff of the Royal Shakespeare Company at Stratford-upon-Avon, serving as head of music and resident composer (1963–98); he composed over 150 scores for the company, including incidental music for all of Shakespeare's plays. His musical based on *The Comedy of Errors* won the Ivor Novello Award and the Society of West End Theatre Award for the best British musical of 1976. Woolfenden's conducting career has included work at Morley College (1968–78) and as principal conductor of the Liverpool Mozart Orchestra (1970–92) and Warwickshire SO (1972–); he has also worked with the LSO, RPO, CBSO, Hallé Orchestra and Kirov Ballet. As an opera conductor he has worked with the Chelsea Opera Group and Scottish Opera; he conducted the first British productions of Nielsen's *Saul og David* (1977), Liszt's *Don Sanche* (1977) and Tchaikovsky's *The Maid of Orléans* (1978). He was the first artistic director of the Cambridge Festival (1986–91).

Woolfenden's incidental music is distinguished by his ability to evoke a period atmosphere without sacrificing individuality or an awareness of contemporary styles, chiefly by a subtle manipulation of archaic techniques such as organum and hemiola, and a resourceful harmonic language firmly rooted in the modality of earlier English composers. His concert works, several of which are derived from theatrical scores, are cast in an accessible and melodically memorable idiom; they include a significant body of music for wind ensemble, of which *Gallimaufry* (1983), based on material originally composed for Shakespeare's *Henry IV* plays, is the best known.

MERVYN COOKE

Woollett, Henry (Edouard) (*b* Le Havre, 13 Aug 1864; *d* Le Havre, 9 Oct 1936). French composer. Originally of an English family, he was a naturalized Frenchman. He briefly studied the piano with Raoul Pugno and composition with Jules Massenet but he was mostly self-taught. He spent his entire career in his native Le Havre, where he was a notable conductor and teacher (prominent among his pupils were Henry Fevrier, André Caplet and Raymond Loucheur) and where in 1924 he became director of a branch of the Schola Cantorum founded at the instigation of the pianist Berthe Duranton. A fervent champion of contemporary music, he founded the Cercle de l'Art Moderne, through which he acquainted the public of Le Havre with the leading composers of his time. Although he was a talented composer himself, and left a large body of work in all genres, Woollett's reputation rested chiefly on his activities as a teacher and musicologist. He wrote a history of music which won an award from the Institut de France, and a magisterial history of orchestration, written in collaboration with Gabriel Pierné. He was also the author of many articles, mainly published in *Le monde musical*.

WORKS

(*selective list*)

Stage: La princesse captive (op, Woollett), unperf.; Pierrot amoureux (pantomime, H. Le Fèvre) (1888); La Rose de Saron (poème lyrique, Le Fèvre) (1895); Les amants byzantins (drame lyrique, 4, H. le Roux) (1926)

Orch: Sym. Ov. (1891); Petite suite (1891); Concertstück, vc, orch (Paris, 1903); Sentier couvert (Paris, 1914); Maures et gitanes (Paris, 1931); Suite antique (1932); Sym., *c*1936

Chbr and solo inst: Pièces intimes, pf (1888); Sonata no.2, E, vn, pf (1894); Nocturnes et pastorales, pf, 1895–1903; Sonata no.3, D, vn, pf (1896); A travers la vie, pf (Paris, before 1900); Sonata, fl/vn, pf (1902); Sonata, c, vc, pf (1906); Au jardin de France, pf (1913); Préludes et valses, pf, 1917–18; Sonata no.5, c, vn/va, pf (Paris, 1918); Croquis de route, pf (1924); Str Qt, g (1928); Pastorale, fl, pf (Paris, 1932)

JACQUES TCHAMKERTEN

Woolley, Robert (*b* London, 8 Jan 1954). English harpsichordist, organist and fortepianist. He studied at the RCM with Ruth Dyson (1970–75), attended masterclasses given by Kenneth Gilbert and George Malcolm, and made his début in London in 1976. His favoured repertory is English keyboard music of the 16th and 17th centuries and the works of Bach, and he has performed and recorded on many historical harpsichords and organs. His first recording (1977) of Purcell's complete harpsichord works was followed by discs of Bach's complete harpsichord concertos, Gibbons's organ fantasias and Scarlatti sonatas, all admired for their vitality and sense of style. In 1985 Woolley was appointed to teach the harpsichord, fortepiano and organ at the RCM. As a chamber player, he has been regularly associated with the cellist Anthony Pleeth, flautist Stephen Preston and the Purcell Quartet.

HOWARD SCHOTT

Woolrich, John (*b* Cirencester, 3 Jan 1954). English composer. He studied English at Manchester University (1972–5) and subsequently composition with Cowie at Lancaster University (1975–7). Appointed Northern Arts Fellow in Composition at Durham University (1982–5), he was then composer-in-residence at the National Centre for Orchestral Studies, London (1985–6) and, from 1994 to 1998, lecturer in music at Royal Holloway, University of London. He has also taught at the GSM and the Dartington International Summer School. Woolrich's commissions include two for the BBC Promenade Concerts (1996 and 1998) and his work has been featured in festivals in the UK including those at Aldeburgh, Bath and Cheltenham. Through the work of the Composers Ensemble (co-founded with the soprano Mary Wiegold), he has established a reputation as an animateur for his inventive commissioning and programming.

Woolrich's responsiveness to visual and literary stimuli is evident in the creative processes he uses in his compositions and in their titles. His music is not generated by organic development but shaped by non-organic procedures designed to produce a succession of varied musical perspectives. Significant is his essentially pragmatic compositional attitude, which includes drawing on a variety of musical artefacts of different traditions. Mozart and Monteverdi are two composers upon whom Woolrich has focussed in this way, the former in *The Theatre Represents a Garden: Night* and *Si va facendo notte*, the latter in *Favola in musica*, *Ulysses Awakes* and *Ariadne Laments*. The historical footprints of his chosen materials provide for Woolrich's compositional strategy of creating new contexts and suggesting new musical connections between them (Mozart, Wagner and Nono, as well as Monteverdi in *Favola*), in a musical process where reference to the borrowed material ranges from allusion to quotation.

Several other themes run through Woolrich's output. His setting of texts about folklore and myth show the influence of Calvino, while the *commedia dell'arte* lies behind *Harlequinade*. Images of the night recur in several pieces, such as *It is Midnight, Dr Schweitzer*, a title taken from one of the constructions of the Swiss sculptor Jean Tinguely. Woolrich's enthusiasm for fashioning musical mechanisms based on juxtaposed and repeated fragments reflects the compositional influences of Stravinsky, Berio, Birtwistle and Janáček. It also draws, as in the ensemble piece *Spalanzani's Daughter*, from the automata featured in E.T.A. Hoffmann's gothic fantasies, the music proceeding in a grotesque series of grunts, gasps and wheezes. Mechanical contrivance also lies behind two works for large orchestra, *The Barber's Timepiece* and *The Ghost in the Machine*, and in *Lending Wings* for ensemble. Another characteristic, evident in these orchestral works and in *Dartington Doubles*, is Woolrich's use of heterophonic textures generated out of a central cantus firmus melody, whose schematically varied repetition (on the isorhythmic principle) establishes and regulates the work's structure. In his later and longer spanned solo concertos for viola and oboe, Woolrich has composed music in which the melodic aspect is more immediately expressive and less impersonal than before.

WORKS
(*selective list*)

VOCAL

Op: In the House of Crossed Desires (M. Warner), 1996, Cheltenham, Everyman theatre, 6 July 1996

Choral: Far From Home (lullaby, folk texts), SATB, 1993; Over the Sea (5 songs, Turkish folk poems), SATB, 1993; Three Choruses (Horace, C. Smart), SATB, 1998; The Old Year (Horace, C. Smart), SATB chorus, orch, 1998; Little Walserings (R. Walser), SATB chorus, strs, 1999

Solo vocal: Harlequinade (commedia dell'arte texts), S + perc, cl + b cl, pf + perc, vn, vc, 1983; Black Riddle (5 songs, Eng. anon.), S, chbr orch, 1984; 3 Macedonian Songs (folk poems, trans. A. DAVID C.H. WRIGHT

Worcester. City in England. In the Middle Ages Worcester was the site of a Benedictine cathedral-priory which by the 9th century was already noted for its classical tradition of Roman chant derived from the monastery of Corbie, northern France. A considerable repertory of 13th- and early 14th-century sacred music of Worcester Cathedral-Priory provenance has been recovered, shedding light on the early history of the motet (*see* WORCESTER POLYPHONY). After the dissolution of the monasteries (1536–9), the cathedral-priory was refounded as a cathedral church under a dean and canons. Organists of the cathedral since that time include Nathaniel Giles (1581–5), Nathaniel Patrick (1590–95), Thomas Tomkins (1596–1656), William Hayes (1731–4), Jeremiah Clarke (ii) (1806–7), Hugh Blair (1895–7), Ivor Atkins (1897–1950), David Willcocks (1950–57), Douglas Guest (1957–63), Christopher Robinson (1963–74), Donald Hunt (1975–96) and Adrian Lucas (from 1996). Other musicians of varying degrees of note born in or close to the boundaries of the city include A.J. Caldicott, E.T. Cook, Edward Elgar (at Broadheath), the celebrated trumpeter Thomas Harper, Battison Haynes (at Kempsey) and J.P. Hullah. Minor church musicians who worked in Worcester are W.H. Havergal, hymn-tune composer and historian of psalmody, who was rector of St Nicholas's, Worcester, from 1845 to 1860, and two writers of once popular but now forgotten anthems, E. Vine Hall, precentor of Worcester Cathedral, 1877–90, and H.H. Woodward, minor canon (precentor from 1890) of the cathedral from 1881 until his death in 1909.

Nothing survives of the organ built by Thomas Dallam for the cathedral in 1613–14, or of the rebuilding with additions thereto by George Dallam in 1661 and Thomas Harris between 1666 and 1667 (for further details of Harris's organ see 'Organ', *Grove's Dictionary*, 1st and 2nd edns). An organ of three manuals and pedals was built for the cathedral by Hill & Son in 1842, afterwards rebuilt and modified in 1874, in which year also a four-manual instrument by Hill was installed in the south transept to accompany services in the nave. But the history of the present instrument goes back to 1895, when both these were replaced by a new four-manual organ built in characteristically idiosyncratic fashion by Robert Hope-Jones; this has at various times from 1925 been modified and rebuilt, most recently in 1967 and 1972 by Harrison & Harrison of Durham. A mobile two-manual organ by Harrison & Harrison for use in the nave was replaced in 1988 by a versatile electronic organ built especially for the cathedral by Ahlborn UK of Bradford. The cathedral also possesses a single-manual chamber organ built by Father Smith and restored by Samuel Green in 1774, understood to have been at one time in the Holywell Music Room, Oxford, and to have associations with William Hayes (popularly, with Handel). There is an interesting old organ in St Swithun's, whose Great manual incorporates, apparently unchanged, the pipework and draw-stop knobs of an early 18th-century single-manual instrument with G compass; the original maker is unknown. In the 19th century the case was enlarged and a small Swell organ (to *c*) and an octave of pedal pipes were added, since when the pipework has not been further modified. From 1841 until removal to Malvern in 1954 the organ building firm of Nicholson & Co. was situated in Worcester.

The THREE CHOIRS FESTIVAL has been held in Worcester once every three years, since the early 18th century. The chief musical organizations based in Worcester are the Worcester Festival Choral Society (founded in 1870 as the Worcester Musical Society, with Caldicott as its first conductor), which gave the first performances of Elgar's *The Black Knight* in 1893 and *From the Bavarian Highlands* in 1896. The Worcestershire Orchestral Society, founded in 1949, continues to promote an annual competitive music festival, though its players, both amateur and professional, now form the Worcestershire SO. The Worcester Concert Club, founded in 1951, lost its main venue in 1966, but many of its functions were taken over and expanded by Cathedral Arts, an independent organization formed four years later using the cathedral for the presentation of both chamber music and choral and orchestral concerts. In 1988 a triennial competitive event, the Elgar Choral Festival, was founded to encourage the performance of choral and vocal music by Elgar and other British composers. In 1994 links with the Netherlands were established by the launching of the Drei Koren Festival held each year in turn at Breda, Haarlem or Worcester.

Of earlier organizations now defunct, two had associations with Elgar: the Worcester Glee Club, founded in 1810, meeting in the Crown Hotel (later demolished) and surviving until a little after World War II, to which he belonged as a young man, and of which he was afterwards patron; and the Worcestershire Philharmonic Society, an orchestra founded in 1898 and conducted by Elgar from then until 1904, when he was succeeded by Granville Bantock. In the 18th century concerts were given in the Assembly Room of the Guildhall and in College Hall, the refectory of the former monastery. In 1848 the city corporation built the Public Hall as a small concert hall, and it was in this (not, as frequently stated, the Shire Hall, which has no concert accommodation) that Elgar's *Froissart* was first performed in 1890. It was pulled down in 1966, and for concerts other than those held in the cathedral, the city relies on the Countess of Huntingdon Hall, a beautiful Georgian chapel restored and converted into a small concert hall in 1987, to which is attached the Elgar School of Music, founded in 1983. Since 1990 the Perdiswell Leisure Centre (built in 1981) has also provided a venue for larger concerts.

WATKINS SHAW/JOHN C. PHILLIPS

Worcester Music Festival. Concert series sponsored by the Worcester (Massachusetts) County Music Association, held annually from October to April in the city of

Worcester. Musical conventions were held there from 1858: several hundred teachers and singers gathered to study, practise and perform selections from Handel and Haydn oratorios (following the example of the Boston Handel and Haydn Society). During the 1860s the number of concerts increased in imitation of English festivals, and Carl Zerrahn (conductor 1866–97) instigated performances of complete oratorios with orchestra. Under the direction of George W. Chadwick (1898–1901) the festivals performed works by contemporary composers – Horatio Parker, Converse, Chadwick and Hadley. Since 1980 the festival has presented major orchestras from around the world, as well as ethnic dance companies and chamber orchestras.

RITA H. MEAD/R

Worcester polyphony. The so-called Worcester repertory, comprising more than 100 anonymous polyphonic compositions datable from between the early 13th century and the second quarter of the 14th.

1. Sources. 2. Group I. 3. Group II. 4. Group III. 5. Group IV. 6. Group V.

1. SOURCES. The repertory is contained in 59 manuscript leaves, 40 of which are preserved in *GB-WO* Add.68. While there is no certainty regarding the original provenance of any of the leaves, most of which are in more or less fragmentary condition, the available indications point to Worcester as a major centre of polyphonic composition, hence the frequently used term 'Worcester Fragments'. Concordances show that the Worcester music was influential elsewhere in England. On the other hand, the 'Worcester Fragments' contain little more than a third of all the completely preserved English polyphony of the 13th century. Some of the compositions in other sources may also have originated in Worcester. (For more detailed information on sources *see* SOURCES, MS, §VI.)

The repertory can be seen as falling chronologically into five main groups of pieces. Of these the second is by far the largest. Each can further be divided into its several categories of composition. The discussion below follows such a scheme of classification. ('*WF*' refers to the edition in MSD, ii, 1957; numbers in square brackets refer to *English Music of the 13th and Early 14th Centuries*, ed. E.H. Sanders, 1979.)

2. GROUP I. The earliest compositions (*WF* 97 [= App.14], 98 [= 64], 99 [= 21], 100, 101 [= App.1], 102–6) are mostly two-voice settings of sequences, written in a largely note-against-note technique that is also known from other insular sources (e.g. *GB-Lbl* Sloane 1580, *Ob* 343, *F-Pn* fr.25408, *GB-Lbl* Arundel 248) as well as continental ones. A notable feature of many of these English pieces is the relative frequency of the contrapuntal interval of the 3rd. Since the accompanying 'upper' voice tends to occupy the same register as the tenor, the voices cross rather frequently (ex.1). One of these early pieces (*WF* 99) is a conductus with cauda, while *WF* 97 and 98 are cantus firmus settings (of an offertory prose and of a hymn, respectively; exx.2*a–b*). All three compositions are for three voices, as is more than four-fifths of the entire Worcester repertory.

Our knowledge of Worcester polyphony in the first half of the 13th century remains sadly incomplete, since only one other composition from that period survives. It is a three-voice measured organum setting of the *Alleluia Nativitas* (for the Nativity of the Virgin) dating perhaps

Ex.1 *GB-WO* Add.68 (*WF* 102)

Upper voice not texted in source

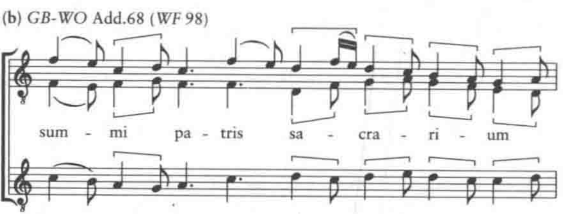
from the 1230s (*WF* 81). This composition, clearly inspired by Perotinus's famous three-voice organum on the same chant – it even quotes the motet form of the entire clausula *Ex semine* from his organum – favours discant style for the verse, but contains remarkably expansive organal sections in the setting of the respond. The evidence would seem to indicate that the composition of organum in the Perotinian manner was uncommon in England, but the state of preservation of English music of that period leaves the matter in doubt. In fact, remnants of organal style still appear in a few compositions from the end of the 13th century, such as a setting of the gradual *Benedicta: Virgo dei genitrix* (*c*1290, ex.3).

3. GROUP II. About three-fifths of the Worcester music may be dated from about 1270. This, except for the excessively fragmentary *WF* 4, 8, 24 and 38–40, can be divided into four categories:

(i) Rondelli (*WF* 5 [= 31], 25, 94 [= 41], rota (*WF* 21 [= 35]), and conductus, often with sectional voice-exchange or rondellus passages (*WF* 68, 69 [= 34], 92 [= App.11], 93 [= 36], 107).

(ii) Motets on a *pes*, with or without voice-exchange (*WF* 6 [= 54], 7, 10 [= 58], 11 [= 50], 12 [= 51], 13, 15 [= 52], 16 [= 53], 17, 18 [= 66], 20, 22, 23, 36, 65, 71 [= 47], 73 [= 48], 74, 75, 76 [= 49]). Apart from the pieces in Group I, nos.74 and 75 are the only extant two-part compositions.

(iii) Motets on a cantus firmus (*WF* 37, 70 [= 84], 72 [= 77], 95 [= 83]).



(iv) Troped chant settings, i.e. settings of a cantus firmus, itself sometimes extended by a trope, in which the original text is elaborated, intermittently or throughout, by poetic tropes in the newly composed

Ex.2(a) *GB-WO* Add.68 (*WF* 97)

Upper two voices lack text in source

(b) *GB-WO* Add.68 (*WF* 98)

Upper two voices lack text in source

Ex.3 *GB-Ob* Lat.lit.d.20 (*WF* 26)

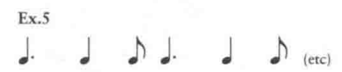
Triplum missing

upper voices (*WF* 1, 2 [= App.21], 3, 9 [= 67], 14, 34, 35, 42 [= 68], 63); Sanctus settings (*WF* 58–60, 61 [= 77], 62); and alleluias (*WF* 19 [= App.18*a*], 45, 46 [= App.20], 49, 50, 51, 52 [= App.17], 54, 55 [= App.19], 56 [= App.18*b*], 57). Most of those are compositions for Lady Masses (ex.4).

The stylistic distinctions between conductus and motet were not so rigid in 13th-century England as knowledge of the French repertory might lead one to expect. The role played by the techniques of VOICE-EXCHANGE (in conductus as well as many *pes* motets) and RONDELLUS shows that the English predilection for extensive homogeneity in a composition accounts for a much greater stylistic homogeneity in the repertory as a whole than is the case in the French polyphony of the time. Even the few cantus-firmus motets (about a sixteenth of Group II) have cantus firmi that are melodically similar to *pedes*.

Homogeneity also characterizes the texts of the entire Worcester repertory. A large percentage of the poetry is Marian, and all the compositions set Latin texts. In England there was no parallel for the process by which the French *ars musica* early in the 14th century came to cultivate the polyphonic chanson, a primarily courtly species, and the Latin or French motet, a kind of university music with both ecclesiastical and courtly outlets. Not only were the composition and performance of polyphony in the hands of qualified members of the clergy, but nearly all their compositions are appropriate for divine service or special devotions, though some of the pieces may also have been produced in the hall on suitable occasions.

In the surviving English repertory of the second half of the 13th century most of the rondelli, most of the conductus with voice-exchange or rondellus sections and most of the *pes* motets are in F major or in a mixture of Lydian and F major (often the flat serves as clef). In almost every case the combined effect of the voices is the constant reinforcement of the tonic by means of elaborations of a tonic ostinato, with the supertonic, because of its cadential function, holding a place of structural importance second only to that of the tonic.



What gives much of the Worcester polyphony its characteristically English sound is the frequency of the major mode (mostly F major, because the 13th-century tonal system generally caused major to be expressed as a variant of Lydian); the stress on the chords of tonic and supertonic, and the emphasis on triads and, secondarily, 6-3 chords, with the latter occurring most prominently as penultimate chords at cadence points; frequency of

Ex.4 *GB-WO* Add.68 (*WF* 61 [= 77])

foursquare phrase design; and an almost exclusive predilection for rhythms with trochaic ingredients, such as that in ex.5, and the rhythm known on the Continent as the

Ex.5

1st mode. The phrase endings emphasize certain degrees of the scale and relate them to one another and to the tonic, nearly always outlining a composition with well-planned tonal unity.

The English preference for fashioning tonally unified compositions is also evident in many of the chant settings, of which the most brilliant specimens are the alleluias, most of them presumed to have been composed by W. de Wycombe. In many cases the cantus firmi were changed so as to yield tonally unified tenors; at times the alteration amounts to no more than one or two notes, while in other cases the changes are more extensive. Troping texts in the upper voices are usually arranged in the manner of the old troped organa; that is, they include the liturgical words of the cantus firmus, which are placed so as to permit their simultaneous declamation by all three voices. To apply motet terminology to such settings would be inappropriate, since the rigid disposition of preconceived rhythmic patterns for structural purposes is untypical of this repertory. Instead of reinforcing polyphonic stratification, polytextuality produces a diversity that is carefully integrated to maintain the effect of organic homogeneity.

Stylistic and palaeographical considerations allow the tentative chronological division of the remaining Worcester repertory (30%) into three chronological groups.

4. Group III. These pieces date from about 1280–90, and fall into three categories:

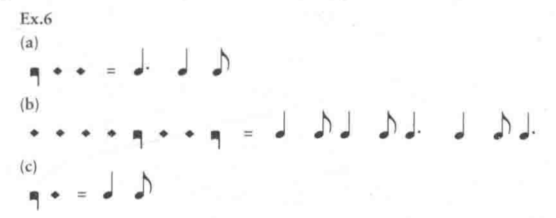
(i) Rondellus (*WF* 31 [= 42]), conductus (*WF* 87, 89 [= App.12], 91 [= 43]), and a free Gloria setting (*WF* 88 [= 44]).
(ii) *Pes* motets (*WF* 41 [= 55], 30, 32).
(iii) Troped chant settings (*WF* 26, 27 [= 71], 28 [= 72], 29, 33).

5. Group IV. These date from about 1295–1315, and are of five kinds:

(i) Cantilena (*WF* 109 [= App.13]).
(ii) Variation motets (*WF* 53 [= 60], 67 [= 61]).
(iii) Chant setting (*WF* 108 [= 66] – cantus firmus unidentified).
(iv) Troped chant settings (*WF* 43, 64 [= 74], 96).
(v) Motets on a cantus firmus (*WF* 44, 47, 78, 79 [= App.25], 80).
(vi) Inconclusive (*WF* 48).

6. Group V. These date from about 1330, and fall into three categories:

(i) Cantilena (*WF* 82).
(ii) Chant settings (*WF* 84–6).
(iii) Inconclusive (*WF* 83).



Shortly after 1300 rondelli became increasingly rare, and the three main types of English 14th-century polyphony (cantilenas; chant settings without textual tropes in the upper parts; and motets, especially cantus-firmus motets) can be seen to emerge. There is also an increase in the percentage of four-part writing, this having already appeared among the compositions of Group II (*WF* 10, 18, 70, 95). Evidently, English composers with their characteristic love of rich chordal sonority welcomed the increased opportunity for four-part counterpoint afforded by a two-voice framework that had expanded from an octave to a 12th, since of the 13 compositions in Group IV six (*WF* 53, 67, 78–80 and 64) are for four voices.

Two double motets, 'Te Domine laudat/Te Dominum clamat' and 'Virginis Marie/Salve gemma virginum' (the pes of the second is a plainchant cantus firmus 'Veritatem'), WF 71 [= 47] and WF 72 [= 77] (GB-WO Add.68, no.XIII (b) and (c) [= GB-Ob lat.lit.d.20, ff.36v–37r])

Such a relatively high percentage of four-part writing does not, however, seem to remain typical of English polyphony in the later 14th century.

Two of the pieces of Group I (*WF* 100 and 81) and a great many compositions of Group II exhibit the notational system usually referred to as English mensural notation or as paired-English-breve notation. Its symbols were the ligatures of square notation and, for syllabic music, two single note shapes with specific mensural significance, i.e. the *virga* and the diamond (or rhomb), which was an ingredient of the *climacus* in the chant notation of the time. The diamond, often used in pairs in English mensural polyphony, represented the breve, in contrast to the continental notational systems of Johannes de Garlandia and his successors, in which it designated the semibreve.

The historical priority of the English notation of music *cum littera* may perhaps be deduced from the circumstance that in the earliest (pre-modal) mensural notation of the Notre Dame period, when the semibreve was still *ultra mensuram* (not precisely definable as a fraction of a breve), all but the last of the notes of the *coniunctura* (derived from the Gregorian *climacus*) signified breves. Since English polyphony before the last quarter of the 13th century evidently recognized only rhythms with trochaic ingredients (Franco's 1st mode), its syllabic notation corresponds to this stylistic situation with ingenious economy. The *virga* represents the three-beat long, while the paired diamonds were conceived as breves, of which the first was twice as long as the second. To an extent this system is related to Franconian notation, except that the valuation of the paired breves is the reverse of his (ex.6*a–b*); some later compositions express the paired-diamond rhythm as in ex.6*c*):

There is evidence that these rhythms and a similar, if not identical, method of their notational representation were the only ones available in Paris before the rise of the modal system in clausula and motet. The rhythmic patterns of the 2nd and 3rd modes, however, remained quite rare in the Worcester polyphony (as elsewhere in 13th-century Europe other than France); even those late 13th-century compositions in which the breves are written as *puncta* in the continental manner often pair them in the traditional English fashion (long–short, in contrast to French precepts). In fact, in subsequent decades the English preference for trochaic rhythms often came to affect paired semibreves as well, again in contrast to continental practice (e.g. *WF* 67 and a good many compositions appearing in sources from the first half of the 14th century; see also ex.3).

Worde, Wynkyn de. *See* WYNKYN DE WORDE.

Word-painting (Ger. *Wortmalerei*). The use of musical gesture(s) in a work with an actual or implied text to reflect, often pictorially, the literal or figurative meaning of a word or phrase. A common example is a falling line for 'descendit de caelis' ('He came down from heaven'). The term is more usually applied to vocal music, although a programmatic instrumental piece might in some sense exploit the technique. Word-painting is often distinguished from mood- or tone-painting (the German *Tonmalerei*), which is concerned with the musical representation of a work's broader emotional or other worlds, although the categories are not always clear: a Bach aria or a Schubert song, for example, can take a melodic or accompanimental motif generated by word-painting and base the entire musical material on it so as to express the dominant affection or image of the text (grief, joy, stream, spinning-wheel). It is one class of figures (*Hypotyposis*) in musical rhetoric (*see* RHETORIC AND MUSIC, §I, 3) – the falling line for 'descendit' is an example of *Catabasis* – and also concerns musical expression (*see* EXPRESSION, §I). Word-painting is associated in particular with music of the Renaissance and Baroque periods, although in any period music that seeks somehow to represent rather than just present a text will probably include it to some degree, if not always in ways we may now appreciate (Machaut is an intriguing case in point).

Word-painting presumes the possibility of a meaningful relationship between word and music. Thus it developed as a characteristic feature of the Renaissance, when this relationship was carefully (re)constructed by musical humanists on the precedent of classical antiquity. Given the emerging sensitivity to music's responsibilities towards the content and delivery of the text, increasingly subtle forms of word-painting contributed to musical expression: Josquin, for example, was able to give musical life to his texts by a wide range of melodic, harmonic or textural

word-painting devices that could themselves take the music in new directions.

Word-painting was discussed by numerous Renaissance theorists in their search for a new poetics (rather than science) of music. Thus musical art might be considered to imitate nature and also enter the Trivium alongside rhetoric. Nicola Vicentino (*L'antica musica ridotta alla moderna prattica*, 1555) argued in a chapter devoted to 'the manner of pronouncing the long and short syllables beneath the notes, and how one should imitate the nature of the words' (book iv, chap. 29) that 'music is written for words for no other purpose than to express the idea [*concetto*], the passions [*passioni*] and the affections [*effetti*] of these words by means of harmony'. German theorists in particular sought to determine a taxonomy of musical poetics: according to Joachim Thuringus (*Opusculum bipartitum*, 1624) there are three categories of words that may be 'expressed and painted' by means of music, including 'words of affection' ('weep', 'laugh', 'pity'), 'words of motion and places' ('leap', 'cast down') and 'words of time and number' ('quickly', 'twice').

The technique was standard, even conventional, in the 16th-century chanson and madrigal, often for witty effect – it became closely associated with the term 'madrigalism' – but sacred music was not excluded. Word-painting devices range from onomatopoeia (for example, the imitation of the sounds of battle, birdsong or chattering washerwomen by Janequin) through figurative or pictorial melodic or contrapuntal gestures (*Catabasis* or its ascending opposite, *Anabasis*; *Circulatio*; *Fuga* etc.) and scoring (a single voice for 'all alone'; three for the Trinity) to more abstruse effects associated with *musica reservata* (*see* MUSICA RESERVATA (i)). Not all can be perceived aurally: some are visual, such as the so-called EYE MUSIC found in the 16th-century madrigal and later (black notes for 'night'; two semibreves for 'eyes'), or musical symbols depending on some technical pun, as with Bach's use of notes marked with a sharp sign (*Kreuz*) in works whose text refers to the Cross.

The more obvious techniques of word-painting have often been decried as childish and naive by theorists seeking a deeper relationship between text and music: Vincenzo Galilei was one of the first to pour scorn on such devices (*Dialogo della musica antica et della moderna*, 1581) and it is generally (if wrongly) assumed that the *seconda pratica* madrigal of Monteverdi and his contemporaries avoided such literalism in favour of a more holistic and oratorical approach to text-setting. It is true that in the Baroque period the relationship of signifier to signified extended beyond pictorial figures based on resemblance to more iconic notions of representation, as with the descending (chromatic) tetrachord as an 'emblem of lament'. Yet Handel was not averse to 'painting' musical images (see, for example, 'Ev'ry valley' from *Messiah* at the words 'exalted', 'crooked' and 'plain'), and the stock association of a musical gesture with a given word or concept was one way in which instrumental music of the Baroque period and later could generate its own semiotic. Similarly, opera composers almost always resort to pictorialism – witness Donizetti's birdsong or Berg's snoring – while Wagner's leitmotifs usually have their origin in some kind of word-painting.

Word-painting is often a matter of musical play, to be enjoyed by one or more of the composer, performer and listener. It is also a question of tradition, as countless settings of 'descendit de caelis' from the Credo of the Mass reveal. And given the strikingly consistent association of specific types of gesture with specific meanings across very different styles and periods, it may reflect something culturally embedded within the language of Western music (or if we believe J.-J. Rousseau, in the origins of language itself), and how that musical language is constructed in semantic and spatial terms. There are also more fundamental aesthetic issues at stake concerning music's ability and power both to represent something outside itself and to communicate that something to others.

TIM CARTER

Wordsworth, Barry (*b* Cheam, Surrey, 20 Feb 1948). English conductor. He studied conducting with Boult at the RCM and the harpsichord with Leonhardt in Amsterdam. His first association with the Royal Ballet was as soloist in Frank Martin's Harpsichord Concerto for Kenneth MacMillan's *Las hermanas*, after which he was invited to conduct the touring company in 1973. From 1974 to 1984 he was principal conductor for Sadler's Wells Royal Ballet; he also worked as guest conductor with the Royal Ballet, the Australian Ballet and the National Ballet of Canada, and was music director of New Sadler's Wells Opera for seasons of operetta in the 1980s. In 1991 he became music director of both the Royal Ballet in London and the Birmingham Royal Ballet, reverting to guest status with the London company in 1995. He was appointed music director of the BBC Concert Orchestra in 1989 and has appeared with other major British orchestras, making his opera début at Covent Garden with *Carmen* in 1991. A skilled practitioner, Wordsworth has the rare ability to display dancers to advantage without compromising the music, acting, in his own words, as 'the company's musical conscience'. Among his many recordings are lively, idiomatic performances of British music by Bax, Berners, Bliss, Foulds and others, Mozart's later symphonies and a complete *West Side Story*.

NOËL GOODWIN

Wordsworth, William (Brocklesby) (*b* London, 17 Dec 1908; *d* Kingussie, 10 March 1988). English composer. A descendant of the poet's brother, he first studied with his choirmaster George Oldroyd (1921–31); in 1934 he was invited to the University of Edinburgh for three years study with Tovey, leaving in 1936 to devote himself to composition. He won the Clements Memorial Prize in 1941 with his String Quartet no.1, and in 1944 his oratorio *Dies Domine* enjoyed the approbation of Vaughan Williams. In the immediate postwar years his music was widely performed, and in 1950, against worldwide competition, he won the Edinburgh International Festival symphony contest with his Symphony no.2. He chaired the Composers' Guild in 1959; after moving from Surrey to the Scottish Highlands in 1961 he

helped to form the Scottish Society of Composers, becoming its honorary president.

From Tovey he learnt to write in traditional rather than experimental forms but derived much of his musical inspiration from the expansive gestures of Sibelius and the brittle intensity of Bartók. Much of his output, particularly in chamber music, is deeply introspective. Although his music is predominantly diatonic he did not eschew atonal procedures when it suited his purpose, for instance in the opening movement of his Symphony no.2; he used tape effectively in his tightly written Symphony no.7. His use of fragmented themes and of unpredictable rhythmic contrasts, which build to form logical and distinctively original statements, is most evident in his symphonies and other large-scale works.

RICHARD D.C. NOBLE

Worgan. English family of musicians and composers.

(1) James Worgan (i) (bap. London, 15 Nov 1713; *d* London, 1753). Organist and composer. He was the eldest son of John Worgan and his wife Mary (née Lambert), who were married at Gray's Inn Chapel, London, on 4 September 1711; the registers of St Botolph Bishopsgate identify nine children. On the death of his father (bur. ?6 October 1728) James assumed the responsibility of bringing up the family. He taught music and on 22 December 1738 was elected organist at both St Botolph Aldgate and St Dunstan-in-the-East. He has been cited as the first organist at Vauxhall Gardens, but there is conflicting evidence: Charles Burney asserted that Thomas Gladwin was the first organist, from about 1737–8, when the organ was installed, to about 1745, when Worgan was appointed. There is also confusion about much of the music published in the first half of the 18th century by James and his brother (3) John Worgan, since only the initial 'J.' appears on many printed editions. It is now thought that many of the songs formerly attributed to John were by James. Most of James Worgan's songs composed after 1745 were performed at Vauxhall; they appeared in three collections and some were issued as single copies. The heading of the final song in the 1745 collection (*The meads and the groves in fresh verdure shone gay*) includes the words 'to an Air in an Organ Concerto for Vauxhall Gardens', and is the only extant part of a concerto by him. Two dialogues (written for Mrs Cecilia Arne and Thomas Lowe) were probably used as finales in the Vauxhall concerts.

Some of his siblings were also musicians, including (2) Mary Worgan; Charles Worgan (bap. 14 Feb 1726), who, according to Sainsbury (*Dictionary*, ii, p.546), settled in Jamaica and became an organist at Port Royal; and (3) John Worgan.

WORKS
all printed works published in London

Song collections: Three New English Cantatas, 1v, vn, vc, hpd (1739); An English Cantata ... and Three English Songs (1745); A Collection of Songs and Ballads (1749), *US-Wc*; The Agreeable Choice (1751)

Other songs, dialogues: Aminta's Farewell (?1745); Blest as the immortal gods is he (A. Phillips, after Sappho) (?1745); The Thief (The Fair Thief) (*c*1745); Jockey and Jenny, dialogue, London, Vauxhall Gardens (*c*1747); The Shepherd's Wedding, dialogue, London, Vauxhall Gardens (1747); Sappho's Hymn to Venus, 1v, str, bc (*c*1749)

(2) Mary Worgan (bap. London, 23 April 1717; *d* after 1768). Organist and composer, sister of (1) James Worgan (i). She succeeded James as organist at St Dunstan-in-the-East, being elected on 11 May 1753. Eight days later she married Liell Gregg, a tradesman, at St Dunstan-in-the-East and they moved to Betchworth in Surrey. Three songs by her are known, all composed about the middle of the century: *The Dying Nightingale*, *The Power of Gold* and *The Constant Lover*. Though short, they are attractive and well constructed.

(3) John Worgan (bap. London, 2 Nov 1724; *d* London, 24 Aug 1790). Organist and composer, brother of (1) James Worgan (i). He was first taught music by his brother and later studied with Thomas Roseingrave and Francesco Geminiani. He made a special study of the works of Palestrina and Handel. He took the MusB at Cambridge in 1748 and became organist at St Mary Axe with St Andrew Undershaft in London the following year. He succeeded his brother as organist at Vauxhall Gardens in 1751 and at St Botolph Aldgate on 11 May 1753; he was elected organist of St John's Chapel, Bedford Row, on 18 June 1760. He married Sarah Mackelcan, a pupil of his brother, on 1 September 1753 and they lived at 7 Milman Street, Bedford Row (Mortimer's *London Directory* of 1763 is inaccurate in giving Worgan's address as St John's Square, Clerkenwell). Nine children were born there between 1754 and 1768. John divorced Sarah for adultery in June 1768 and a few years later married Eleanor (*d* 1777), with whom he had two children, (6) Thomas Danvers and Michael (bur. 17 Nov 1775). On 12 June 1779 he married Martha Cooke (*d* 11 May 1812). He died at 22 (now 65) Gower Street. A memorial brass in St Andrew Undershaft was unveiled on 13 October 1906 (a Voluntary by Worgan, arranged by C.W. Pearce, was played during the ceremony).

Roseingrave had imbued John Worgan with a love of the music of Domenico Scarlatti and in 1752 Worgan obtained a licence, lasting 14 years, allowing him sole printing rights of several of Scarlatti's new sonatas; a second licence was issued in 1771. On 15 April 1761 Worgan conducted a benefit concert for Elisabetta de Gambarini at the Great Concert Room, Dean Street, that included Geminiani's *The Inchanted Forrest*. His appointment at Vauxhall lasted until the end of the 1761 season and he returned in 1770, remaining until the end of the 1773 season. During this time he published 14 collections of 'Vauxhall Songs' and numerous song sheets, most of a rather inferior quality. His oratorio *Hannah* was given its first performance at the King's Theatre, Haymarket, on 3 April 1764 and a second oratorio, *Manasseh* (now lost), was performed at the chapel of the Lock Hospital on 30 April 1766.

Contemporary accounts attest the brilliance of Worgan's performances and improvisations on the organ and harpsichord, and he was in demand to give the opening performance on new organs, including those at St Mary's, Rotherhithe (29 September 1765), St Martin Ludgate (26 January 1766) and the chapel of the Asylum for Female Orphans (25 November 1766). He contributed to at least three books of psalms and hymns for the Asylum. After gaining the MusD from Cambridge in 1775, he virtually retired from public life, apart from his duties as an organist.

Worgan's music was thought by many to be old-fashioned (his sons, particularly (6) Thomas Danvers, resented the lack of acclaim afforded to their father). He continued to teach; two of his pupils were Samuel Jarvis and Charles Wesley. A few years before his death he attempted to institute a series of *concerts spirituels* at his home, but these proved unsuccessful. Apart from the Vauxhall songs, little of Worgan's music was published and most of the manuscripts are lost. Some indication of the scope of his output can be gained from (6) Thomas Danvers Worgan's *The Musical Reformer* (p.64), where he cites 'Oratorios, Anthems, Organ Concertos, and Voluntaries, Vocal Harmony, Sonatas', and from the anonymous article in the *Quarterly Musical Magazine and Review* of 1823 (although some of the works listed there are by (1) James Worgan (i)). Vauxhall programmes for 1786 and 1787 identify some orchestral works; they may, however, have been in the Vauxhall repertory for some years and cannot be accurately dated from these performances. Much of Worgan's music presents a somewhat learned style and looks backwards to the Baroque; the organ pieces selected and published posthumously by his son (5) James Worgan (ii) capture the typical 18th-century character of English voluntaries, with echo effects and 'trumpet tune' melodic lines. A treatise on composition was left unfinished at his death.

Of his eight sons, three were active in music: (4) Richard Worgan, (5) James Worgan (ii) and (6) Thomas Danvers Worgan; his second son, George Bouchir (or Bouchier) Worgan (1757–1838), became a ship's surgeon and in 1786 visited Australia, taking with him his piano, the first to be landed in New South Wales.

WORKS

all printed works published in London

SACRED

Hannah (orat, C. Smart), London, King's, Haymarket, 3 April 1764, as op.1 (1764)

Manasseh (orat), London, Lock Hospital Chapel, 30 April 1766, lost

Anthems: We will rejoice in thy salvation (New Anthem compos'd for a General Thanksgiving) (1759); Lord, thou hast been our refuge, 1782, *GB-Lbl**; It is good to give thanks, The Lord is my shepherd, We will rejoice, cited by Foster

Hymns, in W. Riley, ed.: Psalms and Hymns for … the Asylum … for Female Orphans (1767–9)

OTHER VOCAL

LVG – *London, Vauxhall Gardens*

The Royal Voyage (High on the bounding bark) (J. Marriott), serenata, *GB-Lbl*, *Lcm*, also *Lbl* Add.31693, ff.1–68 as ode

A Solemn Dirge on the Death of the Prince of Wales (C. Smart), LVG, 17 April 1751, lost, text in *Lbl* (Burns Collection)

Occasional Ode on His Majesty's Return to his British Dominions, LVG, 17 Sept 1755, lost, text in *Read's Weekly Journal* (20 Sept 1755)

This is pleasure's golden reign, S, S, T, 2 ob, 2 tpt, 2 hn, str, timp, bc, LVG, 1755 (1755)

Hark! the loud drum (Great Britain for Ever) (Lockman), song … to a march, hautboys, tpts, bns, drums (1759)

Trumpets wake! (Ode for His Majesty's Birthday), 1v, chorus, insts, LVG, 4 June 1761 (1761)

Hence with all this melancholy, qt/choral song, LVG, 1772, lost, text in *Public Advertiser* (10 July 1772)

Cants.: The Court of Comus, London, CG, 5 April 1753, lost; The Nun and Frier (E. Moore) (*c*1757); Gentle heart give over sighing, LVG, 1761 (1761); Who is this that strikes my wond'ring eye?, LVG, 1770 (1770)

Dialogues: Dear Phillis, LVG, 1753 (1753); Yes Damon I can approve, LVG, 1754 (1754); Corydon and Phoebe, LVG, 1755 (1755); Delia leave the shade, LVG, 1757 (1757); Tell me Amyntor, LVG, 1759 (1759); This way pretty maid, LVG, 1760 (1760)

Canzonettas: 6 Canzonets … for Dilettanti, 2, 3vv, bc (1789)

14 vols. of Vauxhall songs (1751–71)

Other works: 3 pieces (nos.2, 3, 9) in Del canzoniere d'Orazio di Giovan Gualberto Bottarelli, Ode xii (1757); pieces in E.T. Warren's collections of catches, canons and glees (1763–94) and his Collection of Vocal Harmony (*c*1775); numerous songs pubd singly and in 18th-century anthologies, others in *Lbl*, *Ob*

INSTRUMENTAL

Symphony, ?D, LVG, 26 June 1786, lost, ?cited in *Quarterly Musical Magazine and Review*, v (1823)

Symphony and March, LVG, 28 May 1787, lost [? sym. = same as above]

2 concs.: tpt, LVG, 28 July 1786, lost; hn, LVG, 10 July 1787, lost [? = hn work perf. LVG, 19 July 1786]

Hpd: 6 sonatas, G, C, F, B♭, E♭, D (1769); [10] Pieces ... for Forming the Hands of Young Pupils (*c*1780); A New Concerto, [G], hpd, 2 vn, vc (1785)
Org: [5] Organ Pieces, A, F, F, B♭, g (*c*1795); Select Organ Pieces, 3 vols., compiled by (5) James Worgan (ii) (*c*1795), 1 Voluntary, G, ed. C.W. Pearce (1906)

Edns: D. Scarlatti: *Libro de XII sonatas modernas*, [i] (1752), ii (1771)

(4) **Richard Worgan** (bap. London, 1 Oct 1759; *d* after 1812). Composer, son of (3) John Worgan. In a letter to Arthur Young, dated 2 August 1807, he described his work as 'the study of Divinity Physic & farming' and his recreation as 'Music'. He composed *A Set of Sonnets* (London, 1810), and one of his hymns, 'Windermere', was included in (7) George Worgan's collection *Gems of Sacred Melody* (London, 1841).

(5) **James Worgan (ii)** (bap. London, 27 Nov 1762; *d* after 1801). Composer, son of (3) John Worgan. He published several vocal works, including the pastorale *Emma* (text by L. Coles; 1800); *Port and Sherry*, for soloist and four-part chorus (*c*1797); the songs *Soft Downy Sleep* (*c*1797) and *Absence* (1800); and a duet with flutes, horns, bassoons and piano, *Bright Phoebus* (1797). His published instrumental works include *A Favorite Carillon Sonata* for harp or piano with two flutes, op.1 (*c*1795), and several marches: *The Royalist's New March* (in D) for piano with violins or flutes (1794; manuscript versions in B♭ exist in *GB-Lbl* and *Lcm* for clarinets, horns and bassoon); one in B♭ for a keyboard instrument (1801); and two for band with piano, one in B♭ 'for the Loyal Essex Regiment' (1801), the other (in C) *A Celebrated French March* with piano variations (1802).

Hark! the drum and a glee with full chorus, both performed at a benefit concert for the singer Isabella Mattocks (née Hallam) at Covent Garden on 7 May 1794, are now lost. Worgan also compiled three volumes of organ music by his father (*c*1795).

(6) **Thomas Danvers Worgan** (bap. London, 27 March 1773; *d* Croydon, 1832). Composer and writer on music, son of (3) John Worgan. He called himself 'Professor of Music' and taught and lectured in London in addition to composing music and writing essays. His three collections *Vocal Sonatinas forming a Coalition of Vocal and Instrumental Harmony* (1816–20) include arrangements as well as his own compositions (rounds, canons, glees etc.). He also composed a motet in ten vocal and 35 instrumental parts, *The Heroes' Welcome* (1824), and published *Rouge et noire de musique, or Harmonic Pastimes*, described as 'Games of Cards constructed on the Principles of Music' (1807). He published three collections of 'Essays in Poetry and Music', as *Monthly Minstrelsy* (1807) and *The Composer or Contrapuntist, with Explanatory Notes* (1826). A further collection of essays, *The Musical Reformer* (1829), included a list of his own works (published and unpublished) and some of his father's. (All of his printed works were published in London.)

(7) **George Worgan** (*b* Chipping Campden, Glos., 1802; bap. 18 Jan 1803; *d* Wellington, NZ, 2 April 1888). Composer and teacher, grandson of (3) John Worgan; his parents, Joseph and Jemima Worgan, were married at Oxford on 4 January 1792. He was taught the piano by J.B. Cramer and after settling in London gave piano lessons to members of fashionable society, including the daughters of Clementi. In 1841 he compiled and published *Gems of Sacred Melody, a Choice Collection of Psalm and Hymn Tunes, Chants etc.*, which contained hymns by various composers, including himself, his uncle (4) Richard Worgan and his grandfather (3) John Worgan. At this time, he lived in Camden Town and was organist at Camden Chapel. About 1850 he retired and went to New Zealand where, after his attempt at sheep farming failed, he continued to teach music.

PAMELA McGAIRL

Work. American family of musicians and composers.

(1) **John W(esley) Work (i)** (*b* Nashville, TN, 6 Aug 1873; *d* Nashville, 7 Sept 1925). Conductor, writer on music, composer and tenor. He studied music at Fisk University, Nashville, and, in 1896–7, classics at Harvard University. He taught Latin and history at Fisk from 1898 to 1923, and from then until his death was president of Roger Williams University, Nashville. He conducted and performed with both student and professional bodies, and composed several songs; through his lectures and scholarly writings he became a leading authority on black American music and culture. He attempted to perpetuate the work of the Jubilee Singers, who had disseminated the spiritual on their American and European tours in the 1870s, and with whose successors he worked at Fisk from 1898 to 1917. He defended the spiritual as the USA's only true folk music and made Fisk University one of the leading centres of its study; his exhaustive *Folk Song of the American Negro* (Nashville, TN, 1915/*R*) was one of the earliest scholarly treatments of the subject.

His wife Agnes Haynes Work (1876–1927) was a fine contralto of exceptional range; she was soloist with the Jubilee Singers during her husband's conductorship and conducted the group after his death.

(2) **Frederick J(erome) Work** (*b* Nashville, 11 Aug 1880; *d* Bordentown, NJ, 17 Jan 1942). Composer, teacher and scholar, brother of (1) John W(esley) Work (i). He taught at Roger Williams University and at black colleges in Arkansas and Missouri. His compositions include a String Quartet in F, *Suite nègre* for violin and piano, a cantata *Out of the Depths*, and many arrangements of African-American folk music, in the collection and dissemination of which he collaborated with his brother. He published the collections *New Jubilee Songs* (1902), *Folk Songs of the American Negro* (with John W. Work, 1907), and *Some American Negro Folksongs* (1909).

(3) **John W(esley) Work (ii)** (*b* Tullahoma, TN, 15 June 1901; *d* Nashville, 17 May 1967). Composer,

scholar, conductor and teacher, son of (1) John W(esley) Work (i). He graduated in history at Fisk University in 1923, studied singing at the Institute of Musical Art in New York in 1923–4, and in 1930 gained a music teaching diploma at Columbia University. He studied composition at Yale University from 1931 to 1933, having taught at Fisk University from 1927 to 1931. He returned to Fisk in 1933 and remained there for the rest of his life, teaching theory, conducting the Jubilee Singers (1947–57), and serving as chairman of the music department (1951–7); on his retirement in 1966 he became professor emeritus.

Work's prolific output, which includes orchestral, instrumental, vocal and choral pieces, shows his keen interest in black folk music. The greater part of it consists of choral folksong arrangements, including 70 spirituals, in which variety of texture and dynamics lends interest to the simple strophic form. In his original choral music (in which folk elements appear only rarely) he favoured a smooth, consonant diatonic style. In 1946 his cantata *The Singers* won first prize in a competition organized by the Fellowship of American Composers. As a musicologist Work was a perceptive authority on black American folk music; his writings, which include *American Negro Songs and Spirituals* (1940) and *Jubilee* (1962), deal with secular as well as sacred music.

(4) Julian C(assander) Work (*b* Nashville, TN, 25 Sept 1910; *d* Tolland, MA, 15 June 1995). Composer, son of John W(esley) Work (i), nephew of Frederick J(erome) Work and brother of John W(esley) Work (ii). He studied composition with his brother while a sociology student at Fisk University. After moving to New York in the early 1930s, he worked as a staff arranger for CBS and became one of the first black American composers to write music for radio and television. Despite his family's interests in black American folksong (his father, uncle and brother published collections), Work belongs to the postwar generation of black composers who wrote in a cosmopolitan musical language that disassociated them from the composers of the Harlem Renaissance. He is best known for his works for wind ensemble, such as the tone poems *Portraits from the Bible* (1956), *Autumn Walk* (1957) and *Driftwood Patterns* (1961). Though his music frequently features strong dissonances and intense chromatic progressions, his compositions have well-established tonal centres.

WILLIAM BURRES GARCIA (1–3), WILLIE STRONG (4)

Work, Agnes Haynes. Wife of John W. Work. *See* WORK family, (1) John W. (i).

Work, Henry Clay (*b* Middletown, CT, 1 Oct 1832; *d* Hartford, CT, 8 June 1884). American composer. The son of abolitionist parents, he was apprenticed as a printer and taught himself songwriting. In 1855 Work moved to Chicago where he was employed by the music publishers Root & Cady. The American Civil War seeded his most fecund songwriting period, and led to immensely popular products like *Kingdom Coming* (1862), *Uncle Joe's 'Hail Columbia!'* (1862) and *Marching through Georgia* (1865). More than perhaps any other songwriter Work captured the deeply felt emotions of the Civil War; he was rewarded with a popularity that outstripped even that of Stephen Foster. Although he was not a great innovator, Work shares much of the credit for the development of the carefully defined verse–chorus structure of late 19th-century popular song, and most of his pieces from this time take this shape. In addition to war songs, he wrote love songs as well as humorous, tragic and moralistic pieces. He composed only two temperance songs, but his *Come home, Father* (1864) is perhaps the best-known in the genre. After the war his powers seem to have waned, in part because of unhappy domestic circumstances. A platonic relationship with a yonger woman led to renewed creative energies in the mid-1870s, writing the immensely popular *Grand-Father's Clock* in 1875. This song tied together many characteristics of Work's earlier songs and sold nearly one million copies, a total unprecedented at that time.

WORKS

(*selective list*)

Edition: *H.C. Work Songs*, ed. B.G. Work (New York, 1884/*R*) [W]

unless otherwise stated, all are solo songs with words by Work; all were published in Chicago. For further details see Hill

We are coming, sister Mary (New York, 1853); God save the nation! (T. Tilton) (1862), W; Grafted into the Army (1862), W; Kingdom Coming (1862), W; Sleep, baby, sleep (1862); Uncle Joe's 'Hail Columbia!' (1862), W; We'll go down ourselves (1862); Babylon is fallen! (1863), W; Days when We were Young (1863), W; Grandmother told me so (1863); Little Major (1863), W; Sleeping for the Flag (1863), W; Song of a Thousand Years (1863), W; Watching for Pa (words adapted by Work) (1863), W; Columbia's Guardian Angels (1864); Come home, Father (1864), W; Corporal Schnapps (1864), W; The Picture on the Wall (words adapted by Work) (1864), W; Wake, Nicodemus! (1864), W; Washington and Lincoln (1864), W

Marching through Georgia (1865), W; Now, Moses! (1865), W; Ring the bell, watchman! (1865), W; The Ship that Never Return'd (1865), W; Tis finished! or, Sing hallelujah (1865), W; Andy Veto (1866); Lillie of the Snowstorm, or Please, father, let us in (1866), W; Poor Kitty Popcorn, or The Soldier's Pet (1866), W; When the 'Evening Star' went down (1866), W; Who shall rule this American nation? (1866), W; Come back to the farm (1867), W; Dad's a Millionaire (1867), W; Crossing the Grand Sierras (1869), W; No Letters from Home (1869), W; Grand-Father's Clock (New York, 1876), W; The Mystic Veil (New York, 1876), W; Sweet Echo Dell (New York, 1876), W; Touch the Sleeping Strings (Cleveland, 1876); Used-Up Joe (Cleveland, 1876); The Lost Letter (1883); The Prayer on the Pier (1883); The Silver Horn (1883); Drop the pink curtains (New York, 1884)

DALE COCKRELL

Workers' Music Association. British organization. It came into being in 1936, when a number of choirs in the London Labour Choral Union and Co-operative Musical Association (then embracing some 44 choirs and five orchestras) came together to 'coordinate workers' musical activity'. Their need was music that reflected the world outlook of their members and the means to create and perform such music. The objects of the WMA are to provide opportunities and means for people to develop their musical instincts and tastes and so to improve the level of their musical understanding as a result of their own strivings and experiences, rather than accept uncritically standards set by commercial or other interests. It sets out to encourage the composition and performance of music which expresses the ideals and aims of humanity for an improvement of society where social justice is seen as being the norm. Around 1939 it issued records through the TOPIC record company. The WMA has direct contacts with national and local trade union organizations, has affiliations from choirs and bands in London and the provinces and runs a summer school every August in Yorkshire. Its London choir, the WMA Singers, is well known to progressive audiences in London and the Home Counties. In 1999 there were about 200 members.

□

Works Progress Administration [WPA], **Federal Music Project of the.** The US government's most ambitious programme to aid musicians left destitute by the Depression. Instituted in May 1935 as part of the Four Arts Project of the WPA, the Federal Music Project built on the musical activities of the earlier Federal Emergency Relief Administration and the Civil Works Administration. Under the able leadership of its first national director, Nikolai Sokoloff (1935–9), the project focussed on the employment of musicians as performers in orchestras, concert and dance bands, chamber music and choral ensembles, and opera companies. Statistics for the period January 1936 to April 1940 show 250,000 performances reaching an audience of 159 million. At its peak in 1936, the project employed over 15,000 people in 42 states and the District of Columbia. Other activities sponsored by the project included the Composers' Forum Laboratories, extensive music education and recreation programmes, music festivals, radio broadcasts, the collecting and recording of American folk music, experimental music therapy programmes and various music copying and research projects.

On 1 September 1939 the project was transferred to state control as the WPA Music Program. Under the direction of Earl Vincent Moore (1939–40) and George Foster (1940–43) the educational and recreational aspects of music were emphasized and the state music projects became increasingly involved in the national defence effort. Most Music Program activities ceased with the outbreak of World War II, although they were not officially terminated until July 1943.

Among the publications of the Federal Music Project are the unfinished *Index of American Composers*, the *Index of American Orchestral Works Recommended by WPA Music Project Conductors* (Washington DC, 1941), Marian Hannah Winter's *Art Scores for Music* (New York, 1939) and, in conjunction with the Federal Writers' Project, *The Spanish-American Song and Game Book* (New York, 1942). Other WPA-sponsored publications involving music include collections of folk music of Mississippi, West Virginia, Nebraska and Kentucky, a reprint of the 1854 edition of William Walker's shape-note tune book *The Southern Harmony* (New York, 1939), an edition of the early American comic opera *The Disappointment, or, The Force of Credulity* (New York, 1935), the seven-volume *History of Music in San Francisco* (San Francisco, 1939–42) and the valuable *Bio-bibliographical Index of Musicians in the United States of America from Colonial Times* (Washington DC, 1941, 2/1958).

METRO VOLOSHIN

World Saxophone Quartet [WSQ]. American jazz group. It was founded in 1976 by David Murray (tenor saxophone), Oliver Lake (alto), Julius Hemphill (alto) and Hamiet Bluiett (baritone). As a corollary to the free jazz principle that a solo concert might be given on any instrument (not just the traditional unaccompanied jazz instruments, piano and guitar), the World Saxophone Quartet invented the now widely imitated idea that a jazz band need not have a conventional rhythm section. With bass lines and harmony conveyed instead by means of Bluiett's biting sound in combination with rhythmic harmonized ostinatos, each member took a turn as a melodic soloist; this approach typically alternated with passages of unmetred collective improvisation. The Quartet's consistently brilliant live performances have been difficult to capture in the studio, where their music takes on a certain sameness despite stylistically wide-ranging ventures into free jazz, rhythm and blues, and jazz standards. Their most successful recordings have been made in collaboration with three African percussionists and, on some tracks, a bass guitarist; the first such disc, *Metamorphosis*, dates from 1990 (Elektra Nonesuch), shortly after Arthur Blythe replaced Hemphill. In the mid-1990s, after further changes in personnel, the soprano and alto saxophonist John Purcell joined Lake, Murray and Bluiett as a regular member of the group.

BARRY KERNFELD

Worms. City in Germany. Located in the Rhineland-Palatinate. Worms grew from the Celtic settlement of Borbetomagus, which came under Roman rule in the last century BCE. The city museum contains items from the 1st to 4th centuries CE, including a trumpet mouthpiece, an actor's mask, a rattle and a tambourine buried as grave goods with a dancing girl.

Ecclesiastical buildings, notably the episcopal church of Worms, built about 600 on the cathedral mound, provide information about the early practice of sacred music. Carolingian school reforms, with their recommendations on the practice of music, probably reached Worms by way of Metz. In 764 the imperial monastery of Lorsch was founded on the right bank of the Rhine, not far from Worms. Abbot Samuel, who was also Bishop of Worms in 838–56, founded the religious house of St Cyriacus in Neuhausen near Worms in 847, and in 852 a copy was made there of the *Etymologiae* of Isidore of Seville (now in *A-Wn*), a work which recommends study of the theory of music as part of the Quadrivium. Worms reached the height of its political and cultural importance in the 10th to 13th centuries, when such bishops as Hildebald (979–98) and Burchard (1000–1025) were closely concerned with the liturgy and with church music. The *Wormser Briefsammlung* of 1036 discusses *musica speculativa*. In the 12th century Minnesinger such as Walter von der Vogelweide visited the city. Bligger von Steinach, whose family held feudal tenure from the episcopal court, may possibly have been the author of the *Nibelungenlied*.

Names of Kantors for the cathedral chapter are first recorded in 1016, for the collegiate churches of St Paulus, St Martin and the Andreaskirche after the 12th century, and for the Liebfrauenstift after the 14th century. Succentors who taught music are first specifically mentioned in 1234, and the cathedral's first recorded organ was installed in 1259. Those manuscripts which had not already been dispersed to foreign libraries, or in the 17th century to the Bibliotheca Vaticana, fell victim to the destruction of Worms in 1689, during the War of the Palatinate Succession. No organs from before 1689 are extant, and most of the instruments built by the brothers Stumm in the 18th century were destroyed in air raids in 1945.

Under the influence of the humanists, the episcopal and imperial city of Worms saw a flowering of the arts around 1500. Emperor Maximilian I brought his Hofkapelle and the organist Paul Hofhaimer to Worms with him for the Imperial Diet of 1495. The organist and composer Arnolt Schlick and the Hofkapellen of the Electorate of the Palatine and of Saxony were also present, and documents reveal that minstrels also performed. There was music again at the Diet of 1521, to which Martin Luther was summoned to defend himself before Emperor Charles V. The coming of the Reformation in 1527, when most of the citizens turned to Lutheranism, resulted in the separation of Catholic and Protestant church music. There is evidence of music-making in the tradition of Meistergesang in the statutes of the Worms Singergesellschaft, printed in Heidelberg in 1561 and entitled *Reformation, Lob und Satzung der edlen und lieblichen Kunst der Musica*. The Lutheran mayor Andreas Schlatt encouraged the printing of compositions by the Palatinate pastor Cornelius Sigefrid, which were published in 1602–5 by Andreas Bertram in Strasbourg. The Catholic cathedral organist Hieronymus Rosso (Roth) was well known around 1614 as a composer of parody masses.

Records documenting the existence of town musicians date from the early 15th century, and an oath of 1470 taken by the pipers and trumpeters has been preserved. Two pipers and a trombonist played annually in Frankfurt in a procession celebrating the exemption from taxation of the merchants of Worms granted in a privilege of 1074. Besides three or four town musicians with their journeymen and apprentices, the city employed drummers and musicians to signal the hours from church towers. After the destruction of the city in 1689 the number of town musicians was reduced to two. The consecration of the Lutheran Dreifaltigkeitskirche in 1725 was celebrated with the performance of four cantatas by Christoph Graupner, Hofkapellmeister at Darmstadt. In the 16th century the organs built by Martin Ruck were highly regarded, as were the organs and harpsichords built in the 18th century by J.C. Jaeckel and his son Christian. The small bishopric had no court music of its own in the 18th century; the Lutheran town musicians joined with the Catholic 'Dommusicus Instrumentalis' to provide the music for festivals.

The bishopric was dissolved in 1801, and the city belonged to France from 1797 to 1814, and then to the Grand Duchy of Hesse-Darmstadt. After 1800 the music publishers J.M. Götz and Georg Kreitner were active in Worms. The Musikgesellschaft, founded in 1812 and from 1880 known as the Musikgesellschaft und Liedertafel, performed choral music, and a cathedral choral society was founded in 1871. In 1893 and 1901 music festivals were held in the Spiel- und Festhaus (inaugurated in 1889). The composers Friedrich Gernsheim (1839–1916) and Rudi Stephan (1887–1915) came from Worms. An Instrumentalverein was founded in 1848 and from 1899 to 1939 was known as the Philharmonischer Verein. More recent musical institutions include the amateur Worms Kammerorchester, founded in 1951, the Jugendmusikschule, which gives orchestral and chamber concerts, and many choral societies, notably the Worms Kantorei, the Bach Chor of the Dreifaltigkeitskirche and the vocal ensemble of St Martin's.

The Jewish community of Worms had an independent musical tradition that can be traced back to the 10th century. Its first synagogue was consecrated in 1034. Liturgically, it had connections with northern France. Raschi, Rabbi Salomon ben Isaac of Troyes (1040–1105), the famous Ashkenazy commentator on the Bible and the Talmud, studied at the Worms Talmudic School. Maharil, Jaakov Halevi Molin of Mainz (*c*1355–1427), regarded as one of the codifiers of the musical *minhag* of the Rhine area, was buried in the 'holy sand', the oldest surviving Jewish cemetery in Europe.

The cities of Speyer, Worms and Mainz developed a Jewish rite of their own in the 11th and 12th centuries. It goes back to Isaak ben Eleasar ha-Levy, a teacher of Raschi. 40 11th-century songs by Meir ben Isaak have been preserved, including penitential songs and introductions to the reading of Aramaic biblical translations (the Targums). The scholar Jehuda he-Chasid, who studied the connections between mysticism and music in the *Sefer Ḥasidim* ('Book of the pious') about 1200, had links with Worms. In the 13th century the Kantor Abraham directed a choir that probably sang antiphonal and responsorial music as well as performing in the synagogal solo style.

Names of leading women singers in the women's synagogue of the same period have also been preserved. In 1495 Empress Bianca Maria Sforza and other royal guests went to hear the singing of the Jews of Worms in the synagogue.

The *Wormser Machsor*, an illuminated two-volume prayer book for religious festivals written by Simcha ben Jehuda in Franconia in 1272 and acquired by the Worms community in the 15th century (now in *IL-J*), contains the Yemenite notation of shofar tones in its first volume. The prayer book for weekdays written in 1452 by Simon Eggenfelder and the collection of Jewish songs by Eisak Wallich (before 1632, now in *GB-Ob*) provide information about musical practice, as does the *minhag* book by Juspa Schammes (1603–76), which describes the music and dances performed at weddings. Instruments, forbidden in the synagogue, were used in wedding dances and processionals. A synagogue choral society which existed from 1870 to 1922 was founded in the wake of 19th-century liberalization, and the synagogue acquired an organ in 1877. Between 1933 and 1945 the 'Holy Community of Worms', which had existed for 1000 years, was destroyed.

FRITZ REUTER

Wornum [Wornham]. English family of music publishers and piano makers. Robert Wornum (i) (*b* ?Berkshire, 1742; *d* London, 1815) was established in Glasshouse Street, London (*c*1772–7), and then at 42 Wigmore Street (*c*1777–1815). He published many small books of dances and airs for the flute or violin, and was also a maker of violins and cellos. His son Robert Wornum (ii) (*b* London, bap. 19 Nov 1780; *d* London, 29 Sept 1852) went into partnership with George Wilkinson in a piano business in Oxford Street from 1810 to about 1813. Following his father's death in 1815 Robert (ii) continued the family business making pianos, moving in 1832 to Store Street, Bedford Square. He played an important role in developing small upright pianos which were acceptable as articles of drawing-room furniture. Wornum invented the diagonally and vertically strung low upright pianos in 1811 and 1813, which he named respectively the 'Unique' and the 'Harmonic'. He patented his actions and by 1828 had completed the development of his cottage piano action, which became very popular and was copied by Pape and Pleyel in their 'pianino'. Wornum was not, as is formerly thought, the inventor of the tape-check action for upright pianos, which facilitated rapid repetition – Herman Lichtenthal first patented it in 1832 – but he did patent his own version of it in 1842 (no. 9262). He also experimented with down-striking actions, including a down-striking tape-check action, a 'pizzicato' stop operated by a pedal, and with placing the soundboard above the strings. His son, A.N. Wornum (*b* London, bap. 9 Sept 1814; *d* London, 1888), succeeded him as head of the firm (by then Robert Wornum & Sons) and the business continued until 1900.

PETER WARD JONES

Woroniec, Antoni Arnulf (*fl* 2nd half of the 18th century). Polish priest and theologian. He was a doctor of theology and canon law, and abbot of a Benedictine monastery at Nieśwież. In 1794 he wrote one of the earliest manuals of music theory in Polish, *Początki muzyki tak figuralnego jako i choralnego kantu* ('The origins of music in plainsong and chorale chant', Vilnius, 1809), which he dedicated to Prince Dominik Radziwiłł. It contains basic music theory, principles of teaching liturgical singing and a glossary of musical terms; it derives partly from Schott's *Organum mathematicum* of 1668.

KATARZYNA MORAWSKA

Worschitzka, Franz Xaver. *See* WOSCHITKA, FRANZ XAVER.

Worshipful Company of Musicians. English organization based in London. Its aim is to promote all aspects of the art and science of music. It grew from the London Fellowship of Minstrels, which became a guild in 1500, and it took its present name in 1604 when it was granted a charter by James I.

Because of the presence of the king's and other royal minstrels in London, the London Fellowship was until 1500 prevented from becoming a guild and from acquiring the virtual monopoly of music-making in the city and its environs that similar groups outside London possessed. Its privileges were improved by a charter of Edward IV (1469), which created the ranks of marshal and two wardens (all members of the King's Musick), and gave the London Fellowship control over the musical profession

throughout the country (except for Cheshire where a separate arrangement obtained). This gave the fellowship some protection against unauthorized competition, but it did not resolve the conflict of rights between it and the royal and aristocratic bodies within London. With the charter of James I, the London guild was transformed into the Worshipful Company of Musicians, granted the civic influence and prestige of other livery companies, and given control over all music-making in and within three miles of London (except for Westminster and Southwark). Its relationship with the royal and aristocratic bands, however, remained precarious; in 1632 Charles I declared the 1604 charter null and void, and the Westminster Musicians Guild claimed control of the city musicians in 1637. Though further impeded by charters of Charles II (1664) and James II (1688), the company did its best to preserve its hard-won privileges, insisting on its rights throughout most of the 18th century. But by mid-century most 'public' music had moved out of the control of the company into the newly built West End of London; to both Hawkins and Burney the Worshipful Company was a pitiful anachronism surviving from a barbarous age, out of touch with the world of Handel and his Classical successors. It began to admit non-musicians, notably businessmen, in order to maintain its existence, and the membership increased from 31 (1739) to 269 (1783). Not until 1870 with the election of William Chappell did the company revive its interest in music and admit more musicians, and its lay members became increasingly willing to use the company to serve the ends of music.

In more recent times it has done this most effectively by awarding prizes, scholarships and medals, the most important of which is the Collard Fellowship, established in 1931 in memory of John Clementi Collard, twice master of the company, and held by, among others, Howells, Lambert, Berkeley and Fricker. It awards the Cobbett Prize for services to chamber music, the Santley medal to singers, and other prizes and medals at various schools and colleges of music and at the National Brass Band Championship. The company operated without a charter from 1632 until 1950, when its position was regularized by the charter under which it now operates.

Woschitka [Woczitka, Worschitzka, Baiczka], **Franz Xaver** (*b* Vienna, 1728; *d* Munich, 5 Dec 1796). Austrian cellist and composer. His father Tobias Woschitka (*b c*1683; *d* 24 March 1752) was a bassoonist in the imperial Hofkapelle in Vienna. Franz Xaver Woschitka was chamber virtuoso from 1750 to 1765 at the ducal court of Mecklenburg-Schwerin, where C.A.F. Westenholz was among his pupils. From 1765 he was in Munich as a chamber virtuoso, receiving the title of 'Kammerdiener' (he was not a member of the court orchestra). There he composed many works for the viol, Elector Maximilian III Joseph's favourite instrument; this secured him an influential position at the court. He arranged W.A. Mozart's conversation with Elector Maximilian on 30 September 1777. After the elector's death in December 1777, Woschitka's services were at first regarded as superfluous, but from 1779 he was listed among the cellists of the court orchestra. He retained his connection with the Schwerin court, and in 1787 he sent Duke Friedrich Franz I six cello concertos and six quartets together with six piano trios and an oboe concerto by his son, also Franz Xaver.

Woschitka was highly esteemed in his day both as a composer and as a cellist. Unfortunately much of his output is lost. Of his Munich compositions only a 'Solo' for cello and bass is preserved (*D-Mbs*). A Cello Concerto in D and six string quartets also survive (*D-SWl*); the quartets, supposedly the set sent in 1787, are mostly in the *galant* three-movement form, the last movement a rondo.

CAMILLO SCHOENBAUM/ROBERT MÜNSTER

Wöss, Josef Venantius von (*b* Cattaro [now Kotor], Dalmatia, 13 June 1863; *d* Vienna, 22 Oct 1943). Austrian church musician, composer and editor. After studying at the Vienna Conservatory (1880–82), where his teachers included Franz Krenn, he held several teaching and church music positions in Vienna. He also worked as an editor for Universal Edition (1908–31), edited *Musica divina* (1913–34) and was co-editor of *Denkmäler der Tonkunst in Österreich* (from 1925). Among other projects, he prepared piano scores of Mahler's symphonies for publication and edited works by Bruckner. As a composer, he wrote primarily Catholic sacred music; his works show the influence of the Cecilian movement and the music of Bruckner, with whom he had many personal contacts.

WORKS
(*selective list*)

Ops: Die Lenzlüge (H. von Korff and E. Brosso), op.22 (1905); Flaviennes Abenteuer (W. Schriefer), op.31 (1910); Carmilhan (F. von Ehrenfels), op.50, unperf.

Vocal: 16 masses; 2 Te Deum; 2 requiems; 10 complete Propers; many motets, hymns and sacred choruses; secular choruses, some with orch; *c*150 lieder; 94 Latin sacred songs with org

Orch: Suite, D; Sakuntala; 4 divertimentos

Chbr and solo inst: Sonata, A, op.1, vn, pf; Str Qt, F, op.9; Sextet, e, op.46, str qt, db, pf; org pieces

HERMANN J. BUSCH

Wotquenne(-Plattel), Alfred (Camille) (*b* Lobbes, Hainault, 25 Jan 1867; *d* Antibes, Alpes-Maritimes, 25 Sept 1939). Belgian music bibliographer. He came from a family of musicians, and studied the piano with Brassin, the organ

with Mailly (first prize, 1888), and theory with Dupont and Gevaert at the Brussels Conservatory. He was appointed deputy secretary and librarian there (1894) and later secretary and inspector of studies (1896). During his tenure as librarian (until 1918) the collections were systematically reorganized and catalogued. Important works were acquired, both original manuscripts and prints, and manuscript copies (many of them in Wotquenne's own hand) of rare items in other libraries. An example of his diligence is the copy he made of the 13 volumes of chansons published in Antwerp by Tylman Susato between 1543 and 1550. The most significant accessions during his librarianship included the acquisition in 1902 of an important portion of the large collection left by Professor Wagener of Marburg (a number of the most valuable books and manuscripts in the Wagener collection, acquired by Wotquenne personally, were among the 624 items he disposed of by auction in Leipzig in 1913: see Thibault). Wotquenne is credited with establishing the library's continuing tradition of warm welcome and generous assistance to researchers.

Being obliged to resign his posts at the conservatory (November 1918), Wotquenne moved to Antibes, where he was active as a singing teacher and organist and became director of music at the cathedral there (1921). In 1929 he sold the major portion of his remaining private music library, including some important manuscript bibliographies he had compiled, to the Library of Congress in Washington.

Although he composed some sacred vocal music, Wotquenne is remembered as an editor and music bibliographer. He participated with other Belgian musical scholars in preparing the complete edition of Grétry's works. He continued Gevaert's *Répertoire classique du chant français*, edited the *Répertoire français de l'ancien chant classique* and brought out the *Répertoire Wotquenne*, a series of vocal exercises. As well as his published catalogues and indexes, he left a number of thematic catalogues in manuscript. Those of Steffani's works, Tartini's sonatas, and the incipits of 18,000 Italian chamber cantatas of the 18th century are in the Brussels Conservatory, while his thematic indexes of the Ballard *petits recueils* (1695–1743), the *Chansonnier français* (1760–62) and the *Théâtre de la Foire* (1680–1762) are in the Library of Congress.

HOWARD SCHOTT

Wotton, Thomas (*fl* Oxford, 1483–9). English organ builder. In 1486 he constructed a 'pair of organs' (i.e. an organ) for the chapel of Magdalen College, Oxford for the sum of £28, and in 1488 repaired it for 40s. In 1487 he entered into an agreement with R. Fitzjames, warden of Merton College, to make a similar instrument, also for £28. According to the late 17th-century antiquary Anthony Wood, who believed that Wotton's first name was William, he was the father of Lambert Simnel, pretender to the English throne in 1487. An account of this theory is given in S. Jeans: 'Wotton, the Organmaker, of Lambert Simnel Fame: was he William or Thomas?', *JBIOS*, xi (1987), 50–53.

GUY OLDHAM/STEPHEN BICKNELL

Wotton, William (Beale) (*b* Torquay, 6 Sept 1832; *d* Deal, 3 May 1912). English bassoonist. He joined the army at the age of 13 and became bassoonist in the Life Guards. There he also played the saxophone and, according to George Grove (*Grove1*), was the first player of this instrument in England. In 1866 he joined the orchestra of the Crystal Palace, and for the next 30 years he enjoyed the highest reputation in London orchestras, succceding Baumann as the foremost bassoonist of his time. He taught at the RCM from 1883 to 1905 and at the RAM from 1883 to 1912. Wotton played all his life on a Savary instrument, and was especially praised for his expressiveness and beauty of tone. His portrait, painted by Arnold Willins in 1890, is at the RCM.

His brother Thomas E. Wotton (1852–?1918) was also an excellent bassoonist and succeeded him in his various posts.

WILLIAM WATERHOUSE

Woulmyer, Jean Baptiste. *See* VOLUMIER, JEAN BAPTISTE.

Wounderlich, Jean-Georges. *See* WUNDERLICH, JEAN-GEORGES.

Woyrsch, Felix (*b* Troppau, Austrian Silesia [now Opava, Czech Republic], 8 Oct 1860; *d* Altona, Hamburg, 20 March 1944). German composer and choral conductor. He grew up in Dresden, and in early youth moved to Hamburg to study with Ernst August Heinrich Chevallier; in Altona he was conductor successively of the Allgemeine Liedertafel (from 1887), the church choir (from 1893) and the Singakademie (from 1895). In addition, he was organist of the Friedenskirche (1895–1903) and then of the Johanniskirche (1903–26), and from 1903 he directed the city orchestral concerts. Elected to the Prussian Academy of Arts in 1917, he received the Goethe Medal in 1936, and in 1937 he retired from public musical life. He had met with Brahms's esteem as a young man, and in his early vocal music he took Brahms and also Palestrina, Lassus, Schütz and Bach as his models. Later he turned more to instrumental music, and his chamber pieces, his Brahmsian symphonies and the *Böcklin-Phantasien* are works of considerable achievement.

HELMUT WIRTH

Woytowicz, Bolesław (*b* Dunajowce, Podolia, 5 Dec 1899; *d* Katowice, 11 July 1980). Polish composer, pianist and teacher. He studied the piano with Michałowski at the Chopin High School of Music in Warsaw (1920–4) and immediately embarked on a performing career that took him throughout Europe and to North America. At the same time he studied composition with Szopski and Maliszewski, followed by three years in Boulanger's class in Paris (1929–32). During World War II the 'Woytowicz Café', which he organised in Warsaw, was a vital public focus for Polish music-making as well as being a centre for underground activities of the resistance. After the war, he was appointed to positions at the conservatories in Katowice (from 1945) and in Kraków (from 1963); his pupils included the composers Baird, Kilar and Szalonek.

Woytowicz is at his most inventive in the surviving orchestral works. *Poemat żałobny* ('Funeral Poem') and the Second Symphony ('The Warsaw') are dramatic tone poems characterized by a robust and gritty language. The Symphony – the first in Poland after the war – is significant both stylistically and symbolically: it quotes the 1831 revolutionary song 'Warszawianka' and even his own wartime underground song in the finale's coda (though this was excised in the published score), while the fugal sections and cyclic thematic scheme point to Woytowicz's disciplined compositional technique. In the post-war decade his cantatas (a genre characteristic of the time) mark an inspirational low point, but the Second String Quartet (1953) is an impressive example of a genre which had become unfashionable in socialist-realist Poland. The Third Symphony – with its prominent solo piano – artfully combines 12-note pitch organization, neo-classical gestures, arch-form and variation technique.

ADRIAN THOMAS

Wrangell [Vrangel′], Baron **Vasily Georgiyevich** (*b* St Petersburg, 13/25 June 1862; *d* St Petersburg, 25 Feb/10 March 1901). Russian composer. Until 1883 he was a member of the *corps des pages*, and as a young man showed signs of musical talent. He studied for a time in Paris, then entered the Ministry of Internal Affairs. From 1885 to 1890 he attended classes at the St Petersburg Conservatory, and soon began to make a name for himself as a composer. A suite for orchestra (1890) was praised by the critics. In 1892 he and Glazunov founded the Obshchestvo Muzïkal′nïkh Sobraniy (Society for Musical Meetings). At their regular meetings music by Russian and European composers and by members of the society was played and discussed. Wrangell was deeply interested in Russian music, and during his editorship of the journal *Nuvellist* (1898–9) he championed the cause of contemporary Russian composers.

Though music was a part-time occupation for Wrangell, he found time to compose several large-scale works, including two ballets. In one of these, *Doch′ Mikado* ('The Mikado's Daughter', 1897), he made delightful use of pseudo-Japanese melodies and oriental orchestral colour. He was certainly acquainted with Tchaikovsky's ballets, and the 'exotic' music of *The Mikado's Daughter* may have its origins in some of the characteristic dances from the second act of *The Nutcracker*. Wrangell's music in general is pleasing rather than profound, and displays little originality. However, he had a marked gift for attractive, lyrical melody and his songs were once very popular with concert artists and salon performers in Russia and elsewhere.

WORKS

Stage: Le mariage interrompu (ballet), 1896; Dmitriy Samozvanets [The False Dmitry] (incid music, Chayev), 1896; Doch′ Mikado [The Mikado's Daughter] (ballet, 3), St Petersburg, 9 Nov 1897, arr. pf (St Petersburg, 1898)

JENNIFER SPENCER

Wranitzky [Vranický, Wraniczky, Wranizky], **Anton** [Antonín] (*b* Nová Říše, Moravia, 13 June 1761; *d* Vienna, 6 Aug 1820). Czech composer, violinist and music teacher active in Vienna, brother of Paul Wranitzky. He attended the grammar school at the Premonstratensian monastery in Nová Říše and later studied philosophy and law at a Jesuit seminary in Brno. His earliest musical training

included violin lessons from his brother; he was also known for his beautiful voice. Before December 1783 he became choirmaster to the chapel of the Theresianisch-Savoyische Akademie in Vienna (until the abolition of church music there with the reforms of Joseph II). In Vienna he studied composition with Mozart, Haydn and J.G. Albrechtsberger, and became renowned as a violin teacher and virtuoso. By 1790 he had entered the services of Prince J.F. Maximilian Lobkowitz as a composer, music teacher, Konzertmeister and (from 1797) Kapellmeister of the prince's private orchestra; in these duties he was active at Vienna, Prague and the prince's country seats in Bohemia (at Roudnice, Jezeří and Bílina). After the prince took charge of the Vienna court theatres (1807) and later sole direction of the opera, he appointed Wranitzky orchestra director of the court theatre – according to the obituary register, a post he held until his death. From 1 August 1814 he was also the orchestra director of the Theater an der Wien. He assisted the prince in leading the Hoftheater-Musik-Verlag from 1812 to 1816 (see Weinmann). After the prince's death Wranitzky remained in the service of his successor.

Like his brother, Anton Wranitzky was a friend of both Haydn and Beethoven. (Haydn approved Wranitzky's arrangement of *The Creation* for string quintet; see letter to Griesinger, 1 October 1801.) As a composer, performer and teacher he was a founder of the Viennese violin school. He used his own pedagogical work, the *Violin Fondament*, in his teaching, and had as pupils the outstanding violinists Ignaz Schuppanzigh and Joseph Mayseder. Wranitzky's numerous violin concertos stand between the Classical and Romantic styles, and his 21 published string quartets are early examples of the emerging theatrical style in Viennese chamber music. The symphonies, mostly consisting of four movements with a slow introduction, remain for the most part within the high Classical style, though two are programmatic: the 'Aphrodite' Symphony of 1792, composed for the wedding of Prince Lobkowitz to the Princess von Schwarzenberg, and the Symphony in D major of 1796, which has five movements headed 'Burst of Ardent Joy', 'Tender Feeling of Gratitude', 'Gleeful Expression of Requited Love' (a minuet with two trios), 'Sweet Emotions' and 'Benediction', anticipating features of Beethoven's Pastoral Symphony. With the exception of the Violin Concerto op.11 and several chamber pieces, Wranitzky's works survive entirely in manuscript, the majority in the former Lobkowitz collection, now in the Národní Muzeum, Prague. His daughters Anna Kraus-Wranitzky (1801–51) and Karoline Seidler-Wranitzky (1790–1872) were well-known singers; Karoline was the first Agathe in Weber's *Der Freischütz*. His sons Friedrich (a cellist) and Anton (a violinist) were members of the court theatre orchestra at Vienna.

WORKS

MSS in CZ-Pnm unless otherwise stated; partial thematic catalogue in Blažek (1936)

MILAN POŠTOLKA/ROGER HICKMAN

Wranitzky [Vranický, Wraniczky, Wranizky], **Paul** [Pavel] (*b* Nová Říše, Moravia, 30 Dec 1756; *d* Vienna, 26 Sept 1808). Czech composer, conductor and violinist active in Vienna, brother of Anton Wranitzky. He studied singing and the organ, violin and viola at the Premonstratensian monastery grammar school in Nová Říše, and later at Jihlava (1770–71). At Olomouc he studied theology and became an excellent violinist. At 20 he went to Vienna, where he entered the theological seminary and served as its choirmaster. He continued his musical studies with J.M. Kraus (the Kapellmeister to the Swedish court, who visited Vienna in about 1783). Suggestions that he was also a pupil of Haydn remain unsubstantiated.

He served as music director for Count Johann Baptist Esterházy in the spring of 1784 and was appointed director of the newly created Kärntnertortheater orchestra in October 1785, a position he held until 1787, when he joined the Burgtheater orchestra. He was named its director in either 1792 or 1793. In about 1786 he started composing symphonies; he was asked to write one for the coronation of Franz II in 1792. He also composed several works for the private use of Franz's second wife, Marie Therese (1772–1807). Wranitzky conducted a gala

performance of his Singspiel *Oberon* during the coronation festivities of Leopold II at Frankfurt (15 October 1790). During the next 15 years Wranizkty composed at least another 20 works for the stage. He maintained his position with the court theatres until his death in 1808 when his brother Anton replaced him.

Wranitzky played a prominent role in the musical life of Vienna. Both Haydn and Beethoven preferred him as a conductor of their works: Haydn insisted on his direction of the Viennese performances of *The Creation* (1799, 1800), and at Beethoven's request he conducted the première of that composer's First Symphony (2 April 1800). From 1805 he alternated with Gyrowetz as head of the Adelige Liebhaber- oder Cavalier-Konzerte of Vienna. Wranitzky was a member of the same freemasons' lodge as Mozart, 'Zur gekrönten Hoffnung' and after Mozart's death served as a legal mediator for his widow in her negotiations with the publisher André. As secretary of the Viennese Tonkünstler-Societät he succeeded in settling Haydn's lengthy quarrel with the society in December 1797. His friendly relations with Haydn are documented by Wranitzky's letter to John Bland (12 December 1790) and by Haydn's letter to Wranitzky (3 September 1800). Beethoven's personal relationship with both Paul and Anton Wranitzky is shown in Czerny's memoirs. Weber visited Paul Wranitzky in Vienna in 1803.

Wranitzky composed 51 symphonies, most of which have four movements in the standard Classical order, frequently with a slow introduction. The public performance of his *Grande sinfonie caractéristique pour la paix avec la République françoise* op.31 was forbidden by an imperial resolution (20 December 1797) as the title of the work was felt to be provocative. Like Beethoven's *Eroica*, this symphony contains a funeral march as the slow movement, which is given the subtitle 'The Fate and Death of Louis XVI'. Wranitzky also published 56 string quartets, the majority of which are set in the three-movement format of the Parisian *quatour concertant*. In these works Wranitzky explored the emerging Romantic style with daring harmonic progressions, theatrical gestures, and virtuoso display. Wranitzky's music quickly fell out of favour after his death, as noted by Fétis: 'The music of Wranitzky was in fashion when it was new because of his natural melodies and brilliant style. He treats the orchestra well, especially in symphonies. I recall that, in my youth, his works held up very well in comparison with those of Haydn. Their premature abandonment of today has been for me a source of astonishment'. Wranitzky's best-known stage work and also one of his longest-surviving compositions was his first Singspiel *Oberon*. The enthusiastic reception of this work in Vienna prompted Schikaneder to conceive *Die Zauberflöte* for Mozart, whose setting shows certain striking resemblances to Wranitzky's work. Goethe considered Wranitzky the most appropriate composer to set his *Zauberflöte zweiter Teil*, and sought his collaboration (letter, 1796). *Oberon* was eclipsed in popularity only in 1826 by Weber's opera of the same name. Even more popular in their day were Wranitzky's ballets, particularly *Das Waldmädchen* (though the 'thème russe' from this work, on which Beethoven wrote his 12 piano variations WoO71, is by Giornovichi).

WORKS

MILAN POŠTOLKA/ROGER HICKMAN

Wrastill, Florian (*b* nr Königgrätz [now Hradec Králové], 31 March 1717; *d* Mariazell, 24 April 1758). Austrian composer. About 1740 he entered the Benedictine monastery of St Lambrecht in Styria. From 1749 until his death he was choir director at the pilgrimage church of Mariazell, which was under the care of his monastery, and composed music for special services there. Joseph Haydn may have sung under Wrastill when he joined the Mariazell choir during a visit there in 1749.

Wrastill's output consists largely of festive masses with orchestra and settings of the litany (the types of liturgical music most often used at a Marian shrine). His style is typical of the minor church composers of the time. (R. Federhofer-Königs: 'Zur Musikpflege in der Wallfahrtskirche von Mariazell/Steiermark', *KJb*, xli, 1957, 117–35, esp. 120)

ELIZABETH ROCHE

Wreede, Johannes. *See* URREDE, JUAN DE.

Wrest pins [tuning pins] (Fr. *chevilles*; Ger. *Stimmwirbeln*). The turnable metal pegs around which one end of the strings of a piano, harpsichord, clavichord, zither, European harp etc. are wound. They are turned to increase or decrease tension on the strings, thereby raising or lowering their pitch and enabling the instrument to be tuned. In modern instruments, the wrest pins are made of hardened steel, have accurately formed square heads that fit an appropriate tuning-key or 'hammer', are finely threaded at the end to be inserted into the WREST PLANK or other part into which they are driven (in harps they pass through the neck), and have a hole through which the end of the string passes before being wound on to the pin. Earlier wrest pins were forged from round iron rod and the head formed by flattening on an anvil; the opposite end, usually slightly tapered, is not threaded, although it may be lightly knurled. These pins were not drilled to accept the end of the string, but the softer wire formerly used for strings could be wound directly on to the pins. In general, early wrest pins are far smaller in diameter than those used on modern pianos, since the string tension was much smaller – approximately 10 kg at the beginning of the 19th century compared with about 75 kg today. In pianos there have since the 18th century been occasional attempts, none lasting, to replace wrest pins with a machine screw mechanism: the end of the string is attached to one end of a threaded pin that passes horizontally through the wrest plank; the pin's other end protrudes and is secured by a nut which is turned with a spanner.

EDWIN M. RIPIN/JOHN KOSTER

Wrest plank [pin block] (Fr. *sommier*; Ger. *Stimmstock*). The massive piece of wood into which the WREST PINS (tuning pins) of a piano, harpsichord, clavichord etc. are driven. In early instruments the wrest plank was made from solid timber, usually oak, walnut or beech. In modern pianos it is usually of cross-laminated maple or beech and is supported by the cast-iron frame that bears the tension imposed by the strings.

EDWIN M. RIPIN/JOHN KOSTER

Wright, Daniel (*fl* London, 1709–35). English music publisher. He was established in London by 1709, and occasionally employed the engraver THOMAS CROSS. He also claimed to be a musical instrument maker, and died or retired about 1735. His son Daniel Wright had a business at different premises from 1730 to about 1735, for a while using a sign which his father had briefly used before him. He probably gave up trading about 1740, and JOHN JOHNSON (ii) may have founded his business on that of the Wrights, as he issued some works from their plates. From about 1730 to 1735 the names of both Wrights appear on some imprints.

Hawkins summed up the character of the elder Wright as a man 'who never printed anything that he did not steal'. While the Wrights were perhaps the most notorious musical pirates of their time, copying numerous publications, especially those of John Walsh, such copying was not illegal. Their publications were copied in turn. They also issued works under the same titles as those of Walsh or very similar ones, including a *British Musical Miscellany*, a *Merry Musician* and a *Monthly Mask of New Songs*. In 1733 the elder Wright published a set of harpsichord lessons by Maurice Greene without permission (a copy is in *GB-Lbl*), provoking an immediate protest from the composer. Their publications included instrumental works by Handel, Vivaldi, Corelli, George Hayden, J.S. Humphries, Loeillet and Robert Valentine, as well as sheet songs, instruction books for the flute and books of dances and airs for the flute or violin including *Aria di Camera: Being a Choice Collection of Scotch, Irish & Welsh Airs* (*c*1730). A list of the elder Wright's publications appeared in his edition of Giulio Taglietti's *Concerti e sinfonie a tre* (*c*1734).

A music seller named Thomas Wright published sheet songs and a number of works around 1732 to 1734 in conjunction with the two Daniel Wrights, to whom no doubt he was related.

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES

Wright, E(lbridge) G. (*b* Ashby, MA, 1 March 1811; *d* Boston, 15 March 1871). American maker of brass instruments. He began his career in Roxbury, Massachusetts, in the late 1830s. In 1841 he moved to Boston and began making valved brass instruments in addition to those with keys. He exhibited a keyed trumpet in the 1841 Massachusetts Charitable Mechanic Association fair. A valve trumpet of his, now in the Smithsonian Institution, is known to date from 1845. He is known to have worked in Lowell, Massachusetts, briefly in 1858 and 1859. Throughout his career a wide variety of valved brass instruments came from his shop and his excellent E♭ keyed bugles brought him considerable fame. Many were made of silver and gold as presentation pieces for famous bandleaders and soloists; the most elaborate of these is a 12-key instrument of solid gold made for D.C. Hall in 1850 (now at the Henry Ford Museum, Dearborn, Michigan).

About 1869 the employees of E.G. Wright and of Graves & Co. amalgamated to form the Boston Musical Instrument Manufactory. Although both Wright and Samuel Graves may have helped to found the new company, neither of them continued with it. For the last two years of his life Wright worked with D.C. Hall and B.F. Quinby. Instruments signed by Wright are found in many collections, notably the John H. Elrod Memorial Collection, Germantown, Maryland; the Smithsonian Institution, Washington, DC; the Museum of Fine Arts, Boston; the Shrine to Music Museum, University of South Dakota; and the Henry Ford Museum.

ROBERT E. ELIASON

Wright, (Frederick) Lawrence (*b* Leicester, 15 Feb 1888; *d* Blackpool, 16 May 1964). British popular music publisher and songwriter. The son of a violin teacher and music stallholder, he performed as a violinist and singer with various concert parties and at the age of 18 set up his own music stall in Leicester. He rapidly built up his business and began publishing songs of his own. In 1911 he moved to London and set up business in Denmark Street, laying the foundations of London's 'Tin Pan Alley'. After World War I he opened demonstration shops in Blackpool and elsewhere to promote new songs, often with elaborate publicity. Before he moved to London he adopted the pseudonym Horatio Nicholls, under which he wrote most of his firm's most successful songs: *Dream of Delight* (1916), *Delilah* (1917), *That Old Fashioned Mother of Mine* (1919), *The Toy Drum Major* (1924), *Babette* (1925), *Among My Souvenirs* (1927), *Shepherd of the Hills* (1927), *Amy* (1930), *When the Guards are on Parade* (1931). He also wrote under other names, including Gene Williams (*Wyoming*, 1920) and Betsy O'Hagan (*Old Father Thames*, 1933). Wright founded the musical weekly *Melody Maker* in 1926, and was a director of the Performing Right Society and president of the National Brass Band Club. After his death his publishing firm, the Lawrence Wright Music Company, was acquired by Northern Songs and later by Associated Television. (E. Rogers and M. Hennessey: *Tin Pan Alley*, London, 1964)

ANDREW LAMB

Wright, Maurice (Willis) (*b* Front Royal, VA, 17 Oct 1949). American composer. He studied composition at Duke University with Iain Hamilton, and at Columbia

University with Jack Beeson, Mario Davidovsky, Charles Dodge and Chou Wen-chung. He taught at Columbia and Boston universities before joining the composition department at Temple University in 1980. His honours include an award from the Guggenheim Foundation and commissions from the Fromm Foundation, the American Brass Quintet, the Emerson String Quartet and the Boston SO, among others. An extremely prolific composer, Wright has a wide range of compositional interests. He has written for both acoustic and electronic instruments, often in combination, as in the Cantata for tenor, percussion and electronic sounds (1975) and the two-act opera *The Trojan Conflict* (1989), in which a quartet of oboe, horn, viola and cello is balanced by four continuously droning synthesizers. Though his early works rely on serial techniques, later music (after 1980) became increasingly lyrical and tonally orientated. Many of his works have been recorded.

WORKS
(*selective list*)

Dramatic: The Fifth String (op, 1, Wright, after J.P. Sousa), 1985; The Trojan Conflict (op, 2), 1989; Dr Franklin (op, 2), 1990; 12 film scores, 1977–95

Vocal: Basilios' Lament (Wright), S, fl, pf, 1976; The Fat Man (V. Thompson), chorus, 1976; loneliness (e.e cummings), 3 S, tpt, vc, pf, 1978; Madrigals, chorus, 1978; Night Watch, S, pf, 1978; Like an Autumn Sky (T. Robbins, W. Shakespeare), chorus, 1980; Missa brevis, chorus, 1980; EARTH SKY SEA TREES BIRDS HOUSE BEASTS FLOWERS (K. Rexoth), high v, pf, 1982

El-ac: Cantata (R. Herrick, 17th-century Eng.), T, perc, elec, 1975; Chbr Sym., pf, elec, 1976; Stellar Frags., elec, 1979; Holding Together, pf, elec, 1981; In Seven Parts, 1981; Marimba Music, mar, elec, 1981; Music for 10 Insts and Elec Sound, 1981; Riverside, fl, cl, vn, va, vc, pf, elec, 1981; Broadcast Sequence with Train Effects, 1982; Set Up Music, perc, elec, 1982; Solos, fl + pic + a fl, elec, 1983; Qt, str qt, cptr, 1987

Principal publishers: Mobart, Merion

Principal recording companies: New World, Smithsonian, CRI

JAMES FREEMAN

Wright, Robert (*b* Daytona Beach, FL, 25 Sept 1914). American composer and lyricist. The first significant phase of Wright's career with co-composer and co-lyricist George Forrest (*b* Brooklyn, NY, 31 July 1915; *d* Miami, 10 Oct 1999), initially begun when both were teenagers, was their employment at the MGM studios in 1936. Over the next six years Wright and Forrest wrote lyrics, adapted music and occasionally composed new music for a series of film adaptations of successful stage musicals (mainly operettas). These included Sigmund Romberg's *Maytime* and Rudolf Friml's *The Firefly* (1937), Victor Herbert's *Sweethearts* (1938), a film musical with Herbert Stothart and George Posford, *Balalaika* (1939), and Richard Rodgers and Lorenz Hart's *I Married an Angel* (1942), also with Stothart. Three songs from their original film musicals received Academy Award nominations. Working from Hollywood, the team launched a second career when they began adapting the music of famous composers into popular staged musicals. The most skilful and popular of these adaptations were *Song of Norway* (1944), a fictional composer biography, and *Kismet* (1953), which used the music of Edvard Grieg and Alexander Borodin, respectively, as the foundation for major theatrical international successes. In contrast to the widespread practice of unacknowledged borrowings by other Broadway composers, Wright and Forrest clearly designated their sources in programmes, published scores and recordings; fittingly, it was Borodin rather than Wright and Forrest who received a Tony award for the Best Score in 1954. Later Broadway musicals adapted from Herbert's *Fortune Teller* (*Gypsy Lady*, 1946) and the music of Heitor Villa-Lobos (*Magdalena*, 1948), Sergey Rachmaninoff (*Anya*, 1965) and Camille Saint-Saëns (*Dumas and Son*, 1967) shared the fate of Wright and Forrest's original musicals and either never left the West Coast or closed out-of-town. *Kean* (1961) did reach Broadway, but quickly failed there. In 1978 *Kismet* returned as *Timbuktu!* with new songs and an African setting for a successful run. Most remarkably, 50 years after their adaptations at MGM studios, *At the Grand*, an original musical which closed in Los Angeles in 1958, was successfully resuscitated as *Grand Hotel* (1989) in a considerably revised version staged by Tommy Tune, with book revisions by Peter Stone and seven new songs by Maury Yeston.

WORKS

all are musicals; unless otherwise stated, dates are those of first New York performance, and music and lyrics with G. Forrest; librettists and lyricists in that order in parentheses

Thank you, Columbus, Los Angeles, Hollywood Playhouse, 15 Nov 1940

GEOFFREY BLOCK

Wright, Thomas (*b* Stockton-on-Tees, 18 Sept 1763; *d* Wycliffe Rectory, nr Barnard Castle, 24 Nov 1829). English musician and inventor. Wright was instructed in music by his father, Robert, by John Garth and, as an articled apprentice, by Thomas Ebdon. On expiration of

his articles about 1784, he succeeded Garth as organist at Sedgefield. In 1794 he married Elizabeth Foxton and set to music her operetta, *Rusticity*. In the 'Advertisement' to his Concerto for Harpsichord or Pianoforte (London, *c*1796), he promoted his invention of a pendulum for keeping musical time as more practicable than the timekeepers of Loulié, Sauveur and others. A model of the invention, owned by Wright's granddaughter, Miss Edith Wright of Wakefield, was seen by Frank Kidson, when compiling his article for *Grove's Dictionary* (3rd edn). In 1797 Wright succeeded his father as organist at Stockton. In 1817 he was organist at Kirkleatham near Redcar; but sometime after he returned to Stockton and remained there as organist, teacher and composer until his death.

JAMIE C. KASSLER

Wright & Wilkinson. English music sellers, printers and publishers, established in London. As Wright & Wilkinson, or Wright & Co., they succeeded Elizabeth Randall and advertised themselves as 'Successors to Mr. Walsh', whose business had passed to her through her husband WILLIAM RANDALL (ii). From February 1785 to 1803 the firm was known by the name of H. Wright, standing for Hermond or Harman Wright. It is chiefly notable for the reissue of many of Handel's works from the Walsh plates, and for the first publication in full score of a number of his oratorios, including *Belshazzar* (*c*1784), *Joseph* (*c*1785), *The Occasional Oratorio* (1784) and *Solomon* (*c*1788). After Wright ceased business his entire stock of plates was purchased by PRESTON & SON. (*Humphries-SmithMP*)

WILLIAM C. SMITH/PETER WARD JONES

Wrocław (Ger. Breslau). City in Poland, capital of the Duchy of Silesia in the 12th century. It was under Habsburg rule from 1526 to 1742, when it became part of Prussia; after World War II it became part of Poland.

1. To 1526. 2. Under Habsburg sovereignty (1526–1742). 3. Under Prussian rule (1742–1945). 4. Since 1945.

1. TO 1526. German settlement of the area, beginning around 1150, brought in foreign religious orders. The Premonstratensians from France used Roman plainchant, while the cathedral chapter and civic parish churches used Germanic chant. The oldest surviving fragment of music in German neumatic notation, the antiphon *Duo homines ascenderunt*, of the Augustines of the Sandkirche, dates from the early 13th century. Chants were composed for the canonization of St Hedwig (1242); the sequences and cantica of Bishop Konrad I (1427–47) have been lost.

After destruction during the Tartar invasion of 1241, the town was rebuilt on a large scale in a new location, and in 1261 it received the status of a city in line with Magdeburg Civic Law. Under Duke Heinrich IV (1252/3–90), who was brought up in Prague, it became the most easterly outpost of late German Minnesang: the Manessische Manuscript contains two compositions by the duke. Tannhäuser, in Lay VI, praised the court of Breslau's hospitality to singers, and around 1311 Frauenlob (Heinrich von Meissen) looked back reminiscently at the city of the Minnesingers in his Proverb 135.

The churches practised organum on great festival days only. In 1327 Breslau seems to have become familiar with the polyphony of the Ars Nova through Machaut, who may have spent some time at the Prague court. In the treaty of Trenčín in 1335 Poland relinquished all claims to Silesia and Breslau 'for ever and always', ceding them to the crown of Bohemia.

The cathedral had an organ as early as the 14th century; a little later the other churches had organs too. 15th-century fragments of organ tablatures from the Dominican monastery, described as 'fundamenta' and 'tenores', indicate clausula setting. Outstanding among the organ builders of Breslau was Stephan Kaschendorff (*c*1425–99), who, besides building new organs for the churches of St Maria Magdalena and St Elisabeth, constructed fine instruments in Nuremberg, Nördlingen and Erfurt.

Around 1500 polyphony was performed, along lines suggested by Codex Mf.2016, from a Sudeten German monastery, which came to Breslau at the time of secularization in 1812. Figural music at Breslau Cathedral reached its first peak with the priest and musician Thomas Stoltzer from Schweidnitz (*c*1470–1526), who had a benefice at St Elisabeth and was *vicarius discontinuus* at the cathedral on great festival days, exercising the function of a Kapellmeister and surely performing works of his own. After 1510 he became known as a composer far beyond his native region. The majority of his mass Propers and four *alternatim* settings of the Ordinary (without Credo) were written for Breslau.

2. UNDER HABSBURG SOVEREIGNTY (1526–1742). In accordance with the Treaty of Succession, Bohemia (with Silesia) and Hungary passed to Austria on the death of King Ludwig II at the Battle of Mohács. By 1523 the majority of the citizens of Breslau had become Lutheran; only the cathedral chapter remained Catholic. At Protestant services late Netherlandish, Italian and German motets with Latin texts continued to be favoured at first; the *alternatim* mass was also retained. The first Breslauer Gesangbuch was printed in 1525 by Adam Dyon; it largely corresponds to Maler's Erfurt *Enchiridion*. In 1555 Valentin Triller published the *Schlesich Singebüchlein* in Breslau, containing German sacred songs in two or three parts. In 1575 Johann Knöfel dedicated his *Cantus choralis* to Breslau city council; this work contained polyphonic settings of the Ordinary and Proper, with a view to ending the progressive disuse into which the Latin liturgy was falling in Protestant services. At the Hieronymus Hospital, and while seriously ill, Gregor Lange (*c*1540–87) composed most of his expressive motets and songs in the style of Lassus; Simon Lyra (1546–1601), cantor of St Elisabeth, also wrote works in the tradition of Lassus. Samuel Besler (1574–1625), who dedicated his settings of sacred songs to the education of the young, was already clearly breaking away from rigid psalmody in his four choral Passions.

While Catholic music at the cathedral went through a period of stagnation in the 17th century, Protestant music followed Italian models in the work of, for instance, the music publisher Ambrosius Profe (1589–1661) and Daniel Sartorius, with his collection of some 400 printed monodic settings of the mass. The printed motets of Tobias Zeutschner (1621–75) were highly esteemed in Germany and Sweden; his version of the Christmas story (1660) seems to be the first German example in the concertato

style before Schütz, who himself had visited Breslau in the retinue of the Elector of Saxony in 1621, and given evidence of his art in two motets especially written for the city.

The Venetian polychoral style is reflected in Sebastian Lemle's 37 polyphonic concertos and the concerto for five choirs *Frischauf, jetzt ist des Singens Zeit* by the Thuringian Johannes Phengius, written for St Elisabeth. Another very prolific composer was Martin Meyer (*c*1643–1709), organist of St Bernhardin; at least 84 of his polyphonic works are extant, among which *Auf Mein Psalter und Harfenspiel* for 50 voices was commissioned by the merchant Friedrich Chremnitz in 1668 to be performed annually. On a more modest scale were the cantatas of Georg Hoffmann (1700–80), in the manner of Telemann. The choral cantatas, keyboard concertos and 24 keyboard preludes and fugues by Georg Gebel (i) (1685–*c*1750) have unfortunately been lost. The mystic poet Angelus Silesius of Breslau also contributed much to Silesian sacred song in its heyday.

Breslau's golden age of organ building began around 1700. Adam Orazio Casparini (1676–1745), son of the famous Eugen Casparini of Sorau, was much in demand as 'architect of organs'. Ignatius Mentzel (*c*1670–1730) was equally energetic and built four outstanding organs in Breslau, besides others. Michael Engler (1688–1760) built the organ of St Elisabeth with its 56 stops.

Several lutenists born in Breslau achieved international recognition in western Germany, especially Silvius Leopold Weiss (1686–1750), whose brother Johann Sigismund was also a well known lutenist at the court of Mannheim. We owe the last German treatise on lute playing, published in Nuremberg in 1727, to Ernst Gottlieb Baron (1696–1760) of Breslau, a pupil of S.L. Weiss. He ended his career as a chamber musician at the court of Frederick the Great.

3. Under Prussian rule (1742–1945). Music at the cathedral had declined until the chapter finally appointed a professional musician who was also a prolific composer to the post of Kapellmeister in 1735: Johann Georg Clement. From 1805 this important position was occupied uninterruptedly until 1945 by Silesians: Joseph Ignaz Schnabel, Bernhard Hahn, Moritz Brosig, Adolf Greulich, Max Filke, Siegfried Cichy and Paul Blaschke, among whom Schnabel, Brosig and Cichy were outstanding composers. All the Kapellmeister wrote masses with orchestral accompaniment, among other liturgical works, in the Bohemian and Austrian tradition to which they still felt they belonged.

Protestant music suffered a perceptible decline in the 18th century. Around and after 1800 Friedrich Wilhelm Berner, organist of St Elisabeth, wrote motets, cantatas and organ concertos, while Gottlieb Siegert (1789–1868) encouraged choral music by founding a Singverein and performing oratorios. An ecumenical Royal Academic Institute for Church Music at the university was beneficial to young talent.

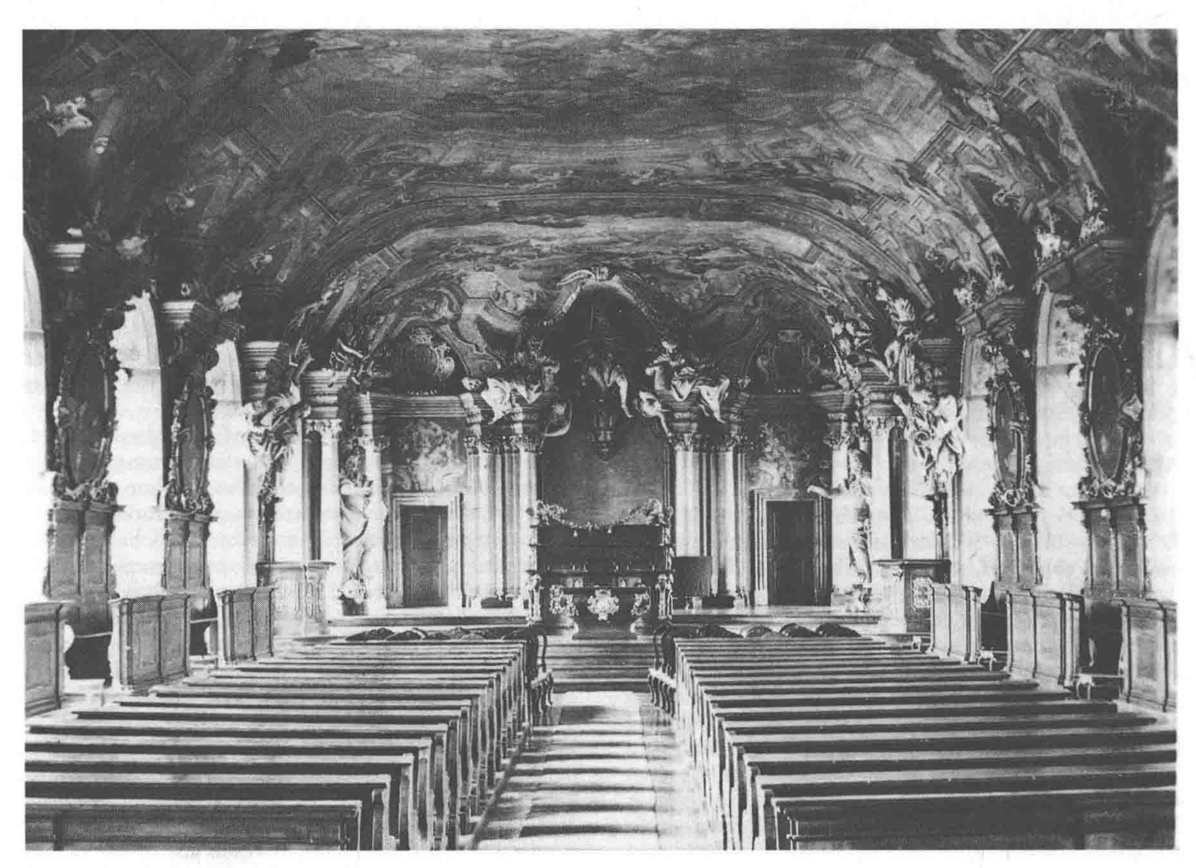
Organ music remained the domain of the Protestant churches. Following Berner, whose playing Mendelssohn admired, the organist and composer Adolf Friedrich Hesse (1809–63) was regarded as one of the major German virtuosos, and the tradition remained a lively one in Breslau until 1945. Johannes Piersig, organist of St Elisabeth, was still organizing the Breslau Organ Festival from 1942 to 1944, and directed the Heinrich Schütz Festival in 1944. Gerhard Zeggert gave 430 organ recitals at St Maria Magdalena over several decades, and the Protestant churches made a crucial contribution to the revival of early music, with many performances of great choral works of the past.

The last important individual organ builder in Breslau was Christian Benjamin Müller (*c*1769–1847); after 1860 organ building increasingly became a matter of industrial manufacture. Müller completed the cathedral organ with its 60 stops in 1805 and the organ of the church of the Eleven Thousand Virgins in 1825. His son Moritz Robert (1803–63) built the small but outstanding instrument in the music hall of the university in 1833. The Frankfurt an der Oder firm of Sauer constructed the spectacular giant organ in the Breslau Jahrhunderthalle (now the Hala Ludowa) in 1913.

The civic musical life of Breslau developed only gradually from 1754 onwards. Franz Beinlich performed oratorios by Dittersdorf and Handel, but it was not until 1787 that Johann Adam Hiller, appointed from Leipzig as music director, continued these efforts. Hoping to cultivate suitable audiences, he organized 16 concerts of German and Italian vocal works and then gave Handel's *Messiah* its first Breslau performance, with 250 amateurs. When he was appointed Kantor of the Thomaskirche in Leipzig, musical life in Breslau disintegrated, but when Schnabel (1767–1831) became cathedral Kapellmeister he succeeded in concentrating the forces available and setting up a permanent orchestra. He was very much of the classical Viennese school as a conductor and was a Beethoven enthusiast; he organized and conducted some 1100 concerts. In 1819 Spohr wrote in his memoirs that many virtuosos visited Breslau, and concerts were given there almost every weekday. In 1822 students at the university founded the Musikverein, and the first Liedertafel was founded in 1823, soon to be followed by many other male-voice choral societies. In 1825, following the example of Carl Friedrich Zelter in Berlin, Johann Theodor Mosewius founded the Singakademie, and a year after Mendelssohn had revived Bach's *St Matthew Passion* in Berlin Mosewius performed the work in Breslau. A society to promote orchestral music in the city, the Orchesterverein, was founded in 1862 and was privately financed; it played a leading part in Silesia and in the 20th century became the state Silesian PO. Brahms conducted the orchestra several times, and the university gave him an honorary doctorate in 1881.

Breslau was well known for opera as early as 1725–34, a period when a 'company of Italian virtuosos' under Antonio Bioni, supported by the Prince Bishop of Breslau and the Catholic nobility, performed 42 works, most of them pastiches or compositions by Bioni himself. An ideological and sectarian quarrel between the middle classes and the nobility led to the dissolution of this company. At the end of the 18th century Hiller and various touring troupes staged Singspiele and operas by Dittersdorf and Mozart. In 1798 a limited liability company was set up to found a theatre, and the young Weber was conductor of the opera from 1804 to 1806. His successor Gottlob Benedict Bierey, an experienced man of the theatre, directed the company from 1808 to 1828; he composed some 30 operas and Singspiele. Eugen Seidelmann gave the Breslau opera a name for its productions of Mozart and Wagner during the period 1830–64. In 1878 the civic theatre passed into the public

domain. In the 20th century the theatre specialized in the works of Richard Strauss, and performed many modern operas between 1924 and 1933.



Musical education in Breslau flourished from the 19th century onwards. With the transfer of the university of Frankfurt an der Oder (the Viadrina) to Breslau in 1811 (a Jesuit college of theology and philosophy, the Leopoldina, had existed since 1702), the city gained new status. The faculty of music was set up in 1909, and later an Institute for School and Church Music was added. The Silesian Conservatory, privately founded in 1880 by Adolf Fischer, became a state institution in the 20th century but was never raised to the status of Musikhochschule.

The long tradition of music printing was continued by the houses of Korn and of Julius Hainauer, which issued over 6000 titles by German and Polish musicians between 1852 and 1939. In the two decades leading up to 1945 the composers Hermann Buchal and Gerhard Strecke, both of them teachers at the conservatory, were active in Breslau; many Jewish musicians also came from the city, including Julius Stern, Salomon Jadassohn, Georg Henschel, Moritz Moszkowski and Otto Klemperer.

4. SINCE 1945. Musical life resumed soon after the war: the first orchestral concert took place on 25 June 1945, and the first opera, a ceremonial presentation of *Halka*, on 8 September. The opera performance was organized by Stanisław Drabik and Stefan Syryłło and featured Franciszka Płat in the title role. Syryłło remained in charge of the orchestra, which from 1949 onwards appeared principally with the opera, nationalized that year as the Opera Dolnośląska (Lower Silesian Opera). The opera has established and maintained a broad repertory of international and Polish works, the latter including operas and ballets by Władysław Żeleński, Paderewski, Feliks Nowowiejski, Ludomir Różycki, Tadeusz Szeligowski, Adam Świerzyński, Krzysztof Baculewski, Zbigniew Bargielski, Henryk Czyż, Juliusz Łuciuk and Witold Rudziński. It has also given festivals devoted to Polish opera and ballet or to Moniuszko in particular. In 1955 a second musical theatre, the Operetka Dolnośląska (Lower Silesian Operetta), was founded.

With the orchestra devoted to the opera, concert life became the milieu of the radio orchestra (active until 1957) and the Wrocław SO, founded in 1954 and renamed the State Philharmonia in 1958. Conductors of this orchestra have included Adam Kopyciński, Włodzimierz Ormicki, Andrzej Markowski, Tadeusz Strugała and Marek Pijavowski. Concerts at first were given in the auditoria of the polytechnic and the university and at the radio; then in 1968 a new Philharmonic Hall was opened, the first programme including short pieces written for the occasion by Szabelski, Górecki and Tadeusz Natanson.

Other ensembles active in the city include Leopoldinum, a chamber orchestra directed by Jan Stanienda, the Philharmonic string quartet Amadeus and two groups specializing in early music: Altri Stromenti, led by Andrzej Kosendziak, and the Collegio di Musica Sacra, under the direction of Marta Kierska-Witczak. Among choirs, that of Wrocław Radio was active from 1949 under Edmund

Interior of the Leopoldina Hall at Wrocław University

Kajdasz and Stanisław Krukowski and was replaced by the Philharmonic choir in oratorio performances. Kajdasz also formed a group for Renaissance and Baroque music, the Cantores Minores Wratislavienses.

The city has five music festivals. Musica Polonica Nova (previously the Festival of Contemporary Music) was started in 1962 as a festival for regional composers but was expanded in 1964 to include all Poles and became complementary to the Warsaw Autumn. The Days of Organ Music began in 1964 (renamed in 1969 Days of Organ and Harpsichord Music) and the choral festival Wratislavia Cantans in 1966. There are also two festivals for young musicians: Jazz on the Odra (founded 1964) and the Days of Old Masters (1967). Festival concerts are held in the Philharmonic Hall, the Grand Studio of Polish Radio, the richly decorated Baroque Leopoldina Hall at the university (see illustration), the Gothic town hall, the hall of the Silesian Museum, the partly ruined Romanesque hall at the Museum of Architecture and the city's churches, especially St Elisabeth and the cathedral.

An Institute of Musicology was founded at the university in 1948 under the direction of Hieronim Feicht, who was also made first rector of the newly founded State Higher School of Music in 1949. The latter institution became the Academy of Music in 1981. There are also music schools at primary and secondary levels. The Lower Silesia Musical Society, founded in 1946, contributes much to the organization of music schools in and around the city. A Franz Liszt Society was set up in 1989 and administers piano competitions.

LOTHAR HOFFMANN-ERBRECHT (1–3), ADAM NEUER/ BARBARA PRZYBYSZEWSKA-JARMNSKA (4)

Wroński, Adam (*b* Kraków, 1850 or 1851; *d* Krynica, 17 Dec 1915). Polish violinist, conductor and composer. He was educated at the music school of the Kraków Technical Institute, studying the violin with Ignacy Wójcikiewicz, theory and wind instruments with Piotr Studziński, and the piano with Józef Blaschke. Later, he studied at the Vienna Conservatory. While serving in the Austrian army Wroński played the violin in the orchestra of the 70th Infantry Regiment under the direction of Michał Zimmermann, from whom he learned much about the craft of instrumentation. He soon became assistant conductor, and in 1867 he went with the orchestra to the Paris Exposition Universelle, where they won first prize. For several years he was musical director of the band of the 40th Infantry Regiment, from which, with great effort, he was able to create a full symphony orchestra. The latter had a great impact on the musical culture of Kraków, promoting important works and becoming part of the Old Theatre (Teatr Stary), where it accompanied performances and played during the entr'actes (under the direction of S. Koźmian). The orchestra also collaborated with the Kraków operetta (under the direction of K. Hofman), and stimulated the amateur musical scene. In 1875, following

the example of the Strauss family in Vienna, Wroński organized his own orchestra in the spa town of Krynica, and directed the ensemble for some 40 years. As its soloist and conductor, he wrote about 180 dances, numerous arrangements and small symphonic pieces for the orchestra. When the 40th Infantry Regiment relocated from Kraków to Rzeszów, Wroński established a city orchestra in Kraków (probably inspired by W. Żeleński), becoming its director in 1882. After its sudden disbanding in 1885 by the Austrian administration of Galicia, he devoted himself to teaching and to playing in a string quartet. In 1886 he moved to Kołomyja as director of the Music Society named after Stanisław Moniuszko, at the same time being engaged in the running of a symphony orchestra and teaching music. From 1897 he worked as conductor of the theatre orchestra at Lemberg, and after 1900 he was head of the music school of the Music Society in Sambor. In 1907 he returned to Kraków briefly in order to direct both the orchestra of the Harmonia Society of Friends of Music and their music school, and in 1908 he was back in Lemberg conducting operettas. Later he directed the Music Society of Stryj.

Wroński's dance music contained a strong folk and Slavonic flavour. Known as the 'Polish Strauss', he composed with ease and was a born melodist. Among about 250 compositions are overtures and fantasies for orchestra; dances for orchestra, piano and other ensembles, which are mostly waltzes (the waltz 'On the Waves of the Vistula' ran to 50 editions), but also including gallops, mazurs, polonaises and marches (for example, the 'Sokołów March' op.92); miniatures for violin and piano (for example, the *Elegy* op.34, and *Kołysanka* ('Lullaby') op.171); theatre music; solo and choral songs. Particularly well regarded were his collections of national songs in various arrangements, and his krakowiak dances *Z nad Wisły* ('From the Vistula'), which won a prize in 1904 at the K. Lubomirski composition competition, are still performed by wind orchestras. A large collection of Wroński's works can be found in the Biblioteka Jagiellonska, Kraków.

BARBARA CHMARA-ŻACZKIEWICZ

Wu Dinglian [Wu Ting-Lien] (*b* Tainan, 3 Dec 1950). Taiwanese composer. He holds degrees in composition from Dongwu University, Taiwan (BA 1981), Northern Illinois University (MM 1982) and UCLA (PhD 1987); his teachers have included Shi Weiliang, Ma Shuilong, Paul O. Steg, Elaine Barkin, Paul Reale, Gilbert Reaney and Roy Travis. Upon his return to Taiwan he was appointed professor of composition at Jiaotong Daxue in 1988 where he was responsible for establishing Taiwan's first computer music studio. Wu's compositional influences and techniques range widely from Chinese poetry (*Qiusi*, 1982) and philosophy (*Ji*, 1991) to pitch-set theory (*Wuyue de fanxiang*, 1984) and electronically produced sound (*Dongzhong zhi jing, jingzhong zhi dong*, 'Calm in Movement and Movement in Calm', 1990). Oxymoronic titles such as this and *Wuzhijin de pianke*, 'The Unending Moment' (1990–92) are examples of the conjunction of polarities evident in many of Wu's pieces. A characteristic example is his juxtaposition of long sustained sounds with tremolos and harsh percussive attacks.

WORKS

BARBARA MITTLER

Wührer, Friedrich (*b* Vienna, 29 June 1900; *d* Mannheim, 27 Dec 1975). Austrian pianist and teacher. At the Vienna Music Academy (1915–20) he studied the piano with Franz Schmidt, music theory and composition with Joseph Marx, and conducting with Ferdinand Löwe. He also studied law and musicology at the University of Vienna. In 1923 he began to tour as a concert pianist. He was also a much sought-after and influential piano teacher, at the Vienna Music Academy (1922–32, 1939–45), the Mannheim Musikhochschule (1934–6, 1952–8), Kiel (1936–9), the Salzburg Mozarteum (1948–51) and Munich (1955–68). He had a special interest in the Viennese Classical and German Romantic and late-Romantic composers, and performed and published his own two-hand arrangements of all Schmidt's works that had been written

originally for the one-armed pianist Paul Wittgenstein. Between 1923 and 1928, as a founder-member of the Austrian section of the ISCM, he performed many works by contemporary composers. His many recordings (including the first complete set of Schubert's sonatas) testify to a style of playing that combines clear articulation with warmth of expression. Wührer composed piano works, string quartets and songs, as well as cadenzas for Mozart concertos; he wrote *Meisterwerke der Klaviermusik* (Wilhelmshaven, 1965).

RUDOLF KLEIN/MARTIN ELSTE

Wuiet [Vuiet], **Caroline** [Auffdiener, Baronne] (*b* 1766; *d* 1835). French author and composer. The daughter of an organist in Rambouillet, she was trained as a pianist and later obtained patronage from Marie-Antoinette. She studied with Beaumarchais and Greuze, and took composition lessons from Grétry. Two of his later letters to her survive (Froidcourt). Her *L'heureuse erreur* (1786) was intended as a sequel to Grétry and Desforges' *L'épreuve villageoise* (1784) and was rehearsed with orchestra at the Comédie-Italienne, but not voted for public performance. At the Revolution she was arrested, but fled to Holland and then England.

During the Directory, Wuiet returned to fashionable Paris society and was the editor of several short-lived papers. In about 1807 she married one Colonel Auffdiener and lived with him in Lisbon, where he was posted. On the defeat of the French armies they returned to France but lived separately, and Wuiet continued to write both music and fiction. Her literary works include the three-act *opéra Zéphire et Flore* (Brussels, 1784), the *comédies Angélina* (1782) and *Sophie* (1787), and *Esope au bal de l'Opéra, ou Tout Paris en miniature* (Paris, 1802).

WORKS

L'heureuse erreur (oc), rehearsed, Paris, Comédie-Italienne, Feb 1786

L'heureux stratagème, ou Le vol supposé (opéra bouffon, 1, G. Saulnier), Paris, Théâtre des Beaujolais, 19 Aug 1786; ov. arr. for kbd, vn obbl, n.d.

6 romances (Paris, 1798); 6 romances, *F-Pc*; Comme elle était jolie, romance; Moi, j'aime la danse, chansonette; 3 sonatas, kbd, vn, b, op.1 (Paris, 1785); Potpourri, pf, op.2 (Paris, n.d.); arrs. for kbd, vn obbl of ovs. to Sacchini: L'amore soldato (Paris, *c*1779) and Anfossi: Le mari insolent, n.d.

DAVID CHARLTON

Wu Jinglue (*b* 1907; *d* 1987). Chinese *qin* zither master. Brought up in Changshu city, Jiangsu province, he first learnt to play the *pipa* lute, *xiao* flute and other instruments of the local *sizhu* (silk-and-bamboo) ensemble music. Around 1930 he began to devote himself to *qin* music, learning from various masters. In 1936 he took part in the founding of the Jin Yu qinshe (Qin Society of Contemporary Yu Region), becoming one of its leaders from 1939. After the founding of the People's Republic of China, he was appointed a teacher and researcher in the Central Conservatory of Beijing in 1956, directing a number of students who subsequently became noted performers and scholars. Apart from transmitting the traditional repertory, he took part in the *dapu* movement to interpret early scores of pieces whose performing tradition had been lost, as well as composing some new pieces such as *Shengli cao* ('Victory march'), which incorporated elements from folk music. Wu was also a maker and restorer of *qin* and experimented with the manufacture of silk and metal strings.

Wu's playing remained largely traditional; he was acclaimed for his 'elegant and pleasing' style. He performed widely and made recordings of many favourite *qin* pieces, such as *Xiaoxiang shuiyun* ('Mist and Cloud over Xiao and Xiang Rivers'), *Wuye wu qiufeng* ('Wutong Leaves Dancing in Autumn Wind') and *Pu'an zhou* ('Incantation of Pu'an').

JOSEPH S.C. LAM

Wulf, Jan (*b* Orneta, 1735; *d* Oliwa, 11 March 1807). Polish organ builder. He was the son of 'Wulf of Orneta' (probably 'Wulf of Malbork', who worked on the organ in Pelplin Cathedral as the assistant of Daniel Nitrowski at various times between 1674 and 1680). In 1758 Wulf went to Danzig; Abbot J. Rybiński of the Cistercian monastery in Oliwa sent him to north Germany and the Netherlands for three years for further training. On his return Wulf built the little organ (of which the case still exists) in the monastery church; on 22 January 1763 he entered the order (as Father Michael) and began work on the large organ. In 1776 he was ordained and in 1778 stopped work on the instrument, which was completed between 1791 and 1793 by F. Dalitz of Danzig. Before its renovation (1934–5), the organ had 83 stops on three manuals and pedal, including 49 foundation stops, 24 mixtures and mutations and ten reeds; it was three-quarters of a tone above modern concert pitch. The instrument was the largest old organ in Poland and represented a synthesis of southern and northern Polish styles.

HANS KLOTZ

Wulfstan [Wulstan, Wolstan] **of Winchester** (*fl* 992–6). English versifier, music theorist and most probably composer. He is not to be confused with the homilist

Wulfstan of York, who was Bishop of London (996–1002), Bishop of Worcester (1002–16), and Archbishop of York (1003–23). Often referred to as 'the cantor' in his lifetime and describing himself as the 'least servant of English hymn singers', Wulfstan was the precentor at Winchester's Old Minster in the years before, and perhaps after, the turn of the millennium. John Leland (?1506–52) claimed that Wulfstan was chosen precentor by his fellow monks because of his 'thoroughly melodious voice and consummate skill in singing'. According to his own testimony, Wulfstan was a pupil of St Ethelwold, Bishop of Winchester (963–84). He died on July 22 (*GB-Lbl* Cotton Titus D.xxvii, f.6*r*), but the year is not known.

Wulfstan's name appears as an acrostic in the preface to his *Brevilioquium de omnibus sanctis*, a versification of a Carolingian sermon on All Saints. He is universally accepted as the author of the *Narratio metrica de S. Swithuno* (a versification of the *Translatio et miracula S. Swithuni* of Lantfred of Winchester) and a prose *Vita S. Aethelwoldi*. The dedication of the former to Bishop Elfheah (Alphege) of Winchester (984–1005) contains a justly famous hyperbolic description of the organ of Winchester (see McKinnon). Wulfstan's music theory treatise, *Brevilioquium super musicam*, is known only through a few citations in two 15th-century manuscripts of an anonymous commentary on Boethius's *De institutione musica* (*GB-Ob* Bod.77 and *Oas* 90). The *Brevilioquium* must be identical with Wulfstan's 'work on the harmony of tones' mentioned by William of Malmesbury (*c*1090–*c*1143) in his *Gesta regum Anglorum*. No liturgical music has survived that bears a medieval attribution to Wulfstan. Nevertheless, there is good reason to think he is the author of three hymns (*Alma lucerna micat*, *Inclitus pastor* and *Caeli senator inclite*) and two introit tropes (*Patris adest votiva* and *Praesul Aethelwoldus*) for St Ethelwold, a hymn (*Agmina sacra poli*) for St Birin, and a hymn (*Aurea lux patriae*) for St Swithun contained in Orderic Vitalis's (1075–*c*1142) manuscript of the *Vita S. Aethelwoldi* (*F-AL* 14). A number of hymns, tropes, and proses, both for the commemoration of Winchester saints and for other feasts (in *GB-DRc* B.III.32, *Lbl* Roy.15.C.vii, *Lbl* Cotton Nero E.i, *F-R* 1385 (U.107), *GB-Cu* Gg.5.35, *Ccc* 473 and *Ob* Bod.775) may well have been composed by Wulfstan. Lapidge and Winterbottom have pointed to linguistic features of *Aula superna poli reboat* (a hymn for All Saints), *Ecce dies venerandus* (an introit trope for St Just), *Omnibus expletis fuerat* (an offertory verse trope for the Dedication of a Church), and *Gaudens christi* (a prose for St Swithun) that link the pieces to poetry accepted as Wulfstan's, but they do not explicitly attribute any tropes or proses to Wulfstan. Holschneider has argued convincingly that Wulfstan was the composer of the main corpus of *voces organalis* to various genres of chant contained in *GB-Ccc* 473 (ff.135*r*–155*r*, 163*r*–189*v*). The traditional dating of this manuscript to the end of the 10th century led Planchart to conjecture plausibly that Wulfstan may have been one of its scribes, but this dating has since been questioned (see Hiley).

ELIZABETH C. TEVIOTDALE

Wüllner, Franz (*b* Münster, 28 Jan 1832; *d* Braunfels, 7 Sept 1902). German conductor, pianist and composer, father of Ludwig Wüllner. From an early age he studied the violin and the piano and composed music. His father was a distinguished philologist who was director of the Düsseldorf Gymnasium; when he died in 1842 the family moved to Münster, where Franz studied the piano and composition with Carl Arnold; from 1846 to 1850 he studied with Anton Schindler in Münster and Frankfurt. From 1850 to 1854 he went on concert tours, playing Beethoven's late sonatas, and completed his studies, visiting Berlin, Brussels, Cologne and Leipzig and meeting many of the important musicians of his day. A lifelong friendship linked him with Brahms from 1853. From 1856 he taught the piano at the music school in Munich before being made music director of Aachen in 1858. He returned to Munich in 1865 as court music director of the church choir ('Vokalkapelle'), and from 1867 he was on the staff of the music school, where he directed the choral and orchestral classes. He became principal Kapellmeister of the court opera in 1871, after his success as conductor of the first performances of *Das Rheingold* (1869) and *Die Walküre* (1870). In 1877 he succeeded Julius Rietz as director of the Dresden Conservatory. Because of increasing difficulties and intrigues, which had forced him to relinquish his direction of the opera to Ernst von Schuch and to supervise the church music and share the direction of court concerts, he left Dresden in 1883 to conduct concerts of the Berlin PO. In 1884 he succeeded Ferdinand Hiller as director of the Cologne Conservatory and conductor of the Gürzenich concerts. He was awarded an honorary doctorate from the University of Munich in 1877.

Although Wüllner is chiefly remembered as a conductor his musical achievements are many-faceted. His compositions – most of them unpublished – show that Wüllner was a prominent representative of the Mendelssohn tradition and Berlin academicism. They include the cantata *Heinrich der Finkler*, works for soloists and orchestra such as *Die Flucht der heiligen Familie*, sacred and secular choral music, songs, chamber music and piano pieces. He also composed a recitative arrangement of the dialogue of Weber's *Oberon* for the 1881 production in Vienna, and published several volumes of choral settings of German folksongs. His *Chorübungen der Münchener Musikschule* (Munich, 1876) appeared in several editions and was translated into English in 1882.

GAYNOR G. JONES/BERND WIECHERT

Wüllner, Ludwig (*b* Münster, 19 Aug 1858; *d* Kiel, 19 March 1938). German baritone, reciter and actor, son of Franz Wüllner. He studied the violin and the piano at an early age and sang at the Maximilian Gymnasium in Munich. From 1876 to 1880 he studied German philology at the universities of Munich and Berlin and in 1881 he completed his dissertation, *Das hrabanische Glossar und die ältesten bayrischen Sprachdenkmäler*, at the University of Strasbourg. After further study in Berlin, he lectured at the Münster Academy and performed as a violinist, singer and reciter. He left Münster in 1887 for extended studies in singing (with Benno Stolzenberg), composition and piano at the conservatory in Cologne, where he also became a choir conductor. After two years he left Cologne for Meiningen; there he joined the court theatre company as an actor. Several successful concerts in Berlin in 1895–6 established Wüllner's reputation as a lieder singer. He was also very successful in operatic parts, particularly in the title role of Wagner's *Tannhäuser*. In 1900 he studied singing with Georg Armin in Leipzig and his voice production greatly improved (he had suffered from a speech impediment); he then embarked on a singing tour of England, the Netherlands, France, Scandinavia and Russia. His tours of the USA in 1908 and 1909–10 were highly successful; during the latter he appeared as a soloist with Mahler in New York and as a singer and reciter at the Manhattan Opera.

Called by his countrymen the 'Kammersänger des deutschen Volkes', Wüllner was a musician of remarkable versatility; during World War I he acted and recited and occasionally played the violin and conducted orchestral concerts. As a singer and reciter he was admired for the evocative intensity of his performances, and his success on the stage was due largely to his powers of declamation and inflection. Wüllner's speaking voice is preserved in a recording of some of his recitations.

GAYNOR G. JONES/BERND WIECHERT

Wullur, Sinta (*b* Bandung, Java, 16 Nov 1958). Indonesian composer, active in the Netherlands. At the age of ten she moved with her family to the Netherlands. Wullur finished her piano studies at the Sweelinck Conservatory in Amsterdam in 1971; in 1984 she returned there to study composition with Leeuw. In 1988 she undertook further composition studies with Andriessen and Loevendie at the conservatory in The Hague. Wullur's works often use the aesthetics and sound elements of gamelan music, for example in *Ganantara* (1988) for gamelan ensemble. She has made great efforts to discover the individual character of each gamelan instrument, blending her background in Western classical composition techniques with her experience of playing gamelan music. In 1985 Wullur set up Irama, a Balinese gamelan ensemble which performs *wayang kulit* (shadow puppet theatre). Since commissioning a gamelan tuned to a chromatic scale in 1995, she has written many works for chromatic gamelan ensemble including *Lingkaran* (1995) with percussion, and *Ballade* and *Tapestry* (1996) with string quartet. Settled in the Netherlands, she returns periodically to Indonesia to study traditional Javanese and Sundanese music and to perform her compositions.

FRANKI RADEN

Wummer, John (*b* Reading, PA, 31 Dec 1899; *d* San Francisco, 6 Sept 1977). American flautist. He began studying the violin at the age of nine and took up the flute at 15, learning first with André Maquarre, then with Georges Barrère. In 1924 he joined the Detroit SO and remained there until 1937, when Toscanini invited him to join the NBC SO at its inception. From 1942 until he retired in 1965 he was principal flautist with the New York PO. He was uncommonly active as a chamber musician, playing with the Busch Chamber Players and the Budapest String Quartet, the New Friends of Music and other ensembles. He was on the faculty of both Columbia University and the Mannes College of Music. Although best known for his skill in the standard orchestral repertory, he gave first performances of several works, including Boris Koutzen's *Morning Music*.

GEORGE GELLES

Wunderlich, Fritz (*b* Kusel, Rheinland-Pfalz, 26 Sept 1930; *d* Heidelberg, 17 Sept 1966). German tenor. During his short career Wunderlich was Germany's leading lyric tenor. He studied at the Freiburg Musikhochschule, sang Tamino there in 1954, and was engaged by the Stuttgart Opera in 1955, making his début (apart from some appearances in small parts) in the same role. In 1958 he joined the Frankfurt company, and at the Salzburg Festival in 1959 he sang Henry in Strauss's *Die schweigsame Frau*, conducted by Böhm. In 1960 he joined the Staatsoper in Munich and from 1962 also spent part of the year with the Vienna Staatsoper.

Wunderlich's voice was well formed, clear and firm of timbre; his style was unaffected, manly and sensitive. At the time of his death from a fall, Rodolfo in *La bohème* and Wagnerian roles were on the horizon. His singing of Mozart was internationally famous: he sang Don Ottavio at Covent Garden in 1965 (his only appearance there), while his ardent, lyrical Tamino and Belmonte can be heard on the recordings with Böhm and Jochum. In Munich he also undertook such parts as Alfredo and Lensky, and in Vienna the title role in *Palestrina*. He created the role of Tiresias in Orff's *Oedipus der Tyrann* (1959, Stuttgart) and of Christophh in Egk's *Die Verlobung in San Domingo* (1963, Munich). His last appearance was as Tamino during the Stuttgart Opera's visit to the Edinburgh Festival; a Metropolitan début, as Don Ottavio, was planned for October 1966. Wunderlich was also an admired Bach singer, excelling as the Evangelist in both the Passions, and brought a unique sensuousness and youthful fervour to the tenor solos in *Das Lied von der Erde*, as revealed in the famous recording with

Klemperer. He came to lieder relatively late in his short career, but was in demand as a recitalist at the Salzburg Festival and elsewhere, and left unaffected, immaculately sung recordings of *Die schöne Müllerin* and *Dichterliebe*.

ANDREW PORTER/RICHARD WIGMORE

Wunderlich, Heinz (*b* Leipzig, 25 April 1919). German organist, church musician and composer. He studied the organ with Karl Straube and composition with Johann Nepomuk David at the Leipzig Hochschule für Musik (1935–41). In 1943 he gained a teaching post at the Halle School of Church Music. When the Halle Musikhochschule was founded in 1947 he became its first, and for some time its only, lecturer in organ and harpsichord. He was also Kantor and organist, then director of church music, at the Moritzkirche. In 1958 he moved to Hamburg to become organ teacher at the Hochschule für Musik und Darstellende Kunst and Kantor and organist at the Jacobikirche. In 1963 he became a professor at the Hochschule and in 1972 he took a professorship at the Hochschule für Musik, Frankfurt, a post he held until his retirement in 1990. Wunderlich gave organ interpretation courses in the USA in alternate years and appeared as an organist and harpsichordist in almost all European and many other countries. His cyclic performances of Bach and Reger were widely acclaimed, and he also performed music by Michelsen, Fiebig, David and Brönner. Among his compositions, organ and choral works predominate.

GERHARD WIENKE

Wunderlich [Vounderlich, Wonderlich, Wounderlich, Wunderlick], **Jean-Georges** [Johann Georg] (*b* Bayreuth, ?2 Feb 1755/6; *d* Paris, 1819). German flautist and composer active in France. He was the son of an oboist in service to the Margrave of Ansbach. He studied the flute with his father and at the age of 20 went to Paris to study with Félix Rault, a flautist at the Concert Spirituel. Wunderlich appeared as a soloist as early as 1776. He was a member of the Concert Spirituel orchestra from 1778 to 1783, performed a solo concerto there on 7 June 1778 and appeared regularly as a soloist in 1779. He joined the Opéra orchestra in 1781 as second flautist and rose to principal in 1787, by which time he had entered the king's service. At the end of the century he was one of the most famous flautists in France. In 1795, on the founding of the Paris Conservatoire, he became a professor of flute, teaching such celebrated flautists as Berbiguier, Camus and Tulou. Wunderlich continued to play in the Opéra orchestra until 1813 (when he was succeeded by Tulou) and remained at the Conservatoire for three more years. His flute method (actually a completion of sketches left by Hugot) was influential on the Continent throughout the 19th century.

WORKS

published in Paris unless otherwise stated

Duos, 2 fl: 6 duos, bk 1; 6 duos concertants [? same as preceding]; Duettini progressivi [? same as preceding]
Solo fl: 3 grandes sonates, fl, b, op.1 (1802); 3 [= 6] solos … à 5 clefs, opp.5, 6; 3 grandes sonates, fl, bn/vc; 6 divertissements; 9 grands solos in 2 collections; études, caprices, variations
Pedagogical: Méthode de flûte du Conservatoire (1804/*R*1975 with introduction by D. Jenkins), collab. A. Hugot; Principes élémentaires et gradués pour la flûte (*c*1815); Principes de flûte, incl. 39 petites pièces (collab. Hugot)

LAURIE SHULMAN

Wuorinen, Charles (Peter) (*b* New York, 9 June 1938). American composer. He began composing at the age of five, even before starting piano lessons. By the age of 12, despite fierce family opposition, he had chosen composition as his career. He attracted early attention by winning the New York PO's Young Composers' Award in 1954. After graduating from the Trinity School, Manhattan, he enrolled in Columbia University (BA 1961, MA 1963), where his composition teachers included Luening, Ussachevsky and Beeson. While a student he received three Bearns prizes (1958, 1959, 1961) and four BMI Student Composer Awards (1959, 1961–3), a feat unmatched by any previous or subsequent composer.

Already a brilliant pianist and formidable conductor, Wuorinen co-founded the Group for Contemporary Music in 1962, an ensemble that quickly set a new performance standard for contemporary music. Stefan Wolpe's Trio for Flute, Cello and Piano and the *Piece for Two Instrumental Units* were both written for and first performed by the Group, a collaboration that was largely responsible for bringing Wolpe's music to international attention. Wuorinen's Second Trio (1962), one of his earliest professional works, is dedicated to Wolpe and exudes the spirited and highly rhythmic interplay of its dedicatee's late works. The Piano Variations (1963) project a spiky, bold, pointillistic surface, reminiscent of Babbitt's aesthetic, yet less intricate and serial only with respect to pitch.

In 1964 Wuorinen was appointed to a teaching post at Columbia. His first large-scale professional works, among them a series of chamber concertos, wide-spread acclaim. In the Chamber Concerto for Cello and Ten Players (1963), the most traditionally conceived of the group, the soloist plays a familiarly virtuosic role. Throughout its five movements, the cellist projects sharply-etched ideas and negotiates daring leaps that encompass registral extremes. The accompanying ensemble often echoes the soloist, at times also anticipating or interrupting its musical material. In contrast, the Chamber Concerto for Flute and Ten Players (1964) presents subdued and lyrical soloistic writing amid a shimmering array of exotic accompanying instruments. As the work's single movement progresses, the flute's lines lengthen, eventually 'taming the unruliness' of the accompanying forces. In terms of form and timbre, this work is among the most striking of the composer's early efforts.

In 1968 Wuorinen embarked on *Time's Encomium*, his major electronic work. Addressing one of the fundamental dilemmas of electronic music – the fact that all renditions of a work will be identical – it takes the precision of the electronic medium as its theme, guiding the listener towards an awareness of the infinite variety of lengths and subtle variations in timbre of highly differentiated core units. The work was awarded the Pulitzer Prize in 1970. Other honours included an American Academy of Arts and Letters Award (1967) and a Guggenheim Fellowship (1968). A year after becoming the youngest

American composer to win the Pulitzer, however, Wuorinen was denied tenure at Columbia, a decision that provoked intense controversy. Later academic appointments included positions at the Manhattan School (1971–9) and Rutgers University (1984–).

During the late 1960s Wuorinen began to reconsider the premises of Babbitt's time-point system, a way of linking the intervals of a 12-note row to points in musical time. He reasoned that if this linkage could influence musical time locally, as the determinant of rhythmic patterns, it might be able to influence formal design as well: small intervals could imply short musical sections, while large ones implied longer musical stretches. Thus, a background structure could be created that would be inextricably linked to the note row from which principal pitch ideas were derived. Wuorinen applied these ideas, with varying degrees of rigour, in most of his subsequent works; they became the basis of his compositional treatise, *Simple Composition* (New York, 1979/*R*).

The ensuing years brought growing recognition in the form of commissions and performances from the nation's leading orchestras, and a second Guggenheim Fellowship (1972). The Concerto for Amplified Violin and Orchestra (1972), commissioned for Michael Tilson Thomas, Paul Zukofsky and the Boston SO in celebration of the 20th anniversary of the Fromm Foundation, was given its première at Tanglewood in 1972. In 1974 Stravinsky's widow invited Wuorinen to compose a work based on her husband's last sketches (*Reliquary for Igor Stravinsky*, 1975). A commission from the Cleveland Orchestra led to the composition of *Tashi* (1976). Further commissions from groups such as Speculum Musicae, Parnassus, the Da Capo Players and the New York New Music Ensemble, added to Wuorinen's growing catalogue of chamber works.

Where early serialists had been reluctant to create pitch hierarchies in atonal contexts, Wuorinen saw an opportunity to 'bring back an aspect of tonality that perhaps had been discarded unnecessarily'. Pitch centres accentuate crucial background structures in works such as *Ringing Changes* (1970), the Violin Concerto (1972) and *Speculum speculi* (1972). An attention to colour, often projected through an expanded role for percussion, also characterizes music of this period. In the Tuba Concerto (1970), the juxtaposition of three disparate timbral choirs is particularly distinctive. The opera, *The W. of Babylon* (1971–5), however, is the crowning achievement of these years. Invoking the spirit of Mozart, it represents the composer at his most fluent and ebullient.

In the late 1970s Wuorinen began to simplify the surface of his music. In the Second Piano Sonata (1976) and *Fast Fantasy* (1977), long strings of melodic ideas are spun continually and mellifluously, often turning back upon each other in unexpected ways. In *Archaeopteryx* (1978), the Two Part Symphony (1978), the Second String Quartet (1979) and *The Blue Bamboula* (1980) there is less overt counterpoint and greater playfulness and wit than in earlier works. Simple motives also assume greater importance. A declamatory E♭ frames the ricocheting passage-work of *The Winds* (1977); F Major triads shape the slowly evolving lines of the opening of *Fortune* (1979). While writing these works, Wuorinen became fascinated with fractal geometry, in particular the work of Benoit Mandelbrot, whose observations seemed to confirm his intuitions about musical structure and form.

With the beginning of the 1980s, Wuorinen's music became more rhythmic, regaining also some of its former contrapuntal complexity. There is a wide-ranging freedom and breadth in the sweeping tapestries of the Sonata for Violin and Piano (1988), commissioned by the Library of Congress, the String Sextet (1989), written for the Chamber Music Society of Lincoln Center, and *A Winter's Tale* (1991). *New York Notes* (1981), written for the New York New Music Ensemble, embraces both old and new formal elements. Striking among the many orchestral works of this period is the Third Piano Concerto (1983), a large-scale, three-movement design.

In 1985 Wuorinen was appointed composer-in-residence with the San Francisco SO, a relationship that resulted in four major works: *Rhapsody for Violin and Orchestra* (1983), *The Golden Dance* (1986), *Machault mon chou* (1988) and *Genesis* (1989). The last of these is an exuberant re-telling of the Creation story, including jubilant hymns of praise and meditative orchestral interludes. The first movement intertwines melodies from all seven Gregorian chant masses on the Creation text; in a lush central movement God's words are sung by a female voice, starkly projected above the narration. Also in 1985 Wuorinen received a MacArthur Foundation Fellowship, was inducted into the American Academy of Arts and Letters, and began to organize and conduct a series of concerts (until 1989) entitled New and Unusual Music, presenting works by such disparate composers as Elliott Carter, Lou Harrison, George Perle, Steve Reich and Morton Feldman.

An invitation by Jean-Pierre Bonnefoux to compose a work for the New York City Ballet in 1987 resulted in Wuorinen's cello concerto *Five*. After the score attracted the attention of Peter Martins, Wuorinen was commissioned to write a second ballet, *Delight of the Muses* (1991), for the company. Commissions for a transcription of the *Schoenberg Op.31 Variations* (1996) and the *Dante Trilogy* of three works (1993–5), followed.

Wuorinen's large corpus of works in many important genres distinguishes his compositional achievement as a powerful compendium of late 20th-century musical thought. His more than 200 compositions are marked by dazzling virtuosity, innovative formal design and an outward exuberance that belies a controlled internal rigour. As critic Michael Steinberg has noted, Wuorinen's music fuses the physicality of Stravinsky's style with Schoenbergian structural principles; it both reconciles and extends the traditions of these two composers. An innovator professing to care more about 'the evolutionary ... than the revolutionary', Wuorinen's most important contribution may be the development of a highly sophisticated 20th-century musical language that responds to the grand musical visions of centuries of musical predecessors.

WORKS
(*selective list*)

STAGE

The Politics of Harmony (masque, 1, R. Monaco), A, T, B, 2 fl, 2 tuba, 3 perc, pf, 2 hp, 2 vn, 2, db, 1967; New York, 28 Oct 1968

The W. of Babylon (The Triumph of Love over Moral Depravity) (Baroque burlesque, 2, R.C. Bruce), 8 solo vv, nar, orch, 1975; San Francisco, 20 Jan 1989

ORCHESTRAL

Music for Orch, 1956; Sym. no.3, 1959; Evolutio transcripta, chbr orch, 1961; Orch and Elec Exchanges, orch, tape, 1965; Pf Conc. no.1, 1966; Contrafactum, 1969; Grand Bamboula, str, 1971;

Conc., amp vn, orch, 1972; Pf Conc. no.2, amp pf, orch, 1974; A Reliquary for Igor Stravinsky, 1975 [based on I. Stravinsky]; Perc Sym., 22 perc, 2 pf, 1976; Tashi, cl, vn, vc, pf, orch, 1976; Ancestors, chbr orch, 1978; 2-Pt Sym., 1978; The Magic Art, inst masque, chbr orch, 1979 [based on H. Purcell]; Ecclesiastical Syms., 1981; Short Suite, 1981; Pf Conc no.3, 1983; Rhapsody, vn, orch, 1983; Bamboula Squared, tape, orch, 1984; Concertino, chbr orch, 1984; Crossfire, 1984; Movers and Shakers, 1984; Prelude to Kullervo, tuba, orch, 1985; Fanfare, 1985; The Golden Dance, 1986; Bamboula Beach, 1987; Five, conc., amp vc, orch, 1987; Galliard, chbr orch, 1987; Another Happy Birthday, 1988; Machault mon chou, 1988 [based on Messe de Notre Dame]; Astra, 1990; Delight of the Muses, 1991; Conc., sax qt, orch, 1992; Microsym., 1992; The Mission of Virgil, 1993; Windfall, band, 1994; The Great Procession, 1995; The River of Light, 1996; Sym. Seven, 1997

CHAMBER

Ens: Prelude and Fugue, 4 perc, 1955; Musica duarum partium ecclesiastica, brass qnt, timp, pf, org, 1959; Trio concertante, ob, vn, pf, 1959; Consort, 4 trbn, 1960; 8 Variations, vn, hpd, 1960; Turetzky Pieces, fl, cl, db, 1960; Tiento sobre Cabezón, fl, ob, vn, va, vc, hpd, pf, 1961; Trio no.1, fl, vc, pf, 1961; Bearbeitungen über das Glogauer Liederbuch, fl/pic, cl/b cl, vn, db, 1962; Duuiensela, vc, pf, 1962

Invention, 5 perc, pf, 1962; Octet, ob, cl, hn, trbn, pf, vn, vc, db, 1962; Trio no.2, fl, vc, pf, 1962; Chbr Conc., solo vc, fl, ob, cl, bn, 2 perc, pf, vn, va, db, 1963; Chbr Conc., solo fl, 4 perc, hp, gui, pf, hpd, cel, db, 1964; Composition, solo vn, 2 ob, 2 b cl, 2 hn, 2 trbn, perc, pf, db, 1964

Chbr Conc., solo ob, tuba, 5 perc, timp, hp, pf, db, 1965; Composition, ob, pf, 1965; Bicinium, 2 ob, 1966; Salve Regina: John Bull, chbr ens, 1966; Duo, vn, pf, 1967; Str Trio, 1968; Adapting to the Times, vc, pf, 1969; Nature's Concord, tpt, pf, 1969; Chbr Conc., solo tuba, 12 wind, 12 drums, 1970; Ringing Changes, 12 perc, 1970

Canzona (to the memory of Igor Stravinsky), 12 insts, 1971; Str Qt no.1, 1971; Bn Variations, bn, hp, timp, 1972; Hp Variations, hp, vn, va, vc, 1972; On Alligators, fl, ob, cl, bn, str qt, 1972; Speculum speculi, fl, ob, b cl, perc, pf, db, 1972; Arabia felix, fl, bn, pf, elec gui, vib, vn, 1973; Grand Union, vc, drums, 1973; Trio no.3, fl, vc, pf, 1973

Fantasia, vn, pf, 1974; Hyperion, 12 insts, 1975; Tashi, cl, vn, vc, pf, orch ad lib, 1975; Album Leaf, vn, vc, 1976; Perc Sym., 24 perc, 1976; Archangel, b trbn, str qt, 1977; Fast Fantasy, vc, pf, 1977; 6 Pieces, vn, pf, 1977; Wind Qnt, 1977; The Winds, 8 wind, pf, 1977; Archeopteryx, b trbn, 10 pfmrs, 1978; Fortune, cl, vn, vc, pf, 1979; Joan's, fl, cl, vn, vc, pf, 1979; Perc Duo, mallet insts, pf, 1979; Str Qt no.2, 1979

Beast 708, chbr ens, 1980; Trio, hn, vn, pf, 1981; Trio for Bass Insts, db, b trbn, tuba, 1981; Divertimento, a sax, pf, 1982; Divertimento, str qt, 1982; NY Notes, fl, cl, vn, vc, perc, pf, 1982; Pf Trio, 1983; Spinoff, vn, db, 4 conga drums, 1983; Concertino, chbr ens, 1984; Double Solo, hn, vn, pf, 1985; Hn Trio Continued, 1985; Trbn Trio, 1985

A Doleful Dompe, eng hn, vn, vc, 1986; Fanfare, 2 tpt, 2 hn, 2 trbn, 1986; Str Qt no.3, 1987; Sonata, vn, pf, 1988; Sax Qt, 1992; Perc Qt, 1994; Pf Qnt, 1994; Sonata, gui, pf, 1995

Solo inst: Concert, db, 1961; Fl Variations I, 1963; Janissary Music, perc, 1966; Fl Variations, II, 1968; The Long and the Short, vn, 1969; Vc Variations I, 1970; Vn Variations, 1972; Vc Variations II, 1975; Gui Variations, 1994; Vc Variations, III, 1997

VOCAL

Choral: Be Merry all that be Present (medieval Eng. carol), SATB, org/4 insts, 1957; The Prayer of Jonah, chorus, str qnt, 1962; Super salutem, TTBB, 9 brass, perc, pf, 1964; Mannheim 87.87.87 (hymn text), chorus, org, 1973; An Anthem for Epiphany (Bible), SATB, org, tpt, 1974; The Celestial Sphere (orat, W. Fuller, Bible), SATB, orch, 1980; Mass, S, SATB, vn, org, 1982; A solis ortu, SATB, 1989; Genesis (orat, Bible), SATB, orch, 1989; Missa renovata, SATB, fl, 3 trbn, timp, str, 1992

Solo: 2 Lute Songs, male vv, 1954 [after T. Campion]; Te decet hymnus, Mez, B, pf, org, timp, 1954; Madrigale spirituale sopra salmo secundo, T, Bar, 2 ob, db ad lib, 2 vn, vc, db, 1960; Symphonia sacra, T, Bar, B, 2 ob, 2 vn, db, org, 1961; A Message to Denmark Hill (cant., R. Howard), Bar, fl, vc, pf, 1970; A Song to the Lute in Musicke (attrib. R. Edwards), S, pf, 1970; 6 Songs (C. Britton), Ct/A, T, chbr ens, 1977; Ps xxxix, Bar, gui, 1979; 3 Songs (Britton), T, pf, 1979; Twang (W. Stevens), Mez, pf, 1989; A Winter's Tale (D. Thomas), S, cl, hn, vn, va, vc, pf, 1991 [arr. S, pf]; Christes Crosse, S, pf, 1994 [after T. Morley]; Lightenings VIII (S. Heaney), S, pf, 1994; Fenton Songs (J. Fenton), S, pf trio, 1997 [arr. 2 gui, vn, vc]

KEYBOARD

for solo piano unless otherwise stated

Evolution, org, 1961; Variations, 1963; The Bells, carillon, 1966, rev. 1997; Hpd Divisions, 1966; Making Ends Meet, pf 4 hands, 1966; Sonata no.1, 1969; 12 Short Pieces, 1973; Sonata no.2, 1976; Self-Similar Waltz, 1977; The Blue Bamboula, 1980; Capriccio, 1981; Album Leaf, 1984; Natural Fantasy, org, 1985; Sonata no.3, 1986; Ave Christe: Josquin, 1988; Bagatelle, 1988; Katz Fugue, 1996; Schoenberg Op.31 Variations, 2 pf, 1996

LOUIS KARCHIN (text), JASON CARUCCI (work-list, bibliography)

Wuppertal. Town in Germany, formed by the union of Barmen, Elberfeld and the smaller towns of Ronsdorf, Vohwinkel and Cronenberg along the Wupper River in 1929. The cultivation of music there was at first seriously hindered by Calvinist influences and became established only in the second half of the 19th century.

The Wuppertal Konzertgesellschaft, founded in Barmen and Elberfeld in 1861, is one of the few private organizations of this type in Germany. Under the auspices of the town it arranges symphony, choral and chamber concerts and solo recitals. It has mounted many first performances and presented guest appearances by Liszt, Clara Schumann, Bülow, Joachim, Casals, Elly Ney, Schnabel and Emil Sauer. In 1933 the Wuppertal Konzertgesellschaft became the Städtischer Konzertverein and was immediately subject to Nazi cultural policies. Before 1945 the Berlin PO under Furtwängler appeared in Wuppertal 12 times. The two oratorio choirs of the Konzertgesellschaft, the Städtischer Singverein Barmen (founded 1817) and the Elberfelder Gesangverein (founded 1811), amalgamated in 1968 as the Chor der Konzertgesellschaft. Johannes Schornstein, the first conductor (1811–53) of the Elberfelder Gesangverein, organized the first Niederrheinisches Musikfest (1818).

Subsequent conductors were Hermann Schornstein (1854–78) and the guest conductors Ferdinand Hiller and Rafał Maszkowski. Between 1879 and 1890 Julius Buths was conductor of the Gesangverein and the Städtisches Orchester. The most important conductor of the Barmer Singverein was Anton Krause (1859–96); under him Barmen was the third German town to perform Bach's *St Matthew Passion* (in 1864) and the seventh to perform his Mass in B minor (in 1865).

The Städtisches Orchester originated in the Langenbachsche Kapelle, which from 1849 collaborated with the Barmen and Elberfeld choirs in their oratorio performances. 18 members of the Langenbachsche Kapelle formed the Elberfelder Kapelle in 1862, which became known as the Städtisches Orchester in 1886. In 1874 another 20 players from the Langenbachsche Kapelle formed the Barmer Orchesterverein, which became the Städtisches Orchester in 1889. In 1919 the town orchestras joined to form the Vereinigtes Städtisches Orchester. After a period under the conductors Hans Haym (1890–1920) and Hermann von Schmeidel (1921–6) in Elberfeld, and Erich Kleiber (1921–2), Otto Klemperer and Hans Weisbach (1924–6) in Barmen, the two orchestras were finally united in 1926 (three years before the official union) under one municipal director of music, Franz von Hoesslin. His successor (1932–7) was Hellmut Schnackenberg; Paul van Kempen and Leopold Ludwig were guest conductors. Fritz Lehmann was conductor of the symphony and choral concerts and opera performances from 1938 to 1947. Weisbach (who held the appointment until 1955) and Hans Georg Ratjen were succeeded by Martin Stephani (1959–63), who made the Wuppertal Orchestra widely known through a number of broadcasts. Hanns-Martin Schneidt was appointed director of music in Wuppertal in 1963. Peter Gülke succeeded him in 1986, and he in turn was succeeded by George Hanson in 1998.

A theatre company was formed at Elberfeld in 1806. The town had its first theatre in the same year, but the building was soon commandeered for other uses. The Reiterbahnbühne opened in 1835, and in 1842 the newly founded Theaterverein built a theatre which became the centre of the town's theatrical life until its closure in 1882. The new opera house, the Theater am Brausenwerth, opened in 1888. Franz Lehár was first violin and for a while Konzertmeister there. The Elberfeld Opera attracted much attention through its Wagner performances with Bayreuth singers. In 1874 the Barmer Stadttheater opened with *Der Freischütz* and *Don Carlos*. It burnt down several times and was eventually replaced by a new building in 1905. In 1913–14 Klemperer conducted 23 performances of *Parsifal* in Barmen and 25 in Elberfeld, giving the two towns together the highest number of *Parsifal* performances in Germany and abroad by that time. In 1919 the theatres of the two towns amalgamated, becoming known as the Städtische Bühnen Wuppertal in 1929. During World War II there were notable performances of the *Ring* in March 1942 and 1943 under Hans Knappertsbusch (who had been opera conductor at Elberfeld from 1913 to 1918). The opera house at Barmen was damaged by bombing in 1943, and the town hall at Elberfeld (opened in 1900 as a concert hall) served as an opera house. After the war Wuppertal was the first town in West Germany to reopen its opera house (14 October 1945). In the 1950s the Wuppertal Opera's important large-scale performances were so highly regarded that press reports referred to a 'Wuppertal style'. In October 1956 the Barmen opera house reopened with Hindemith's *Mathis der Mahler* and Mozart's *Die Entführung aus dem Serail*.

Important events at the Wuppertal theatre since the war – premières and first West German performances – have included productions of Heinrich Sutermeister's *Raskolnikoff* (1950), Paul Dessau's *Puntila* (1967), Gunther Schuller's *Die Heimsuchung* (1962), Milhaud's *Médée* (1972), Volker David Kirchner's *Die fünf Minuten des Isaak Babel* (1980 première) and the first staged performance of Shostakovich's *The Gamblers*, completed by Krzysztof Meyer (1983).

Many music festivals have been held in Wuppertal since 1950, including the Niederrheinisches Musikfest in 1950 and 1955, the Bergisches Chorfest (1957), the thirteenth Deutsches Mozartfest of the Deutsche Mozart-Gesellschaft, and 'Zupfmusik 90', an international festival for plucked-string instrument players (1990). Wuppertal also took part in the North Rhine-Westphalian cycle of Hindemith's works in 1992 and 1993. The KlangZeit lodge, an organization in which composers, visual artists, architects, scientists and philosophers all worked together to explore the possibilities of giving an acoustic structure to human life and its environment, was founded in Wuppertal in 1991. The Bergisches Landeskonservatorium, founded at Haan in 1945, was combined in 1972 with the Wuppertal Institute, the vocational section of the Cologne Hochschule für Musik.

MARGRET HEUFT-HUBSCHER/STEFAN DREES

Würfel, Václav Vilém [Werfel, Wenzel Wilhelm] (*b* Plaňány, nr Kolín, 6 May 1790; *d* Vienna, 23 March 1832). Bohemian pianist and composer. He came from a musical family and was pushed (especially by his mother) towards a career in music. A precocious pianist, he made many concert tours in Bohemia as a youth. He went to Prague as a pupil of Tomášek and, though he primarily studied the piano, was tremendously influenced by the novel style of Tomášek's keyboard compositions and modelled some of his own works on them; this is particularly so in the music he wrote while in Warsaw during the most important period of his career.

In 1815 Würfel went to Warsaw, where he soon became a favourite artist in the salon and the concert hall; that year he was appointed professor of organ and thoroughbass at the conservatory. In Warsaw he published some major didactic works for keyboard, including *Euterpe: dziennik muzyczny na fortepiano* (1818) and *Zbiór exercycyi w kształcie preludyów ze wszystkich tibów*

maior i minor (1821), a set of exercises and preludes in all the major and minor keys; he also published a number of polonaises and other keyboard works. There was a colony of Czech musicians in Warsaw, including Živny (Żywny), Chopin's first teacher. Würfel knew the Chopin family well and often worked with young Fryderyk, on whom he had a strong influence. In 1824 Würfel left Warsaw and returned to Prague where his first opera, *Rübezahl*, was presented at the Estates Theatre on 7 October. After the performance he worked as a conductor at the Kärntnertortheater in Vienna until 1826 and wrote his second opera, *Der Rotmantel*. He continued to tour as a pianist until his death.

ADRIENNE SIMPSON

Würker, Johann. *See* WIRCKER, JOHANN.

Wurlitzer. American firm of instrument makers and dealers of German origin.

1. History of the company. 2. The Wurlitzer harp. 3. The Wurlitzer electronic organ.

1. HISTORY OF THE COMPANY. (Franz) Rudolph Wurlitzer (*b* Schöneck, Saxony, 31 Jan 1831; *d* Cincinnati, 14 Jan 1914) came to the USA in 1853; he settled in Cincinnati and began dealing in musical instruments in addition to working in a local bank. It is likely that he was one of a long line of Saxon instrument makers, beginning with Heinrich Wurlitzer (1595–1656), a lute maker. By 1860 he had a thriving trade and is said to have been a leading supplier of military wind instruments and drums during the Civil War. In 1865 he opened a branch in Chicago and in 1872 joined his brother Anton to form the partnership of Rudolph Wurlitzer & Bro. On 25 March 1890 the firm was incorporated as the Rudolph Wurlitzer Company. Rudolph served as president of the corporation from 1890 to 1912 and as chairman from 1912 to 1914.

Rudolph's eldest son Howard Eugene (*b* Cincinnati, 5 Sept 1871; *d* New York, 30 Oct 1928) joined the firm in 1889. He guided the general business management, aggressively involving the firm in the increasingly popular automatic instrument trade. Through the purchase of manufacturing operations of the DeKleist Musical Instrument Works in North Tonawanda, New York (1908), and of the Melville Clark Piano Co. in DeKalb, Illinois (1919), Howard established the company as a leading instrument manufacturer and dealer. He served as president from 1912 to 1927 and as chairman from 1927 to 1928.

The artistic development of the firm stemmed from the second son, Rudolph Henry Wurlitzer (*b* Cincinnati, 30 Dec 1873; *d* Cincinnati, 27 May 1948). In 1891 he went to Berlin, where he studied the violin with Emanuel Wirth (of the Joachim Quartet), the history of instruments with Oskar Fleischer and acoustics with Hermann von Helmholtz. From the violin expert August Riechers he acquired a basic knowledge of violins and violin making. Returning to Cincinnati in 1894 he joined the company as a director, and in addition to serving as treasurer and secretary (1899–1912), vice-president (1912–27), president (1927–32) and chairman (1932–42), he developed the violin department.

The third son, Farny Reginald Wurlitzer (*b* Cincinnati, 7 Dec 1883; *d* North Tonawanda, NY, 6 May 1972), provided technical and manufacturing expertise. After graduating from the Cincinnati Technical School, he went to Germany in 1901 to learn German and to serve apprenticeships with various manufacturers, including six months at Phillips & Söhne, makers of automatic pianos and orchestrions in Bockenheim, near Frankfurt. He returned to Cincinnati in 1904 to join the company, first as a sales representative, and in 1907 as head of the automatic musical instrument department. In 1909 he moved to North Tonawanda to take charge of the Rudolph Wurlitzer Manufacturing Company, formed after the purchase of the manufacturing operations of DeKleist, and in 1910 bought the Hope-Jones Organ Company of Elmira, New York. In 1933, also under Farny in North Tonawanda, the firm began to manufacture coin-operated phonographs. Farny was president of the corporation from 1932 to 1941, chairman from 1942 to 1966, and chairman emeritus from 1966 to 1972. In 1934 R.C. Rolfing joined the company as vice-president and general manager, and at the beginning of his presidency (1941–67) the offices moved from Cincinnati to Chicago; the corporate name was changed in 1957 to the Wurlitzer Company. In the 1980s the president of the company was George B. Howell, the chairman was A. Donald Arsen, and the corporate headquarters were in DeKalb, Illinois. The company split in the 1980s: the keyboard division was acquired in 1988 by Baldwin Pianos, who continue to use the Wurlitzer name for a range of upright and grand pianos.

The Wurlitzer Company had the knack of sensing the demands of the musical public. The emphasis was first on importing and selling: an advertisement of 1865 lists a wide variety of instruments and accessories for sale. The company commissioned drums during the Civil War and had pianos carrying the name of Wurlitzer made from 1880. When automated instruments became popular in the USA in the 1880s, Wurlitzer became leading sellers for the Regina Music Box Company, which in 1896 at the request of the Wurlitzers equipped their 27-inch disc-changer machines with coin slots. In 1899 they marketed the Wurlitzer Tonophone, an electrically powered piano fitted with a coin slot and a cylinder pinned with ten tunes. The success of this coin-operated piano led to the development of other coin-operated machines (among them the Pianino, Mandolin Quartette and Mandolin Sextette).

When silent films were introduced, Wurlitzer was ready by 1910 for theatre music with the introduction of the Wurlitzer Hope-Jones Unit Orchestra, known as 'the Mighty Wurlitzer' theatre organ, fitted with brass trumpets, tubas, clarinets, oboes, chimes, xylophones, drums, and many other sounds and effects. For smaller theatres Wurlitzer Photoplayers were developed. In the late 1920s Wurlitzer developed coin-operated phonographs: first, in 1934, the P-10 jukebox, with ten selections, then a machine with 24 selections in 1946 (model 1015, 'The Bubbler'), and by 1956 they had produced their Centennial model with 200 selections. (When they ceased production of jukeboxes in 1974, nearly 750,000 had been manufactured; in 1985 the Wurlitzer name was acquired by the Nelson Group of Companies, who have

resumed the manufacture of jukeboxes under the marque.) In 1935 the company introduced a console upright spinet piano, just under 1 metre high, and in 1947, following trends in the musical instrument trade, they began to produce electronic instruments; the most important of these were electronic organs (see §3 below), but they also marketed 'stringless' electric pianos based on struck tuned reeds, originally designed by BENJAMIN F. MIESSNER (model EP–100, from 1954) and subsequently by HARALD BODE (EP–200, from 1968); later they marketed digital electric pianos. In about 1960 they introduced the first commercial electronic drum machine, the Side Man (*c*1960).

The violin department became one of the world's leading centres for rare string instruments. Begun by Rudolph Henry Wurlitzer after his training in Germany, by 1918 the violin collection included over 200 instruments with several by Stradivari and Guarneri. Jay C. Freeman joined the Wurlitzer branch in New York in 1920 to head the violin department. Under his leadership the firm bought in 1923 the Betts Stradivari of 1704 and in 1929 the important Rodman Wanamaker Collection. Rudolph Henry's son REMBERT WURLITZER joined the department in 1930, and became a violin authority and a strong supporter of 20th-century American violin makers. In 1949 the violin department became independent of the parent company, and was directed by Rembert.

2. THE WURLITZER HARP. For many years Wurlitzer imported from Europe harps made by Erard, Erat, Dodd, Grosjean and others; the repair of these harps at the Cincinnati store indicated the need for a harp that could better withstand both the American climate and the demands of contemporary music. In 1909 the company began harp production at its Chicago factory, under the direction of Emil O. Starke, who had been for 20 years an associate of George B. Durkee at the Lyon & Healy harp factory. Like the Lyon & Healy harp, the new Wurlitzer harp was a far sturdier instrument than its European prototypes; its special features included body ribs of maple and a patented anchor and shoulder brace which minimized the need for frequent regulation of the harp action.

At the 1915 International Exposition in San Francisco the Wurlitzer harp was awarded a medal of excellence. Soon harpists and important conductors, including Walter Damrosch and Leopold Stokowski, endorsed the instrument. Alberto Salvi, the Italian-born virtuoso who acquired the medal-winning harp, stated that even after seven years of touring, playing 1000 solo concerts, neither travel nor climate changes damaged the harp. By 1924 Wurlitzer was advertising more than eight different styles of harp, from a 43-string instrument of 'Grecian' design to a 'Grand Concert' one of 'Gothic' design. The latter, Style DDX, was 182 cm high, weighed over 35 kg and had 47 strings ranging from C′ to g″″. A 46-string version of Style DDX was also introduced.

In tone, craftsmanship, and appearance the Wurlitzer harp competed successfully for many years with the Lyon & Healy harp, and both instruments were generally preferred to their European counterparts because of their durable construction. Owing to economic conditions and changes within the parent company, Wurlitzer ceased harp production in the late 1930s, but harps with the mark 'Starke Model' engraved on the brass plate remain among the finest pedal harps ever made.

Roslyn Rensch playing a 46-string Wurlitzer 'Starke Model' harp: oil painting by Jamie McMahan, 1991

3. THE WURLITZER ELECTRONIC ORGAN. The Wurlitzer Company began the manufacture of electronic organs in 1947 at its factory in North Tonawanda, New York. In 1946 Wurlitzer had taken over from the Everett Piano Co. the Orgatron (based on a patent by Miessner), in which the vibrations of reeds operated by suction were converted into voltage variations by means of electrostatic pickups and made audible through a loudspeaker; a modification of this principle was used in the first Wurlitzer electronic organ, which was marketed in 1947. Between 1959 and the mid-1960s these were phased out and all new models were fully electronic.

Most Wurlitzer electronic organs have two manuals and pedals, and are primarily for home use; an important group are the 'spinet' organs (introduced 1952) in which two manuals (each usually having 44 notes) are staggered, their ranges overlapping by one octave. Most models feature an additional Leslie tremultant loudspeaker. For some years, starting with the Model 4037 in 1971, all Wurlitzer organs, except the smaller 'spinet' models, included the Orbit III Synthesizer (not strictly a synthesizer, though it incorporates some synthesizer features) on a third, principally monophonic, manual with a compass of two octaves. During the early 1970s some models incorporated a cassette tape recorder. Advances in electronic technology from about 1970 made possible several new devices that are included in many home organs: rhythm and 'walking bass' units, arpeggiators, memories, and a choice of chord systems. Digital electronics were introduced in 1980, permitting among other things the storage of different registrations in a memory.

CYNTHIA ADAMS HOOVER (1), ROSLYN RENSCH (2), HUGH DAVIES (3)

Wurlitzer, Fritz (Ulrich) (*b* Erlbach, 21 Dec 1888; *d* Erlbach, 9 April 1984). German clarinet maker. He was born into a family of woodwind instrument makers and worked initially in the shop of his father, Paul Oskar Wurlitzer. He set up an independent workshop about 1930. During the 1930s he collaborated with the clarinettist Ernst Schmidt, adding refinements to both the Oehler system clarinet of the German-speaking world and the Boehm system instrument. Wurlitzer's Schmidt-Kolbe system (initially involving Louis Kolbe, a maker in Altenburg) is a modification of the Oehler system with a more even venting that results in an exceptionally full and even tone in the low register. The majority of these instruments were built with a very wide bore (15·2 mm), perhaps the widest ever used on German-style instruments. They were widely used, and were especially favoured in the Netherlands. The Schmidt Reform Boehm system utilizes standard Boehm system fingering, but carries several additional vents, resulting in a very even tone closer to the German sound than to the French. Wurlitzer also made fine basset-horns, bass clarinets and even a contrabass clarinet; his lower clarinets were still highly prized at the end of the 20th century.

Herbert Wurlitzer (*b* Erlbach, 19 Dec 1921; *d* Neustadt an der Aisch, 8 May 1989), a son of Fritz Wurlitzer, worked with his father until 1959. In that year he moved to West Germany and established his own workshop, first located in Bubenreuth, later in Neustadt an der Aisch. Although he made a slightly simplified version of the Reform Boehm system clarinet, he preferred the standard Oehler system, and most of instruments follow the latter. His soprano clarinets were almost universally regarded as unrivalled among Oehler system instruments during the last quarter of the 20th century. His workshop and name remained active after his death. For further information see E. Weller, 'Die Wurlitzers', *Rohrblatt: Magazin für Oboe, Klarinette, Fagott und Saxophon*, x (1995), 15–20, 50–55, 107–14.

NICHOLAS SHACKLETON

Wurlitzer, Rembert (*b* Cincinnati, 27 March 1904; *d* New York, 21 Oct 1963). American authority on early instruments of the violin family. He was the only son of Rudolph Henry Wurlitzer, director of the WURLITZER Company in Cincinnati. In 1924, after two years at Princeton University, he was sent to Mirecourt, to learn violin making under Amédée Dieudonné. The following year he spent six months in London as the guest of Alfred Hill of W.E. Hill & Sons, who gave him a valuable grounding in violin connoisseurship. He returned to Cincinnati and became a vice-president of the family business. In 1937 he moved to the firm's violin department in New York, which he established as an independent company under his own direction in 1949. In 1951 he was joined by the Italian restorer FERNANDO SACCONI (*d* 1973).

After Wurlitzer's death the business was continued with considerable success by his widow Anna Lee Wurlitzer, née Little (*b* 29 July 1912); she was aided by Sacconi and his assistant DARIO D'ATTILI, who in his later capacity as manager was responsible for upholding the firm's high standard. In 1965 Mrs Wurlitzer purchased the Hottinger Collection, comprising some 30 outstanding Italian violins, including a dozen by Stradivari. The firm closed down in autumn 1974.

Wurlitzer's business was unrivalled in the USA and was patronized by leading musicians and by owners of the finest instruments. His vast knowledge and photographic memory enabled him to identify many lost Italian masterpieces. Careful records were kept of every instrument examined, and the certificates of authenticity which he issued are accepted universally.

CHARLES BEARE

Wurm, (Daniel) Wilhelm [Vurm, Vasily Vasilyevich] (*b* Brunswick, 28 Aug 1826; *d* St Petersburg, 25 May/7 June 1904). German cornet player, composer and band director. His first musical training was with his father, bandmaster of the Black Hussars of the Grand Duke of Braunschweig. At the age of 21 he moved to St Petersburg, where he was 'Soloist of the Imperial Theatre Orchestra' from 1847 to 1878 (from 1862, 'Cornet Soloist to His Imperial Majesty') and director of bands of the Imperial Guards from 1869 to 1889, as well as musical adviser to Tsars Aleksandr II and III, the latter an amateur cornet player. In 1866 he reorganized Russian infantry bands, using special instruments he had invented a year earlier together with the St Petersburg maker Anders. From 1867 until his death he taught the cornet and brass chamber music, the latter an innovation, at St Petersburg Conservatory. For 33 years Wurm was chairman of the St Petersburg Philharmonic Society.

A consummate soloist specializing in lyric movements, Wurm made extensive concert tours throughout Russia together with Auer and Karl Davïdov, among others. He was a prolific composer for cornet and piano, for band, and other formations. Among his methods and étude collections are the first cornet method to appear in Russia (1879), as well as another for cavalry trumpet. He was the originator of lip buzzing as a brass instrument warmup.

EDWARD H. TARR

Wurstisen [Vurstisius], **Emanuel** (*b* Basle, Nov 1572; *d* ?Biel). Swiss doctor and lutenist, son of the famous Basle chronicler and professor of mathematics Christian Wurstisen (1544–88). In 1586 he matriculated at Basle University. He received the Baccalaureate there in 1590, was awarded the *magister artium* in 1593 and enrolled in the school of medicine in 1593–4. In 1596 he can be traced to Orléans, and he later worked as a doctor in Biel.

Wurstisen cultivated a strong interest in music while attending Basle University. His musical tastes and abilities are well documented in a lute manuscript now in Basle University (*CH-Bu* F IX 70). This collection of dances, songs, motets and 'free' instrumental pieces, dated 10 July 1591, was copied by Wurstisen himself. It contains nearly 500 compositions and represents one of the largest extant collections of Renaissance lute music. In addition to its value as a repository of the types of music heard and performed by students at the University of Basle in the last decade of the 16th century, the manuscript also contains a lute treatise which presents what appear to be the essential rules and performing techniques that Wurstisen considered necessary to play the music in his collection.

JOHN KMETZ

Würzburg. Capital city of Lower Franconia, Germany. The history of music in Würzburg falls into two periods, the earlier dominated by the rule of the prince-bishops, the more recent by state and municipal institutions. The turning-point was the secularization of 1802. The institution of the prince-bishops, who also wielded secular authority as dukes of Franconia, meant that sacred and vocal music predominated. Only in the 18th century was there a short phase when secular and instrumental music in the Italian style flourished at the episcopal court. After secularization, two new institutions were established where music was cultivated, the Königliche Musikschule and the theatre, which still to a large extent determine the musical life of the city.

After the introduction of the Roman rite by St Boniface the Germanic choral dialect gained an increasingly strong hold until the 17th century when the special form of it known as the Mainzer Choral was made statutory for Würzburg in the definitive form given in the *Agenda ad usum ecclesiarum metropolitanae Moguntinae et Cathedralium Herbipolensium et Wormatensium* (1671). The choral singing was particularly fine in St Burkard, the cathedral, the Stift Haug and the Benedictine church. The printer Georg Reyser issued his *Missale Herbipolense* (1481) and *Agenda Herbipolensis* (1482) in Würzburg; these may be the earliest printed collections of choral music in Germany. Polyphony was first introduced by Bishop Julius Echter von Mespelbrunn (1573–1617) in the cathedral, where Orlande de Lassus's *Opus musicum* was taken as the chief guide. Lassus's *Lectiones sacrae novum* of 1582 are dedicated to Echter von Mespelbrunn. After the Thirty Years War the musicians of the cathedral and the court usually worked together, especially under the bishops of the Schönborn family. The outstanding figures among the locally born musicians were Heinrich Pfendner (*c*1590–*c*1631) and Philipp Friedrich Buchner (1614–69).

The musical ensemble at the court of the prince-bishops was first mentioned in the 17th century; numbers were few and they were employed principally in church services. Trumpeters and drummers were available for festive occasions. The impetus given to religious and cultural life by the prince-bishops Johann Philipp Franz (1719–24) and Friedrich Carl von Schönborn (1729–46), which included the building of the Residenz Palace, allowed the court ensemble to come into its own, and it reached its peak under Bishop Adam Friedrich von Seinsheim (1755–77). He had Italian operas and ballets performed in the Weisser Saal of the Residenz and, after 1770, in the theatre he had built in the Residenz. As well as local musicians, many of whom studied in Italy at the court's expense, Italian singers and instrumentalists were employed (notably Giovanni Benedetto Platti and Domenico Steffani). The relations of the prince-bishops with Vienna and Italy are illustrated by the surviving scores, in which the works of the Italian composers of the 18th century and their German imitators predominate. The number of musicians employed, already reduced by the end of the 18th century, decreased even more after secularization, and the ensemble was dissolved in 1814.

The Stadttheater received its name in 1843, when the city bought the theatre founded by Count Soden in 1803–4. It had been devoted primarily to plays, the operas performed being ones that imposed only small demands. Friedrich Witt, one of its early musical directors, also made a reputation as a composer. Wagner worked there in 1833 for a short time, during which he completed *Die Feen*. After the building was destroyed in 1945 the theatre was able to keep going only on a makeshift basis. The completion in 1966 of a new building with 770 seats made it possible to produce operas and plays in a suitable setting once more, under the Intendant Joachim von Groeling, and the conductor Max Kink. The Philharmonisches Orchester Würzburg (formerly the Städtisches PO) is connected with the theatre, and also gives an annual series of subscription concerts and matinées. Concerts are also organized by private musical societies: the Musikalische Akademie Würzburg, formerly the Gesellschaft der Freunde des Bayerischen Staatskonservatoriums (founded 1960), which also provides scholarships for gifted students, and the Bach-Gesellschaft (founded 1966), which subsidizes among other things concerts of the Bach Choir (founded by Günter Jena). The Würzburg Mozart Festival was inaugurated in 1921 by Herman Zilcher, then director of the conservatory; its concerts are held each summer in the Residenz with the participation of Bavarian Radio, the Frankfurt RSO, the Bamberg SO, the Stadttheater, the Hochschule für Musik and internationally renowned ensembles and soloists.

The Collegium Musicum Academicum Wirceburgense was founded at the university towards the end of the 18th century as an association of musical academics. It soon developed, under the direction of Franz J. Fröhlich, into a teaching institution for members of the university, and in 1804 was established as the Akademisches Musikinstitut with open entry, the oldest of its kind in Germany. Its connection with the university ceased in 1820, and it was subsequently renamed the Königliches Musikinstitut. In 1875, after reorganization by Karl Kliebert, the institute expanded considerably, and in 1923 became the Bayerisches Staatskonservatorium der Musik. From 1945 to 1965 it had temporary accommodation in private houses,

and then under its director Hanns Reinartz moved into a spacious modern building that contains two concert halls, seating 860 and 220. In 1973 it was renamed the Staatliche Hochschule für Musik. The institute hosts two biennial festivals: the Tage der Neuen Musik (established 1977) and the Tage Alter Musik (established 1982). In 1963 the Städtische Sing- und Musikschule was founded in the city, and in 1975 the Hermann-Zilcher-Konservatorium, which trains music teachers and professional musicians. Music was taught as an academic subject at the university by Oskar Kaul from 1922 to 1945. A chair was not established until 1960, the first holder being Georg Reichert. Composers active in Würzburg include Berthold Hummel (*b* 1925), Klaus Hinrich Stahmer (*b* 1941) and Heinz Winbeck (*b* 1946).

MARTIN JUST/FROHMUT DANGEL-HOFMANN

Würzburg [Würzburc], **Konrad von.** *See* KONRAD VON WÜRZBURG.

Wurzel, G. Friedrich. Pseudonym of GEORGE FREDERICK ROOT.

Wüst [Wiest, Wiestius; Obscoenus], **Paul** [Paulus] (*b* Swabia or Alemannia, between 1470 and 1475; *d c*1540). Swiss composer. He was a travelling minstrel ('ioculator egregius') until about 1510. He was offered the position of court jester to the Count of Württemberg, but declined it. Later he probably lived in Augsburg and Basle. From about 1520 he was a headmaster in Kaysersberg, north-west of Colmar, Alsace. From there he corresponded with Swiss humanist circles, in particular with Joachim Vadian, the Amerbach brothers and Glarean.

Apart from a Latin psalm motet and two sacred two-voice songs, 22 secular German songs for four and five voices have survived; ten are contained in *CH-Bu* F X 1–4, compiled in 1523–5 for the Amerbach family. Of these songs, a cycle of four four-voice arrangements of the folksong *Elslein, liebstes Elselein* is particularly interesting; the melody appears in a different voice in each version, and the phrases already show a strong tendency towards homophony. A psalm motet for five voices and other songs are lost.

WORKS

Beatus qui intelligit, 4vv, 1538[6]; Curia pauperibus, 2vv, 1549[16]; Pleni sunt caeli, 2vv, 1547[1], ed. in MSD, vi (1965)
22 songs, 4–5vv, 1535[10], 1536[8], *CH-Bu* F X 1–4; 10 ed. H.J. Moser, *65 deutsche Lieder … nach dem Liederbuch von Peter Schöffer und Mathias Apiarius* (Wiesbaden, 1967)

FRANZ KRAUTWURST

Wüthrich(-Mathez), Hans (*b* Aeschi, Berne, 3 Aug 1937). Swiss composer. He studied with Sava Savoff (piano) and Sándor Veress (theory) at the Berne Conservatory (diploma 1962) and with Klaus Huber (composition) at the Musik-Akademie der Stadt Basel (1968–72). He also studied linguistics, philosophy and musicology at Zürich University (doctorate 1973). He has taught at Zürich and Basle universities (1971–85) and at the Winterthur Conservatory (from 1985). In 1974 he founded Mixt Media Basel, an ensemble specializing in experimental music-theatre works. His honours include first prize in the Zürich composition competition (1972), distinctions from the International Composers Seminars, Boswil (1974, 1976, 1978), the Paul Gildson prize of the Communauté radiophonique des programmes de la langue française (1984) and the Anerkennungspreis Kultur of the canton of Basel-Landschaft (1991).
